**LABOR AND EQUIPMENT
MARKET PRICE LISTS FOR
THE UNIT PRICES FOR CONSTRUCTION
WORKS**

2019

GENERAL PROVISIONS AND EXPLANATIONS FOR MARKET PRICES

1- Prepared as per Article 97, Paragraph 1, Point (k) regarding the Organization and Duties of Our Ministry of the Presidential Decree no. 1 on the Organization of the President's Office.

2- In case of a later change in the market price standards applied, the latest versions of the standards in effect shall apply. Furthermore, they have to be supplied to the market securely in compliance with the latest legislation in effect.

3- The materials and products in this list shall be used in compliance with the relevant legislations of Environment, Health, Occupational Safety, Fire, Structural Materials and similar other legislation. If the list does not refer to the relevant legislation or if there are hesitations as to the referred legislation, the legislation in effect shall be applicable.

4- The unit prices published and updated on an annual basis by our Ministry shall be taken as basis as per the following statement in the article 17, paragraph 9 of the Law No. 6446 on the Electricity Market:

As per the provision "Unit prices for ground destruction which may arise from the infrastructure works shall not exceed the unit prices published by the Ministry of Environment and Urbanization," unit prices updated and published every year by our Ministry shall apply in determining the cost of ground destruction. Nevertheless, if the unit prices to be taken into consideration are not available in the unit price lists of our Ministry, the unit prices of the General Directorate of Highways, the General Directorate of İlbank A.Ş. and the General Directorate of State Hydraulic Works shall be taken as basis in the order of priority mentioned herein.

5- The Unit Prices of our Ministry shall be effective from 1 January 2019, and the administrations shall update the prices for preparing an approximate cost in accordance with the "TÜİK Table of Construction Cost Index and Rates of Change" as specified in the paragraph 11/3 of the Regulation on Application of the Tenders for Construction Works.

6- In case there are printer's and material errors in those lists, the latest values as may be corrected by the Ministry of Environment and Urbanism shall be taken as basis, and the amendments made accordingly shall be published in the page of the Directorate of Technical Board on www.csb.gov.tr or directly on <https://yfk.csb.gov.tr/>.

7- Market prices with more recent item numbers, if any, shall be used for the market prices with amended item numbers in market price lists.

8- The values given in such lists do not include VAT and the contractor's overheads and profit.

(Effective 1 January 2019.)

Market Prices for Labor

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
	LABOR		
10.100.1001	Master stonemason	h	15,70
10.100.1002	Master floor tiler	h	15,70
10.100.1003	Master floor-and-wall tiler	h	15,70
10.100.1004	Master ceramic tiler	h	15,70
10.100.1005	Master marble tiler	h	15,70
10.100.1006	Master marble cutter	h	15,70
10.100.1007	Master mosaic tiler	h	15,70
10.100.1008	Master joiner	h	15,70
10.100.1009	Master carpenter	h	15,70
10.100.1010	Master of insulation	h	15,70
10.100.1011	Blaster (Blasting expert)	h	15,70
10.100.1012	Master plasterer	h	15,70
10.100.1013	Master bricklayer	h	15,70
10.100.1014	Master paver	h	15,70
10.100.1015	Concrete master	h	15,70
10.100.1016	Roof tiler	h	15,70
10.100.1017	Master builder	h	15,70
10.100.1018	Master blacksmith	h	15,70
10.100.1019	Master steel fixer	h	15,70
10.100.1020	Plasterboard master	h	15,70
10.100.1021	Master welder	h	15,70
10.100.1022	Master glazer	h	15,70
10.100.1023	Master painter	h	15,70
10.100.1024	Master whitewasher	h	15,70
10.100.1025	Master upholsterer	h	15,70
10.100.1026	Master tinsmith	h	15,70
10.100.1027	Master turner	h	15,70
10.100.1028	Master linoleum layer	h	15,70
10.100.1029	Master varnisher	h	15,70
10.100.1030	Timberman (does shoring work)	h	15,70
10.100.1031	Master coppersmith	h	15,70
10.100.1032	Master aluminum worker	h	15,70
10.100.1033	Gypsum board master	h	15,70
10.100.1034	Gypsum block master	h	15,70
10.100.1035	Scaffolding Construction Worker	h	15,70
10.100.1036	Panel Roofer	h	15,70
10.100.1037	Concrete Pump Operator	h	18,50
10.100.1038	Gypsum board master's helper	h	11,70
10.100.1039	Master mosaic tiler's helper	h	11,70
10.100.1040	Gypsum block master's helper	h	11,70
10.100.1041	Master carpenter's helper	h	11,70
10.100.1042	Master of insulation's helper	h	11,70
10.100.1043	Plasterboard master's helper	h	11,70
10.100.1044	Master plasterer's helper	h	11,70
10.100.1045	Master bricklayer's helper	h	11,70
10.100.1046	Master blacksmith's helper	h	11,70

Market Prices for Labor

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
10.100.1047	Master steel fixer's helper	h	11,70
10.100.1048	Master varnisher's helper	h	11,70
10.100.1049	Master pipefitter's assistant	h	11,70
10.100.1050	Master pipefitter	h	15,70
10.100.1051	Driver	h	16,00
10.100.1052	Heavy truck driver	h	18,15
10.100.1053	Chief machinist repairman	h	23,10
10.100.1054	Machinist	h	16,00
10.100.1055	Machine operator	h	18,45
10.100.1056	Assistant machinist	h	12,85
10.100.1057	Assistant operator	h	15,10
10.100.1058	Assistant driver	h	12,40
10.100.1059	Greaser	h	11,70
10.100.1060	Foreman	h	23,10
10.100.1061	Surveyor	h	17,15
10.100.1062	Unskilled worker (Construction worker)	h	11,50
10.100.1063	Expert laborer	h	12,25
10.100.1064	Apprentice	h	11,50
10.100.1065	Overseer	h	11,70
10.100.1066	Tinsmith's helper	h	11,70
10.100.1067	Tunnel timberman	h	15,35
10.100.1068	First class master	h	15,70
10.100.1069	First class master's helper	h	11,70
10.100.1070	Second class master	h	14,85
10.100.1071	Second class master's helper	h	11,55
10.100.1072	Pulverizer operator	h	13,85
10.100.1073	Shotcrete (applies concrete by a lance)	h	13,85
10.100.1074	Master gardener and sapling expert	h	13,85
10.100.1075	Runway concrete pavement master (for airport construction)	h	15,70
10.100.1076	Chief driller	h	19,60
10.100.1077	Driller	h	19,10
10.100.1078	Pump technician	h	18,45
10.100.1079	Cook	h	17,00
10.100.1080	Assistant cook	h	14,85
10.100.1081	Master electrician	h	15,70
10.100.1082	Master installer	h	15,70
10.100.1083	Master electrician's helper	h	11,70
10.100.1084	Master installer's helper	h	11,70
10.100.1085	Tower crane operator	h	24,60
	PORT CONSTRUCTION (EXCLUDING ALL BUILDING CONSTRUCTION)		
10.100.1501	Dredger captain (close route captain)	h	27,30
10.100.1502	Dredger chief machinist	h	23,40
10.100.1503	Dredging expert	h	31,90
10.100.1504	Tugboat captain (Tugboat skipper)	h	21,30
10.100.1505	Tugboat machinist (Engineer)	h	21,30
10.100.1506	Self-propelled stone and mud collection barge captain (Port captain)	h	21,30

Market Prices for Labor

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
10.100.1507	Self-propelled stone and mud collection barge machinist (Engineer)	h	20,00
10.100.1508	Floating crane operator	h	20,00
10.100.1509	Dredger mate (Tugboat skipper)	h	20,00
10.100.1510	Dredger second machinist (Engineer)	h	22,90
10.100.1511	Boatswain	h	15,30
10.100.1512	Donkeyman	h	15,30
10.100.1513	Able seaman	h	14,50
10.100.1514	Ship greaser	h	14,50
10.100.1515	Diver's guide	h	14,50
10.100.1516	Chief cook	h	14,50
10.100.1517	Ship stoker	h	14,50
10.100.1518	Steward	h	13,15
10.100.1519	Sailor (Crew)	h	13,15
10.100.1520	Ship cleaner	h	13,15
10.100.1521	Ship assistant cook	h	13,15
10.100.1522	Diver	h	36,60

Market Prices for Vehicles

ITEM NO	DESCRIPTION	MARKET PRICE (TRY)
	VEHICLES	
10.110.1001	Road carriage composed of three horses or mules (or five donkeys) and a driver (Daily) TRY	100,00
10.110.1002	Carriage coefficient for carts drawn by any kind of animal	60,00
10.110.1003	Motor vehicle carriage coefficient K for any type and tonnage	330,00

Market Prices for Construction Machinery and Vehicles

ITEM NO	DESCRIPTION	MARKET PRICE (TRY)
	CONSTRUCTION PLANT AND TOOLS	
10.120.1001	Excavators and dragline machines, 100 HP (1 yd³)	325.000,00
10.120.1002	Excavators and dragline machines, 140 HP (11/2 yd³)	435.000,00
10.120.1003	Excavators and dragline machines, 170 HP (2 yd³)	475.000,00
10.120.1004	Excavators with palette, 210 HP (21/2 yd³)	600.000,00
10.120.1005	Crawler excavator (210 HP) (maximum 2.5 m³)	600.000,00
10.120.1006	Excavators and dragline machines, 260 HP (3 yd³)	690.000,00
10.120.1007	Excavator (crawler) (260 HP) (max. 2.5 m³)	690.000,00
10.120.1008	Excavator backhoe, approximately 125 HP (3/4 - 15/8 yd³)	445.000,00
10.120.1009	Excavators with palette (300 HP) (max. 3.5 m³)	825.000,00
10.120.1010	Tractor-Scraper (TD 20 or equivalent 111 HP+ Wagon bucket 8 yd³)	245.000,00
10.120.1011	Tractor ripper (TD25 or equivalent, 185HP+ Ripper)	540.000,00
10.120.1012	Motor grader (Engine power higher than 80 HP, approximately 9 tons)	250.000,00
10.120.1013	Grader (190-209 HP)	760.000,00
10.120.1014	Grader (210-230 HP)	870.000,00
10.120.1015	Wheel tractor-scraper (approximately HP 24 yd³)	1.000.000,00
10.120.1016	Tractor bulldozer (70-HP engine + blade)	170.000,00
10.120.1017	Tractor bulldozer (100-HP engine + blade)	210.000,00
10.120.1018	Tractor bulldozer (160-HP engine + blade)	280.000,00
10.120.1019	Tractor bulldozer (TD 25 or equivalent, 185 HP + blade)	450.000,00
10.120.1020	Tractor bulldozer (285-HP engine + blade)	910.000,00
10.120.1021	Tractor bulldozer (345-HP engine + blade)	1.000.000,00
10.120.1022	Steam- or compressor-powered pile driver in complete form, coupled-automatic and with all accessories included (Approximately 50 HP engine power, 6-ton hammer, able to drive backward with 1/4 inclination, and forward with 1/10 inclination)	620.000,00
10.120.1023	Compressor (210-Cfm compressor + hose and guns)	62.000,00
10.120.1024	Ventilation machine (including 210-Cfm compressor + ventilation pipes and accessories)	70.000,00
10.120.1025	Compressor (250 HP)	215.000,00
10.120.1026	Grouting machine (210-Cfm compressor + injection pipes + supply tank)	71.000,00
10.120.1027	Compressor (250 Cfm + pneumatic pile driver + pneumatic drill + pneumatic nutrunner group + pickup or light duty truck)	87.000,00
10.120.1028	Grouting machine (with approximately 75 HP, 250 cfm capacity, injection pipes, supply tank)	15.000,00
10.120.1029	Excavator loader (100 HP) (maximum 2.5 m³)	285.000,00
10.120.1030	Loader (11/2 yd³ or 5500 lbs load carrying capacity, equivalent to approximately 80 HP, wheel)	165.000,00
10.120.1031	Loader (wheel) (100 HP) (maximum 2 m³)	230.000,00
10.120.1032	Loader (traxcavator) (1½ yd³ approximately 56 HP) (Crawler)	340.000,00
10.120.1033	Concrete mixer (approximately 250 liters including engine)	11.000,00
10.120.1034	Concrete mixer (approximately 500 liters including engine)	11.000,00
10.120.1035	Concrete mixer (approximately 1000 liters including engine)	32.000,00

Market Prices for Construction Machinery and Vehicles

ITEM NO	DESCRIPTION	MARKET PRICE (TRY)
10.120.1036	Concrete mixer (approximately 1000 liters including engine, semi-automatic)	33.000,00
10.120.1037	Mosaic floor grinding machine (Gasoline-powered)	4.400,00
10.120.1038	Road line remover machine (7.5 HP, bicycle type)	45.000,00
10.120.1039	Sandblasting machine complete with all accessories	8.000,00
10.120.1040	Concrete vibrator (4 HP)	8.000,00
10.120.1041	Vibrator completely operating with a compressor	25.000,00
10.120.1042	Rock crusher (120 to 150 m³/h - 215 HP)	780.000,00
10.120.1043	Sieving machine (Approximately 70 HP, 3 or 4 stages, 100 m³/h capacity, vibrated, drawn type)	63.000,00
10.120.1044	Sieving machine, 70 HP, 100 m³/h	63.000,00
10.120.1045	Elevator, approximately 15 HP, 10 to 18 m length and 60 cm belt width	13.500,00
10.120.1046	Elevator, approximately 25 HP, 18 to 24 m length and 60 cm belt width	30.000,00
	Approximately 50 MSS (total pumping head as meter) vertical-shaft deep well pumps with a dish, column group, threaded head and diesel engine	
10.120.1047	Ø: 0 to 10 lt/sec (including 10)	11.250,00
10.120.1048	Ø: 10 to 20 lt/sec (including 20)	15.000,00
10.120.1049	Ø: 20 to 40 lt/sec (including 40)	18.500,00
10.120.1050	Ø: 40 to 80 lt/sec (including 80)	34.250,00
	Note: The price shall be raised by 20 percent for each extra 10 m of MSS.	
10.120.1051	Water pump (5 PS power, approximately 50 mm in diameter)	1.400,00
10.120.1052	Water pump (10 HP)	2.150,00
10.120.1053	Water pump (15 PS power, approximately 100 mm in diameter)	3.300,00
10.120.1054	Water pump (20 PS power, approximately 125 mm in diameter)	5.600,00
10.120.1055	Water pump (30 PS power, approximately 135 mm in diameter)	11.250,00
10.120.1056	Water pump (45 PS power, approximately 150 mm in diameter)	15.750,00
10.120.1057	Water pump (60 PS power, approximately 200 mm in diameter)	18.500,00
10.120.1058	Mobile Concrete Pump (420 HP)	1.550.000,00
10.120.1059	Water Truck (with 5-ton water tank)	35.000,00
10.120.1060	Water Truck (Pick-up)	20.500,00
10.120.1061	Dump Truck (120 HP, 7-ton capacity)	82.500,00
10.120.1062	Plunger water pumps with engine	7.500,00
10.120.1063	Any type of (vibration impact) motor compactor (Approximately 400 kg static weight, 9 HP)	6.750,00
10.120.1064	Vibratory roller (Vibratory roller with 4 to 5-ton (inclusive) static weight and 8 to 9-ton dynamic power + crawler tractor with approximately 35 to 58 HP)	128.000,00
10.120.1065	Vibratory roller (Roller with 4 to 5-ton (inclusive) static weight and 8 to 9-ton dynamic power + crawler tractor with approximately 41 to 56 HP)	145.000,00
10.120.1066	Vibratory roller (Roller with 5 to 6-ton (inclusive) static weight and 10 to 12-ton dynamic power + crawler tractor with approximately 45 to 61 HP)	155.000,00
10.120.1067	Vibratory roller (Roller with 6 to 7-ton (including 7 tons) static weight and 12 to 14-ton dynamic power + crawler tractor with approximately 50 to 60 HP)	240.000,00

Market Prices for Construction Machinery and Vehicles

ITEM NO	DESCRIPTION	MARKET PRICE (TRY)
10.120.1068	Vibratory roller (Roller with 7 to 9-ton (including 9 tons) static weight and 14 to 18-ton dynamic power + crawler tractor with approximately 56 to 76 HP)	260.000,00
10.120.1069	Vibratory roller (Roller with 9 to 11-ton (including 11 tons) static weight and 18 to 22-ton dynamic power + crawler tractor with approximately 66 to 86 HP)	340.000,00
10.120.1070	Vibratory roller (Roller with 11 to 13-ton (including 13 tons) static weight and 22 to 26-ton dynamic power + crawler tractor with approximately 76 to 96 HP)	360.000,00
10.120.1071	Vibratory roller (Roller with 13 to 15-ton (including 15 tons) static weight and 26 to 30-ton dynamic power + crawler tractor with approximately 90 to 110 HP)	390.000,00
10.120.1072	Complete pad foot roller (Total weight of 40-HP crawler tractor and drums shall be 4000 kg with 2-drum pad foot where each drum is min. 1.20-m long)	100.000,00
10.120.1073	Steel-drum roller (8 to 10 tons (including 10 tons), 2 or 3 wheels) (40 HP)	102.000,00
10.120.1074	Steel-drum roller (10 to 14 tons (including 14 tons), 2 or 3 wheels) (60 HP)	125.000,00
10.120.1075	Wheel roller (7 to 8 tons (inclusive) with tractor) (40 HP)	102.000,00
10.120.1076	Drawn-type, wheel roller (8 to 10 tons (inclusive), without tractor)	42.000,00
10.120.1077	Wheel roller (self-moving) (60 to 80 HP, 21-ton static weight)	133.000,00
10.120.1078	Wheel roller (self-moving) (80 to 100 HP, 35-ton static weight)	185.000,00
10.120.1079	Wheel tractor (Approximately 45 HP, with plow and discs)	22.500,00
10.120.1080	Wheel tractor (Approximately 80 to 100 HP)	41.000,00
10.120.1081	Aggregate silo (4 cells, 100 t/h work rate)	25.000,00
10.120.1082	Aggregate silo (4 cells, 50 t/h work rate)	16.000,00
10.120.1083	Cement silo (with approximately 80 to 100 m³ air system)	20.500,00
10.120.1084	Small sieving plant (40 t/h capacity) (30 HP)	105.000,00
10.120.1085	Mineral filler feeder (Diesel-powered)	12.000,00
10.120.1086	Large sieving plant (100 t/h capacity)	230.000,00
10.120.1087	Trailer distributor (500 US gallons)	24.000,00
10.120.1088	Distributor (installed on a 1500-US gallon truck)	76.000,00
10.120.1089	Small asphalt drying machine (Plant with approximately 60-80 HP, 40 t/h capacity)	108.000,00
10.120.1090	Large asphalt drying machine (Plant with approximately 100-120 HP, 100 t/h capacity)	307.000,00
10.120.1091	Asphalt tank (with 40-ton heating system)	10.500,00
10.120.1092	40-m³ fixed water tank	7.200,00
10.120.1093	Sweeping machine (9-feet, non-motorized, drawn type, rotating drum)	7.200,00
10.120.1094	Vacuum sweeping machine (Approximately 130 HP + 81 HP)	290.000,00
10.120.1095	Thermoplastic road line marking machine and heater (Approximately 151 HP)	510.000,00
10.120.1096	Cold road line marking machine (Approximately 168 HP)	410.000,00

Market Prices for Construction Machinery and Vehicles

ITEM NO	DESCRIPTION	MARKET PRICE (TRY)
10.120.1097	Thermoplastic paint preheater (175 HP, truck-mounted, and equipped with a heating and stirring systems)	380.000,00
10.120.1098	Stone chip spreader (12-feet, non-motorized, drawn type, equipped with a spreader roller)	8.500,00
10.120.1099	Road mixer (Approximately 100 HP and 50 m³/h capacity)	112.000,00
10.120.1100	Pulvimixer (Approximately 50 HP and 25 m³/h capacity, drawn type)	23.900,00
10.120.1101	Pull behind type mixer (Approximately 22 HP and 5 t/h capacity)	23.900,00
10.120.1102	Hot type small mixer (Approximately 60 to 80 HP and 40 t/h capacity)	73.750,00
10.120.1103	Heating and stirring machine for preparing mastic asphalt (with 1-ton/hour capacity)	30.750,00
10.120.1104	Concrete/Asphalt curbing machine (10 to 15 HP)	50.000,00
10.120.1105	Concrete/Asphalt curbing machine (20 to 30 HP)	150.000,00
10.120.1106	Large hot mixer (Approximately 100 t/h capacity)	270.000,00
10.120.1107	Stabilization mixer (100 to 200-ton/hour capacity, 80 to 120-HP)	78.750,00
10.120.1108	Equipped with a mixer machine (15 HP) (for circulation sludge)	2.300,00
10.120.1109	Equipped with a mixer machine (75 HP) (for circulation sludge)	4.500,00
10.120.1110	Small finisher (Approximately 30 to 50 HP and 100 t/h capacity) (Asphalt)	93.000,00
10.120.1111	Large finisher (Approximately 80 to 100 HP and 200 t/h capacity) (Asphalt)	195.000,00
10.120.1112	Asphalt finisher with electronic sensors (Approximately 60 to 100 HP, 300-ton/hour capacity, 5 to 10-m³ reservoir)	282.000,00
10.120.1113	Concrete finisher with approximately 70 HP and 50 m³/h capacity	560.000,00
10.120.1114	Slip Form Channel Concrete Pavement Machine (50 m³/h capacity and 130 HP power)	1.700.000,00
10.120.1115	Aggregate spreading machine (Approximately 23 HP and 25 m³/h capacity)	24.250,00
10.120.1116	Mechanical aggregate spreader (Bulldozer-drawn, with 3 to 4-meter spreading width)	9.000,00
10.120.1117	Vapor generator (Approximately 30-HP, and with hoses that can heat 3 x 40-ton tanks in parallel)	37.000,00
10.120.1118	Asphalt pump (Approximately 25 HP, 50 ton/hour capacity, with 2 to 3-inch (including 3) hoses)	7.800,00
10.120.1119	Asphalt pump (Approximately 50 HP, 100 ton/h capacity, with 2 to 6-inch including hoses)	10.000,00
10.120.1120	Pull behind spreader box (0.50 m² windrow section)	3.000,00
10.120.1121	Aggregate washing plant (Approximately 30 HP, 25 m³/h capacity)	23.900,00
10.120.1122	Bored pile rig (200 HP)	1.000.000,00

Market Prices for Construction Machinery and Vehicles

ITEM NO	DESCRIPTION	MARKET PRICE (TRY)
10.120.1123	Bored pile rig (300 HP)	3.100.000,00
10.120.1124	Bored pile rig (440 HP)	3.800.000,00
10.120.1125	Scraper: Equipped with a 70-HP engine, for plants with approximately 8 yd ³ scraper wagons.	410.000,00
10.120.1126	Automatic concrete plant, 1000 L capacity, 50 m ³ /h (including radial scraper, star silo, aggregate scale, forced concrete mixer loading bucket, forced concrete mixer + cement scale, water meter, pressure air equipment, maintenance platform, control cabinet, control panel, carrier structure, cement silo, cement conveyor)	230.000,00
10.120.1127	Prefabricated concrete paving block plant, overhead filling silo with 75 m ² capacity, vibrating plate, 62 kW total engine power, molding, etc.	1.300.000,00
10.120.1128	Asphalt scraper machine (with 400 HP, max. 2.05 m milling width, 0.15 m milling depth, and conveyor)	1.820.000,00
10.120.1129	Concrete pipe moving machine (at factory)	116.000,00
10.120.1130	Concrete pipe production machine	325.000,00
	Rotary type water drilling machines (with equipment)	
10.120.1131	100 to 200 m drilling capacity	270.000,00
10.120.1132	400 to 500 m drilling capacity	650.000,00
10.120.1133	750 m drilling capacity	700.000,00
	Rotary type foundation drilling machines (with equipment)	
10.120.1134	40 to 100 m drilling capacity	90.000,00
10.120.1135	200 to 250 m drilling capacity	125.000,00
10.120.1136	300 to 350 m drilling capacity	155.000,00
10.120.1137	500 m drilling capacity	175.000,00
10.120.1138	700 m drilling capacity	197.000,00
10.120.1139	960 m drilling capacity	242.000,00
10.120.1140	BPE 80 m and similar concrete pump with rotor system	550.000,00
10.120.1141	Drilling machine with hammering capability (100 to 150 m drilling capacity with the equipment) any diameter	165.000,00
10.120.1142	25 to 30 HP complete welding machine	16.800,00
10.120.1143	Power generator (min. 5 kW)	3.400,00
10.120.1144	Dredging rock barge for stone with hinged lid (Non-motorized, 125-ton, water line: 1.85 m)	127.000,00
10.120.1145	Dredging rock barge for stone with hinged lid (Non-motorized, 400-ton, water line: 2.5 m)	285.000,00
10.120.1146	Tilting sand barge (Non-motorized, 300-ton, water line: 2.2 m)	285.000,00
10.120.1147	Dredging rock barge for sand with hinged lid (Non-motorized, 300 m ³ , water line: 2 m)	285.000,00
10.120.1148	Dredging sand barge with opening in the middle (Approximately 2 x 255 HP, motorized, 500-m ³ , water line: 3.40 M)	1.100.000,00
10.120.1149	Non-motorized lighter (180-ton, hoisting capacity: 5 tons, water line: 1 M)	550.000,00
10.120.1150	Diesel engine trailer (Approximately 116 HP, water line: 0.85 M)	215.000,00
10.120.1151	Diesel engine trailer (Approximately 240 HP, water line: 1.75 M)	485.000,00
10.120.1152	Diesel engine trailer (Approximately 310 HP, water line: 2 M)	510.000,00

Market Prices for Construction Machinery and Vehicles

ITEM NO	DESCRIPTION	MARKET PRICE (TRY)
10.120.1153	Diesel engine trailer (Approximately 525 HP, water line: 1.8 M)	1.250.000,00
10.120.1154	Diesel engine trailer (Approximately 2 x 300 HP, water line: 2.60 M)	1.360.000,00
10.120.1155	Coal-powered floating crane (Derrick) (60-ton, 1080 tons x M, max. 24 m guide rope, hoisting height: min. 16, max. 29 m)	1.250.000,00
10.120.1156	Manual lawnmower	238,00
10.120.1157	Motorized lawnmower	1.625,00
10.120.1158	Walking tractor for garden (11 HP)	7.875,00
10.120.1159	Garden tractor (35 HP)	15.750,00
10.120.1160	10-liter lever-operated knapsack sprayer	163,00
10.120.1161	10-liter motorized knapsack sprayer	925,00
10.120.1162	100-liter, hand-drawn, motorized sprayer	2.400,00
10.120.1163	250-liter, vehicle-drawn, motorized sprayer	4.000,00
10.120.1164	560-liter, vehicle-drawn, motorized sprayer	6.800,00
10.120.1165	1200-liter, motorized mobile sprayer	22.250,00
10.120.1166	2200-liter, vehicle-carried, hydraulic, motorized sprayer	17.000,00
	Note: Market prices of the Sprayers with other capacities in the items 10.120.1160 - 1161 - 1162 - 1163 - 1164 - 1165 - 1166 shall be interpolated.	
10.120.1167	Pressuremeter	51.000,00
10.120.1168	Pressuremeter probe (support)	2.740,00
10.120.1169	Pressuremeter probe rubber	300,00
10.120.1170	Special hose for pressuremeter	2.740,00
10.120.1171	Slotted tube for pressuremeter (Slotted driving pipe)	1.870,00
10.120.1172	Geophysical resistivity instrument	59.000,00
10.120.1173	Geophysical logging instrument	142.000,00
10.120.1174	Geophysical Seismic Reaction Instrument	170.000,00
10.120.1175	Crane (Truck-mounted)	57.500,00
10.120.1176	Gantry Crane (60 tons)	171.000,00
10.120.1177	Diesel-electric cutting-suction dredge vessel (Approximately 400 m³/h capacity, max. 16 m dredging depth, able to pump dredged materials to 800 m away or 6 m high)	9.750.000,00
10.120.1178	Lift and force refueler (215 HP) (For ongoing works)	530.000,00
10.120.1179	Grab bucket amphibious excavator (Approximately 180 HP, 3 yd³, able to move 4.5 tons 18 meters, max. lifting capacity as a crane: 15 tons)	930.000,00
10.120.1180	Amphibious excavator with reverse bucket (Backhoe) (About 225 HP, 3 m³ bucket capacity, max. extension range: 9 m, max. excavating depth: 8.5 m)	1.875.000,00
10.120.1181	Pontoon (100-ton crane barge) (For ongoing works)	93.750,00
10.120.1182	Diver boat (Including a compressor, diver suit, hoses and accessories)	68.750,00
10.120.1183	Car trailer (Approximately 300 HP)	247.000,00
10.120.1184	Flume factory (2 m³/h capacity of prefabricated concrete)	2.000.000,00

Market Prices for Construction Machinery and Vehicles

ITEM NO	DESCRIPTION	MARKET PRICE (TRY)
10.120.1185	Ø150 - Ø800 mm steam-cured concrete and reinforced concrete pipe manufacturing plant (including all equipment)	2.450.000,00
10.120.1186	Ø900 - Ø1200 mm steam-cured concrete and reinforced concrete pipe manufacturing plant (including all equipment)	3.680.000,00
10.120.1187	Ø1400 - Ø1600 mm steam-cured concrete and reinforced concrete pipe manufacturing plant (including all equipment)	5.600.000,00
10.120.1188	Ø1800 - Ø2000 mm steam-cured concrete and reinforced concrete pipe manufacturing plant (including all equipment)	8.000.000,00
10.120.1189	Ø2200 - Ø2600 mm steam-cured concrete and reinforced concrete pipe manufacturing plant (including all equipment)	9.000.000,00
10.120.1190	Ø2800 - Ø3000 mm steam-cured concrete and reinforced concrete pipe manufacturing plant (including all equipment)	11.000.000,00
10.120.1191	Prefabricated inspection chamber manufacturing plant (including all equipment)	79.500,00
10.120.1192	Aluminum joinery workshop	290.000,00
10.120.1193	Plastic joinery workshop	270.000,00
10.120.1194	Iron joinery workshop	410.000,00
10.120.1195	Tunnel formwork workshop	410.000,00
10.120.1196	Woodwork shop	470.000,00
10.120.1197	Workshop for scaffolds made of prefabricated components (steel and aluminum)	290.000,00
10.120.1198	Mass Concrete Cooler/Heater (Complete System including a Compressor, Pump, Pipes and Valves) (12 Delivery and 12 Return Lines, Able to Generate Water at Desired Flow Rate and Temperature, and Generate Reports), 130 kW power	375.000,00
10.120.1199	Mass Concrete Cooler/Heater (Complete System including a Compressor, Pump, Pipes and Valves) (12 Delivery and 12 Return Lines, Able to Generate Water at Desired Flow Rate and Temperature, and Generate Reports), 200 kW power	500.000,00
10.120.1200	Coal-powered dredging vessel with bucket (500-liter bucket volume, approximately 350 m³/h dredging capacity, able to dredge at 7 to 20-meter depth)	10.000.000,00
10.120.1201	Fuel-oil-powered sand dredger vessel (Approximately 600 m³/h capacity, max. 15 m suction depth, able to absorb sand with 1.5 to 4 mm grain diameter, storage volume: 600 m³)	6.200.000,00
10.120.1202	6-meter-long, pressure-resistant hose, 4 inches in diameter (Used for cement stabilization and similar other works as well as pumping cement to the silo.)	168,00
10.120.1203	Joint Cutting Machine (Maximum cutting depth: 160 mm, power: 12 HP) (Complete with a cutter, water tank, etc.)	11.600,00
10.120.1204	Helicopter trowel (9 HP) (Complete with a tray, 4 blades, etc.)	6.270,00
10.120.1205	Seamless Groove Machine, 1.5 HP, 1400 rpm, 220 V (12 m/min production speed)	20.500,00
10.120.1206	Welding machine (Approximately 300 amps)	3.680,00
10.120.1207	Spreader (400 m³/day) (for airport construction)	290.000,00
10.120.1208	Diesel-electric bucket dredger (500-liter bucket volume, approximately 300 m³/h dredging capacity, able to dredge at 7 to 20-meter depth)	10.000.000,00
10.120.1209	Diesel-electric bucket dredger (250-liter bucket volume, approximately 150 m³/h dredging capacity, able to dredge at 6.5 to 16-meter depth)	6.200.000,00
10.120.1210	Diesel-electric bucket dredger (750-liter bucket volume, approximately 500 m³/h dredging capacity, able to dredge at 10 to 22-meter depth)	12.500.000,00

Market Prices for Construction Machinery and Vehicles

ITEM NO	DESCRIPTION	MARKET PRICE (TRY)
	Floor Stabilization System Machines	
	Deep Mixing Method Machines	
10.120.1211	Complete system including an Excavator (280 HP) + a Single-tank, Mobile Lime Silo (130 HP) + a Mixing Tip + a Compressor (60 HP)	4.900.000,00
10.120.1212	Complete system including an Excavator (280 HP) + a Double-tank, Mobile Lime Silo (130 HP) + a Mixing Tip + a Compressor (60 HP)	5.700.000,00
	Surface Stabilization Method Machines	
10.120.1213	Mixer Shredder (600 HP)	4.200.000,00
10.120.1214	Lime Spreader (250 HP)	1.400.000,00
10.120.1215	Turning lathe (7.5 KW)	36.750,00
10.120.1216	Premixed plaster machine (7.5 kW)	106.000,00
10.120.1217	Truck mixer (with a 120-HP truck and a cement mixer with 4-m³ useful volume and 56-HP drive motor mounted on the truck)	340.000,00
10.120.1218	Pull behind-type Concrete Pump (with a 75 HP, 50 m³/h capacity and concrete delivery pipes)	280.000,00
10.120.1219	Crane (130-HP, rubber-tire hydraulic crane with 8 to 25-meter boom length and 25-ton average hoist capacity)	1.200.000,00
10.120.1220	Crane (240-HP, rubber-tire mobile crane with 11 to 33.5-meter boom length and 55 to 60-ton average hoist capacity)	1.500.000,00
10.120.1221	Mobile crane (60 tons - 240 HP)	1.500.000,00
10.120.1222	Crane (270-HP, rubber-tire mobile crane with 16 to 36-meter boom length and 30-ton average hoist capacity)	1.350.000,00
10.120.1223	Crane (476-HP, rubber-tire mobile crane with 42 to 55-meter boom length and 80-ton average hoist capacity)	2.300.000,00
10.120.1224	Tower crane (height: 65 m, boom length: 65 m, max. capacity: 10 tons, traveling on rail) (TS ISO 4306-3)	1.700.000,00
10.120.1225	Blender	2.050,00
10.120.1226	Mobile air compressor (12 bars, 760 cfm)	490.000,00
10.120.1227	Crawler drilling rig (160 HP)	1.260.000,00
10.120.1228	Drilling rig with jet grouting equipment	2.900.000,00
10.120.1229	Pipe installing by microtunnelling machine (160 kW boring power, 160 tons, 218 HP, Ø400 to Ø1000)	3.400.000,00
10.120.1230	Pipe installing by microtunnelling machine (250 to 1200-ton driving power, 340-HP, Ø1000 mm to Ø2600 mm)	14.500.000,00
	Shotcrete machine	
10.120.1231	Theoretical dry mix spraying capacity: max. 10 m³/h	65.000,00
10.120.1232	Wet mix spraying shooting capacity: max. 30 m³/h	600.000,00
10.120.1233	Theoretical wet and dry mix spraying capacity: max. 20 m³/h	760.000,00
10.120.1234	Axial Fan (3 x 75 kW frequency converter fan + 1000-m fan tube)	380.000,00
	Tunnel Boring Machine (TBM)	
10.120.1235	TBM with max. 50 m² tunnel section, 2 x 75 kW electric motor power and electric hydraulic controller with two levers	1.850.000,00

Market Prices for Construction Machinery and Vehicles

ITEM NO	DESCRIPTION	MARKET PRICE (TRY)
10.120.1236	TBM with tunnel section above 50 m², 2 x 75 kW or up to 3 x 75 kW electric motor power and electric hydraulic controller with three levers	3.150.000,00
10.120.1237	Iron cutting and bending machine (including all accessories)	15.000,00
10.120.1238	Forklift (4 tons, 40 HP)	75.000,00
10.120.1239	Mobile crane (9 tons, 80 HP)	270.000,00
10.120.1240	Two-component insulation material dosage mixing machine (Complete system including spray guns, Hoses, Transfer Pumps, Electrical Panels, Compressors, Dryers, Any type of nozzle, etc.)	260.000,00
	DRILLS AND BITS	
10.120.1241	Vidya drill bit (Hard mineral)	13,00
10.120.1242	Vidya kron drill bit	185,00
10.120.1243	Diamond drill bits (carat percentage: 23)	500,00
10.120.1244	Drill (4 1/2 inches for drilling)	1.500,00
10.120.1245	Drill (9 7/8 inches for drilling)	6.000,00
10.120.1246	Drill (12 1/4 inches)	8.000,00
10.120.1247	Drill (15 inches)	9.750,00
10.120.1248	Drill (17 1/2 inches)	12.500,00

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
	PRINCIPAL CONSTRUCTION MATERIALS			
	AGGREGATES (TS 706 EN 12620+A1) (Loading, unloading and laying of sand, gravel and crushed stone are not included)			
10.130.1001	Gravel (coarse-grained aggregate that does not need to be screened)	m³	Warehouse	10,00
10.130.1002	Gravel (extracted from screened all-in aggregate materials, and washed)	m³	Warehouse	21,00
10.130.1003	Gravel (extracted from screened from all-in aggregate materials, washed, and prepared by mixing minimum two of its classes)	m³	Warehouse	24,00
10.130.1004	Sand (fine-grained aggregate that does not need to be screened)	m³	Warehouse	10,00
10.130.1005	Sand (extracted from screened all-in aggregate materials, and washed)	m³	Warehouse	21,00
10.130.1006	Sand (extracted from screened from all-in aggregate materials, washed, and prepared by mixing minimum two of its classes)	m³	Warehouse	24,00
10.130.1007	Fine sand for plaster or grout (screened and washed)	m³	Warehouse	27,00
10.130.1008	Crushed stone up to 32 mm	m³	Warehouse	36,00
10.130.1009	Crushed stone up to 63 mm (prepared by mixing minimum two classes)	m³	Warehouse	33,00
	Coarse aggregate			
10.130.1021	Gravel (Extracted from screened all-in aggregate materials, and washed) (machine-supplied) (19.100.2003) (price charged for 57% of the diesel fuel)	m³	Quarry	7,87
10.130.1022	Gravel (Extracted from screened all-in aggregate materials, and washed) (machine-supplied) (19.100.2004) (price charged for 57% of the diesel fuel)	m³	Quarry	19,59
10.130.1023	Gravel (extracted from screened from all-in aggregate, washed, and prepared by mixing minimum two of its classes) (Machine-supplied) (19.100.2006) (price charged for 57% of the diesel fuel)	m³	Quarry	21,90
	Fine aggregate			
10.130.1024	Sand (Fine-grained aggregate that does not need to be screened) (machine-supplied) (19.100.2003) (price charged for 57% of the diesel fuel)	m³	Quarry	7,87
10.130.1025	Sand (Extracted from screened all-in aggregate materials, and washed) (machine-supplied) (19.100.2004) (price charged for 57% of the diesel fuel)	m³	Quarry	19,59
10.130.1026	Sand (extracted from screened from all-in aggregate materials, washed, and prepared by mixing minimum two of its classes) (Machine-supplied) (19.100.2006) (price charged for 57% of the diesel fuel)	m³	Quarry	21,90
10.130.1027	Fine sand for plaster or grout (screened and washed) (machine-supplied) (19.100.2007) (price charged for 57% of the diesel fuel)	m³	Quarry	25,31
	Crushed stone			
10.130.1028	Crushed stone up to 63 mm (prepared by mixing minimum two classes) (19.100.2016)	m³	Quarry	31,12
10.130.1029	Crushed stone up to 32 mm (19.100.2017)	m³	Quarry	34,36
	Artificial Concrete Aggregates (TS 706 EN 12620+A1)			
10.130.1041	Iron cinder fine aggregate	m³	Warehouse	10,00
10.130.1042	Iron cinder coarse aggregate	m³	Warehouse	8,00
10.130.1043	Iron cinder mixed aggregate	m³	Warehouse	9,00
	Artificial Aggregate for Materials with Hydraulic Binder or without Binder Used for Road Building (TS EN 13242 + A1)			
10.130.1044	Iron cinder mixed aggregate	m³	Warehouse	12,00

10.130.1510	C 50/60 concrete mix	m³	On the job	198,00

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
	Note: The definition of regular plant-mixed concrete mixes in this list covers regular gray plant-mixed concrete mixes derived from any Portland and Pozzolanic Cement except Refractory Cement, White Cement, Sulphate-Resisting Cement, Boron Active Belite Cement. Excluding pump cost.			
	REGULAR WHITE PLANT-MIXED CONCRETE MIXES			
10.130.1521	C 8/10 white concrete mix	m³	On the job	196,00
10.130.1522	C 12/15 white concrete mix	m³	On the job	202,00
10.130.1523	C 16/20 white concrete mix	m³	On the job	214,00
10.130.1524	C 20/25 white concrete mix	m³	On the job	226,00
10.130.1525	C 25/30 white concrete mix	m³	On the job	238,00
10.130.1526	C 30/37 white concrete mix	m³	On the job	255,00
10.130.1527	C 35/40 white concrete mix	m³	On the job	273,00
10.130.1528	C 40/50 white concrete mix	m³	On the job	297,00
10.130.1529	C 45/55 white concrete mix	m³	On the job	315,00
10.130.1530	C 50/60 white concrete mix	m³	On the job	333,00
	Note: Regular white concrete mixes in this list cover regular white concrete mixes derived from White Concrete with minimum 85% whiteness in terms of its Y value under the CIE system as per TS EN 197-1 and TS 21. Excluding pump cost.			
	GRAY, PLANT-MIXED, LIGHT CONCRETE MIXES			
10.130.1541	LC 8/9 light concrete mix	m³	On the job	160,00
10.130.1542	C 12/13 light concrete mix	m³	On the job	172,00
10.130.1543	C 16/18 light concrete mix	m³	On the job	190,00
10.130.1544	C 20/22 light concrete mix	m³	On the job	208,00
	Note: The definition of light plant-mixed concrete mixes in this list covers lightweight, gray, plant-mixed concrete mixes derived from any Portland and Pozzolanic Cement except Refractory Cement, White Cement, Sulphate-Resisting Cement, Boron Active Belite Cement. Excluding pump cost.			
	PERMEABLE GRAY CONCRETE MIXES (Permeability Ratio: 15 to 35%)			
10.130.1561	Permeable concrete mix	m³	On the job	178,00
	Note: The definition of permeable, plant-mixed concrete mixes in this list covers permeable, gray, plant-mixed concrete mixes derived from any Portland and Pozzolanic Cement except Refractory Cement, White Cement, Sulphate-Resisting Cement, Boron Active Belite Cement.			
	CONCRETE REINFORCING BARS (TS 708)			
10.130.1701	Concrete reinforcing bar, plain, Ø6 mm (S220) (Iskenderun)	Kg	Factory	2,52
10.130.1702	Concrete reinforcing bar, plain, Ø8-Ø10-Ø12 mm (S220)	Kg	Factory	2,48
10.130.1703	Concrete reinforcing bar, plain, Ø14 to 50 mm (S220)	Kg	Factory	2,48
10.130.1704	Concrete reinforcing bar, ribbed, Ø8-12 mm (S420, B420B-C, B500B-C)	Kg	Factory	2,47
10.130.1705	Concrete reinforcing bar, ribbed, Ø14-32 mm (S420, B420B-C, B500B-C)	Kg	Factory	2,47
10.130.1706	Ø80-100 mm steel (DIN c 35)	Kg	On the job	5,60
10.130.1707	Flats (TS EN 10058)	Kg	Factory	3,05

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
10.130.1708	Hot-rolled profile irons (S235 JR) (I-U-T-Omega) (TS 910, TS 911 EN 10055, 912, TS 911 EN 10055)	Kg	Factory	3,13
10.130.1709	Hot-rolled brackets (S235 JR) (TS EN 10056-1, 2)	Kg	Factory	3,30
10.130.1710	Steel sheet pile profile	Tons	On the job	4.000,00
10.130.1711	Steel pig	Kg	Factory	2,07
	STEEL MESH			
10.130.1751	Steel mesh (Ribbed) (TS 4559) (weight per m ² : 3.01 - 10.00 kg)	Kg	Warehouse	2,85
10.130.1752	Steel mesh (Ribbed) (TS 4559) (weight per m ² : 1.50 - 3.00 kg)	Kg	Warehouse	2,90
10.130.1753	Steel mesh (Ribbed) (Flume mesh) (TS 4559)	Kg	Warehouse	2,95
10.130.1754	Factory-made B.A. beam iron (Thin-cell beam or a similar item)	Kg	Warehouse	3,05
	RIBBED CONCRETE REINFORCEMENT BARS MADE OF GLASS FIBER-REINFORCED POLYMER (TS 13816) (Cut and bent in any size as per the relevant project, and ready to be in its designated location)			
10.130.1771	Ø4 mm	Tons	On the job	30.000,00
10.130.1772	Ø6 mm	Tons	On the job	28.500,00
10.130.1773	Ø8 - 26 mm	Tons	On the job	26.500,00
	BRICKS			
	Horizontally perforated LD unit bricks (TS EN 771-1+A1) (length x width x height)			
10.130.2001	190 x 85 x 190-mm horizontally perforated brick	Qty	Factory	0,31
10.130.2002	190 x 135 x 190-mm horizontally perforated bricks	Qty	Factory	0,39
10.130.2003	250 x 100 x 200-mm horizontally perforated bricks	Qty	Factory	0,42
10.130.2004	200 x 100 x 200-mm horizontally perforated bricks	Qty	Factory	0,36
10.130.2005	250 x 120 x 200-mm horizontally perforated bricks	Qty	Factory	0,51
10.130.2006	250 x 120 x 250-mm horizontally perforated bricks	Qty	Factory	0,64
10.130.2007	235 x 240 x 185-mm horizontally perforated bricks	Qty	Factory	0,87
10.130.2008	290 x 240 x 185-mm horizontally perforated bricks	Qty	Factory	1,07

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
10.130.4205	Wall/manhole bottom strip (Polybutylene/vulcanized thermoplastic (TPV)-coated, aluminum-reinforced, self-adhesive, UV-resistant - 50/60-cm wide)	m	On the job	78,00
10.130.4206	Aluminum pressure bar (6 cm wide, every color)	m	On the job	7,10
10.130.4207	PVC-based, self-channeled, UV-resistant, vane-type groove/ inclined gutter water insulation (min. 50 cm wide - every color)	m	On the job	31,00
10.130.4208	Self-channeled, UV-resistant, vane-type groove/inclined gutter water insulation made of aluminum (min. 50 cm wide - every color)	m	On the job	24,00
10.130.4209	Pantile fixing apparatus	Qty	On the job	0,26
10.130.4210	Eaves Vent Combs	Qty	On the job	3,90
	WOODEN CONSTRUCTION SUPPLIES (Timber chopped in every size)			
10.130.4501	Pine wood (class I) (TS 1265) (TS EN 844-6, 9, 12) (TS EN 1309-1, TS EN 1310, TS EN 1311, TS EN 1313-1, 2)	m³	On the job	1.800,00
10.130.4502	Pine wood (class II) (TS 1265) (TS EN 844-6, 9, 12) (TS EN 1309-1, TS EN 1310, TS EN 1311, TS EN 1313-1, 2)	m³	On the job	1.050,00
10.130.4503	Structural round timber (Pine) (class II) (TS EN 1927-1, 2, 3, TS EN 1310)	m³	On the job	600,00
10.130.4504	White pine (Fir) (Class I) (TS EN 844-6, 9, 12) (TS EN 1309-1, TS EN 1310, TS EN 1311, TS EN 1313-1, 2)	m³	On the job	1.100,00
10.130.4505	White pine (Fir) (Class II) (TS EN 844-6, 9, 12) (TS EN 1309-1, TS EN 1310, TS EN 1311, TS EN 1313-1, 2)	m³	On the job	1.030,00
10.130.4506	Poplar wood (TS 1249 EN 975-2)	m³	On the job	630,00
10.130.4507	Oak wood (TS EN 975-1, TS EN 942)	m³	On the job	2.300,00
10.130.4508	Walnut wood	m³	On the job	2.800,00
10.130.4509	Beech wood (TS EN 975-1, TS EN 942)	m³	On the job	1.450,00
	Plywood mold materials (TS EN 636+A1)			
10.130.4601	Non-film-coated, 15 mm	m²	On the job	38,00
10.130.4602	Non-film-coated, 18 mm	m²	On the job	44,00
10.130.4603	Non-film-coated, 21 mm	m²	On the job	51,00
10.130.4604	Film-coated, 15 mm	m²	On the job	48,00
10.130.4605	Film-coated, 18 mm	m²	On the job	53,00
10.130.4606	Film-coated, 21 mm	m²	On the job	60,00
10.130.4607	I-section wooden beam (bottom and top caps min. 40 x 80 mm)	m	On the job	28,00
	Slaked powder lime (bagged) (TS EN 459-1, TS EN 459-2)			
10.130.6001	Calcium lime CL 70S slaked powder lime (bagged)	Tons	On the job	285,00
10.130.6002	Calcium lime CL 80SCalcium lime CL 70S slaked powder lime (bagged)	Tons	On the job	305,00
10.130.6003	Calcium lime CL 90SCalcium lime CL 70S slaked powder lime (bagged)	Tons	On the job	330,00
10.130.6011	Hydraulic lime (HL 3.5)	Tons	On the job	480,00

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
10.130.6012	Natural hydraulic lime (NHL 3.5)	Tons	On the job	1.885,00
10.130.6021	Unslaked fragmented calcium lime	Kg	On the job	0,22
	Water			
10.130.9991	Water	m³	On the job	6,84
	EXPLOSIVE AND COMBUSTIBLE SUPPLIES			
10.160.1001	Gelatinous Dynamite	Kg	On the job	13,08
10.160.1002	Emulsion-type explosive (capsule-sensitive, water-resistant)	Kg	On the job	4,48
10.160.1003	Ammonium nitrate, fuel-oil mixture (non-capsule-sensitive)	Kg	On the job	4,42
10.160.1004	Detonating cord (Tarry, Safety-enabled, Detonating)	m	On the job	1,55
10.160.1005	Capsule (Regular)	Qty	On the job	0,81
10.160.1006	Delayed Action (Capsule)	Qty	On the job	3,18
	Capsule (Electric)	Qty	On the job	
10.160.1021	1.50-m wire length	Qty	On the job	2,54
10.160.1022	2.50-m wire length	Kg	On the job	2,64
10.160.1023	Kerosene	Kg	On the job	4,97
10.160.1024	Liquid petroleum gas (LPG)	Kg	On the job	5,35
10.160.1025	Gasoline	Kg	On the job	6,72
10.160.1026	Diesel fuel	Kg	On the job	5,62
10.160.1027	Lubricating oil	Kg	On the job	6,70
10.160.1028	Waste oil	Kg	On the job	0,44
10.160.1029	Cotton waste	Kg	On the job	1,95
10.160.1030	Electric power	kWh	On the job	0,57
10.160.1031	Carbide	Kg	On the job	2,00
10.160.1032	Oxygen cylinder, 20 lt.	Qty	On the job	33,00
10.160.1033	Pressiometer pressurized air cylinder (20 lt. fill)	Qty	On the job	32,00
10.160.1034	Technical Ammonium Nitrate	Kg	On the job	1,98
10.160.1035	Electrode (3.25 to 4 mm in diameter) (TS EN ISO 2560)	Qty	On the job	0,23
	WOODEN CONSTRUCTION MATERIALS			
	WOOD FLOORING (TS EN 13226)			
	Processed flooring (Oak) (class I)			
10.170.1001	15-16 mm thickness	m²	On the job	70,00
	Processed flooring (Oak) (class II)			
10.170.1011	15-16 mm thickness	m²	On the job	64,00
	Processed flooring (Oak) (class III)			
10.170.1021	15-16 mm thickness	m²	On the job	58,00
	Processed flooring (Beech) (class I)			
10.170.1031	15-16 mm thickness	m²	On the job	55,00
	Processed flooring (Beech) (class II)			
10.170.1041	15-16 mm thickness	m²	On the job	49,00
	Processed flooring (Beech) (class III)			
10.170.1051	15-16 mm thickness	m²	On the job	43,00
	Laminate Flooring (TS EN 13329+A1)			
10.170.1201	AC1 Class 21	m²	On the job	23,00

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
10.170.1202	AC3 Class 23-31	m ²	On the job	25,00
10.170.1203	AC4 Class 32	m ²	On the job	30,00
10.170.1251	5-6-mm thickness, AC 4 Class 32, Water-proof PVC Flooring, Heterogeneous Group T (TS EN ISO 10581)	m ²	On the job	60,00
	MULTI-LAYER FLOORING COMPONENTS			
10.170.1401	Multi-layer flooring component in round, square and triangle classes for oak and other leafed (hard wood) tree types. (Type: 1) (TS EN 13489)	m ²	On the job	106,00
10.170.1402	Multi-layer flooring component in free class for oak and other leafed (hard wood) tree types. (Type: 4) (TS EN 13489)	m ²	On the job	112,00
	WOOD PLATING (TS 1250)			
10.170.1601	Walnut veneer (0.8 mm thickness)	m ²	On the job	13,50
10.170.1602	Oak veneer (0.8 mm thickness)	m ²	On the job	9,50
10.170.1603	Mahogany veneer (0.6 mm thickness)	m ²	On the job	7,75
10.170.1604	Beech veneer (0.8 mm thickness)	m ²	On the job	4,25
	TIMBERS MODIFIED BY THERMAL TREATMENT			
10.170.1701	Thermally treated (185-212°C) 19-mm thickness siding with Class I pine wood (TSE CEN / TS 15679)	m ²	On the job	156,00
10.170.1702	Thermally treated (185-212°C) 26-mm thickness flooring with Class I pine wood (TSE CEN / TS 15679)	m ²	On the job	165,00
10.170.1703	Thermally treated (185-212°C) 19-mm thickness siding and flooring with Class I iroko wood (TSE CEN / TS 15679)	m ²	On the job	262,00
10.170.1704	Thermally treated (185-212°C) 21-mm thickness siding and flooring with Class I ash wood (TSE CEN / TS 15679)	m ²	On the job	226,00
10.170.1705	Thermally treated (185-212°C) 25-mm thickness siding and flooring with Class I ash wood (TSE CEN / TS 15679)	m ²	On the job	273,00
10.170.1721	Thermally treated (185-212°C) Class I Pine Wood (TSE CEN / TS 15679)	m ³	On the job	6.000,00
10.170.1722	Thermally treated (185-212°C) Class I Ash Wood (TSE CEN / TS 15679)	m ³	On the job	8.750,00
10.170.1723	Thermally treated (185-212°C) Class I Iroko Wood (TSE CEN / TS 15679)	m ³	On the job	9.500,00
	PLYWOOD (TS EN 636+A1)			
10.170.1801	Plywood (Prices of different thicknesses shall be estimated by proportion)	m ³	On the job	2.400,00
	Oriented Strand Boards (OSB) TS EN 300			
	Used as a load carrier under dry conditions (OSB/2 Type)			
10.170.1901	6 mm thickness	m ²	On the job	9,70
10.170.1902	9 mm thickness	m ²	On the job	10,20
10.170.1903	11 mm thickness	m ²	On the job	10,60
10.170.1904	15 mm thickness	m ²	On the job	16,20
10.170.1905	18 mm thickness	m ²	On the job	19,50
10.170.1906	22 mm thickness	m ²	On the job	23,80

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
	Used as a load carrier under humid conditions (OSB/3 Type)			
10.170.1921	6 mm thickness	m ²	On the job	10,30
10.170.1922	9 mm thickness	m ²	On the job	10,80
10.170.1923	11 mm thickness	m ²	On the job	12,60
10.170.1924	15 mm thickness	m ²	On the job	17,50
10.170.1925	18 mm thickness	m ²	On the job	20,80
10.170.1926	22 mm thickness	m ²	On the job	25,60
	Wood fiber boards (TS 64-1 EN 622-1, TS 64-2 EN 622-2, TS 64-3 EN 622-3, TS EN 622-4) (TS EN 622-5)			
10.170.2001	Flat, 3.0 mm	m ²	On the job	5,25
10.170.2002	Flat, 4 mm	m ²	On the job	6,00
10.170.2003	Flat, 5 mm	m ²	On the job	7,40
10.170.2004	Ceiling board, perforated (40 x 40 cm), 3.0-mm thick	Qty	On the job	1,80
10.170.2005	Ceiling board, perforated, coated, (40 x 40 cm), 3.0-mm thick	Qty	On the job	2,55
10.170.2006	Ceiling board, perforated (40 x 80 cm), 3.0-mm thick	Qty	On the job	2,40
10.170.2007	Ceiling board, perforated, coated, (40 x 80 cm), 3.0-mm thick	m ²	On the job	3,65
10.170.2008	4-mm thick, with rope	m ²	On the job	2,65
10.170.2009	Soft boards of wood fiber boards (12.7 mm)	m ²	On the job	3,65
	PARTICLE BOARDS (TS EN 309, TS EN 310, TS EN 312, TS EN 317, TS EN 319, TS EN 322, TS EN 323, TS EN 324-1, TS EN 324-2, TS EN 325, TS EN 326-1)			
10.170.2101	4 mm thickness	m ²	On the job	5,25
10.170.2102	6 mm thickness	m ²	On the job	6,95
10.170.2103	8 mm thickness	m ²	On the job	7,80
10.170.2104	10 mm thickness	m ²	On the job	8,95
10.170.2105	13 mm thickness	m ²	On the job	10,05
10.170.2106	16 mm thickness	m ²	On the job	11,15
10.170.2107	19 mm thickness	m ²	On the job	12,50
10.170.2108	For 22 mm thickness	m ²	On the job	13,65
10.170.2109	25 mm thickness	m ²	On the job	14,75
10.170.2110	30 mm thickness	m ²	On the job	17,80
10.170.2111	35-mm thickness board perforated to cross sections (TS 3482)	m ²	On the job	22,50
10.170.2112	38-mm thickness board perforated to cross sections (TS 3482)	m ²	On the job	24,55
	SYNTHETIC RESIN-BASED PARTICLE BOARDS (TS 1770) (any color and pattern)			
10.170.2201	8 mm thickness	m ²	On the job	11,75
10.170.2202	18 mm thickness	m ²	On the job	19,55
10.170.2203	30 mm thickness	m ²	On the job	33,15
	PROFIED SHEETS WITH CHEMICAL CELLULOSIC COATING ON 17 MM PARTICLE BOARDS (Colorful - Decorative) (TS 4616)			
10.170.2401	For internal coating:	m ²	On the job	99,00
10.170.2402	For external coating:	m ²	On the job	135,00

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
	DECORATIVE LAMINATE BOARDS (TS EN 438-1) (High-pressure-compressed thermoset resin-based)			
	A- Standard laminate boards (Various colors, patterns and surface forms)			
10.170.2451	0.65 mm thickness	m ²	On the job	17,80
10.170.2452	1.00 mm thickness	m ²	On the job	21,00
	B- Laminate boards that can be shaped later (various colors, patterns and surface forms)			
10.170.2501	0.65 mm thickness	m ²	On the job	19,70
	C- Compact Laminated boards (various colors, patterns and surface forms)			
10.170.2551	2 mm thickness	m ²	On the job	44,00
10.170.2552	20 mm thickness	m ²	On the job	343,00
	Note: Other thicknesses shall be interpolated.			
	DECORATIVE LAMINATED-LAMINATE BOARDS USED OUTSIDE (TS EN 438-6) High-pressure-compressed thermoset resin-based			
10.170.2601	Compact laminated board, 4-mm thick	m ²	On the job	117,00
10.170.2602	Compact laminated board, 6-mm thick	m ²	On the job	137,00
10.170.2603	Compact laminated board, 8-mm thick	m ²	On the job	157,00
10.170.2604	Compact laminated board, 10-mm thick	m ²	On the job	175,00
10.170.2605	Compact laminated board, 12-mm thick	m ²	On the job	195,00
10.170.2621	Compact laminated board, 4-mm thick, two faces	m ²	On the job	137,00
10.170.2622	Compact laminated board, 6-mm thick, two faces	m ²	On the job	157,00
10.170.2623	Compact laminated board, 8-mm thick, two faces	m ²	On the job	175,00
10.170.2624	Compact laminated board, 10-mm thick, two faces	m ²	On the job	195,00
10.170.2625	Compact laminated board, 12-mm thick, two faces	m ²	On the job	216,00
	Note: Other thicknesses shall be interpolated.			
	METAL MATERIALS			
	STEEL SHEETS AND PLATES			
10.200.1001	Black flat metal sheet (1.5 mm thickness)	Kg	Factory	2,96
10.200.1002	Black flat metal sheet (2.0 mm thickness)	Kg	Factory	2,83
10.200.1003	Black flat metal sheet (2.5 mm thickness and above) (1200 x 2400 HRU) and others	Kg	Factory	2,78
	COLD-ROLLED STEEL ROLL, DC01 QUALITY (1100 mm width (inclusive) small) (TS EN 10130) Note: Also, if it is done, an extra charge of 5% for side trimming, 5% for length trimming and 5% for galvanizing (hot dip) shall be applicable.			
10.200.1101	0.29 mm (inclusive, small) thickness	Kg	Factory	3,98
10.200.1102	0.30 mm - 0.34 mm thickness	Kg	Factory	3,74
10.200.1103	0.35 mm - 0.39 mm thickness	Kg	Factory	3,70
10.200.1104	0.40 mm - 0.44 mm thickness	Kg	Factory	3,63
10.200.1105	0.45 mm - 0.49 mm thickness	Kg	Factory	3,51
10.200.1106	0.50 mm - 0.59 mm thickness	Kg	Factory	3,59
10.200.1107	0.60 mm - 0.69 mm thickness	Kg	Factory	3,37
10.200.1108	0.70 mm - 0.79 mm thickness	Kg	Factory	3,38
10.200.1109	0.80 mm - 0.89 mm thickness	Kg	Factory	3,41
10.200.1110	0.90 mm - 0.99 mm thickness	Kg	Factory	3,27

Market Prices for Construction Materials

10.200.3053	Concealed carrier edge C profile (min. 1.00-mm thickness, in any size, and electrostatically or factory coated)	m	On the job	3,15
10.200.3054	Edge C profile of the concealed carrier system sheet metal (min. 0.50-mm thickness, in any size, made of hot-dip galvanized sheet metal, and electrostatically or factory coated)	m	On the job	2,30
10.200.3055	Carrier attachment (made of min. 0.50-mm thickness, made of hot-dip galvanized sheet metal plate and 4-mm thickness galvanized bar)	Qty	On the job	0,28
10.200.3056	Attachment clip (Profile attachment made of 0.50-mm thickness spring steel plate or min. 2-mm thickness spring steel)	Qty	On the job	0,43
10.200.3057	Press clip (made of 0.50-mm thickness spring steel)	Qty	On the job	0,37
10.200.3058	Lamellar suspended ceiling carrier profile (made of min. 0.50-mm thickness hot-dip galvanized sheet metal (oven-dried paint) with 1 cm joints)	m	On the job	2,45
10.200.3059	Lamellar suspended ceiling carrier profile (made of min. 0.50-mm thickness hot-dip galvanized sheet metal (oven-dried paint) with 1.5 cm joints)	m	On the job	3,05
10.200.3060	Lamellar suspended ceiling carrier profile (made of min. 0.50-mm thickness hot-dip galvanized sheet metal (oven-dried paint) with 2 cm joints)	m	On the job	3,05
10.200.3061	Lamellar suspended ceiling carrier profile (made of min. 0.50-mm thickness hot-dip galvanized sheet metal (oven-dried paint) self-jointed)	m	On the job	3,05
10.200.3062	15-mm-wide, min. 0.50-mm thickness aluminum joint strip	m	On the job	1,55
10.200.3063	20-mm-wide, min. 0.50-mm thickness aluminum joint strip	m	On the job	1,60
10.200.3064	Edge L profile made of 0.50-mm thickness hot-dip galvanized sheet metal (oven-dried paint) self-jointed	m	On the job	1,60
10.200.3065	Edge U profile made of 0.50-mm thickness hot-dip galvanized sheet metal (oven-dried paint) self-jointed	m	On the job	2,30

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
	2- Rock wool (mineral fiber) fiberglass, aluminum, metal plaster board and similar other types of suspended ceiling (polyester-based electrostatic powder-coated) (including 3071...3128)			
	24-mm-WIDE MAIN CARRIER T PROFILES			
10.200.3071	Profile with 0.40-mm thickness, and h=38-mm height	m	On the job	1,95
10.200.3072	Profile with 0.30-mm thickness, and h=38-mm height	m	On the job	1,65
10.200.3073	Corrosion-resistant profile with 0.30-mm thickness, and h=38-mm height	m	On the job	3,15
10.200.3074	Corrosion-resistant profile with 0.40-mm thickness, and h=38-mm height	m	On the job	3,40
	35-mm-WIDE MAIN CARRIER T PROFILES			
10.200.3081	Profile with 0.30-mm thickness, and h=38-mm height	m	On the job	4,95
	24-mm-WIDE INTERMEDIATE CARRIER T PROFILES			
10.200.3091	Profile with 0.40-mm thickness, and h=30-mm height	m	On the job	2,95
10.200.3092	Profile with steel clip head, 0.30-mm thickness, and h=30 to 32-mm height	m	On the job	2,25
10.200.3093	Profile with steel clip head, 0.30-mm thickness, and h=25-mm height	m	On the job	2,45
10.200.3094	Corrosion-resistant profile with steel clip head, 0.30-mm thickness, and h=32-mm height	m	On the job	2,25
10.200.3095	Corrosion-resistant profile with steel clip head, 0.40-mm thickness, and h=32-mm height	m	On the job	3,10
10.200.3096	Corrosion-resistant profile with steel clip head, 0.30-mm thickness, and h=25-mm height	m	On the job	2,55
10.200.3097	Corrosion-resistant profile with steel clip head, 0.40-mm thickness, and h=25-mm height	m	On the job	2,95
	35-mm-WIDE INTERMEDIATE CARRIER T PROFILES			
10.200.3101	Profile with 0.30-mm thickness, and h=38-mm height	m	On the job	4,60
	15-mm-WIDE MAIN CARRIER T PROFILES			
10.200.3111	Profile with 0.40-mm thickness, and h=38-mm height	m	On the job	2,45
10.200.3112	Profile with 0.30-mm thickness, and h=32-mm height	m	On the job	2,25
10.200.3113	Profile with 0.40-mm thickness, and h=32-mm height	m	On the job	2,25
10.200.3114	Grooved profile with 0.30-mm thickness, and h=45-mm height	m	On the job	5,50
10.200.3115	Profile with 0.40-mm thickness, and h=45-mm height	m	On the job	5,50
	15-mm-WIDE INTERMEDIATE CARRIER T PROFILES			
10.200.3121	Profile with 0.40-mm thickness, and h=30-mm height	m	On the job	2,60
10.200.3122	Profile with steel clip head, 0.30-mm thickness, and h=32-mm height	m	On the job	2,45
10.200.3123	Grooved profile with 0.30-mm thickness, and h=45-mm height	m	On the job	5,90
10.200.3124	Grooved profile with 0.40-mm thickness, and h=45-mm height	m	On the job	6,30
10.200.3125	Edge L-profile (0.50 mm thickness)	m	On the job	1,45

	TERRAZZO TILE SLABS (OUTDOOR) (TS 213-2 EN 13748-2) Double Layer In two layers, namely top and bottom layers. For the sizes from 0 to 15 mm, it shall be manufactured in two layers with marble, granite, basalt, andesite, quartz-silica or mosaic aggregates, using press-vibration-washing-brushing-sanding technique with cement binder. (All colors and patterns) Single Layer A single layer. For the sizes from 0 to 15 mm, it shall be manufactured as a single layer with marble, granite, basalt, andesite, quartz-silica or mosaic aggregates, using vacuum-press-vibration-washing-brushing-sanding technique with cement binder. None of the overall water absorption test results shall exceed 8% by mass. (All colors and patterns) If such materials are used as tactile walking surface indicators (TWSI), the surface and surface relief (emboss) texture shall fulfill the conditions defined in the standard TS ISO 23599 depending on the use of the surface (warning surface or guiding surface).			
	Terrazzo Tile Slabs (Cement tiles) (Manufactured by pressing) (grooved/plain, colored/colorless)

10.240.6059	Acrylic-based Carbon-Reinforced Conductor PVC Adhesive	Kg	On the job	22,00

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
	<p>NOTE:</p> <p>1- The bottom layer of the heterogeneous material shall be non-absorbent, non-breakable, flexible, made of weldable PVC, etc. mixture for its entire thickness (1.5 mm or 2.0 mm); and shall not be foam, swollen or expanded foam, cork, etc. Heterogeneous material with 1.5 mm thickness shall be min. 2100 gr/m², and heterogeneous material with 2 mm thickness shall be min. 2800 gr/m². In addition, a certificate of compliance with the EN 649 standard issued by an internationally accredited organization shall be required. The condition that fire class as well as volume test and abrasion thickness loss test results are published by the manufacturers on their international websites shall be sought. (This definition applies to the items no. 10.240.6001...6022) Samples shall be taken with the administration before the materials (item no. (10.240.6001...6031) under the aforementioned titles 10.240.6001...6031 are manufactured. The samples shall be tested by an accredited laboratory. The approved test results shall be annexed to the payment receipt.</p> <p>2- 10.240.6001 - Administrator and personnel rooms, guest houses, day care centers, infirmaries, etc. of public institutions and organizations.</p> <p>10.240.6002 - Administrator and personnel rooms, guest houses, day care centers etc. of public institutions and organizations (except hospitals).</p> <p>10.240.6003/6010 - All corridors of public service buildings, hearing rooms of court houses, fitness and multi-purpose rooms, hospital intensive care units, patient rooms (except operating rooms and x-ray rooms), outpatient clinics, rehabilitation centers, community healthcare centers, cafeterias, classrooms, dormitories, libraries, laboratories, and any area where medical stretchers and trolleys may be used, etc.</p> <p>10.240.6011/6012 - Hospital Operating rooms, x-ray rooms, IT main switch rooms, production and storage areas of defense industry, electronics production and repair areas, etc.</p> <p>10.240.6021/6022 - Wet surfaces and inclined surfaces (ramps), etc.</p> <p>10.240.6031 - Meeting and conference halls, and reading rooms of libraries, etc.</p>

10.300.2031	Water Reducer/Plasticizer (Fluid)	Kg	On the job	2,00
10.300.2032	Powerful Water Reducer/Super-plasticizer (Fluid)	Kg	On the job	3,05
10.300.2033	Medium Plasticizer - Setting Retarder (Fluid)	Kg	On the job	2,55
10.300.2034	Super Plasticizer - Setting Retarder (Fluid)	Kg	On the job	3,90
10.300.2035	Chemical Setting Retarder Admixture (Fluid)	Kg	On the job	3,40
10.300.2036	Chemical Hardening-accelerating Admixture (Fluid)	Kg	On the job	3,70
10.300.2037	Waterproofing Admixture (Fluid)	Kg	On the job	2,95

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
10.300.2038	Air-entraining Chemical Admixture (Fluid)	Kg	On the job	3,40
10.300.2039	Cold-weather Concreting Admixture (Fluid)	Kg	On the job	1,85
	Concrete Side Products	Kg	On the job	
10.300.2061	Corrosion-retarding Admixture (Fluid)	Kg	On the job	14,05
10.300.2062	Acrylic-based Curing Agent (Fluid)	Kg	On the job	4,95
	Concrete Repair Agents, etc. (Cement-based)			
10.300.2071	Fine Repair Mortar (TS EN 1504-3)	Kg	On the job	1,00
10.300.2072	Coarse Repair Mortar (TS EN 1504-3)	Kg	On the job	0,95
10.300.2073	Cement-based Pouring Grout (TS EN 1504-3)	Kg	On the job	1,20
10.300.2074	Self-leveling floor bedding mortar (TS EN 13813, TS EN 1504-2)	Kg	On the job	1,45
	Cement-based Surface Hardeners (TS EN 1504-2, TS EN 13813)			
10.300.2091	Surface hardeners with basalt aggregates (Gray)	Kg	On the job	0,40
10.300.2092	Surface hardeners with basalt aggregates (Red)	Kg	On the job	0,60
10.300.2093	Surface hardeners with basalt aggregates (Green)	Kg	On the job	0,90
10.300.2094	Surface hardeners with quartz aggregates (Gray)	Kg	On the job	0,45
10.300.2095	Surface hardeners with quartz aggregates (Red)	Kg	On the job	0,70
10.300.2096	Surface hardeners with quartz aggregates (Green)	Kg	On the job	1,05
10.300.2097	Surface hardeners with quartz-corundum aggregates (Gray)	Kg	On the job	0,60
10.300.2098	Surface hardeners with quartz-corundum aggregates (Red)	Kg	On the job	0,85
10.300.2099	Surface hardeners with quartz-corundum aggregates (Green)	Kg	On the job	1,10
10.300.2100	Surface hardeners with corundum aggregates (Gray)	Kg	On the job	0,75
10.300.2101	Surface hardeners with corundum aggregates (Red)	Kg	On the job	1,05
10.300.2102	Surface hardeners with corundum aggregates (Green)	Kg	On the job	1,45
	Liquid Surface Hardeners - Primers (TS EN 1504-2)			
10.300.2121	Anti-dusting Coating and Curing Agent (Fresh/Hardened Concrete) (Fluid)	Kg	On the job	4,60
10.300.2122	Single-component Acrylic Copolymer-based Primer (Fluid)	Kg	On the job	4,70
	Quick-setting Admixtures for Shotcrete (Dry System)			
10.300.2131	Powder shotcrete admixture with alkali content	Kg	On the job	2,30
10.300.2132	Alkali-free powder shotcrete admixture	Kg	On the job	1,85
	Quick-setting Admixtures for Shotcrete (Wet System)			
10.300.2141	Fluid shotcrete admixture with alkali content	Kg	On the job	2,95
10.300.2142	Alkali-free, fluid shotcrete admixture	Kg	On the job	2,10
	Resin-based Agents			
10.300.2151	Adhesive for adherence of epoxy-based old concrete to new concrete (two-component)	Kg	On the job	25,25
10.300.2152	Epoxy-based pre-flooring primer (two-component) (TS EN 1504-2)	Kg	On the job	36,00
10.300.2153	Epoxy-based (Self-leveling) flooring (two-component)	Kg	On the job	23,50

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
10.300.2154	Epoxy-based flooring with orange peel pattern (texture) (two-component) (TS EN 1504-2)	Kg	On the job	30,50
10.300.2155	Epoxy-based (two-component) adhesive and repair grout (TS EN 1504-3)	Kg	On the job	22,00
10.300.2156	Agents used for anchorage (epoxy resin-based, two-component cylinder) (250-ml cylinder)	Qty	On the job	50,50
10.300.2157	One-component, polyurethane-based, UV-resistant joint filling mastic (310-ml cartridge)	Qty	On the job	20,00
10.300.2158	Polyethylene cylinders (diameter: Ø6 mm)	m	On the job	0,17
	Water Insulation Agents			
10.300.2171	Cement-based, quick-setting sealing grout (TS EN 1504-3)	Kg	On the job	6,40
10.300.2172	Cement-based crystallized water insulation agent (single-component) (TS EN 1504-2)	Kg	On the job	2,50
10.300.2173	Cement-based, elastic (two-component) water insulation grout (TS EN 1504-2)	Kg	On the job	3,40
10.300.2174	Elastomeric resin-based (single-component) water insulation agent (Liquid Membrane)	Kg	On the job	9,30
10.300.2175	Cement- and bitumen-based (two-component) water insulation agent	Kg	On the job	6,75
10.300.2176	Bitumen-rubber-based (single-component) water insulation agent	Kg	On the job	8,95
10.300.2177	Bitumen-rubber-based (two-component) water insulation agent	Kg	On the job	8,95
10.300.2178	Hybrid polyurea-based (two-component) water insulation agent (TS EN 1504-2)	Kg	On the job	26,00
10.300.2179	100%-pure polyurea-based (two-component) water insulation agent (TS EN 1504-2)	Kg	On the job	58,00
	Mold Releases			
10.300.2191	Oil-based mold release (concentrated mold oil) (Wood-Plastic)	Kg	On the job	3,75
10.300.2192	Oil-based mold release (concentrated mold oil) (Plastic-Steel)	Kg	On the job	4,75
	Tile Adhesives			
10.300.2201	Cement-based, standard-performance tile adhesives with reduced slip (TS EN 12004-1 - C1T)	Kg	On the job	0,50
10.300.2202	Cement-based, standard-performance tile adhesives with reduced slip and prolonged exposed holding time (TS EN 12004-1 - C1TE)	Kg	On the job	0,80
10.300.2203	Cement-based, high-performance tile adhesives with reduced slip and prolonged exposed holding time (TS EN 12004-1 - C2TE)	Kg	On the job	1,20
10.300.2204	Cement-based, high-performance, flexible tile adhesives with reduced slip and prolonged exposed holding time ((TS EN 12004-1 - C2TE) (TS EN 12004-2 - S1))	Kg	On the job	2,20

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
10.300.2205	Cement-based, high-performance, very flexible tile adhesives with reduced slip and prolonged exposed holding time ((TS EN 12004-1 - C2TE) (TS EN 12004-2 - S2))	Kg	On the job	2,40
10.300.2206	Dispersion (Acrylic)-based, standard-performance tile adhesives with reduced slip TS EN 12004-1 - D1T)	Kg	On the job	4,50
10.300.2207	Dispersion (Acrylic)-based, high-performance tile adhesives with reduced slip and prolonged exposed holding time (TS EN 12004-1 - D2TE)	Kg	On the job	5,80
10.300.2208	Reaction resin-based (two or more components), high-performance tile adhesives with reduced slip (TS EN 12004-1 - R2T)	Kg	On the job	16,50
	Joint Filling Agents (any color)			
10.300.2231	Cement-based, standard-performance joint filling (TS EN 13888 - CG1)	Kg	On the job	1,30
10.300.2232	Cement-based, high-performance, high abrasion-resistant joint filling with reduced water absorption (TS EN 13888 - CG2AW)	Kg	On the job	1,70
10.300.2233	Reaction resin-based (two or more components) joint filling (TS EN 13888 - RG)	Kg	On the job	19,20
	STEEL WIRES AND MICRO/MACRO REINFORCEMENT FIBERS USED FOR CONCRETE REINFORCEMENT			
	Steel Wires (TS EN 14889-1)			
10.300.4001	Longitudinally deformed, glued wires (notched, longitudinally curved, waved)	Kg	On the job	5,20
10.300.4002	Longitudinally deformed, non-glued wires (notched, longitudinally curved, waved)	Kg	On the job	4,75
	Glued Wires with Hooks in Both Ends (TS EN 14889-1)			
10.300.4011	0.55 mm in diameter and 30/35 mm long	Kg	On the job	7,20
10.300.4012	0.75 mm in diameter and 30/35 mm long	Kg	On the job	6,80
10.300.4013	0.75 mm in diameter and 60 mm long	Kg	On the job	6,25
10.300.4014	0.90 mm in diameter and 60 mm long	Kg	On the job	6,00
	Non-glue Wires with Hooks in Both Ends (TS EN 14889-1)			
10.300.4021	0.55 mm in diameter and 30/35 mm long	Kg	On the job	6,40
10.300.4022	0.75 mm in diameter and 30/35 mm long	Kg	On the job	5,60
10.300.4023	0.75 mm in diameter and 60 mm long	Kg	On the job	5,30
10.300.4024	0.90 mm in diameter and 60 mm long	Kg	On the job	4,60
	Macro/micro reinforcement fibers (TS EN 14889-2)			
10.300.4101	Price of synthetic macro-fiber reinforcement in 1 m³ of shotcrete with synthetic macro-fiber reinforcement, which shall have an energy storage capacity of (500 joules ≤ energy storage capacity < 700 joule) as indicated by the tests conducted by a laboratory accredited per TS EN 14488-5.	m³	On the job	100,00

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
10.300.4102	Price of synthetic macro-fiber reinforcement in 1 m ³ of shotcrete with synthetic macro-fiber reinforcement, which shall have an energy storage capacity of (700 joules ≤ energy storage capacity < 1000 joules) as indicated by the tests conducted by a laboratory accredited per TS EN 14488-5.	m ³	On the job	145,00
10.300.4103	Price of synthetic macro-fiber reinforcement in 1 m ³ of shotcrete with synthetic macro-fiber reinforcement, which shall have an energy storage capacity of (1000 joules ≤ energy storage capacity) as indicated by the tests conducted by a laboratory accredited per TS EN 14488-5.	m ³	On the job	190,00
10.300.4121	The price for synthetic macrofiber reinforcement per m ³ of field concrete with synthetic macrofiber reinforcement and with 1.5 N/mm ² for CMOD=0.5 mm and 1 N/mm ² for CMOD=3.5 as per the results of the tests conducted by accredited laboratories in accordance with TS EN 14651	m ³	On the job	135,00
10.300.4151	Polypropylene micro-fiber reinforcement fibers	Kg	On the job	14,00
	INSULATION MATERIALS			
	FIBER THERMAL AND SOUND INSULATION SUPPLIES AND CEILING PANELS			
	GLASS WOOL (TS 901-2, TS EN 13162+A1)			
	Mat of inorganic origin: Non-load bearing and used for heat and sound insulation in the technique and structure, estimated thermal conductivity at first dynamic hardness ≤ 0.040 W/mK Note: Market prices of other thicknesses will be interpolated.			
	15 kg/m³ density			
10.330.1001	8-cm thickness, both surfaces covered with glass tissue	m ²	On the job	6,85
10.330.1002	10-cm thickness, both surfaces covered with lass tissue	m ²	On the job	7,85
10.330.1003	12-cm thickness, both surfaces covered with glass tissue	m ²	On the job	9,10
10.330.1004	14-cm thickness, both surfaces covered with glass tissue	m ²	On the job	10,35
10.330.1005	8-cm thickness, one surface covered with Kraft paper	m ²	On the job	5,95
	16 kg/m³ density			
10.330.1011	8-cm thickness, one surface covered with tin foil with overlap margin	m ²	On the job	9,05
10.330.1012	10-cm thickness, one surface covered with tin foil with overlap margin	m ²	On the job	10,35
10.330.1013	12-cm thickness, one surface covered with tin foil with overlap margin	m ²	On the job	11,45
	18 kg/m³ density			
10.330.1021	18 kg/m ³ density, 6-cm thick (mat)	m ²	On the job	3,60
10.330.1022	8 cm thickness	m ²	On the job	5,60
10.330.1023	10 cm thickness	m ²	On the job	7,00
10.330.1024	12 cm thickness	m ²	On the job	8,40
10.330.1025	14 cm thickness	m ²	On the job	9,85
	22 kg/m³ density			
10.330.1031	5-cm thickness, one surface covered with Kraft paper	m ²	On the job	5,20
	Panel: Used for heat and sound insulation in the technique and structure, estimated thermal conductivity at first dynamic hardness: ≤ 0.040 W/mK. Note: Unit prices of intermediate thickness values shall be interpolated.			
10.330.1201	30 kg/m ³ density, 3-cm thick, non-load bearing, with silicon	m ²	On the job	4,15

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
10.330.1202	30 kg/m ³ density, 5-cm thick, non-load bearing, with silicon	m ²	On the job	6,45

10.400.2007	Outer door lock with rim lock (TS EN 12209)	Qty	On the job	40,30
10.400.2008	Door handle and panels (Chromated) (TS EN 12209)	Qty	On the job	14,30
10.400.2009	Rubber seal plug	Qty	On the job	2,47
10.400.2010	Hinge	Qty	On the job	2,34
10.400.2011	Spring-loaded hinge	Qty	On the job	22,75
10.400.2012	Door latch (Vertical fixing tools)	Qty	On the job	3,00
10.400.2013	Stop (Nickel-plated)	Qty	On the job	11,20
	Window joinery mineral hardware (Wood, metal and plastic)			
10.400.2101	Window bar hardware (Handle lever and other components)	Qty	On the job	15,60
10.400.2102	Transom window hardware (Simple folding mechanism)	Qty	On the job	5,20
10.400.2103	Transom window hardware (Steel folding mechanism, chrome-plated lever and handle)			13,00
10.400.2104	Latch (window bar lever and cam) yellow brass montevet screw	Qty	On the job	7,80
10.400.2105	Bolt	Qty	On the job	2,60
10.400.2106	Rubber seal plug	Qty	On the job	2,86
10.400.2107	Latch with locking spring	Qty	On the job	3,64
10.400.2108	Counterweight set (Cast knitting wire, complete together with wrap pulley wire sockets)	Qty	On the job	3,64
10.400.2109	Sliding window handle	Qty	On the job	11,05
	Clutch window bar hardware (Including lever) (for wood)			
10.400.2121	With two 80-cm clutches (for wood)	Qty	On the job	11,05
10.400.2122	With three 100-cm clutches (for wood)	Qty	On the job	13,00
10.400.2123	With three 120-cm clutches (for wood)	Qty	On the job	15,60
10.400.2124	With three 140-cm clutches (for wood)	Qty	On the job	15,60
10.400.2125	With three 160-cm clutches (for wood)	Qty	On the job	16,90

Market Prices for Construction Materials

ITEM NO	DESCRIPTION	UNIT OF MEASURE	PURCHASING LOCATION	MARKET PRICE (TRY)
10.400.2126	With four 180-cm clutches (for wood)	Qty	On the job	18,20
10.400.2127	Hinge	Qty	On the job	2,86
10.400.2128	Continuous hinge	m	On the job	4,42
10.400.2129	Adjustable hinge (Double) Plastic-coated	Qty	On the job	11,05
	Window joinery mineral hardware (Wood, metal and plastic) (Subject to written approval of the administration.)			
10.400.2141	Window bar hardware (including lever), two-clutches, up to 100 cm	Qty	On the job	39,00
10.400.2142	Window bar hardware (including lever), three clutches, up to 180 cm	Qty	On the job	48,00
10.400.2143	Window bar hardware (including lever), four clutches, longer than 180 cm	Qty	On the job	48,00
10.400.2144	Transom window bar hardware (including lever and folding mechanism)	Qty	On the job	39,00
	Door handle hardware (TS EN 1906, TS EN 12051)			
10.400.2161	Door handle hardware with static paint (with 360 gr weight, 40 mm x 220 mm (width x length) panel part, and 1.20 mm wall thickness)	Set	On the job	7,25
	Brass door handle hardware (yellow brass with copper alloy)			
10.400.2181	The handle part shall be min. 475 gr.	Set	On the job	23,40
10.400.2182	The handle part shall be min. 750 gr.	Set	On the job	31,20
10.400.2183	The handle part shall be min. 900 gr.	Set	On the job	48,10
	Note: 1- Electrolytic coating with satin, albirifin, smoke gray, chrome shall be charged extra TRY 5.00. 2- Two-color satin albirifin coating shall be charged extra TRY 7.50.

10.450.4315	PE-based house connection manhole cover that is Ø400 mm in diameter (Regular, Locked, Sealed type, including installation components) (TS EN 124-6 - B125)	Qty	On the job	150,00
10.450.4331	Prefabricated base slab for PE-based Manhole or Inspection Chamber Ø800 mm in nominal diameter (H = 0.80 m)	Qty	On the job	330,00
10.450.4332	Prefabricated chamber ring with steps for PE-based Manhole or Inspection Chamber Ø800 mm in nominal diameter (H = 0.50 m)	Qty	On the job	340,00
10.450.4333	Prefabricated chamber ring with steps for PE-based Manhole or Inspection Chamber Ø800 mm in nominal diameter (H = 1.00 m)	Qty	On the job	510,00
10.450.4334	Prefabricated stepped taper for PE-based Manhole or Inspection Chamber Ø800 mm in nominal diameter (H = 0.45 m)	Qty	On the job	305,00
10.450.4335	Prefabricated stepped taper for PE-based Manhole or Inspection Chamber Ø800 mm in nominal diameter (H = 0.70 m)	Qty	On the job	360,00
10.450.4336	Prefabricated base slab for PE-based Manhole or Inspection Chamber Ø800 mm in nominal diameter (H = 0.80 m) - Outlet: 300/200 mm	Qty	On the job	360,00
10.450.4337	Prefabricated base slab for PE-based Manhole or Inspection Chamber Ø800 mm in nominal diameter (H=0.80 m) - Entrance 300/200 mm - Exit 300/200 mm	Qty	On the job	360,00
10.450.4338	Prefabricated base slab for PE-based Inspection Chamber Ø800 mm in nominal diameter (H=0.80 m) Entrance 300/200 mm - Exit 300/200 mm (15, 30, 45, 75, 90 etc. degrees of angles)	Qty	On the job	360,00
10.450.4351	Prefabricated base slab for PE-based Inspection Chamber Ø1000 mm in nominal diameter (H=1.00 m)	Qty	On the job	570,00
10.450.4352	Prefabricated chamber ring with steps for PE-based Inspection Chamber Ø1000 mm in nominal diameter (H=0.50 m)	Qty	On the job	440,00
10.450.4353	Prefabricated chamber ring with steps for PE-based Inspection Chamber Ø1000 mm in nominal diameter (H=1.00 m)	Qty	On the job	725,00
10.450.4354	Prefabricated taper with steps for PE-based Inspection Chamber Ø1000 mm in nominal diameter (H=0.75 m)	Qty	On the job	500,00
10.450.4355	Prefabricated taper with steps for PE-based Inspection Chamber Ø1000 mm in nominal diameter (H=1.00 m)	Qty	On the job	580,00
10.450.4356	Prefabricated base slab for PE-based Manhole or Inspection Chamber Ø1000 mm in nominal diameter (H=0.75 m) - Entrance 300/200 mm - Exit 300/200 mm	Qty	On the job	510,00
10.450.4357	Prefabricated base slab for PE-based Manhole or Inspection Chamber Ø1000 mm in nominal diameter (H=0.75 m) - Entrance 500/400 mm - Exit 500/400 mm	Qty	On the job	510,00
10.450.4358	Prefabricated base slab for PE-based Inspection Chamber Ø1000 mm in nominal diameter (H=0.75 m) Entrance 300/200 mm - Exit 300/200 mm (15, 30, 45, 75, 90 etc. degrees of angles)	Qty	On the job	510,00

	D) Group 4 (minimum Class D 400) Road parts dedicated to freight transport (including pedestrian-only streets), hard shoulders and parking lots for all vehicle types. (min. width x length x min. height) (mm)			
10.480.1331	200 x 1000 x 60	m	On the job	50,00
10.480.1332	200 x 1000 x 80	m	On the job	65,00
10.480.1333	200 x 1000 x 125	m	On the job	78,00
10.480.1334	200 x 1000 x 200	m	On the job	110,00
10.480.1335	200 x 1000 x 250	m	On the job	134,00
10.480.1336	300 x 1000 x 80	m	On the job	69,00
10.480.1337	300 x 1000 x 150	m	On the job	129,00
10.480.1338	300 x 1000 x 250	m	On the job	204,00
	E) Group 5 (minimum Class E 600) Areas such as port and dock sides, which are exposed to excessive wheel loads. (min. width x length x min. height) (mm)			
10.480.1351	300 x 1000 x 80	m	On the job	80,00
10.480.1352	300 x 1000 x 150	m	On the job	157,00
10.480.1353	300 x 1000 x 250	m	On the job	232,00
	F) Group 6 (minimum Class F 900) Surfacing of areas such as airport runways, which are exposed to excessive wheel loads. (min. width x length x min. height) (mm)			
10.480.1361	200 x 1000 x 250	m	On the job	186,00
10.480.1362	350 x 1000 x 400	m	On the job	378,00
	GRATING SETS (TS EN 124-1, TS EN 124-2, TS EN 124-3)			
10.480.1401	Stainless Steel Grating Set (including installation and fittings) (Group 1 (minimum Class A 15) for the areas used by pedestrians and cyclists only)	m ²	On the job	1.140,00
10.480.1402	Galvanized Sheet Metal Grating Set (including installation and fittings) (Group 1 (minimum Class A 15) for the areas used by pedestrians and cyclists only)	m ²	On the job	770,00
10.480.1403	Nodular Cast Grating Set (including installation and fittings) (Group 1 (minimum Class A 15) for the areas used by pedestrians and cyclists only)	m ²	On the job	700,00
10.480.1404	Reinforced Concrete Grating Set (including installation and fittings) (Group 1 (minimum Class A 15) for the areas used by pedestrians and cyclists only)	m ²	On the job	1.100,00
10.480.1411	Stainless Steel Grating Set (including installation and fittings) (Group 2 (minimum Class B 125) for pedestrian ways, pedestrian areas and similar other areas, private parking lots and multi-story car parks)	m ²	On the job	1.320,00
10.480.1412	Galvanized Sheet Metal Grating Set (including installation and fittings) (Group 2 (minimum Class B 125) for pedestrian ways, pedestrian areas and similar other areas, private parking lots and multi-story car parks)	m ²	On the job	890,00

10.480.1483	Steel-reinforced, polymer-based composite maintenance manhole covering component (TS EN 124-1, TS EN 124-3) (Road pavements, pedestrian-only streets including pedestrian-only streets, hard shoulders and parking lots for all vehicle types) (including covers, frames, and fittings such as universal joints, etc.) (minimum Ø600 mm net opening) (Group 4 Minimum D 400 class)	Qty	On the job	280,00
	PANEL FENCE, POST AND ACCESSORIES			
	Hot-dip galvanized and electrostatic polyester powder coated wire in panel form (50 x 150 mm mesh size, Ø4.5 mm wire diameter) (TS EN 10223-4)			
10.480.1501	1.00-m high, min. 2-twisted	m	On the job	19,00
10.480.1502	1.20-m high, min. 2-twisted	m	On the job	23,50
10.480.1503	1.50-m high, min. 3-twisted	m	On the job	28,50
	Hot-dip galvanized panel fence post sized 50 x 50 x 1.5 mm coated with electrostatic polyester powder paint (including min. 120 x 120 x 5 mm flange and UV-resistant, unbreakable plastic door)			
10.480.1511	1.00-m high	Qty	On the job	16,00
10.480.1512	1.20-m high	Qty	On the job	18,50
10.480.1513	1.50-m high	Qty	On the job	22,00
	Panel Fence Accessories			
10.480.1521	Clips (UV-resistant, unbreakable plastic with clamps gripping the profile, including installation screws)	Qty	On the job	0,75
	REINFORCED CONCRETE POLES AND BRACES (C40/50 concrete with 4 x Ø6 (h = 0-2.5 m) / Ø8 (h = above 2.5 m) reinforcing bars and a stirrup bar every 25 cm will be steam-cured (dried) for min. 8 hours)			
	Concrete Poles (Lower part / Upper part)			
10.480.1701	1.60 m straight post (Sized 9 x 9 / 9 x 7, 8 holes)	Qty	On the job	12,00
10.480.1702	2.00 m straight post (Sized 8 x 10 / 8 x 9.5, 6 holes)	Qty	On the job	14,00
10.480.1703	2.50 m straight post (Sized 9 x 12 / 8 x 10 holes, 8 holes)	Qty	On the job	18,00
10.480.1704	3.00 m straight post (Sized 10 x 14 / 10 x 12, 8 holes)	Qty	On the job	25,00
	(Lower part / Middle Part / Upper part)			
10.480.1711	2.40 m post with leaned top (sized 9x10 / 8x10 / 8x8, with 8 holes)	Qty	On the job	15,00
10.480.1712	2.50 m post with leaned top (sized 10x14 / 9x10 / 9x9.5, with 9 holes)	Qty	On the job	18,00
10.480.1713	2.80 m post with leaned top (sized 10x14 / 9x10.5 / 9x9, with 10 holes)	Qty	On the job	22,00
10.480.1714	3.00 m post with leaned top (sized 10x13 / 10x12 / 10x12, with 11 holes)	Qty	On the job	25,00
10.480.1715	3.15 m post with leaned top (sized 10x13 / 10x12 / 10x12, with 12 holes)	Qty	On the job	27,00

REPUBLIC OF TURKEY

THE MINISTRY OF ENVIRONMENT AND URBANISM

Directorate of Higher Technical Board

1934

CONSTRUCTION WORKS

2019

GENERAL PROVISIONS AND EXPLANATIONS FOR CONSTRUCTION WORKS

- 1- Prepared as per Article 97, Paragraph 1, Point (k) regarding the Organization and Duties of Our Ministry of the Presidential Decree no. 1 on the Organization of the President's Office.
 - 2- In case there are printer's and material errors in Unit Prices, the latest values as may be corrected by the Ministry of Environment and Urbanism shall be taken as basis, and the amendments made accordingly shall be published in the page of the Directorate of Technical Board on www.csb.gov.tr or directly on <https://yfk.csb.gov.tr/>.
 - 3- The unit price manufactures applicable shall be in compliance with the Turkish Standards referred to in unit price definitions. However, if the said standards are amended later, the final standards in effect shall be applicable. In case of a later change in those standards, the latest versions of the standards in effect shall apply.
 - 4- The table indicating the names of the materials in the Market Price Lists of 2019 as may be amended as per the standards shall also be applicable to the Unit Prices of 2019 in terms of size and definition.
 - 5- The unit prices amended to comply with the amended analyses shall be in effect from the beginning of the year in which they are put into effect, and the unit prices for a given application year shall be found by taking as basis the unit price analyses for the contracts tendered in previous years.
 - 6- General Technical Specifications published by the Ministry of Environment and Urbanism shall be complementary to such unit prices and their definitions.
 - 7- The works and manufactures in this list shall be performed and made in compliance with the relevant legislations of Environment, Health, Occupational Safety, Fire, Structural Materials and similar other legislation. If the Unit Price Definitions or the annexed Unit Price List does not refer to the relevant legislation or if there are hesitations as to the referred legislation, the legislation in effect shall be applicable.
 - 8- The unit prices published and updated on an annual basis by our Ministry shall be taken as basis as per the following statement in the article 17, paragraph 9 of the Law No. 6446 on the Electricity Market:
As per the provision "Unit prices for ground destruction which may arise from the infrastructure works shall not exceed the unit prices published by the Ministry of Environment and Urbanization," unit prices updated and published every year by our Ministry shall apply in determining the cost of ground destruction. Nevertheless, if the unit prices to be taken into consideration are not available in the unit price lists of our Ministry, the unit prices of the General Directorate of Highways, the General Directorate of İlbank A.Ş. and the General Directorate of State Hydraulic Works shall be taken as basis in the order of priority mentioned herein.
 - 9- The Unit Prices of our Ministry shall be effective from January 1, 2019, and the administrations shall update the prices for preparing an approximate cost in accordance with the "TÜİK Table of Construction Cost Index and Rates of Change" as specified in the paragraph 11/3 of the Regulation on Application of the Tenders for Construction Works.
 - 10- Unit prices include 25% contractor's profit and overheads.
 - 11- The prices in the Unit Price list do not include VAT.
- (Effective 1 January 2019.)

ITEM NO. TYPE OF MATERIAL ON CONSTRUCTION SITE

LIST OF MATERIALS ON CONSTRUCTION SITE:

- 1- Cements (Regular and White)
- 2- Steel products for Reinforced Concrete:
 - a) Concrete Steel Bar (Ø6 mm)
 - b) Concrete Steel Bar (Ø8 - Ø10 - Ø12 mm)
 - c) Concrete Steel Bar (Ø14-50 mm)
 - d) Concrete Steel Bar, Ribbed (III a) (Ø8-12 mm)
 - e) Concrete Steel Bar, Ribbed (III a) (Ø14-32 mm)
 - f) Steel Mesh, Ribbed (Weight per m²: 3.01 to 10.00 kg)
 - g) Steel Mesh, Ribbed (Weight per m²: 1.50 - 3.00 kg)
- 3 - Profile steels (I-U-T-omega) and steel pipes
- 4 - Sheet metal products:
 - a) Plain black metal sheets (0.70 - 2.50 mm)
 - b) DKP Sheets (0.40 - 20 mm)
 - c) Galvanized plain sheet
 - d) Galvanized grooved sheet
- 5 - Bricks
 - a) Clay Bricks
 - b) Horizontally perforated bricks (19 x 19 x 8.5 cm)
 - c) Horizontally perforated bricks (19 x 19 x 13.5 cm)
 - d) Solid or vertically perforated bricks (19 x 9 x 5 cm)
 - e) Vertically perforated bricks (19 x 29 x 13.5 cm)
 - f) Vertically perforated bricks (19 x 19 x 8.5 cm)
 - g) Vertically perforated bricks (19 x 9 x 8.5 cm)
 - h) Vertically perforated bricks (19 x 29 x 13.5 cm)
 - i) Vertically perforated lightweight bricks (04.018/11 to 04.018/i48)
- 6 - Pantile, Grooved Bricks and ridge tiles
- 7 - Sand and Gravel:
 - a) All-in aggregate, sand and gravel
 - b) Sieved and washed sand
 - c) Sieved and washed gravel
- 8 - Stones:
 - a) Crushed Stone
 - b) Quarry Stone
- 9- Marble and Travertine (Any size and color)
- 10- Marble powder and chips
- 11- Lime (unslaked)
- 12- Ceramic tiles (in any size, color and type)
- 13- Ceramic (in any size, color and type)
- 14- Cement tiles
- 15- Mosaic tiles (in any color and type)
- 16- Artificial marble sheets and step sheets with regular or white cement marble chips
- 17- Copper and zinc sheets (for roofing)
- 18- Flat aluminum sheets (in any type)
- 19- Trapezoidal aluminum sheets (in various thicknesses)
- 20- Aluminum profiles (any type)
- 21- Metal-reinforced and non-metal-reinforced hard PVC joinery profiles
- 22- Lumbers:
 - a) Pine lumber (Class 1)
 - b) Pine lumber (Class 2)
 - c) White pine (fir) (Class I)
 - d) White pine (fir) (Class II)
- 23- For any type of door and window joinery,
70% of the installed production shall be paid.
- 24- Sheets with asbestos cement (flat and waved)
(6-mm thickness and in any size)
- 25 - Bitumen grooved sheets with organic fiber (black and colored) (3 mm thickness)

ITEM NO. TYPE OF MATERIAL ON CONSTRUCTION SITE

26- LIGHTWEIGHT AAC MATERIALS:

- a) Non-reinforced blocks
- b) Non-reinforced insulation slabs
- c) Reinforced slabs
- d) Reinforced wall elements

27- PUMICE CONCRETE MATERIALS:

- a) Hollow and solid wall elements (in any size)
- b) Hollow tile flooring blocks

28- POLYMER BITUMEN SHEETS

NOTE:

- 1) The ones for which the materials on construction site will be paid shall be drawn.
- 2) No payment for the materials on construction site shall be paid for materials that are not listed herein.
- 3) The following materials listed herein and for which transportation shall be paid as per the General Technical Specifications:
 - 3.1) sand, gravel, all-in aggregate, lightweight aggregate (from the nearest warehouse for marble powder and chips)
 - 3.2 Unslaked lime, cement
 - 3.3 Quarry stone (blocks, rubbles, dressed stone, crushed stone)
 - 3.4 Bricks (perforated, non-perforated, clay, factory-made and lightweight bricks)
 - 3.5 Reinforced and non-reinforced lightweight AAC materials
 - 3.6 Bricks
 - 3.7 Steel (B.A. steel, steel mesh, ribbed steel, profile steel, profile pipes, black and DKP metal sheets), the carriage fees to be calculated as per the principles laid out in the General Technical Specifications for Carriage shall be paid separately.
- 4) The price of the materials on construction site shall be subject to the reductions and discounts.
- 5) Carriage fees for cement and steel shall not include the loading fees to be paid by the organization during the purchase of such materials from factories.
- 6) The titles of items are written in the price list, and the records in the relevant item numbers shall be taken as basis for the conditions of measurement.
- 7) For the materials with multiple types among those given in the list of materials on construction site (cement, bricks, lumber, etc.), the materials on construction site shall be paid for based on the price of the materials actually used.
- 8) The units of measure and prices for the materials on construction site for the materials included in the list of materials on construction site shall be taken from the Market Price List that makes the basis of the construction unit prices.

CARRIAGE FORMULAS

1- Carriage by motor vehicles:

a) Item: 07.004 - Carriage of any excavation material with carriage distances measured by Bruckner's curve to a distance of m:

F: 0.00023. $K \times \sqrt{M}$ TRY /Ton

b) For any paved road with 10% inclination based on the distance and route of carriage:
Carriages up to $b / 1 : M < 10$ km:

Item No. 07.005 $F = 0.00017 K \times \sqrt{M}$ TRY/Ton

Carriages of $b / 2 : M > 10$ km:

Item No. 07.006 $F = K (0.0007 M + 0.01)$ TRY/Ton

In the first formula, $M = m$, and in the second formula, $M = km$.

The K in motor vehicle formulas represents the "Carriage coefficient for any motor vehicle type and tonnage" given in the item 02.017 of the market price table published by the Ministry of Public Works.

NOTE: In applying the items (07.005) and (07.006):

- I. If any of the following factors: Specifications of the carriage road,
 - II. Adverse weather conditions during the carriage,
 - III. Coincidence of the carriage works with the season with unfavorable conditions of commercial carriage affects the carriage works and depending on the characteristics of the work, the carriage fee shall be calculated by multiplying the Carriage formulas by the coefficient (A).
- I) After obtaining approval from the authorized body of the investing organization before the reduction for the coefficient A,

A shall be a value between 1.00 (inclusive) and 2 (inclusive). If no value is chosen for A in the contract and its annexes before the tender,

$$A = 1 + \frac{0.25}{M} [b + d + 2 (c + e) + 3 f]$$

shall be used to make a calculation based on the road conditions. In the formula:

M = Total length of the carriage route = m

b = Length of any type of paved road with inclinations of 10% to 15%

(inclusive) in m c = Length of any type of paved road with inclinations higher than 15% in m

d = Raw road length with up to 10% (inclusive) inclination in m

e = Raw road length with 10% to 15% (inclusive) inclination in m

f = Raw road length with greater inclination than 15% in m.

NOTE: If the excavation, road, superstructure and industrial production materials in m^3 are:

- a. Mixed in different types and grain sizes,
 - b. With unspecified densities since they are dry, humid or wet,
 - c. Various ground excavations and construction materials are mixed for the production of roads and industrial production under the same tender,
- the carriage fee per m^3 :

Shall be calculated by multiplying the coefficients in the formulas of Item 07.004, Item 07.005, and Item 07.006 by a coefficient that is maximum 2, which shall be specified in the contract and its annexes and approved by the authorized body of the investing organization before the tender, shall be applied to all materials (except water) in m³ to be carried as part of the relevant task.

2. Loads that are carried by a wheelbarrow, on an animal's back or drawn by an animal:
Item 07.001: Carriages made by a wheelbarrow.

Carriage of 1 ton of load to a distance of M = m.

$F = 0.013 \text{ k. M TRY/ton.}$

k = Hourly rate of an unskilled worker: TRY.

M = Carriage distance up to 100 m (inclusive).

Item 07.002 Carriages on an animal's back.

Carriage of 1 ton of load to a distance of M = m.

$F = k.(0.0002 \text{ M} + 0.025) \text{ TRY / Ton.}$

k = "The daily rate of a road train that is made up of three horses or mules and a rider (or five donkeys)" in the item 02.002 specified in the market price table published by the Ministry of Environment and Urbanization.

3- Item 07.003: Carriages by animal-drawn carts.

Carriage of 1 ton of load to a distance of M = m.

$F = k (0.00016 \text{ M} + 0.03) \text{ TRY/Ton.}$

k = "Carriage coefficient for carts drawn by any animal" in the item 02.016 in the market price table published by the Ministry of Public Works.

NOTE: The carriage formulas for carriages made by different vehicles given in the items 1, 2 and 3 above give the carriage fees per ton (not including loading and unloading),

- a. and for the carriage of materials for which the analysis does not include loading, unloading, laying and stowing at the work site, the calculation shall be based on the Item No. of the carried materials (09.001 - 09.021) (without any profit and overheads) and the calculated amount shall be added to the amounts found.
- b. For carriages measured in m³, carriage fee F per m³ of material shall be paid as the price per carriage of a ton of material x density of the material.
- c. Carriage fee for reinforced concrete flumes and plastic pipes shall be paid as double the amount found by the formula given above.

CONSTRUCTION UNIT PRICE DEFINITIONS MARKET PRICES

2019

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
	LOADING, UNLOADING AND STOWING MATERIALS (Except Transportation)		
15.100.1001	Loading, unloading and stowing of any type of 1-ton cement and lime (Loading fee is deducted for ex-factory materials.)	Tons	14,38
15.100.1002	Loading onto vehicles, unloading from vehicles and storing of 1 m³ of sand, gravel, all-in aggregate materials, stabilized crushed stone, lightweight aggregate, and marble chips	m³	2,91
15.100.1003	Loading onto vehicles, unloading from vehicles and storing of 1 m³ of any type of stone	m³	3,19
15.100.1004	Loading onto vehicles, unloading from vehicles, and stowing of 1 ton of any type of reinforcement steel, profiles and flat bars (Loading fee is deducted for ex-factory materials.)	Tons	12,68
15.100.1005	Loading onto vehicles, unloading from vehicles, and stowing of 1 ton of steel pipes	Tons	25,34
15.100.1006	Loading onto vehicles, unloading from vehicles, and stowing of 1 ton of PE, HDPE and PVC-based pipes of any type	Tons	38,01
15.100.1007	Loading onto vehicles, unloading from vehicles, and stowing of regular, exterior wall, modular solid or perforated bricks and grooved tiles	1000 pcs.	15,63
15.100.1008	Loading onto vehicles, unloading from vehicles, and stowing of any type of AAC material, expanded perlite aggregate, and materials (bricks, panels, premixed dry mortar, etc.) made of such aggregate	m³	4,46
	CUTTING, UPROOTING AND CLEARING OF SHRUBS AND TREES IN THE EXCAVATION AREA		
15.105.1001	Cutting and clearing of the shrubs in the excavation area	100 m²	359,38
15.105.1002	Clearing and uprooting plants by machines in the excavation area	100 m²	43,50
	Cutting and Uprooting of Trees:		
15.105.1101	Manual cutting and uprooting of trees, for each tree that is 5 to 10 cm (including 10 cm) in diameter	Qty	7,19
15.105.1102	Manual cutting and uprooting of trees, for each tree that is 11 to 20 cm (including 20 cm) in diameter	Qty	14,38
15.105.1103	Manual cutting and uprooting of trees, for each tree that is 21 to 30 cm (including 30 cm) in diameter	Qty	28,75
15.105.1104	Manual cutting and uprooting of trees, for each tree that is 31 to 40 cm (including 40 cm) in diameter	Qty	43,13
15.105.1105	Manual cutting and uprooting of trees, for each tree that is 41 to 50 cm (including 50 cm) in diameter	Qty	57,50
15.105.1106	Manual cutting and uprooting of trees, for each tree that is 51 to 60 cm (including 60 cm) in diameter	Qty	86,25
15.105.1107	Manual cutting and uprooting of trees, for each tree that is 61 to 70 cm (including 70 cm) in diameter	Qty	129,38
15.105.1108	Manual cutting and uprooting of trees, for each tree that is 71 to 80 cm (including 80 cm) in diameter	Qty	172,50
15.105.1109	Manual cutting and uprooting of trees, for each tree that is greater than 81 cm in diameter	Qty	287,50
	PAY RISE FORMULAE FOR EXCAVATION DEPTH:		
15.110.1001	Pay rise for depth for manual (wide - narrow) deep excavations in any type of soil (unshored excavations): $F = 5.688 \times H - 11.376$ (including 25% contractor's general expenses and profit)	m³	
15.110.1002	Pay rise for depth for manual excavations (wide-narrow) in any type of soil (opposing, open, closely coated and fully coated shoring) $F = 11.375 \times H - 22.75$ (including 25% contractor's general expenses and profit)	m³	
	Note: H: The difference in meters between the elevation where free excavation ends and narrow excavation begins and the elevation of the deep excavation base elevation		

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
	A) MANUAL FREE EXCAVATIONS:		
15.115.1001	Manual digging of soft soil (loose soil and topsoil, loose silt, sand and similar other materials)	m ³	28,76
15.115.1002	Manual digging of hard soil (clay, silty, sandy and soft clay, clayey sand and gravel, soil with stones that can be laid by shovel, and similar other flooring materials)	m ³	37,39
15.115.1003	Manual digging of soft loose rock layer (hard clay, soft marl and tuff, compact gravel, any type of hand-laid loose rock sized up to 0.100 m ³ , mud and similar other soils for resemblance in terms of excavation difficulty)	m ³	46,73
15.115.1004	Manual digging of hard loose rock layer (altered and fissured rock, altered sandstone, schist, lithified marl and clay, any type of loose rock that can be crushed to 0.100 - 0.400 m ³ and laid manually, and similar other flooring materials)	m ³	53,91
15.115.1005	Excavation of soft rock manually or by a compressor, using explosives(stratified limestone, marl limestone, marl, schist, sandstone, loose conglomerate, gypsum, volcanic tuff (except basaltic tuff), same type of loose rock larger than 0.400 m ³ , and similar other rocks)	m ³	43,56
15.115.1006	Excavation of hard rock manually or by a compressor, using explosives(thick layers and masses of hard sandstone, strongly cemented conglomerate, hard limestone, marble, unaltered antigorite, andesite, trachyte basalt tuffs, and the same type of loose rocks and similar other rock blocks sized above 0.400 m ³)	m ³	52,78
15.115.1007	Excavation of very hard rock manually or by a compressor, using explosives (unaltered granite and similar materials, basalt, porphyry, quartz, and similar other loose rocks and similar other rock blocks sized above 0.400 m ³)	m ³	64,01
15.115.1008	Excavation of soft rock manually or by a compressor, without using explosives (stratified limestone, marl limestone, marl, schist, sandstone, loose conglomerate, gypsum, volcanic tuff (except basaltic tuff), same type of loose rock larger than 0.400 m ³ , and similar other rock blocks)	m ³	71,43
15.115.1009	Excavation of hard rock manually or by a compressor, without using explosives(hard sandstone, strongly cemented conglomerate, hard limestone, marble, unaltered antigorite, andesite, trachyte basalt tuffs, and the same type of loose rocks and similar other rock blocks sized above 0.400 m ³)	m ³	97,55
15.115.1010	Excavation of very hard rock manually or by a compressor, without using explosives(unaltered granite and similar materials, basalt, porphyry, quartz, and similar other loose rocks and similar other rock blocks sized above 0.400 m ³)	m ³	147,13
15.115.1011	Manual excavation of sludge or slime (creeping and adhesive soils with high water content, which do not easily release its water content)	m ³	86,26
	B) MANUAL DEEP EXCAVATIONS (The pay rise for depth per the item 15.110.1001 and 15.110.1002 shall be applicable to the excavations deeper than 2.00 meters.)		
15.115.1201	Wide and deep manual excavation of soft and hard soil at any depth(loose topsoil, loose silt, sand, clay, silty, sandy and soft clay, clayey sand and gravel, soil with stones that can be laid by shovel, and similar other soils)	m ³	53,93
15.115.1202	Narrow and deep manual excavation of soft and hard soil at any depth(loose topsoil, loose silt, sand, clay, silty, sandy and soft clay, clayey sand and gravel, soil with stones that can be laid by shovel, and similar other soils)	m ³	59,31

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.115.1203	Wide and deep manual excavation of soft and hard loose rock layer at any depth (hard clay, soft marl and tuff, compact gravel, mud because of similar difficulty of excavation, altered and fissured rock, altered sandstone, schist, lithified marl and clay, any type of loose rocks and similar other rock blocks sized 0 to 0.400 m³)	m³	77,65
15.115.1204	Narrow and deep manual excavation of soft and hard loose rock layer at any depth (hard clay, soft marl and tuff, compact gravel, mud because of similar difficulty of excavation, altered and fissured rock, altered sandstone, schist, lithified marl and clay, any type of loose rocks and similar other rock blocks sized 0 to 0.400 m³)	m³	85,41
15.115.1205	Wide and deep excavation manually or by compressor and explosive at any depth in soft, hard and very hard rock (stratified limestone, marn limestone, marl, schist, sandstone, loose conglomerate, gypsum, volcanic tuff (except basalt tuff) hard sandstone, strongly cemented conglomerate, hard limestone, marble, unaltered antigorite, andesite, trachyte basalt tuff, unaltered granite and similar other materials, basalt, porphyry, quartz, and similar type of loose rocks and similar other materials larger than 0.400 m³)	m³	95,13
15.115.1206	Narrow and deep excavation manually or by compressor and explosive at any depth in soft, hard and very hard rock (stratified limestone, marn limestone, marl, schist, sandstone, loose conglomerate, gypsum, volcanic tuff (except basalt tuff) hard sandstone, strongly cemented conglomerate, hard limestone, marble, unaltered antigorite, andesite, trachyte basalt tuff, unaltered granite and similar other materials, basalt, porphyry, quartz, and similar type of loose rocks and similar other materials larger than 0.400 m³)	m³	104,64
15.115.1207	Wide and deep excavation manually or by compressor and without explosive at any depth in soft rock (stratified limestone, marl limestone, marl, schist, sandstone, loose conglomerate, gypsum, volcanic tuff (except basaltic tuff), same type of loose rock larger than 0.400 m³, and similar other flooring materials)	m³	102,70
15.115.1208	Narrow and deep excavation manually or by compressor and without explosive at any depth in soft rock (stratified limestone, marl limestone, marl, schist, sandstone, loose conglomerate, gypsum, volcanic tuff (except basaltic tuff), same type of loose rock larger than 0.400 m³, and similar other flooring materials)	m³	112,98
15.115.1209	Wide and deep excavation manually or by compressor and without explosive at any depth in hard rock (thick layers and masses of hard sandstone, strongly cemented conglomerate, hard limestone, marble, unaltered antigorite, andesite, trachyte basalt tuffs, and the same type of loose rocks and similar other flooring materials sized above 0.400 m³)	m³	128,81
15.115.1210	Narrow and deep excavation manually or by compressor and without explosive at any depth in hard rock (thick layers and masses of hard sandstone, strongly cemented conglomerate, hard limestone, marble, unaltered antigorite, andesite, trachyte basalt tuffs, and the same type of loose rocks and similar other flooring materials sized above 0.400 m³)	m³	141,70
15.115.1211	Wide and deep excavation manually or by compressor and without explosive at any depth in very hard rock (unaltered granite and similar materials, basalt, porphyry, quartz, and similar other loose rocks and similar other flooring materials sized above 0.400 m³)	m³	181,06
15.115.1212	Narrow and deep excavation manually or by compressor and without explosive at any depth in very hard rock (unaltered granite and similar materials, basalt, porphyry, quartz, and similar other loose rocks and similar other flooring materials sized above 0.400 m³)	m³	199,18

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.115.1213	Compression of any type of excavation laid for filling (except rock soil) in layers by tamping	m ³	15,23
15.115.1214	Plowing the surface beneath the backfill	1000 m ²	56,25
15.115.1215	Manual excavation of wide and deep sludge and slime at any depth (creeping and adhesive soils with high water content, which do not easily release its water content)	m ³	130,11
15.115.1216	Manual excavation of narrow and deep sludge and slime at any depth (creeping and adhesive soils with high water content, which do not easily release its water content)	m ³	143,13
	MECHANIZED EXCAVATIONS FOR CONSTRUCTION WORKS:		
	A- Mechanized free excavations:		
15.120.1001	Machine excavation of soft and hard soil (Free excavation)	m ³	4,73
15.120.1002	Machine excavation of soft and hard layers of loose rock (Free excavation)	m ³	6,29
15.120.1003	Machine excavation of sludge and slime (Free excavation)	m ³	9,30
15.120.1004	Machine excavation of soft rock, using explosives (Free excavation)	m ³	15,24
15.120.1005	Machine excavation of soft rock, without using explosives (Free excavation)	m ³	10,68
15.120.1006	Machine excavation of hard rock, using explosives (Free excavation)	m ³	19,61
15.120.1007	Machine excavation of hard rock, without using explosives (Free excavation)	m ³	24,48
15.120.1008	Machine excavation of very hard rock, using explosives (Free excavation)	m ³	25,23
15.120.1009	Machine excavation of very hard rock, without using explosives (Free excavation)	m ³	33,10
	B- Mechanized deep excavations:		
15.120.1101	Machine excavation of soft and hard soil at any depth and width (Deep excavation)	m ³	5,44
15.120.1102	Machine excavation of soft and hard layer of loose rock at any depth and width (Deep excavation)	m ³	8,01
15.120.1103	Machine excavation of sludge and slime at any depth and width (Deep excavation)	m ³	12,71
15.120.1104	Machine excavation of soft rock, using explosives at any depth and width (Deep excavation)	m ³	21,20
15.120.1105	Machine excavation of soft rock, without using explosives, at any depth and width (Deep excavation)	m ³	13,31
15.120.1106	Machine excavation of hard rock, using explosives at any depth and width (Deep excavation)	m ³	25,39

15.130.1004	Open timber shoring for excavations	m²	35,55
	JET GROUTING		
15.135.1001	Building jet grout columns Ø60 cm in diameter for any length, angle and any kind of soil (by jet 1 grouting method) (including drilling)	m	87,00
15.135.1002	Building jet grout columns Ø80 cm in diameter for any length, angle and any kind of soil (by jet 1 grouting method) (including drilling)	m	100,66
15.135.1003	Building jet grout columns Ø60 cm in diameter for any length, angle and any kind of soil (by jet 2 grouting method) (including drilling)	m	102,40
15.135.1004	Building jet grout columns Ø80 cm in diameter for any length, angle and any kind of soil (by jet 2 grouting method) (including drilling)	m	118,11
15.135.1005	Building jet grout columns Ø100 cm in diameter for any length, angle and any kind of soil (by jet 2 grouting method) (including drilling)	m	140,89
	BORED PILE WORKS (including the boring and concrete charges, excluding the iron charge)		
	Using C 20 / 25 ready-mix concrete		
15.140.1001	Making cast in-situ reinforced concrete bored piles with Ø30 cm diameter, any length, C 20/25 compressive strength	m	110,00
15.140.1002	Making cast in-situ reinforced concrete bored piles with Ø45 cm diameter, any length, C 20/25 compressive strength	m	142,00

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.140.1003	Making cast in-situ reinforced concrete bored piles with Ø65 cm diameter, C 20/25 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	239,93
15.140.1004	Making cast in-situ reinforced concrete bored piles with Ø65 cm diameter, C 20/25 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	260,08
15.140.1005	Making cast in-situ reinforced concrete bored piles with Ø80 cm diameter, C 20/25 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	312,49
15.140.1006	Making cast in-situ reinforced concrete bored piles with Ø80 cm diameter, C 20/25 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	346,08
15.140.1007	Making cast in-situ reinforced concrete bored piles with Ø100 cm diameter, C 20/25 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	468,09
15.140.1008	Making cast in-situ reinforced concrete bored piles with Ø100 cm diameter, C 20/25 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	528,10
15.140.1009	Making cast in-situ reinforced concrete bored piles with Ø120 cm diameter, C 20/25 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	643,36
15.140.1010	Making cast in-situ reinforced concrete bored piles with Ø120 cm diameter, C 20/25 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	729,13
15.140.1011	Making cast in-situ reinforced concrete bored piles with Ø165 cm diameter, C 20/25 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	1.059,66
15.140.1012	Making cast in-situ reinforced concrete bored piles with Ø165 cm diameter, C 20/25 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	1.231,16
	Using C 25 / 30 ready-mix concrete		
15.140.1101	Making cast in-situ reinforced concrete bored piles with Ø30 cm diameter, any length, C 25/30 compressive strength	m	110,60
15.140.1102	Making in-situ reinforced concrete bored piles with Ø45 cm diameter, any length, C 25/30 compressive strength	m	143,28
15.140.1103	Making cast in-situ reinforced concrete bored piles with Ø65 cm diameter, C 25/30 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	242,63
15.140.1104	Making cast in-situ reinforced concrete bored piles with Ø65 cm diameter, C 25/30 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	262,78
15.140.1105	Making cast in-situ reinforced concrete bored piles with Ø80 cm diameter, C 25/30 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	316,61
15.140.1106	Making cast in-situ reinforced concrete bored piles with Ø80 cm diameter, C 25/30 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	350,20
15.140.1107	Making cast in-situ reinforced concrete bored piles with Ø100 cm diameter, C 25/30 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	474,54
15.140.1108	Making cast in-situ reinforced concrete bored piles with Ø100 cm diameter, C 25/30 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	534,55
15.140.1109	Making cast in-situ reinforced concrete bored piles with Ø120 cm diameter, C 25/30 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	652,66

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.140.1110	Making cast in-situ reinforced concrete bored piles with Ø120 cm diameter, C 25/30 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	738,43
15.140.1111	Making cast in-situ reinforced concrete bored piles with Ø165 cm diameter, C 25/30 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	1.077,29
15.140.1112	Making cast in-situ reinforced concrete bored piles with Ø165 cm diameter, C 25/30 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	1.248,79
	Using C 30 / 37 ready-mix concrete		
15.140.1201	Making cast in-situ reinforced concrete bored piles with Ø30 cm diameter, any length, C 30/37 compressive strength	m	111,20
15.140.1202	Making cast in-situ reinforced concrete bored piles with Ø45 cm diameter, any length, C 30/37 compressive strength	m	144,55
15.140.1203	Making cast in-situ reinforced concrete bored piles with Ø65 cm diameter, C 30/37 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	245,33
15.140.1204	Making cast in-situ reinforced concrete bored piles with Ø65 cm diameter, C 30/37 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	265,48
15.140.1205	Making cast in-situ reinforced concrete bored piles with Ø80 cm diameter, C 30/37 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	320,74
15.140.1206	Making cast in-situ reinforced concrete bored piles with Ø80 cm diameter, C 30/37 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	354,33
15.140.1207	Making cast in-situ reinforced concrete bored piles with Ø100 cm diameter, C 30/37 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	480,99
15.140.1208	Making cast in-situ reinforced concrete bored piles with Ø100 cm diameter, C 30/37 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	541,00
15.140.1209	Making cast in-situ reinforced concrete bored piles with Ø120 cm diameter, C 30/37 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	661,96
15.140.1210	Making cast in-situ reinforced concrete bored piles with Ø120 cm diameter, C 30/37 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	747,73
15.140.1211	Making cast in-situ reinforced concrete bored piles with Ø165 cm diameter, C 30/37 compressive strength (0.00 to 18.00 m, including 18.00 m)	m	1.094,91
15.140.1212	Making cast in-situ reinforced concrete bored piles with Ø165 cm diameter, C 30/37 compressive strength (18.01 to 36.00 m, including 36.00 m)	m	1.266,41
	READY-MIX CONCRETE (GRAY, NORMAL)		
15.150.1001	Pouring of gray, regular, ready-mix concrete of compressive strength class C 8/10, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m³	187,30
15.150.1002	Pouring of gray, regular, ready-mix concrete of compressive strength class C 12/15, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m³	199,80
15.150.1003	Pouring of gray, regular, ready-mix concrete of compressive strength class C 16/20, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m³	207,61

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.150.1004	Pouring of gray, regular, ready-mix concrete of compressive strength class C 20/25, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	212,61
15.150.1005	Pouring of gray, regular, ready-mix concrete of compressive strength class C 25/30, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	220,11
15.150.1006	Pouring of gray, regular, ready-mix concrete of compressive strength class C 30/37, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	227,61
15.150.1007	Pouring of gray, regular, ready-mix concrete of compressive strength class C 35/45, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	241,36
15.150.1008	Pouring of gray, regular, ready-mix concrete of compressive strength class C 40/50, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	255,11
15.150.1009	Pouring of gray, regular, ready-mix concrete of compressive strength class C 45/55, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	260,11
15.150.1010	Pouring of gray, regular, ready-mix concrete of compressive strength class C 50/60, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	266,36
	READY-MIX CONCRETE (WHITE, NORMAL)		
15.150.1101	Pouring of white, regular, ready-mix concrete of compressive strength class C 8/10, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	262,30
15.150.1102	Pouring of white, regular, ready-mix concrete of compressive strength class C 12/15, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	269,80
15.150.1103	Pouring of white, regular, ready-mix concrete of compressive strength class C 16/20, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	286,36
15.150.1104	Pouring of white, regular, ready-mix concrete of compressive strength class C 20/25, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	301,36
15.150.1105	Pouring of white, regular, ready-mix concrete of compressive strength class C 25/30, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	316,36
15.150.1106	Pouring of white, regular, ready-mix concrete of compressive strength class C 30/37, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	337,61
15.150.1107	Pouring of white, regular, ready-mix concrete of compressive strength class C 35/45, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	360,11
15.150.1108	Pouring of white, regular, ready-mix concrete of compressive strength class C 40/50, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	390,11
15.150.1109	Pouring of white, regular, ready-mix concrete of compressive strength class C 45/55, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	412,61
15.150.1110	Pouring of white, regular, ready-mix concrete of compressive strength class C 50/60, manufactured in a concrete plant or purchased, and pumped by a concrete pump (including transportation of concrete)	m ³	435,11
	PREFABRICATED CONCRETE STRUCTURES		
15.155.1001	Flooring with 12-cm thickness, precast, prestressed, hollow, load-bearing concrete flooring components.	m ²	148,39

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.155.1002	Flooring with 16-cm thickness, precast, prestressed, hollow, load-bearing concrete flooring components.	m ²	152,79
15.155.1003	Flooring with 20-cm thickness, precast, prestressed, hollow, load-bearing concrete flooring components.	m ²	161,71
15.155.1004	Flooring with 20-cm thickness, precast, prestressed, hollow, heavy load-bearing concrete flooring components.	m ²	192,31
15.155.1005	Flooring with 24-cm thickness, precast, prestressed, hollow, load-bearing concrete flooring components.	m ²	209,00
15.155.1006	Flooring with 24-cm thickness, precast, prestressed, hollow, heavy load-bearing concrete flooring components.	m ²	237,05
15.155.1007	Building walls with 12-cm thickness, precast, prestressed, hollow concrete partition (wall) components.	m ²	137,04
15.155.1008	Building walls with 16-cm thickness, precast, prestressed, hollow concrete partition (wall) components.	m ²	151,06
	PROCESSING - ATTACHMENT OF CONCRETE STEEL BARS WITH SLEEVES:		
15.160.1001	Installation of ribbed steel mesh 1,500 to 3,000 kg/m ² (including 3,000 kg/m ²)	Tons	4.319,38
15.160.1002	Installation of ribbed steel mesh 3,001 to 10,000 kg/m ² (including 10,000 kg/m ²)	Tons	4.226,31
15.160.1003	Cutting, bending, and installation of Ø8 to Ø12-mm ribbed concrete steel bars	Tons	4.029,78
15.160.1004	Cutting, bending, and installation of Ø14 to Ø28-mm ribbed concrete steel bars	Tons	3.965,28
15.160.1005	Cutting, bending, and installation of ribbed concrete steel bars larger than Ø28 mm	Tons	3.916,65
	STEEL STRUCTURES:		
15.165.1001	Individual or joint preparation and installation of irons of any profile (rafters made as purlins, one-way slabs, continuous beams, individual roof purlins and rafters, lintels, one-way slabs, corner reinforcement irons, columns for simple use, and girders used for bonding of vierendeel columns, and similar other structures)	Tons	7.097,03
15.165.1002	Production and installation of roof trusses with profile iron	Tons	7.529,71
15.165.1003	Construction and installation of carcass (framework) with any profile, steel bar and steel sheet (structural carcass, profile iron beams for bridges, ends, connections and other structures)	Tons	7.131,60
	FORMWORK		
15.180.1001	Serial production of wooden formwork	m ²	21,21
15.180.1002	Production of concrete or reinforced concrete form made of wood	m ²	54,95
15.180.1003	Production of plywood reinforced concrete form with smooth surface	m ²	57,48
15.180.1004	Production of concrete or reinforced concrete form with sheet metal	m ²	60,58
15.180.1005	Production of reinforced concrete formwork with tunnel formwork system	m ²	68,09
	FORMWORK AND SCAFFOLDS		
15.185.1001	Making formwork with steel pipes (0.00 to 4.00 m)	m ³	7,89
15.185.1002	Making formwork with steel pipes (4.01 to 6.00 m)	m ³	9,24
15.185.1003	Making formwork with steel pipes (6.01 to 8.00 m)	m ³	10,58
15.185.1004	Making formwork with steel pipes (8.01 to 10.00 m)	m ³	11,95
15.185.1011	Making fully-safe exterior wall working scaffold with precast components (0.00 to 51.50 m)	m ²	12,90
15.185.1012	Making fully-safe ceiling working scaffold with precast components (0.00 to 21.50 m)	m ³	10,48

	APPLICATIONS OF VARIOUS BUILDING CHEMICALS		
15.190.1001	Application of basalt aggregate (gray) surface hardeners and curing (on fresh concrete)	m ²	10,64
15.190.1002	Application of quartz aggregate (gray) surface hardeners and curing (on fresh concrete)	m ²	10,95
15.190.1003	Application of quartz-corundum aggregate (gray) surface hardeners and curing (on fresh concrete)	m ²	11,89
15.190.1004	Application of corundum aggregate (gray) surface hardeners and curing (on fresh concrete)	m ²	12,83
15.190.1005	Grooving joints in 4 mm width and 40 mm depth, and filling polyethylene cylinder and polyurethane joint mastic	m ²	7,59
15.190.1006	Curing of fresh concrete surfaces	m ²	2,23
15.190.1007	Leveling of the floor at 2 mm thickness on average with cement-based, self-leveling mortar	m ²	13,18
	INSTALLATION OF CONCRETE/REINFORCED CONCRETE PIPES		
15.195.1001	Installation of 1500-mm-long concrete pipes with integrated seal, Ø200-mm inner diameter and 30-40-mm thickness	m	54,01
15.195.1002	Installation of 1500-mm-long concrete pipes with integrated seal, Ø300-mm inner diameter and 45-50-mm thickness	m	68,98
15.195.1003	Installation of 1500-mm-long concrete pipes with integrated seal, Ø400-mm inner diameter and 45-55-mm thickness	m	90,85
15.195.1004	Installation of 2000-mm-long reinforced concrete pipes with integrated seal, Ø1000-mm inner diameter and 110-115-mm thickness	m	431,23
	INSTALLATION OF DRAINAGE BOARDS		
15.200.1001	Supply and installation of HDPE-based drainage and protection boards on thermal insulators applied with water insulation and insulation pins for basement curtains (150 ≤ compressive strength < 200 KN/m ²)	m ²	7,74
15.200.1002	Supply and installation of HDPE-based drainage and protection boards on thermal insulators applied with water insulation and insulation pins for basement curtains (200 ≤ compressive strength < 250 KN/m ²)	m ²	8,73
15.200.1003	Supply and installation of HDPE-based drainage and protection boards on thermal insulators applied with water insulation and insulation pins for basement curtains (250 ≤ compressive strength < 350 KN/m ²)	m ²	10,30
15.200.1004	Supply and installation of HDPE-based drainage and protection boards applied on water insulation for basement curtains (150 ≤ compressive strength < 200 KN/m ²)	m ²	9,25
15.200.1005	Supply and installation of HDPE-based drainage and protection boards applied on water insulation for basement curtains (200 ≤ compressive strength < 250 KN/m ²)	m ²	10,24
15.200.1006	Supply and installation of HDPE-based drainage and protection boards applied on water insulation for basement curtains (250 ≤ compressive strength < 350 KN/m ²)	m ²	11,81
	INSTALLATION OF DRAINAGE WITH PVC-BASED, CORRUGATED DRAINAGE PIPES		
15.205.1001	Supply and installation of PVC-based, corrugated drainage pipes with Ø100 mm nominal diameter	m	4,84
15.205.1002	Supply and installation of PVC-based, corrugated drainage pipes with Ø125 mm nominal diameter	m	7,68
15.205.1003	Supply and installation of PVC-based, corrugated drainage pipes with Ø160 mm nominal diameter	m	11,55
15.205.1004	Supply and installation of PVC-based, corrugated drainage pipes with Ø200 mm nominal diameter	m	15,86

15.230.1208	Hollow tile flooring with 35-cm-high pumice concrete hollow blocks (min. 400 kg/m³)	m²	67,19
	Supply and installation of reinforced pumice concrete lintel		
15.230.1301	Supply and installation of 10-cm thickness reinforced pumice concrete lintel	m²	53,69
15.230.1302	Supply and installation of 13.5-cm thickness reinforced pumice concrete lintel	m²	69,38
15.230.1303	Supply and installation of 15-cm thickness reinforced pumice concrete lintel	m²	76,81
15.230.1304	Supply and installation of 19-cm thickness reinforced pumice concrete lintel	m²	95,58
	LIGHTWEIGHT SANDWICH MASONRY UNITS WITH AN INSULATION LAYER		
15.235.1001	Building walls with lightweight sandwich masonry units with 14 cm total thickness, 5.5 cm EPS thickness, and 2.5 N/mm² compressive strength	m²	97,36
15.235.1002	Building walls with lightweight sandwich masonry units with 15 cm total thickness, 6 cm EPS thickness, and 0.9 N/mm² compressive strength	m²	60,49
15.235.1003	Building walls with lightweight sandwich masonry units with 19 cm total thickness, 6 cm EPS thickness, and 0.9 N/mm² compressive strength	m²	64,86
15.235.1004	Building walls with lightweight sandwich masonry units with 19.5 cm total thickness, 8.5 cm EPS thickness, and 2.5 N/mm² compressive strength	m²	110,31
15.235.1005	Building walls with lightweight sandwich masonry units with 20 cm total thickness, 6 cm EPS thickness, and 1 N/mm² compressive strength	m²	66,94
	BRICK-LAYING WORKS BY USING CALCIUM SILICATE MASONRY UNITS		
15.240.1001	Building 11.5-cm-thick walls with calcium silicate masonry units sized (37.5 x 11.5 x 19 cm) (application with glue)	m²	38,19
15.240.1002	Building 19-cm thickness walls with calcium silicate masonry units sized (37.5 x 19 x 19 cm) (application with glue)	m²	51,03
15.240.1003	Building 24-cm thickness walls with calcium silicate masonry units sized (37.5 x 24 x 19 cm) (application with glue)	m²	56,88
	LAYING OF GEOTEXTILE FELT		
15.245.1001	Laying of 150 g/m² of geotextile felt	m²	3,44
15.245.1002	Laying of 250 g/m² of geotextile felt	m²	4,13
15.245.1003	Laying of 500 g/m² of geotextile felt	m²	6,05
	LEVELING WORKS		
15.250.1001	Application of a leveling coat with 200 kg/m³ cement content	m²	18,59

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
	SCREED WORKS	m ²	
15.250.1101	Application of 2.5-cm thickness screed with 400 kg/m ³ cement content	m ²	26,24
15.250.1102	Application of 2.5-cm thickness screed with 450 kg/m ³ cement content	m ²	26,40
15.250.1103	Application of 2.5-cm thickness screed with 500 kg/m ³ cement content	m ²	26,95
	WATER INSULATION WITH POLYMER BITUMEN SHEETS		
15.255.1001	Installation of duplex water insulation with polymer bitumen sheets with 3-mm thickness plastomer-based glass tissue carriers (bent at -5°C) and 3-mm thickness plastomer-based (bent at -5°C) polyester felt carriers	m ²	36,60
15.255.1002	Installation of duplex water insulation with polymer bitumen sheets with 3-mm thickness plastomer-based glass tissue carriers (bent at -10°C) and 3-mm thickness plastomer-based (bent at -10°C) polyester felt carriers	m ²	38,05
15.255.1003	Installation of duplex water insulation with polymer bitumen sheets with 3-mm thickness elastomer-based glass tissue carriers (bent at -20°C) and 3-mm thickness elastomer-based (bent at -20°C) polyester felt carriers	m ²	42,28
15.255.1004	Installation of duplex water insulation with polymer bitumen sheets with 3-mm thickness plastomer-based (bent at -5°C) polyester felt carriers	m ²	38,54
15.255.1005	Installation of duplex water insulation with polymer bitumen sheets with 3-mm thickness plastomer-based (bent at -10°C) polyester felt carriers	m ²	40,14
15.255.1006	Installation of duplex water insulation with polymer bitumen sheets with 3-mm thickness elastomer-based (bent at -20°C) polyester felt carriers	m ²	45,44
15.255.1007	Installation of duplex water insulation with polymer bitumen sheets with 3-mm and 4-mm thickness plastomer-based (bent at -5°C) polyester felt carriers	m ²	40,91
15.255.1008	Installation of duplex water insulation with polymer bitumen sheets with 3-mm and 4-mm thickness plastomer-based (bent at -10°C) polyester felt carriers	m ²	42,65
15.255.1009	Installation of duplex water insulation with polymer bitumen sheets with 4-mm thickness elastomer-based (bent at -20°C) polyester felt carriers	m ²	48,18
15.255.1010	Installation of duplex water insulation with polymer bitumen sheets mineral-coated on one side, with 3.3-mm thickness plastomer-based glass tissue carriers (bent at -5°C) and 3-mm thickness plastomer-based (bent at -5°C) polyester felt carriers	m ²	38,98
15.255.1011	Installation of duplex water insulation with polymer bitumen sheets mineral-coated on one side, with 3.3-mm thickness plastomer-based glass tissue carriers (bent at -10°C) and 3-mm thickness plastomer-based polyester felt carriers (bent at -10°C)	m ²	40,56
15.255.1012	Installation of duplex water insulation with polymer bitumen sheets mineral-coated on one side, with 3.3-mm thickness elastomer-based glass tissue carriers (bent at -20°C) and 3-mm thickness elastomer-based polyester felt carriers (bent at -20°C)	m ²	44,65
15.255.1013	Installation of duplex water insulation with polymer bitumen sheets mineral-coated on one side, with 3.3-mm thickness plastomer-based polyester felt carriers (bent at -5°C) and 3-mm thickness plastomer-based (bent at -5°C) polyester felt carriers	m ²	40,91

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.270.1012	Water insulation in 3 layers with a total thickness of 2 mm with cement-based, one-component, crystallized water insulation mortar and mesh reinforcement	m ²	36,71
15.270.1101	Making 2-mm-thickness water insulation using hybrid Polyurea-based, two-component water insulation agent	m ²	105,44
15.270.1111	Making 2-mm-thickness water insulation using 100% Pure Polyurea-based, two-component water insulation agent	m ²	193,44
	JOINTING AND POINTING		
15.275.1001	Making flush grooved joints on stone wall surfaces	m ²	14,90
15.275.1002	Making relief joints on stone wall surfaces	m ²	16,29
	PLASTERING		
15.275.1101	Plastering with rough and fine mortar with 250/350 kg/m ³ cement content (exterior plaster)	m ²	40,20
15.275.1102	Plastering with rough and fine mortar with 200/250 kg lime/cement mixture content (interior plaster)	m ²	36,23
15.275.1103	Plastering with rough and fine mortar with 250/350 kg lime/cement mixture content (ceiling plaster)	m ²	37,49
15.275.1104	Rough plastering with rough and fine mortar with 250/350 kg/m ³ cement content	m ²	28,96
15.275.1105	Applying single layer rough plaster with 350 kg/m ³ cement content	m ²	26,44
	FILLING OF THE BACK OF METAL DOOR FRAME		
15.275.9991	Filling the back of metal door frames with concrete grout	m ²	33,98
	GYPSUM PLASTER AND LINING WORKS		
15.280.1001	Gypsum plaster over rough lime plaster (with slaked lime bag)	m ²	28,06
15.280.1002	Perlite plaster and satin plaster lining of such surfaces as concrete, brick walls, etc.	m ²	51,20
15.280.1003	Applying 5-mm thickness repair plaster made by a mixture of satin plaster and perlite plaster groups (For rough plaster, exposed concrete surfaces, perlite plaster and similar other surfaces)	m ²	36,01
15.280.1004	Gypsum priming (polishing) (for repair works)	m ²	5,66
15.280.1005	5-mm thickness satin gypsum coating of rough plaster surfaces, etc.	m ²	13,94
15.280.1006	3-mm thickness satin gypsum coating of fine plaster, gypsum plaster surfaces, etc.	m ²	11,16
15.280.1007	15-mm thickness, single layer plastering of ceilings with machine-applied ready-mix plaster	m ²	22,19
15.280.1008	20-mm thickness, single layer plastering of walls with machine-applied ready-mix plaster (on concrete, brick and similar other surfaces)	m ²	25,45
	APPLICATION OF INSULATION PLASTER		
15.285.1001	Application of 2-cm thickness plaster on interior or exterior surfaces with ready-mix (factory-made) rough/fine plaster (TI, WI, CSI)	m ²	49,14
15.285.1002	Application of 3-cm thickness plaster on interior or exterior surfaces with ready-mix (factory-made) rough/fine plaster (TI, WI, CSI)	m ²	68,34
15.285.1003	Application of 4-cm thickness plaster on interior or exterior surfaces with ready-mix (factory-made) rough/fine plaster (TI, WI, CSI)	m ²	87,54
15.285.1011	Application of 2-cm thickness plaster on interior or exterior surfaces with ready-mix (factory-made) rough/fine plaster (TI, WI, CSII)	m ²	50,79
15.285.1012	Application of 3-cm thickness plaster on interior or exterior surfaces with ready-mix (factory-made) rough/fine plaster (TI, WI, CSII)	m ²	70,81
15.285.1013	Application of 4-cm thickness plaster on interior or exterior surfaces with ready-mix (factory-made) rough/fine plaster (TI, WI, CSII)	m ²	90,84

	WOODEN ROOF		
15.300.1001	Building wooden free-standing roof (wood paneling under the roofing)	m ²	112,56
15.300.1002	Building wooden free-standing roof (OSB/3 paneling under the roofing)	m ²	112,35
15.300.1003	Building wooden truss roof	m ³	2.338,11
15.300.1004	Building truss roof made of planed wood	m ³	2.420,75
15.300.1005	Wood paneling on the roof	m ²	50,20
15.300.1006	OSB/3 paneling on the roof	m ²	43,05
15.300.1007	Planed wood paneling of eaves and pediments	m ²	83,96
	CLAY TILE ROOFING WORKS		
15.305.1001	Roofing with top and bottom bricks (pantile) (Tightness Class: Group 1) (Resistant to 150 freezing - thawing cycles) (3-lath system)	m ²	117,70
15.305.1002	Roofing with top and bottom bricks (pantile) (Tightness Class: Group 1) (Resistant to 90 freezing - thawing cycles) (3-lath system)	m ²	112,45
15.305.1003	Roofing with tiles with interlocking side and top edges (Tightness Class: Group 1) (Resistant to 150 freezing - thawing cycles) (2-lath system)	m ²	71,25
15.305.1004	Roofing with tiles with interlocking side and top edges (Tightness Class: Group 1) (Resistant to 90 freezing - thawing cycles) (2-lath system)	m ²	68,63
15.305.1005	Building ridges using ridge tiles (Tightness Class: Group 1) (Resistant to 150 freezing - thawing cycles)	m	59,13
15.305.1006	Building ridges using ridge tiles (Tightness Class: Group 1) (Resistant to 90 freezing - thawing cycles)	m	56,50
	ROOFING WITH CONCRETE / PERLITE CONCRETE TILES		
15.305.1201	Roofing with colorless concrete tiles (2-lath system)	m ²	69,94
15.305.1202	Roofing with concrete tiles painted in iron oxide (2-lath system)	m ²	75,45
15.305.1203	Roofing with concrete tiles with color glazing, and painted in iron oxide and (2-lath system)	m ²	81,10
15.305.1204	Building ridges with colorless concrete ridge tiles	m	64,51
15.305.1205	Building ridges with concrete ridge tiles painted in iron oxide	m	68,98
15.305.1206	Building ridges with concrete ridge tiles painted in iron oxide and with colored glazing	m	73,70
15.305.1207	Roofing with colorless perlite concrete tiles (2-lath system)	m ²	65,35
15.305.1208	Roofing with perlite concrete tiles painted in iron oxide (2-lath system)	m ²	69,94
15.305.1209	Roofing with perlite concrete tiles with color glazing, and painted in iron oxide and (2-lath system)	m ²	75,19
15.305.1210	Building ridges with colorless perlite concrete ridge tiles	m	62,54
15.305.1211	Building ridges with perlite concrete ridge tiles painted in iron oxide	m	64,90
15.305.1212	Building ridges with concrete ridge tiles painted in iron oxide and with colored glazing	m	71,46

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.305.1213	Water insulation of walls, chimney bottoms, etc. using self-adhesive, aluminum-reinforced, UV-resistant chimney bottom tapes coated with polybutylene/vulcanized thermoplastic (TPV) (Total width: 25 to 40 cm)	m	60,44
15.305.1214	Sealing of insulation finishes with an aluminum pressure bar and polyurethane mastic	m	23,33
15.305.1215	Making roof valleys with PVC-based, self-channeled, UV-resistant, vane-type groove/inclined gutter water insulation (min. 50 cm wide)	m	50,05
	TIN WORKS		
	Production and installation of vertical rainwater downpipes:		
15.310.1001	Production and installation of vertical rainwater downpipes 150 mm in diameter, made of no. 12 zinc sheets.	m	80,66
15.310.1002	Production and installation of vertical rainwater downpipes 120 mm in diameter, made of no. 12 zinc sheets.	m	70,46
15.310.1003	Production and installation of vertical rainwater downpipes 100 mm in diameter, made of no. 12 zinc sheets.	m	63,68
15.310.1004	Production and installation of vertical rainwater downpipes 100 mm in diameter, made of no. 10 zinc sheets.	m	56,28
15.310.1005	Production and installation of vertical rainwater downpipes 80 mm in diameter, made of no. 10 zinc sheets.	m	52,31
15.310.1006	Production and installation of vertical rainwater downpipes 80 mm in diameter, made of no. 12 zinc sheets.	m	58,64
15.310.1007	Production and installation of vertical rainwater downpipes 75 mm in diameter, made of no. 10 zinc sheets.	m	49,69
15.310.1008	Production and installation of vertical rainwater downpipes 70 mm in diameter, made of no. 10 zinc sheets.	m	46,00
	Production and installation of rain gutters		
15.310.1101	Production and installation of rain gutters 240 mm in diameter, made of no. 14 zinc sheets.	m	162,95
15.310.1102	Production and installation of rain gutters 185 mm in diameter, made of no. 12 zinc sheets.	m	127,96
15.310.1103	Production and installation of rain gutters 155 mm in diameter, made of no. 12 zinc sheets.	m	116,64
15.310.1104	Production and installation of rain gutters 130 mm in diameter, made of no. 12 zinc sheets.	m	105,43
15.310.1105	Production and installation of rain gutters 110 mm in diameter, made of no. 12 zinc sheets.	m	99,05
15.310.1106	Production and installation of rain gutters 90 mm in diameter, made of no. 12 zinc sheets.	m	90,60
	Other tin works		
15.310.1201	Production and installation of inclined roof valleys made of zinc no. 14	m	106,78
15.310.1202	Production and installation of horizontal roof valleys in the form of gutter, made of zinc no. 14	m	201,60
15.310.1203	Production and installation of rainwater hoppers sized 30 x 40 x 30 cm made of no. 12 zinc sheet	Qty	190,80
15.310.1204	Production and installation of roof valleys made of zinc no. 14 for the back of the attic wall	m	221,24
15.310.1205	Production and installation of flashing sheets, chimney edges, roof examination windows and roof lantern bases, made of no. 12 zinc sheet	m	78,54
15.310.1206	Production and installation of roof valleys made of no. 12 zinc sheet on the top and sides of the attic walls	m ²	152,33

15.310.1207	Production and installation of window sills made of no. 12 zinc sheet	m	70,66
15.310.1208	Production and installation of chimney cleaning boxes made of no. 12 zinc sheet	Qty	41,88
15.310.1209	Production and installation of stove flue inlet and cap made of no. 12 zinc sheet	Qty	29,86
	Production of copper pipes, gutters, etc.		
15.310.1301	Production and installation of vertical rainwater downpipes 125 mm in diameter, made of 0.50-mm copper sheets.	m	123,55
15.310.1302	Production and installation of rain gutters (with round or angular section) that are 155 mm in diameter and made of 0.50-mm copper sheet	m	191,58
15.310.1303	Production and installation of roof valleys made of 0.50-mm copper sheet	m	200,08
15.310.1304	Production and installation of roof valleys in the form of gutter made of 0.50-mm copper sheet	m	345,86
15.310.1305	Production and installation of rain water hoppers sized 30 x 40 x 30 cm made of 0.50-mm copper sheet	Qty	292,39
15.310.1306	Production and installation of roof valleys made of 0.50-mm copper sheet on the back of the attic wall	m	364,99
15.310.1307	Production and installation of flashing sheets, chimney edges, roof examination windows and roof lantern bases made of 0.50-mm copper sheet	m	140,06
15.310.1308	Production and installation of roof valleys made of 0.50-mm copper sheet on the top and sides of the attic walls	m ²	291,69
15.310.1309	Production and installation of window sills made of 0.50-mm copper sheet	m	123,09
	PVC Rainwater Downpipe, Gutter, etc.		
15.315.1001	Supply and installation of hard PVC rainwater downpipes Ø70 mm in diameter and with a bellmouth at one end	m	15,48
15.315.1002	Supply and installation of hard PVC rainwater downpipes Ø100 mm in diameter and with a bellmouth at one end	m	22,46
15.315.1003	Supply and installation of hard PVC rainwater downpipes Ø125 mm in diameter and with a bellmouth at one end	m	25,75
15.315.1004	Supply and installation of hard PVC rain gutters Ø100 mm in diameter	m	28,44
15.315.1005	Supply and installation of hard PVC rain gutters Ø150 mm in diameter	m	35,88
	Jointless Rain Gutter		
15.315.1101	Production and installation of 0.50-mm thickness, hot-dip galvanized and coated sheet metal jointless pipes (Total sheet metal width: 30 cm)	m	24,25
	INSULATED ROOF AND WALL PANEL WORKS		
15.320.1001	Roofing with 50-mm polyurethane-insulated roof panels (0.50-mm thickness, coated, galvanized sheet metal top, and 0.40-mm thickness, coated, galvanized sheet metal bottom) on the current wooden, reinforced concrete or steel purlins.	m ²	122,70
15.320.1002	Roofing with 50-mm polyurethane-insulated roof panels (1.20-mm thickness, PVC membrane top, and 0.60-mm thickness, coated, galvanized sheet metal bottom) on the current wooden, reinforced concrete or steel purlins.	m ²	174,60
15.320.1003	Roofing with 50-mm polyurethane-insulated roof panels (1.20-mm thickness, TPO membrane top, and 0.60-mm thickness, coated, galvanized sheet metal bottom) on the current wooden, reinforced concrete or steel purlins.	m ²	180,60

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.320.1004	Roofing with 50-mm polyisocyanurate-insulated roof panels (0.50-mm thickness, coated, galvanized sheet metal top, and 0.40-mm thickness, coated, galvanized sheet metal bottom) on the current wooden, reinforced concrete or steel purlins.	m ²	131,70
15.320.1005	Roofing with 50-mm polyisocyanurate-insulated roof panels (1.20-mm thickness, PVC membrane top, and 0.60-mm thickness, coated, galvanized sheet metal bottom) on the current wooden, reinforced concrete or steel purlins.	m ²	188,10
15.320.1006	Roofing with 50-mm polyisocyanurate-insulated roof panels (1.20-mm thickness, TPO membrane top, and 0.60-mm thickness, coated, galvanized sheet metal bottom) on the current wooden, reinforced concrete or steel purlins.	m ²	192,60
15.320.1007	Roofing with 60-mm polystyrene-insulated roof panels (0.70-mm thickness top, and 0.50-mm thickness bottom made of natural, embossed aluminum) on the current wooden, reinforced concrete or steel purlins.	m ²	154,20
15.320.1008	Roofing with 60-mm polystyrene-insulated roof panels (0.50-mm thickness, coated, galvanized sheet metal top, and 0.40-mm thickness, coated, galvanized sheet metal bottom) on the current wooden, reinforced concrete or steel purlins.	m ²	127,20
15.320.1009	Roofing with 60-mm polystyrene-insulated roof panels (0.50-mm thickness coated, galvanized sheet metal top, and 0.40-mm thickness natural, embossed aluminum bottom) on the current wooden, reinforced concrete or steel purlins.	m ²	137,70
15.320.1010	Roofing with 60-mm rock wool-insulated roof panels (0.50-mm thickness coated, galvanized sheet metal top, and 0.50-mm thickness coated, galvanized sheet metal bottom) on the current steel purlins.	m ²	157,35
15.320.1011	Roofing with 60-mm rock wool-insulated roof panels (1.20-mm thickness, PVC membrane top, and 0.60-mm thickness, coated, galvanized sheet metal bottom) on the current steel purlins.	m ²	207,24
15.320.1012	Roofing with 60-mm rock wool-insulated roof panels (1.20-mm thickness, TPO membrane top, and 0.60-mm thickness, coated, galvanized sheet metal bottom) on the current steel purlins.	m ²	211,74
15.320.1013	Roofing with 60-mm rock wool-insulated roof panels (1.50-mm thickness, TPO membrane top, and 0.60-mm thickness, coated, galvanized sheet metal bottom) on the current steel purlins.	m ²	214,74
15.320.1014	Roofing with 50-mm rock wool + 25-mm polyurethane-insulated roof panels (1.20-mm thickness, PVC membrane top, and 0.60-mm thickness, coated, galvanized sheet metal bottom) on the current steel purlins.	m ²	223,74
15.320.1015	Roofing with 50-mm rock wool + 25-mm polyurethane-insulated roof panels (1.20-mm thickness, TPO membrane top, and 0.60-mm thickness, coated, galvanized sheet metal bottom) on the current steel purlins.	m ²	228,24
	ZINC, COPPER, ALUMINUM AND SHEET METAL ROOFING		
15.325.1001	Roofing with 0.50-mm thickness no. 10 zinc on wooden roof frame	m ²	168,36
15.325.1002	Roofing with 0.50-mm thickness copper plate on wooden roof frame	m ²	346,46
15.325.1003	Roofing with 0.66-mm copper plate on wooden roof frame	m ²	432,53
15.325.1004	0.70-mm roofing of flat aluminum sheet (EN AW 3003 Al-Mn1 Cu) on wooden roof frame	m ²	137,79

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.325.1005	Roofing with 0.70-mm thickness trapezoidal aluminum sheets (EN AW 3003 Al-Mn1 Cu) on the current wooden, reinforced concrete or steel purlins.	m ²	83,33
15.325.1006	Roofing with 0.70-mm thickness trapezoidal aluminum sheets (EN AW 1050A, Al 99.5) on the current wooden, reinforced concrete or steel purlins.	m ²	81,11
15.325.1007	Installing roof cover with 0.70-mm thickness trapezoidal aluminum sheets (EN AW 3003 Al-Mn1 Cu) on the existing reinforced concrete, precast, ready-mix concrete slabs or wooden roofing with sided wood.	m ²	96,96
15.325.1008	Roofing with 0.50-mm thickness hot-dip galvanized flat sheet metal on wooden roof.	m ²	92,05
15.325.1009	Roofing with 0.50-mm thickness hot-dip galvanized grooved/trapezoidal sheet metal on wooden roof.	m ²	49,33
	OTHER ROOFING WORKS		
15.325.1101	Roofing with grooved roofing covers made of fiber-reinforced cement on wooden roof	m ²	43,00
15.325.1102	Roofing with grooved bitumen panels in any color over wooden roof (CATEGORY R ≥ 1400 N/M ²) (Fire class: BROOF)	m ²	39,98
15.325.1103	Roofing with 0.50-mm thickness, hot-dip galvanized, grooved/trapezoidal sheet metal on the existing roof made of reinforced concrete or reinforced premix (with lightweight or regular aggregate) concrete slabs.	m ²	51,39
15.325.1104	Roofing with fiber-reinforced, grooved cement slabs on the existing roof made of reinforced concrete or reinforced premix (with lightweight or regular aggregate) concrete slabs.	m ²	47,49
15.325.1105	Roofing with grooved bitumen panels in any color on the existing roof made of reinforced concrete or reinforced premix (with lightweight or regular aggregate) concrete slabs (Category: R ≥ 1400 N/m ²) (Fire Class: BROOF).	m ²	46,63
15.325.1106	Roofing with grooved bitumen panels in any color on steel or precast reinforced concrete beams (CATEGORY: R≥ 1400N/M ²) (Fire Class: BROOF)	m ²	44,98
15.325.1107	Roofing with lead sheet on reinforced concrete roof.	Kg	19,16
15.325.1108	Roofing with 0.50-mm thickness, hot-dip galvanized, flat sheet metal on the existing roof made of reinforced ready-mix concrete slabs.	m ²	60,78
15.325.1109	Roofing with 0.50-mm thickness hot-dip galvanized grooved/trapezoidal sheet metal on steel or precast reinforced concrete beams.	m ²	46,98
15.325.1110	Roofing with grooved fiber-reinforced cement slabs on steel or precast reinforced concrete beams	m ²	43,08
	WATER INSULATION UNDER ROOFING.		
15.330.1001	Water insulation with minimum 1-mm thickness, non-laminated polymer bitumen cover with glass tissue carriers, coated with polyethylene film on both surfaces, for use under the roofing materials on pitched roofs	m ²	16,55
15.330.1002	Water insulation with minimum 0.60-mm thickness, non-laminated polymer bitumen cover with polyester felt carriers, coated with polyethylene film on both surfaces, for use under the roofing materials on pitched roofs	m ²	18,20
15.330.1003	Water insulation with vapor-permeable water insulation cover under the roofing for pitched roofs	m ²	14,63
15.330.1004	Water insulation with a 3-mm thickness polymer bitumen cover (Bent at -10°C) with plastomer-based glass tissue carriers under the roofing for pitched roofs.	m ²	22,45

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.330.1005	Water insulation with a 3-mm thickness polymer bitumen cover (Bent at -10°C) with plastomer-based polyester felt carriers under the roofing for pitched roofs.	m ²	24,44
15.330.1006	Water insulation with a 3-mm thickness polymer bitumen cover (Bent at -20°C) with elastomer-based glass tissue carriers under the roofing for pitched roofs.	m ²	23,96
15.330.1007	Water insulation with a 3-mm thickness polymer bitumen cover (Bent at -20°C) with elastomer-based polyester felt carriers under the roofing for pitched roofs.	m ²	26,99
15.330.1008	Water insulation with a 3-mm thickness polymer bitumen cover (Bent at -5°C) with plastomer-based glass tissue carriers under the roofing for pitched roofs.	m ²	21,83
15.330.1009	Water insulation with a 3-mm thickness polymer bitumen cover (Bent at -5°C) with plastomer-based polyester felt carriers under the roofing for pitched roofs.	m ²	23,69
15.330.1010	Water insulation with organic-fiber, bitumen-impregnated under-tile water insulation panels under the roofing for pitched roofs (over the existing veneer)	m ²	31,41
15.330.1011	Water insulation with organic-fiber, bitumen-impregnated under-tile water insulation panels under the roofing for pitched roofs (for reinforced concrete roofs)	m ²	38,81
	THERMAL INSULATION WITH XPS AND EPS FOAM MATERIALS		
	XPS Jacketing		
15.335.1001	Thermal insulation of exterior walls with 3-cm thickness, extruded polystyrene (CPS - 200 kPa compressive strength) panels with rough or smooth canals on its surface and coated with thermal insulation plaster (jacketing)	m ²	62,36
15.335.1002	Thermal insulation of exterior walls with 4-cm thickness, extruded polystyrene (CPS - 200 kPa compressive strength) panels with rough or smooth canals on its surface and coated with thermal insulation plaster (jacketing)	m ²	66,30
15.335.1003	Thermal insulation of exterior walls with 5-cm thickness, extruded polystyrene (CPS - 200 kPa compressive strength) panels with rough or smooth canals on its surface and coated with thermal insulation plaster (jacketing)	m ²	70,24
15.335.1004	Thermal insulation of exterior walls with 6-cm thickness, extruded polystyrene (CPS - 200 kPa compressive strength) panels with rough or smooth canals on its surface and coated with thermal insulation plaster (jacketing)	m ²	74,18
15.335.1005	Thermal insulation of exterior walls with 7-cm thickness, extruded polystyrene (CPS - 200 kPa compressive strength) panels with rough or smooth canals on its surface and coated with thermal insulation plaster (jacketing)	m ²	78,11
15.335.1006	Thermal insulation of exterior walls with 8-cm thickness, extruded polystyrene (CPS - 200 kPa compressive strength) panels with rough or smooth canals on its surface and coated with thermal insulation plaster (jacketing)	m ²	82,05
	EPS Sheathing		
15.335.1101	Thermal insulation of exterior walls with 3-cm thickness, expanded polystyrene (EPS - 16 kg/m ³ density) panels coated with thermal insulation plaster (sheathing)	m ²	57,05
15.335.1102	Thermal insulation of exterior walls with 4-cm thickness, expanded polystyrene (EPS - 16 kg/m ³ density) panels coated with thermal insulation plaster (sheathing)	m ²	59,21
15.335.1103	Thermal insulation of exterior walls with 5-cm thickness, expanded polystyrene (EPS - 16 kg/m ³ density) panels coated with thermal insulation plaster (sheathing)	m ²	61,38

	Carbon EPS Sheathing		
15.335.1201	Thermal insulation of exterior walls with 3-cm thickness, carbon-black, graphite-based, expanded polystyrene (EPS - 16 kg/m ³ density) panels coated with thermal insulation plaster (sheathing)	m ²	58,04
15.335.1202	Thermal insulation of exterior walls with 4-cm thickness, carbon-black, graphite-based, expanded polystyrene (EPS - 16 kg/m ³ density) panels coated with thermal insulation plaster (sheathing)	m ²	60,53
15.335.1203	Thermal insulation of exterior walls with 5-cm thickness, carbon-black, graphite-based, expanded polystyrene (EPS - 16 kg/m ³ density) panels coated with thermal insulation plaster (sheathing)	m ²	63,03
15.335.1204	Thermal insulation of exterior walls with 6-cm thickness, carbon-black, graphite-based, expanded polystyrene (EPS - 16 kg/m ³ density) panels coated with thermal insulation plaster (sheathing)	m ²	65,51
15.335.1205	Thermal insulation of exterior walls with 7-cm thickness, carbon-black, graphite-based, expanded polystyrene (EPS - 16 kg/m ³ density) panels coated with thermal insulation plaster (sheathing)	m ²	68,01
15.335.1206	Thermal insulation of exterior walls with 8-cm thickness, carbon-black, graphite-based, expanded polystyrene (EPS - 16 kg/m ³ density) panels coated with thermal insulation plaster (sheathing)	m ²	70,50
	Thermal Insulation for Basement Curtains with XPS		
15.335.1301	Thermal insulation over water insulation for basement walls using 3-cm thickness boards with smooth surface (XPS - 300 Kpa compressive strength)	m ²	18,33
15.335.1302	Thermal insulation over water insulation for basement walls using 4-cm thickness boards with smooth surface (XPS - 300 Kpa compressive strength)	m ²	22,61
15.335.1303	Thermal insulation over water insulation for basement walls using 5-cm thickness boards with smooth surface (XPS - 300 Kpa compressive strength)	m ²	26,69
	Thermal Insulation for Basement Curtains with EPS		
15.335.1401	Thermal insulation over water insulation on basement curtains with 3-cm thickness expanded polystyrene (EPS - 30 kg/m ³ density) panels	m ²	17,93
15.335.1402	Thermal insulation over water insulation on basement curtains with 4-cm thickness expanded polystyrene (EPS - 30 kg/m ³ density) panels	m ²	22,09
15.335.1403	Thermal insulation over water insulation on basement curtains with 5-cm thickness expanded polystyrene (EPS - 30 kg/m ³ density) panels	m ²	26,03
	XPS Thermal Insulation for Flooring with Soil Contact or for Inverted Roofs		
15.335.1501	Horizontal thermal insulation (for flooring with soil contact or fore inverted roofs) using 3-cm thickness boards with smooth surface (XPS - 300 Kpa compressive strength)	m ²	14,41
15.335.1502	Horizontal thermal insulation (for flooring with soil contact or fore inverted roofs, etc.) using 4-cm thickness boards with smooth surface (XPS - 300 Kpa compressive strength)	m ²	18,48

	Thermal Insulation with Rock Wool for Conventional Trafficable Roofs		
15.340.1201	Horizontal thermal insulation with 3-cm thickness rock wool panels (Rock wool - 150 kg/m ³ density - load-bearing) (on conventional trafficable roofs, etc.)	m ²	16,51
15.340.1202	Horizontal thermal insulation with 4-cm thickness rock wool panels (Rock wool - 150 kg/m ³ density - load-bearing) (on conventional trafficable roofs, etc.)	m ²	20,64
15.340.1203	Horizontal thermal insulation with 5-cm thickness rock wool panels (Rock wool - 150 kg/m ³ density - load-bearing) (on conventional trafficable roofs, etc.)	m ²	24,65
15.340.1204	Horizontal thermal insulation with 6-cm thickness rock wool panels (Rock wool - 150 kg/m ³ density - load-bearing) (on conventional trafficable roofs, etc.)	m ²	29,30
15.340.1205	Horizontal thermal insulation with 8-cm thickness rock wool panels (Rock wool - 150 kg/m ³ density - load-bearing) (on conventional trafficable roofs, etc.)	m ²	36,99
15.340.1206	Horizontal thermal insulation with 10-cm thickness rock wool panels (Rock wool - 150 kg/m ³ density - load-bearing) (on conventional trafficable roofs, etc.)	m ²	45,13
	Thermal and Acoustic Insulation with Glass Wool between Two Walls (sandwich system)		
15.340.1301	Thermal and acoustic insulation between two walls with 3-cm thickness glass wool panels (Glass wool panel, 20-22 kg/m ³ density - non-load-bearing - with silicon) (sandwich system)	m ²	6,34
15.340.1302	Thermal and acoustic insulation between two walls with 4-cm thickness glass wool panels (Glass wool panel, 20-22 kg/m ³ density - non-load-bearing - with silicon) (sandwich system)	m ²	7,65
15.340.1303	Thermal and acoustic insulation between two walls with 5-cm thickness glass wool panels (Glass wool panel, 20-22 kg/m ³ density - non-load-bearing - with silicon) (sandwich system)	m ²	8,96
15.340.1304	Thermal and acoustic insulation between two walls with 6-cm thickness glass wool panels (Glass wool panel, 20-22 kg/m ³ density - non-load-bearing - with silicon) (sandwich system)	m ²	10,40
15.340.1305	Thermal and acoustic insulation between two walls with 8-cm thickness glass wool panels (Glass wool panel, 20-22 kg/m ³ density - non-load-bearing - with silicon) (sandwich system)	m ²	12,90
15.340.1306	Thermal and acoustic insulation between two walls with 10-cm thickness glass wool panels (Glass wool panel, 20-22 kg/m ³ density - non-load-bearing - with silicon) (sandwich system)	m ²	16,78
	Laying Rock Wool/Glass Wool on Garret Flooring Concrete		
15.340.1401	Laying 6-cm thickness glass wool mattress on the garret flooring (Glass wool mattress - 18 kg/m ³ density) and laying vapor-permeable insulation cover on the mattress	m ²	15,44
15.340.1402	Laying 8-cm thickness glass wool mattress on the garret flooring (Glass wool mattress - 18 kg/m ³ density) and laying vapor-permeable insulation cover on the mattress	m ²	18,06
15.340.1403	Laying 10-cm thickness glass wool mattress on the garret flooring (Glass wool mattress - 18 kg/m ³ density) and laying vapor-permeable insulation cover on the mattress	m ²	19,90
15.340.1404	Laying 12-cm thickness glass wool mattress on the garret flooring (Glass wool mattress - 18 kg/m ³ density) and laying vapor-permeable insulation cover on the mattress	m ²	21,74
15.340.1405	Laying 14-cm thickness glass wool mattress on the garret flooring (Glass wool mattress - 18 kg/m ³ density) and laying vapor-permeable insulation cover on the mattress	m ²	23,64

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.340.1406	Laying 6-cm thickness rock wool mattress on the garret flooring (Rock wool mattress - 50 kg/m ³ density) and laying vapor-permeable insulation cover on the mattress	m ²	19,84
15.340.1407	Laying 8-cm thickness rock wool mattress on the garret flooring (Rock wool mattress - 50 kg/m ³ density) and laying vapor-permeable insulation cover on the mattress	m ²	22,26
15.340.1408	Laying 10-cm thickness rock wool mattress on the garret flooring (Rock wool mattress - 50 kg/m ³ density) and laying vapor-permeable insulation cover on the mattress	m ²	24,63
15.340.1409	Laying 12-cm thickness rock wool mattress on the garret flooring (Rock wool mattress - 50 kg/m ³ density) and laying vapor-permeable insulation cover on the mattress	m ²	26,99
15.340.1410	Laying 14-cm thickness rock wool mattress on the garret flooring (Rock wool mattress - 50 kg/m ³ density) and laying vapor-permeable insulation cover on the mattress	m ²	29,35
	HORIZONTAL THERMAL AND ACOUSTIC INSULATION WITH POLYETHYLENE FOAM MATS		
15.340.9951	Thermal and acoustic insulation on horizontal plane (on the floor or mezzanine flooring concrete, etc.) with 2-mm-thickness flat mattresses (min. 90 kg/m ³ density) made of polyethylene foam	m ²	6,14
15.340.9952	Thermal and acoustic insulation on horizontal plane (on the floor or mezzanine flooring concrete, etc.) with 5-mm-thickness flat mattresses (min. 90 kg/m ³ density) made of polyethylene foam	m ²	12,05
15.340.9953	Thermal and acoustic insulation on horizontal plane (on the floor or mezzanine flooring concrete, etc.) with 8-mm-thickness flat mattresses (min. 90 kg/m ³ density) made of polyethylene foam	m ²	17,95
15.340.9961	Thermal and acoustic insulation on horizontal plane (on screed concrete etc.) with 2-mm-thickness perforated mattresses (min. 90 kg/m ³ density) made of polyethylene foam	m ²	8,76
15.340.9962	Thermal and acoustic insulation on horizontal plane (on screed concrete etc.) with 2.5-mm-thickness perforated mattresses (min. 90 kg/m ³ density) made of polyethylene foam	m ²	10,74
15.340.9963	Thermal and acoustic insulation on horizontal plane (on screed concrete etc.) with 5-mm-thickness perforated mattresses (min. 90 kg/m ³ density) made of polyethylene foam	m ²	18,61
	SHEATHING WITH AAC THERMAL INSULATION PANELS		
	Sheathing with AAC Thermal Insulation Slabs		
15.345.1001	Exterior thermal insulation of exterior walls with 5-cm thickness AAC thermal insulation panels coated with AAC thermal insulation panel plaster (Sheathing)	m ²	78,05
15.345.1002	Exterior thermal insulation of exterior walls with 6-cm thickness AAC thermal insulation panels coated with AAC thermal insulation panel plaster (Sheathing)	m ²	81,85
15.345.1003	Exterior thermal insulation of exterior walls with 7-cm thickness AAC thermal insulation panels coated with AAC thermal insulation panel plaster (Sheathing)	m ²	85,66
15.345.1004	Exterior thermal insulation of exterior walls with 8-cm thickness AAC thermal insulation panels coated with AAC thermal insulation panel plaster (Sheathing)	m ²	89,46
15.345.1005	Exterior thermal insulation of exterior walls with 9-cm thickness AAC thermal insulation panels coated with AAC thermal insulation panel plaster (Sheathing)	m ²	93,28
15.345.1006	Exterior thermal insulation of exterior walls with 10-cm thickness AAC thermal insulation panels coated with AAC thermal insulation panel plaster (Sheathing)	m ²	97,08

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.405.1502	Exterior flooring with quartz-silica aggregate terrazzo tiles (Breaking Strength Conditions (Class 1), min. 2.8 Mpa bending strength, Abrasion strength class (2-G), 1600 < Surface area ≤ 3600 cm², with any surface treatment)	m²	133,88
15.405.1503	Exterior flooring with quartz-silica aggregate terrazzo tiles (Breaking Strength Conditions (Class 2), min. 3.2 Mpa bending strength, Abrasion strength class (3-H), Surface area ≤ 1600 cm², with any surface treatment)	m²	129,94
15.405.1504	Exterior flooring with quartz-silica aggregate terrazzo tiles (Breaking Strength Conditions (Class 2), min. 3.2 Mpa bending strength, Abrasion strength class (3-H), 1600 < Surface area ≤ 3600 cm², with any surface treatment)	m²	137,81
15.405.1505	Exterior flooring with quartz-silica aggregate terrazzo tiles (Breaking Strength Conditions (Class 3), min. 4.0 Mpa bending strength, Abrasion strength class (4-I), Surface area ≤ 1600 cm², with any surface treatment)	m²	135,19
15.405.1506	Exterior flooring with quartz-silica aggregate terrazzo tiles (Breaking Strength Conditions (Class 3), min. 4.0 Mpa bending strength, Abrasion strength class (4-I), 1600 < Surface area ≤ 3600 cm², with any surface treatment)	m²	141,75
	Wash Concrete (Exterior)		
15.405.1601	Exterior flooring with wash concrete surface-treated terrazzo tiles (Breaking Strength Conditions (Class 1), min. 2.8 Mpa bending strength, Abrasion strength class (2-G), Surface area ≤ 1600 cm²)	m²	107,63
15.405.1602	Exterior flooring with wash concrete surface-treated terrazzo tiles (Breaking Strength Conditions (Class 1), min. 2.8 Mpa bending strength, Abrasion strength class (2-G), 1600 < Surface area ≤ 3600 cm²)	m²	112,88
15.405.1603	Exterior flooring with wash concrete surface-treated terrazzo tiles (Breaking Strength Conditions (Class 2), min. 3.2 Mpa bending strength, Abrasion strength class (3-H), Surface area ≤ 1600 cm²)	m²	111,56
15.405.1604	Exterior flooring with wash concrete surface-treated terrazzo tiles (Breaking Strength Conditions (Class 2), min. 3.2 Mpa bending strength, Abrasion strength class (3-H), 1600 < Surface area ≤ 3600 cm²)	m²	116,81
15.405.1605	Exterior flooring with wash concrete surface-treated terrazzo tiles (Breaking Strength Conditions (Class 3), min. 4.0 Mpa bending strength, Abrasion strength class (4-I), Surface area ≤ 1600 cm²)	m²	112,88
15.405.1606	Exterior flooring with wash concrete surface-treated terrazzo tiles (Breaking Strength Conditions (Class 3), min. 4.0 Mpa bending strength, Abrasion strength class (4-I), 1600 < Surface area ≤ 3600 cm²)	m²	119,44
	Terrazzo Baseboard		
15.405.1701	Production and installation of baseboard made of terrazzo tiles, with 6 to 10 cm height, any thickness (any surface treatment)	m	17,76
	MARBLE COATING		
	Flooring with white marble sheets		
15.410.1001	Flooring with 2-cm thickness white marble sheets (2 cm x 30 - 40 - 50 cm x free size) (honed or polished)	m²	139,33
15.410.1002	Flooring with 2-cm thickness white marble sheets (2 cm x 30 - 40 - 50 cm x free size) (with any surface treatment except honing and polishing)	m²	156,39

	(U)-shaped windowsills, parapets or coping tiles		
15.430.1501	Building windowsills, parapets or coping tiles with ready-made, reinforced, (U)-shaped panels made of marble aggregate concrete (with any surface treatment)	m ²	251,16
15.430.1502	Building windowsills, parapets or coping tiles with ready-made, reinforced, (U)-shaped panels made of granite aggregate concrete (with any surface treatment)	m ²	268,23
15.430.1503	Building windowsills, parapets or coping tiles with ready-made, reinforced, (U)-shaped panels made of quartz-silica + marble aggregate concrete (with any surface treatment)	m ²	283,98
15.430.1504	Building windowsills, parapets or coping tiles with ready-made, reinforced,	m ²	310,23
	NATURAL/CONCRETE PAVING STONE, LAWN BLOCK, GUTTER STONE, KERB WORKS		
	Supply and laying of concrete paving stones		
15.435.1001	Flooring with 6-cm-high steam-cured concrete paving stones with white cement (in any size, color and pattern)	m ²	51,94
15.435.1002	Flooring with 8-cm-high steam-cured concrete paving stones with white cement (in any size, color and pattern)	m ²	53,90
15.435.1003	Flooring with 10-cm-high steam-cured concrete paving stones with white cement (in any size, color and pattern)	m ²	55,88
15.435.1004	Flooring with 6-cm-high steam-cured concrete paving stones with regular cement (in any size, color and pattern)	m ²	49,96

Construction Unit Price Definitions, Market Prices

15.435.1005	Flooring with 8-cm-high steam-cured concrete paving stones with regular cement (in any size, color and pattern)	m ²	51,94
15.435.1006	Flooring with 10-cm-high steam-cured concrete paving stones with regular cement (in any size, color and pattern)	m ²	53,90
	Supply and laying of concrete lawn blocks		
15.435.1101	Flooring with 8-cm-high steam-cured concrete lawn blocks with white cement (in any size, color and pattern)	m ²	59,81
15.435.1102	Flooring with 10-cm-high steam-cured concrete lawn blocks with white cement (in any size, color and pattern)	m ²	63,09
15.435.1103	Flooring with 8-cm-high steam-cured concrete lawn blocks with regular cement (in any size, color and pattern)	m ²	57,84
15.435.1104	Flooring with 10-cm-high steam-cured concrete lawn blocks with regular cement (in any size, color and pattern)	m ²	61,13
	Supply and laying of kerbs		
15.435.1201	Laying of steam-cured concrete kerbs with white cement and sized 50 x 20 x 10 cm (chamfered, in any color)	m	23,68
15.435.1202	Laying of steam-cured concrete kerbs with white cement and sized 75 x 30 x 15 cm (chamfered, in any color)	m	25,51
15.435.1203	Laying of steam-cured concrete kerbs with regular cement and sized 50 x 20 x 10 cm (chamfered, in any color)	m	21,71
15.435.1204	Laying of steam-cured concrete kerbs with regular cement and sized 75 x 30 x 15 cm (chamfered, in any color)	m	23,68
15.435.1205	Supply and laying of andesite kerbs sized 10 x 15 x 50 cm	m	55,18
15.435.1206	Supply and laying of andesite kerbs sized 10 x 20 x 50 cm	m	60,69
15.435.1207	Supply and laying of andesite kerbs sized 10 x 20 x 70 cm	m	60,46
	Supply and laying of gutter stones		
15.435.1301	Laying of steam-cured concrete gutter stones with white cement and sized 30 x 10 x free dimension cm (in any color)	m	29,39
15.435.1302	Laying of steam-cured concrete gutter stones with regular cement and sized 30 x 10 x free dimension cm (in any color)	m	27,51
15.435.1303	Laying of andesite gutter stones sized 50 x 20 cm	m	70,40
	Supply and laying of natural paving stones		
15.435.7001	Flooring with natural andesite paving stones (10 x 10 cm) (for roads, squares, parks, pavements and similar other areas)	m ²	64,46
15.435.7002	Flooring with natural granite paving stones (10 x 10 cm) (for roads, squares, parks, pavements and similar other areas)	m ²	69,59
15.435.7003	Flooring with natural basalt paving stones (10 x 10 cm) (for roads, squares, parks, pavements and similar other areas)	m ²	84,71

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
	EXPANSION WORKS FOR FLOORING, WALLS AND FACADES		
15.440.1001	Making expansion joints with anodized aluminum covering profiles with 120 mm width and 1.3 mm wall thickness on walls, ceilings and facades (For 50-mm-wide expansions)	m	31,74
15.440.1002	Making expansion joints (with rubber gaskets, min. 1.5 mm. aluminum wall thickness, +/- 4 mm moving capacity, 13 mm profile height, and 45 mm wing width) on ceilings and walls with expansion profiles on the coating (For 50-mm-wide expansions)	m	41,83
15.440.1003	Making expansion joints with anodized aluminum covering profiles with 120 mm width and 2.2 mm wall thickness on flooring (For 50-mm-wide expansions) (resistant to pedestrian loads)	m	40,26
15.440.1004	Making expansion joints (with rubber gaskets, min. 2 mm aluminum wall thickness, +/- 4 mm moving capacity, 35 mm profile height, and 45 mm wing width) on floors with expansion profiles under the coating (For 50-mm-wide expansions) (resistant to pedestrian loads)	m	70,06
15.440.1005	Making expansion joints (with strip gaskets made of rubber and aluminum, min. 2.5 mm aluminum wall thickness, +/- 4 mm moving capacity, 40 mm profile height, and 45 mm wing width, the area between the supports where the gasket is placed reinforced with additional elements) on floors with expansion profiles under the coating (For 50-mm-wide expansions) (resistant to pedestrian loads)	m	110,75
15.440.1006	Making expansion joints (with rubber gaskets, min. 1.5 mm aluminum wall thickness, +/- 4 mm moving capacity, 15 mm profile height, and 45 mm wing width) on floors with expansion profiles on the coating (For 50-mm-wide expansions) (resistant to pedestrian loads)	m	60,79
15.440.1007	Making expansion joints (with strip gaskets made of rubber and aluminum, min. 2 mm aluminum wall thickness, +/- 4 mm moving capacity, 20 mm profile height, and 45 mm wing width, the area between the supports where the gasket is placed reinforced with additional elements) on floors with expansion profiles on the coating (For 50-mm-wide expansions) (resistant to pedestrian loads)	m	69,98
15.440.1008	Water insulation for expansions using 30-cm-wide and min. 1-mm thickness expansion insulation tapes.	m	57,08
	GLASS, CERAMIC, NATURAL STONE AND MOSAIC PANELING		
15.445.1001	Wall and facade paneling with meshed glass mosaics (aligned on mesh) in any color, size, shape and pattern	m ²	94,90
15.445.1002	Wall and facade paneling with meshed ceramic mosaics (glazed/non-glazed porcelain) (aligned on mesh) in any color, size, shape and pattern	m ²	120,65
15.445.1003	Jointless wall and facade paneling with meshed natural stone mosaics (aligned on mesh) in any color, size, shape and pattern (jointless - blasted surface)	m ²	159,15
15.445.1004	Jointed wall and facade paneling with meshed natural stone mosaics (aligned on mesh) in any color, size, shape and pattern (jointed - plain surface)	m ²	191,46
	MOSAIC WINDOWSILLS, PARAPETS AND COPING TILES		
15.450.1001	Building mosaic windowsills (with regular cement)	m ²	300,59
15.450.1002	Building mosaic windowsills (with white cement)	m ²	304,78
15.450.1003	Building mosaic parapets (with regular cement)	m ²	298,23
15.450.1004	Building mosaic parapets (with white cement)	m ²	301,71

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.450.1005	Building mosaic-lined concrete coping tiles on masonry walls of any width (with regular cement)	m ²	220,55
15.450.1006	Building mosaic-lined concrete coping tiles on masonry walls of any width (with white cement)	m ²	224,04
	PVC JOINERY		
15.455.1001	Production and installation of plastic joinery (Any kind of door, window, paneling and similar other applications of hard PVC joinery profiles) Note: All main and additional profiles should be marked along the profile length at min. 1-meter intervals on spots that are not visible when the window is closed. Marking of the main and additional profiles should contain the following minimum information. - The name or trademark of the manufacturer, - The marking and number of this standard (in the form of TS EN 12608-1), - Wall thickness class, - Production code (e.g. date, etc.) to ensure traceability	Kg	15,41
	ALUMINUM JOINERY		
15.460.1001	Production and installation of natural-matte and anodized aluminum joinery profiles without thermal insulation	Kg	36,64
15.460.1002	Production and installation of natural-glossy or sandblasted, satin and anodized aluminum joinery without thermal insulation	Kg	37,16
15.460.1003	Production and installation of colored-matte anodized aluminum joinery without thermal insulation	Kg	37,44
15.460.1004	Production and installation of colored-glossy or sandblasted, satin and anodized aluminum joinery without thermal insulation	Kg	37,84
15.460.1005	Production and installation of electrostatic powder-coated aluminum joinery without thermal insulation	Kg	37,98
15.460.1006	Production and installation of natural-matte and anodized aluminum joinery with thermal insulation	Kg	38,78
15.460.1007	Production and installation of natural-glossy or sandblasted and anodized aluminum joinery with thermal insulation	Kg	39,44
15.460.1008	Production and installation of colored-matte and anodized aluminum joinery with thermal insulation	Kg	39,71
15.460.1009	Production and installation of colored-glossy, sandblasted and anodized aluminum joinery with thermal insulation	Kg	39,84
15.460.1010	Production and installation of electrostatic powder-coated aluminum joinery with thermal insulation	Kg	40,38
	METAL JOINERY HARDWARE		
	Unit Price of Metal Hardware for Doors (Wood, Metal, Plastic)		
15.465.1001	Installation of mortise interior door locks (Wide Type)	Qty	17,25
15.465.1002	Installation of mortise interior door locks (Narrow Type)	Qty	17,25
15.465.1003	Installation of mortise roller interior door locks (Wide and Narrow Type)	Qty	27,63
15.465.1004	Installation of cylinder mortise interior and exterior door locks (Wide and Narrow Type)	Qty	45,50
15.465.1005	Installation of cylinder, roller, mortise interior and exterior door locks (Wide and Narrow Type)	Qty	45,50

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.465.1006	Installation of cylinder, roller, mortise interior and exterior door locks (Narrow Type)	Qty	45,50
15.465.1007	Installation of ground cylinder exterior door locks	Qty	50,38
15.465.1008	Installation of door handles and panels (Chrome-plated)	Qty	17,88
15.465.1009	Installation of rubber seal plugs	Qty	3,09
15.465.1010	Installation of hinges	Qty	2,93
15.465.1011	Installation of spring hinges	Qty	28,44
15.465.1012	Installation of door bolts (Vertical securing set)	Qty	3,75
15.465.1013	Installation of stops (Nickel-plated)	Qty	14,00
	Unit Price of Metal Hardware for Windows (Wood, Metal, Plastic)		
15.465.1101	Installation of window bar hardware (Handle, grill and other components)	Qty	19,50
15.465.1102	Installation of transom window hardware (Simple folding mechanism)	Qty	6,50
15.465.1103	Installation of transom window hardware (Steel folding mechanism, chrome-plated handle)	Qty	16,25
15.465.1104	Installation of the latch (window bar handle and cam) yellow brass screw with insert nut	Qty	9,75
15.465.1105	Installation of door bolts	Qty	3,25
15.465.1106	Installation of rubber seal plugs	Qty	3,58
15.465.1107	Installation of spring-loaded securing latches	Qty	4,55
15.465.1108	Installation of counterweight sets (Together with cast, wire, yellow pulley, knit, wire sockets)	Kg	4,55
15.465.1109	Installation of sliding window handles	Qty	13,81
15.465.1110	Installation of clutch window bar hardware (80 cm, including handle) (2 clutches) (for wood)	Qty	13,81
15.465.1111	Installation of clutch window bar hardware (100 cm, including handle) (3 clutches) (for wood)	Qty	16,25
15.465.1112	Installation of clutch window bar hardware (120 cm, including handle) (3 clutches) (for wood)	Qty	19,50
15.465.1113	Installation of clutch window bar hardware (140 cm, including handle) (3 clutches) (for wood)	Qty	19,50
15.465.1114	Installation of clutch window bar hardware (160 cm, including handle) (3 clutches) (for wood)	Qty	21,13
15.465.1115	Installation of clutch window bar hardware (180 cm, including handle) (4 clutches) (for wood)	Qty	22,75
15.465.1116	Installation of hinges	Qty	3,58
15.465.1117	Installation of continuous hinges	m	5,53
15.465.1118	Installation of plastic-coated, adjustable hinges (pair)	Qty	13,81
	Unit Price of Metal Hardware for Windows (Wood, Metal, Plastic) (Subject to written approval of the administration.)		
15.465.1201	Installation of window bar hardware (including handle), two-clutches, up to 100 cm	Qty	48,75
15.465.1202	Installation of window bar hardware (including handle), 3-clutches, up to 180 cm	Qty	60,00
15.465.1203	Installation of window bar hardware (including handle), 4-clutches, larger than 180 cm	Qty	60,00
15.465.1204	Installation of transom window bar hardware (including handle and folding mechanism)	Qty	48,75

15.470.1424	Installation of double-glazed window units with 6+6 mm thickness and 16 mm middle gap, the first pane with solar and thermal control coating, on PVC and aluminum joinery with glazing profile	m ²	183,89
	WOODEN FLOORING		
15.475.1001	Square timber flooring	m ²	117,19
15.475.1002	Wooden flooring on existing square timber	m ²	98,35
	HARDWOOD PARQUET		
15.480.1001	First class oak floor paneling with 15 to 16-mm thickness square timber on concrete	m ²	204,81
15.480.1002	15 to 16-mm thickness first class oak floor paneling by adhesive bonding on concrete	m ²	164,75
	LAMINATE FLOORING		
15.485.1001	Laminate flooring (including baseboard)	m ²	165,39
	LAMINATE FLOORING		
15.490.1001	Laminate flooring (AC1 Class 21) (including baseboard)	m ²	40,34
15.490.1002	Laminate flooring (AC3 Class 23-31) (including baseboard)	m ²	43,06
15.490.1003	Laminate flooring (AC4 Class 32) (including baseboard)	m ²	49,96
	WOODEN BASEBOARD		
15.495.1001	Production and installation of wooden baseboard	m	14,03
	WOODEN HANDRAILS		
15.500.1001	Production and installation of straight handrails for staircase	m	75,45
15.500.1002	Production and installation of curved handrails for staircase	m	147,98
	WOODEN WAINSCOT		
15.505.1001	Wooden wainscoting	m ²	298,61
	WOODEN DOOR FRAME AND DOOR CASING		
15.510.1001	Production and installation of solid wood panel interior door frame and casing	m ²	168,05
15.510.1002	Production and installation of solid wood panel exterior door frame and casing	m ²	238,06
	WOODEN DOOR LEAF		
15.510.1101	Production and installation of solid wood panel interior door leaves	m ²	155,13
15.510.1102	Production and installation of solid wood panel exterior door leaves	m ²	214,75
15.510.1103	Production and installation of interior door leaves with both surfaces made of pressed wood fiber boards, and with laminate paneling and craft filling	m ²	222,34
15.510.1104	Production and installation of interior door leaves with both surfaces made of pressed wood fiber boards, and with laminate paneling and perforated particle board filling	m ²	204,55
15.510.1105	Production and installation of wooden interior swinging door leaves with glass	m ²	144,43
	QUILTING		
15.510.9991	Faux leather quilt lining of the existing doors	m ²	160,19
	WOODEN WINDOW		
15.515.1001	Production and installation of single-surface windows with wooden frame and casing	m ²	186,70

15.530.1067	Building single-frame partition walls made of water- and fire-resistant gypsum wall boards and filled with rock wool panels (Single profile - 60 cm axle spacing) With gypsum wall board in three layers on one side (12.5 mm + 12.5 mm + 12.5 mm) and two layers on the other side (12.5 mm + 12.5 mm) of the partition wall	m ²	128,28
15.530.1068	Building single-frame partition walls made of water- and fire-resistant gypsum wall boards and filled with rock wool panels (Single profile - 40 cm axle spacing) With gypsum wall board in three layers on one side (12.5 mm + 12.5 mm + 12.5 mm) and two layers on the other side (12.5 mm + 12.5 mm) of the partition wall	m ²	140,48
15.530.1069	Building single-frame partition walls made of water- and fire-resistant gypsum wall boards and filled with rock wool panels (Double profile - 60 cm axle spacing) With gypsum wall board in three layers on one side (12.5 mm + 12.5 mm + 12.5 mm) and two layers on the other side (12.5 mm + 12.5 mm) of the partition wall	m ²	146,76
15.530.1070	Building single-frame partition walls made of water- and fire-resistant gypsum wall boards and filled with rock wool panels (Double profile - 40 cm axle spacing) With gypsum wall board in three layers on one side (12.5 mm + 12.5 mm + 12.5 mm) and two layers on the other side (12.5 mm + 12.5 mm) of the partition wall	m ²	162,98

Construction Unit Price Definitions, Market Prices

ITEM NO	DESCRIPTION	UNIT OF MEASURE	MARKET PRICE (TRY)
15.530.1071	Building double-frame high partition walls (≥ 4.5 m) made of water- and fire-resistant gypsum wall boards and filled with rock wool panels (Single profile - 60 cm axle spacing) (on both surfaces of the partition wall (12.5 mm + 12.5 mm) with double-layer gypsum wall board)	m ²	135,53
15.530.1072	Building double-frame high partition walls (≥ 4.5 m) made of water- and fire-resistant gypsum wall boards and filled with rock wool panels (Double profile - 60 cm axle spacing) (on both surfaces of the partition wall, with (12.5 mm + 12.5 mm) double layer gypsum wall board)	m ²	166,35
	WALL CLADDING WITH GYPSUM BOARDS		
15.530.1101	Wall cladding by gluing gypsum wall boards (with 12.5-mm single layer gypsum wall board)	m ²	49,35
15.530.1102	Wall cladding with metal frame using gypsum wall boards (with 12.5-mm single layer gypsum wall board)	m ²	44,53
15.530.1103	Wall cladding with metal frame using gypsum wall boards (with 12.5-mm double layer gypsum wall board)	m ²	56,56
15.530.1104	Wall cladding with metal frame using gypsum wall boards (With wall profiles) (with 12.5-mm single layer gypsum wall board)	m ²	53,29
15.530.1105	Wall cladding with metal frame using gypsum wall boards (With wall profiles) (with 12.5-mm double layer gypsum wall board)	m ²	65,33
15.530.1106	Wall cladding by gluing water-resistant gypsum wall boards (with 12.5-mm single layer gypsum wall board)	m ²	51,79
15.530.1107	Wall cladding with metal frame using water-resistant gypsum wall boards (with 12.5-mm single layer gypsum wall board)	m ²	46,96
15.530.1108	Wall cladding with metal frame using water-resistant gypsum wall boards (with 12.5-mm double layer gypsum wall board)	m ²	61,41
15.530.1109	Building metal-frame clad walls with water-resistant gypsum wall boards (with wall profiles) (with 12.5-mm single layer gypsum wall board)	m ²	55,73
15.530.1110	Wall cladding with metal frame using water-resistant gypsum wall boards (With wall profiles) (with 12.5-mm double layer gypsum wall board)	m ²	70,18
15.530.1111	Wall cladding by gluing fire-resistant gypsum wall boards (with 12.5-mm single layer gypsum wall board)	m ²	52,05
15.530.1112	Wall cladding with metal frame using fire-resistant gypsum wall boards (with 12.5-mm single layer gypsum wall board)	m ²	47,23
15.530.1113	Wall cladding with metal frame using fire-resistant gypsum wall boards (with 12.5-mm double layer gypsum wall board)	m ²	61,94
15.530.1114	Wall cladding with metal frame using fire-resistant gypsum wall boards (With wall profiles) (with 12.5-mm single layer gypsum wall board)	m ²	55,99
15.530.1115	Wall cladding with metal frame using fire-resistant gypsum wall boards (With wall profiles) (with 12.5-mm double layer gypsum wall board)	m ²	70,70
15.530.1116	Wall cladding by gluing water- and fire-resistant gypsum wall boards (with 12.5-mm single layer gypsum wall board)	m ²	54,01

MECHANICAL INSTALLATION WORKS

2019

GENERAL PROVISIONS AND EXPLANATIONS FOR MECHANICAL INSTALLATIONS

- 1- Prepared as per Article 97, Paragraph 1, Point (k) regarding the Organization and Duties of Our Ministry of the Presidential Decree no. 1 on the Organization of the President's Office.
- 2- In case there are printer's and material errors in Unit Prices, the latest values as may be corrected by the Ministry of Environment and Urbanism shall be taken as basis, and the amendments made accordingly shall be published in the page of the Directorate of Technical Board on www.csb.gov.tr or directly on <https://yfk.csb.gov.tr/>.
- 3- In case of a later change in the unit price standards applied, the latest versions of the standards in effect shall apply. Furthermore, they have to be supplied to the market securely in compliance with the applicable legislation.
- 4- General Technical Specifications published by the Ministry of Environment and Urbanism shall be complementary to such unit prices and their definitions.
- 5- The unit prices including installation and installation fees given in the list include the Contractor's 25% profit and overheads.
- 6- The materials and devices in the Unit Price Lists, for which no payment shall be made for the materials on construction site shall be listed by the relevant administrations.
- 7- The rates of the materials on construction site as specified in the Unit Prices Lists are percentages of unit prices including installation. The price of the materials on construction site shall be subject to tax discount.
- 8- For the materials and products with the names, classes and types listed below, which will be used in the contracted tasks:
 - 8.1. It shall be compulsory to present a Certificate of Compliance with the Turkish Standards for any material, for which the Unit Price Definition does not include a TSE number but there is a Turkish Standard is published.
 - 8.2. Documents that certify quality and compliance with the principles provided herein as well as international or foreign standards, and technical or special specifications shall be required for the items for which a Turkish Standard is not available.
 - 8.3. Any document mentioned in the items (8.1), (8.2) should be issued by authorized bodies.
- 9- The "Directive on the Protection of Buildings from Fire" and the "Construction Materials Directive" in effect shall be followed in selection, application, and commissioning of any installation equipment.
- 10- For pump equipment,

The "Communiqué on Environmentally Sensitive Design Requirements for Standalone or Integrated Glandless Recirculating Pumps" published in the Official Gazette no. 28063 dated 23 September 2011,

The "Communiqué on Environmentally Sensitive Design Requirements for Electric Motors" published in the Official Gazette no. 28197 dated 7 February 2012, and

The "Communiqué on the Designation, Nominal Operating Point and Dimensions of End-suction Centrifugal Pumps (Nominal Pressure: 16 bars)" published in the Official Gazette no. 28508 dated 25 December 2012,

published by the Ministry of Science, Industry and Technology shall be followed.

11- As per the regulation on energy performance in buildings:

"a) If liquid-fuel, forced blowing burners are used burners with the following specifications:

- 1) For the systems with up to 100 kW heating capacity, single-stage burners with servo-controlled air suction damper, or two-stage or proportional-control burners,
- 2) For the systems with 100 to 1200-kW heating capacity, two-stage or proportional-control burners, and for the systems with min. 1200-kW capacity, only proportional-control burners,
- 3) For the systems above 3000 kW, burners with flue gas oxygen control system shall be used.

b) If gas-fueled, forced blowing burners are used:

- 1) For the systems with up to 100 kW heating capacity, single-stage burners with servo-controlled air suction damper, or two-stage or proportional-control burners,
- 2) For the systems with 100 to 600-kW heating capacity, two-stage or proportional-control burners, and for the systems with min. 600-kW capacity, only proportional-control burners,
- 3) For the systems above 3000 kW, burners with flue gas oxygen control system shall be used."

shall be used.

12- The values listed herein are VAT exclusive.

13- The Unit Prices of our Ministry shall be effective from January 1, 2019, and the administrations shall update the prices for preparing an approximate cost in accordance with the "TÜİK Table of Construction Cost Index and Rates of Change" as specified in the paragraph 11/3 of the Regulation on Application of the Tenders for Construction Works.

(Effective 1 January 2019.)

SHEET METAL THICKNESS CHARTS ADVISED FOR MODULAR WATER TANKS

FOR STAINLESS TANKS

DISTANCE FROM THE TOP ELEVATION OF THE MODULE	MINIMUM SHEET THICKNESS mm
	SIDE-BOTTOM SHEET
0 - 1.1 m	1.5
1.1 - 2.2 m	2
2.2 - 3.3 m	2.5
3.3 - 4.4 m	3
4.4 - 5.5 m	4

FOR GALVANIZED TANKS

DISTANCE FROM THE TOP ELEVATION OF THE MODULE	MINIMUM SHEET THICKNESS (mm)
	SIDE-BOTTOM SHEET
0 - 1.1 m	1.5
1.1 - 2.2 m	2
2.2 - 3.3 m	3
3.3 - 4.4 m	4
4.4 - 5.5 m	5

The bottom point of the module shall be taken as basis for measuring the distance.

The top sheet thickness of the tanks shall not be less than the sheet thickness of the side wall.

25.102.1000	WASHBASIN PIPING SYSTEM: (Unit: Set,) Supply to the work site with a sink siphon and sewer pipe connection adapter, and installation and delivery in working order of brass-chromized or plastic-based (acetal copolymer) washbasin installation sized to comply with TS-EN 274-1-2-3, certified for quality, resistant to min. 80°C and acids for use with the washbasins given in the item 25.100.1000, with a 15-mm tap and rosette or faucet certified for compliance with TS-EN 274-1-2-3, a 6-cm anti-odor part, a min. 16-cm extension, brass-chromized or hard plastic rosette, which can be removed and cleaned, and tightened by a 32-mm wrench.		
25.102.1100	With a long tap and siphon without brass controls:		
25.102.1101	First class: (Tap: TS EN 200, Siphon: TS-EN 274-1-2-3)	115,24	15,14
25.102.1200	With wall-mounted faucet (in compliance with TS EN 200 or TS EN 817) and siphon without brass controls:		
25.102.1201	First class: (Faucet: TS EN 200 or TS EN 817, Siphon: TS-EN 274-1-2-3)	232,61	23,71
25.102.1300	With a flush-mounted faucet (including brass chromized angle valves and connection pipes) and siphon without brass controls		
25.102.1301	First class: (Faucet: TS EN 200 or TS EN 817, Siphon: TS-EN 274-1-2-3)	206,61	23,71
25.102.1400	With a long tap (in compliance with TS EN 200 or TS EN 817) a special plastic bowl and a siphon without controls:		
25.102.1401	First class: (Tap: TS EN 200, Siphon: TS-EN 274-1-2-3)	98,71	23,71
25.102.1500	With a wall-mounted faucet (in compliance with TS EN 200 or TS EN 817), a special plastic bowl and a siphon without controls:		
25.102.1501	First class: (Faucet: TS EN 200 or TS EN 817, Siphon: TS-EN 274-1-2-3)	163,10	23,71
25.102.1600	With a flush-mounted faucet (including brass chromized angle valves and connection pipes), a special rubber bowl and siphon without controls:		
25.102.1601	First class: (Faucet: TS EN 200 or TS EN 817, Siphon: TS-EN 274-1-2-3)	186,65	23,71
25.102.1700	With a flush-mounted faucet (including brass chromized angle valves and connection pipes) and siphon with brass controls		
25.102.1701	First class: (Faucet: TS EN 200 or TS EN 817, Siphon: TS-EN 274-1-2-3)	189,13	23,71
25.104.1000	MIRRORS (Unit: Qty.) (TS EN 1036) 5-mm glass thickness, ground edges, and with beveled stripes, if any. Wall attachment screws shall be brass with min. 5-micron nickel plating or stainless steel. Installation on a wall with braces, screws and dowel pins. Mirrors shall be in compliance with the Regulation 305/2011/EU on Construction Products and released with a CE compliance marking.		
25.104.1001	Approximately 40 x 50 cm	71,10	13,44
25.104.1002	Approximately 40 x 60 cm	89,70	13,44
25.104.1003	Approximately 50x70-cm accessible mirrors Supply and installation of adjustable-tiL, accessible mirrors with 304-quality stainless steel frame.	155,00	13,44

25.130.3208	Single-control, single-body medical faucet for washbasins: Equipped with a heat and flow limiter cartridge that saves energy and water, a special hygienic aerator with laminar flow, and a special extended handle.	281,96	18,46
25.130.3209	Single-control, wall-mounted medical faucet for washbasins: Equipped with a rotating extension tip, a special hygienic aerator with laminar flow and a special extended handle.	368,76	18,46
25.130.3300	Bath and Shower Faucets;		
25.130.3301	Single-control bath faucet: With 1/2" shower outlet, heat and flow rate limiter cartridge that saves energy and water, non-scaling aerator, and automatic deflector.	284,10	18,46
25.130.3302	Single-control shower faucet: With 1/2" shower outlet, and heat and flow rate limiter cartridge that saves energy and water.	240,08	18,46

Plumbing System

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.130.3303	Single-control, wall-mounted (built-in) bathroom faucet, flush-mounted: Energy- and water-efficient with a 1/2" shower outlet, a deflector group on the outlet tip set, a cartridge with heat and water flow limiter, an anti-scale aerator, and an automatic deflector. The product shall be compatible with plastic and galvanized pipes within a plastic housing, and allow easy removal without breaking the tiles in case of a malfunction.	319,66	18,46
25.130.3304	Single-control, wall-mounted (built-in) shower faucet (flush-mounted): Energy- and water-efficient, a cartridge with heat and water flow limiter. The product shall be compatible with plastic and galvanized pipes within a plastic housing, and allow easy removal without breaking the tiles in case of a malfunction.	249,66	18,46
25.130.3305	Two-control, wall-mounted bath mixer: with non-scaling cascaded aerator, ceramic seal, mechanical or automatic deflector.	351,33	18,46
25.130.3306	Two-control, wall-mounted shower mixer:	255,51	18,46
25.130.3309	Built-in Shower Head (Unit: Qty.) (TSEK certified) Supply to the work site and installation to the designated location of threaded, impact-resistant, filter shower heads which can be attached to flush-mounted built-in pipes	85,55	4,34
25.130.4100	WASHBASIN SENSOR FAUCET AND ITS PIPING SYSTEM (TS EN 15091): (Unit: Qty., Materials on construction site: 60%) Supply to the work site, installation and delivery in working order of a sensor faucet including its piping system, with single or double water inlets, which can adjust the flow rate by a filter angle valve, can be powered by a battery or a power adapter, allows 60 to 120 seconds of water flow, complete with angle valves and a washbasin siphon with a U-pipe.		
25.130.4101	Sensor faucet and piping for washbasin, with two water inlets:	1.016,30	18,46
25.130.4102	Sensor faucet and piping for washbasin, with single water inlet:	829,76	18,46
25.130.4200	URINAL SENSOR TAP (Unit: Qty., Materials on construction site: 60%) Supply to the work site and installation of a urinal sensor tap with fresh water inlet at the back or top, battery or adapter power unit, complete with a copper pipe for supplying fresh water to the urinal, and necessary fittings.		
25.130.4201	Sensor tap for urinal, surface-mounted:	783,18	18,46
25.130.4202	Sensor tap for urinal, flush-mounted:	839,78	18,46
25.130.4300	THERMOSTATIC BATH MIXER (TS EN 1111): (Unit: Qty., Materials on construction site: 60%) Supply to the work site, installation and deliver in working order of a thermostatic bath mixer that maintains the utility water temperature at a set value between 15 and 65°C, equipped with a safety button at 38°C to prevent scalding, an eco mode button that limits the water flow rate, and a check valve that completely cuts off the water for safety in case of sudden changes in the amount and pressure of hot or cold water.	472,46	18,46
25.130.4410	TIME-CONTROL WASHBASIN TAP AND PIPING: (Unit: Qty., Materials on construction site: 60%) Supply to the work site, installation and delivery in working order of chromized, time-control washbasin tap and piping with angle valves and U-pipe washbasin siphon and single water inlet, which can be adjusted between 5 and 60 seconds,	322,96	18,46

Plumbing System

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.130.4422	Time-control tap for urinal, flush-mounted: Supply to the work site, installation and delivery in working order of time-control, flush-mounted taps compatible with urinals with fresh water inlet at the top or back, and water flow time adjustable between 5 and 60 seconds,	325,33	18,46
25.130.4500	FLUSH-MOUNTED TIMER-BUTTON RESERVOIR: (Unit: Qty.) Supply to the work site and installation of reservoirs which can be directly connected to the plumbing system (piping) and used in Squat Toilet Pans and toilet bowls.	194,34	18,46
25.130.5000	Extension Parts: (Processed by chip removal and in compliance with TS 3143.)		
25.130.5001	1.0 cm extension, chrome-plated (1/2")	7,31	2,90
25.130.5002	1.5 cm extension, chrome-plated (1/2")	7,80	2,90
25.130.5003	2.0 cm extension, chrome-plated (1/2")	8,79	2,90
25.130.5004	2.5 cm extension, chrome-plated (1/2")	9,05	2,90

25.130.5007	5.0 cm extension, chrome-plated (1/2")	12,18	2,90
25.130.6000	Siphons, for washbasins, sinks and urinals (TS EN 274-1-2-3):		
25.130.6001	Washbasin and sink siphon	74,16	11,66
25.130.6004	Plastic siphon for washbasins and sinks (sized to comply with TS-EN 274-1-2-3, resistant to temperatures up to 80°C, and equipped with a 6-cm anti-odor part);	20,05	11,66
25.130.6006	Urinal siphon (with a 6-cm hard plastic anti-odor part, extension to the wall and a large adapter);	16,21	11,66
25.130.6007	Plastic (PVC-based) Ø100 mm (with 6-cm anti-odor part);	16,21	11,66
25.130.6008	Supply and installation of bathtub waste water piping with a faucet, chain, plug, base siphon, and overflow pipe.	39,38	11,66
25.130.6010	Cistern		
25.130.6011	Reservoir with hard PVC float valve	42,04	9,98
25.135.1000	SOAP DISH (SPONGE DISH): (Unit: Qty., Materials on construction site: 60%):		
25.135.1100	Ceramic soap dish (Tabbed): Supply to the work site and installation of extra-quality white ceramic soap dish with a tab and drainboard, which can be half embedded in the wall or surface mounted with ceramic installation components. Note: If colored glazed ceramic is used, installed prices shall be increased by 15% with the installation fee remaining unchanged.		
25.135.1101	Approximately 16 x 16 cm	26,58	2,90
25.135.1102	Approximately 16 x 31 cm	35,29	2,90
25.135.1200	Ceramic soap dish (non-tabbed): Supply to the work site and installation of extra-quality white ceramic soap dish with a drainboard, which can be half embedded in the wall or surface mounted with ceramic installation components. Note: If colored glazed ceramic is used, installed prices shall be increased by 15% with the installation fee remaining unchanged.		
25.135.1201	Approximately 10 x 16 cm	25,30	2,90
25.135.1202	Approximately 16 x 16 cm	18,78	2,90
25.135.1203	Sponge dish: (Tabbed) 16 x 31 cm	31,19	2,90

25.160.0000	BOOSTER PUMPS (Unit: Qty.)		
25.160.1000	FULLY AUTOMATIC WITH A CENTRIFUGAL PUMP WITH VERTICAL OR HORIZONTAL SHAFT BOOSTER PUMP PACKAGE (Unit: Qty. Materials on construction site: 80%) Booster pump package with the specifications provided below, equipped with a strainer, check valve, ball valves for turning on and off, automatic pressure switches (equal to the number of pumps) with upper and lower limits adjustable to the required pressure, a manometer that indicates water pressure, safety against operation without water by a floater with thermal protection against overload or level control electrode, and with switches and indicators located on the housing. Supply to the work site, installation and delivery in fully working order of a fully automatic booster pump that is made up of a Centrifugal Pump with TSE certificate of compliance, and equipped with a vertical or horizontal shaft with different number of steps depending on the capacity, a motor sealed by a mechanical seal and coupled with the pump with connection flanges directly or by means of a special coupling, and with a 3,000-rpm single-phase or three-phase pump motor that activates individually or jointly depending on the water demand; and of a Pressurized Tank with TSE certificate of compliance, and equipped with a sufficient number of balance tanks made of St. 37-2 materials with an airtight, replaceable membrane in compliance with TS EN ISO 11124-1, 2, 3, 4, with the pump and motor fixed on the same chassis or connected by a connection tube, protected by any necessary means against corrosion, all pipes, collectors and cable connections made and certified for quality per TSE, and with vertical or horizontal shaft. NOTE 1- Minimum switching rate of the pump: 180 times/h for up to 1.1 KW of pump power, and 40 times/h for over 1.1 KW of pump power. 2- The capacities specified for the booster pumps with multiple pumps are the sum of pump flow rates.

25.165.3000	Fully automatic water softening device (Unit: Qty., Materials on construction site: 80%) (1 - 39 m³/hour) With specifications provided below, and equipped with a resin tank coated with glass-fiber reinforced polyester over ISO-certified polypropylene or made of ST 37 steel per TS pressurized vessel norms with the interior and exterior coated with hot-dip galvanized steel, with 10 at test pressure, 2 to 8 at operating pressure, salt tank made of anti-corrosion polyethylene and equipped with a polyethylene cover with a capacity to take at least the amount required for regeneration, which shall be equipped with a salt water suction pipe, a filter on the pipe inlet, a salt water suction protector made of PVC pipe, a salt tank overflow pipe and a discharge end. Supply to the work site, building of a concrete base, connection to the installation, and delivery in working order, including a test kit for measurement of water hardness, and operating and maintenance manuals in Turkish, of a multi-way water softening device made of plastic or metal resistant to salt water corrosion, with a resin bed height of 0.7 to 1.2 m., resin carrier quartz filter fixed bed height of 25 to 35 cm, required salt amounts and durations factory-preset/ adjustable, two sampling taps with automatic valves and inlet and outlet manometers, and two ends equipped with threads or bushes for ease of connection to the piping system, which shall be awarded an international certificate of quality, capable of starting regeneration fully automatically once a certain amount of soft water that is pre-programmed and equal to the device capacity has passed through based on the signals received from the meter on the output line; preparing the salt water required for microprocessor-controlled or electromechanical regeneration, which distributes and collects water in the tank by means of filters installed on the platform and/or octopus filter pipes. Concrete base shall be charged separately by the relevant unit prices. NOTE: Input water hardness is assumed to be 30°F. Accordingly, the resin capacity is assumed to be 6000°F/liter. - Water softener device bed speed shall be 30 to 35 m/h. - The tank shall be sized with 40% swelling taken into consideration. 25.175.1706	600 L - minimum hot water flow rate 910 L/h (0.6 kPa) - 420 L/h (0.3 Kpa)	15.850,25	377,16
25.175.1707	800 L - minimum hot water flow rate 1130 L/h (0.7 kPa) - 610 L/h (0.4 Kpa)	17.493,16	411,41
25.175.1708	1000 L - minimum hot water flow rate 1200 L/h (0.7 kPa) - 770 L/h (0.6 Kpa)	19.042,04	445,66
25.175.1709	1250 L - minimum hot water flow rate 1300 L/h (0.9 kPa) - 800 L/h (0.6 Kpa)	20.895,91	452,85
25.175.1710	1500 L - minimum hot water flow rate 1540 L/h (1.5 kPa) - 870 L/h (0.6 Kpa)	22.795,45	505,70
25.175.1711	2000 L - minimum hot water flow rate 1920 L/h (3.0 kPa) - 1370 L/h (1.5 Kpa)	28.444,58	539,95
25.175.1712	2500 L - minimum hot water flow rate 2320 L/h (4.0 kPa) - 1150 L/h (0.2 Kpa)	34.488,71	588,58
25.175.1713	3000 L - minimum hot water flow rate 2640 L/h (7.0 kPa) - 1270 L/h (0.2 Kpa)	40.823,83	622,83
25.175.1800	LOW TEMPERATURE BOILER WITH SINGLE STEEL PIPE SERPENTINE This is vertical design boiler capable of operating at low temperatures of source fluid (55/50) C and 10-bar operating pressure. The rest of the specifications shall be similar to those of the vertical boilers with single serpentine (25.175.400). The capacities are based on 55/50°C serpentine and 10/45°C utility water temperature, minimum utility water flow rates and serpentine side maximum flow resistances.		
25.175.1801	160 L - minimum hot water flow rate 260 L/h (5.0 kPa)	3.017,01	214,38
25.175.1802	200 L - minimum hot water flow rate 410 L/h (16.0 kPa)	3.468,25	234,25
25.175.1803	300 L - minimum hot water flow rate 430 L/h (24.0 kPa)	4.355,38	283,13
25.175.1804	500 L - minimum hot water flow rate 430 L/h (30.0 kPa)	5.699,61	369,98
25.175.1805	800 L - minimum hot water flow rate 860 L/h (50.0 kPa)	8.311,79	411,41
25.175.1806	1000 L - minimum hot water flow rate 860 L/h (50.0 kPa)	8.893,79	445,66
25.175.1807	1500 L - minimum hot water flow rate 860 L/h (63.0 kPa)	11.506,20	505,70
25.175.1808	2000 L - minimum hot water flow rate 860 L/h (95.0 kPa)	15.147,20	539,95
25.175.2500	Storage Tank; It shall be used exclusively for storage of hot water, not generate hot water, and be without serpentine pipes, with the other specifications the same as the unit 25.175.1400		
25.175.2501	Storage Tank, 100 L	1.448,40	179,88
25.175.2502	Storage Tank, 150 L	1.684,51	213,88
25.175.2503	Storage Tank, 200 L	1.980,41	233,25
25.175.2504	Storage Tank, 300 L	2.394,00	282,00
25.175.2505	Storage Tank, 350 L	2.605,56	327,16
25.175.2506	Storage Tank, 500 L	3.271,31	368,48
25.175.2507	Storage Tank, 600 L	3.356,75	375,79
25.175.2508	Storage Tank, 800 L	4.557,59	409,79
25.175.2509	Storage Tank, 1,000 L	5.051,63	443,79
25.175.2510	Storage Tank, 1250 L	6.196,03	451,10
25.175.2511	Storage Tank, 1500 L	7.131,94	503,70
25.175.2512	Storage Tank, 2,000 L	8.898,10	537,70

25.175.4307	100 L, 1800 Watts and above	1.070,45	65,41
25.178.1000	<p>Solar collectors: (Unit: m²) (TS- EN 12975-1)</p> <p>Fixed solar collectors with regular fluid shall be manufactured as per TS EN 12975-1+A1 with a TSE compliance report, test report and product specifications submitted to the relevant authority, and for such solar collectors, non-recyclable materials should be avoided or minimized to the extent possible for the purpose of energy saving and reduction of pollution, aluminum materials shall be AL-6063 Etial-60 alloys, and materials that do not contain scrap aluminum and are non-flammable shall be used. The collector box shall be water-proof and designed to avoid collecting the condensed water within the collector. Collectors should guarantee that no undesirable stress occurs within the coating even at the highest static temperature. The collectors should be made of materials that will allow them to resist thermal shocks and static conditions that they may be exposed to in summer. The parts and materials of the collectors shall be resistant to the mechanical loads that may occur during the heating and cooling of the collector as well as environmental impacts caused by such factors as rain, snow, hail, wind, extreme humidity and air pollution. The panels shall be coated with oven-dried or sprayed paint or be compatible with the mechanical, thermal and selective specifications of the selective surface coating. The impact of such operations as cutting, welding and soldering on the absorber should be taken into consideration, and the absorber should be resistant to corrosion. The cover should remain transparent throughout the life cycle of the collector. The covers shall be resistant to ultraviolet radiation, air pollution and high humidity, and condense at high temperatures depending on the collector design. Glass wool or rock wool insulation material used in the side surfaces of the casing and at the back of the absorber shall be min. 3-cm-thick rock wool or glass wool collector mat with a rated thermal conductivity of λ 0.040 W/mK. Insulation materials shall be resistant to the local temperature that may arise during the static temperature conditions of the collector, and final condensation, reduction of panel performance or corrosion of metal surfaces, leading to melting or gas leak in the insulation material within the collector cover at such temperature shall not substantially reduce the collector's performance. The collector glass shall be low-iron-oxide with minimum 90% light transmittance and ensure a low amount of reflection loss. Glass thickness shall be min. 3 mm The glycol-based fluid manufactured for solar systems to prevent corrosion and freezing of the circuit between the solar collector and heat exchanger should constitute 20% to 60% of the total fluid volume specified in the project design, depending on the climate. All collector glasses shall be tempered.</p>

25.182.1000	AUTOMATIC IRRIGATION SYSTEM COMPONENTS		
25.182.1100	SPRAY-TYPE POP-UP SPRING: (nit: Qty., Materials on construction site: 80%) Supply to the work site, installation, adjustment and delivery in working order, of spray-type sprinklers for use at green fields, including a connection pipe up to 2 meters, two adapters and two clamps for each sprinkler with flow rate, pressure, spraying range and height in compliance with the relevant project design, with a polypropylene plastic housing and an operating temperature of 1.0 to 5 bars; a flow rate adjustable to a spraying range of 3 to 5 meters; an adjustable angle of 0 to 360 degrees; ½" housing, a minimum 10-cm pop-up height, which allow installation of nozzles to perform square, rectangular or star-shaped irrigation, adjustment of the spraying range by an integrated screw, and installation of an optional check valve with a filter that strains impurities.	19,50	6,80
25.182.1200	ROTOR SPRINKLER IRRIGATION SYSTEMS: (Unit: Qty., Materials on construction site: 80%) Supply to the work site, installation, adjustment, and delivery in working order of polypropylene rotor sprinklers for irrigation of green fields, with technical specifications including flow rate, pressure, spray range and height designed for rotor spring in compliance with the relevant project design, equipped with a water-lubricated gear mechanism, a standard nozzle set, a nozzle inlet on head, and an optional check valve.		
25.182.1201	Pop-up Rotor Sprinkler (1/2") Irrigation sprinkle with polypropylene plastic housing, an operating pressure of 1.7 to 3.8 bars, a spray range of 4.6 - 9.4 meters, a flow rate of min. 0.12 to 1.20 m³/h, 40° to 360° adjustable angle, 1/2" grooved female inlet, and min. 10-cm pop-up height	52,90	9,73

Plumbing System

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.182.1202	Pop-up Rotor Sprinkler (3/4") Irrigation sprinkle with polypropylene plastic housing, an operating pressure of 1.0 to 5 bars, a spray range of 7 - 15 meters, a flow rate of min. 0.17 - 2.5 m³/h, 40° to 360° adjustable angle, 3/4" grooved female inlet, and min. 10-cm pop-up height	59,79	14,59
25.182.1203	Pop-up Rotor Sprinkler (1") Irrigation sprinkler with polypropylene plastic housing, 3.5 to 6.9 bar operating pressure, 13.1 to 23.2 meter spray range, 2.54 to 7.73 m³/h flow rate, 50 to 360° adjustable angle, and min. 10-cm pop-up height.	268,20	19,45
25.182.2000	CONTROL UNITS: (Unit: Qty., Materials on construction site: 80%) Supply to the work site, installation, adjustment and delivery in working order of 24-VAC Control Units for programming the operating times of the solenoid valves used for irrigation of green fields, with technical specifications including the number of programs, starting times and stations as provided in the project design; presets to enable quick programming; a test program to enable system testing; built-in batteries to retain the program for 24 hours and a protection kit for protection against power surges; a transformer with 230 VAC, 50 Hz input and 24 VAC output, and an integral casing, which can increase or decrease the irrigation times globally by means of a water saving function based on seasonal changes by means of an independent program.		
25.182.2001	4 Stations	334,56	38,56

25.200.1000	HOT WATER GENERATOR, SECTIONAL CAST IRON BOILERS: (LIQUID OR GAS FUEL) (TS 430, TS EN 303-1/2/3) UNIT: (Qty., Measurement unit: (kcal/h) kW, Materials on construction site: 80%) Thermodynamic and endurance calculations shall be conducted for the construction pressure required by the standards TS 430, TS EN 303-1, TS EN 303-2, TS EN 303-3, and the capacity and thermal efficiency values found by capacity and thermal efficiency tests conducted as per the standards TS-4040 and TS 4041 as well as the communiqué no. 93/80-81 published in the Official Gazette no. 21651 dated 28 July 1993 shall not be lower than the minimum values specified in the said communiqué and Turkish standards, and boilers with lower efficiency shall not be used. The said results shall be documented and specified in the relevant projects. Manufacture, transportation to the work site, installation on the designated base, and delivery in working order of the boiler. Notes: 1- Liquid or gas- fired hot water boilers with minimum 4 kW and maximum 400 kW power shall be manufactured in compliance with the Directive (92/42/EEC) Hot-Water Boilers and the Regulation 2016/426/ABon Gas-burning Devices, released with a CE compliance marking, and be in compliance with the "Regulation on Controlling the Air Pollution Caused by Heating" and the "Regulation on Controlling the Industrial Air Pollution". 2- A control panel containing an operating thermostat, safety thermostat and thermometer shall be supplied with the boiler. No additional fee shall be charged for these items. 3- Unit prices for other capacities shall be interpolated.

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.205.2500	Superheated water generator boilers with 8 atmosphere construction pressure: Unit Prices Including Installation and Installation Fees shall be 10% higher than the item 25.205.2400, and the rest of the specifications shall be the same as the item 25.205.1000.		
25.205.2600	Superheated water generator boilers with 10 atmosphere construction pressure: Unit Prices Including Installation and Installation Fees shall be 20% higher than the item 25.205.2400, and the rest of the specifications shall be the same as the item 25.205.1000.		
25.205.2700	Superheated water generator boilers with 12 atmosphere construction pressure: Unit Prices Including Installation and Installation Fees shall be 30% higher than the item 25.205.2400, and the rest of the specifications shall be the same as the item 25.205.1000.		
25.207.1000	MANUFACTURE OF GRATES: (Unit: kg, Materials on construction site: 60%) Production and installation of cast iron grates for the boilers as prescribed in the approved project.	6,49	2,95
25.207.1100	Replacement of boiler pipes of radiators and steam generators (Unit: m, Materials on construction site: 60%) Detachment of the fume hood to remove defective smoke pipes without damaging the boiler plate; removal of pipes, installation of new boiler pipes of appropriate size and application of tube expanders; temporary closure of boiler connections to test tightness and pressure testing at 1.5 times the operating pressure; delivery of the boiler in working order including any material, labor and damages.		
25.207.1101	70% of the unit price including installation of black welded and steam boiler pipes of the item 25.300.1000 shall be paid as extra depending on the external measure of the replaced pipe, and no pipe installation material shall be charged.		
25.207.1102	Where there are replaced weldless black pipes (patent rolled steel pipes), 70% extra payment shall be added to the unit prices of the item 25.300.1500, and other conditions shall be as specified in the items 25.207.1100 ve 1101.		
25.208.1000	MECHANICAL STOKERS: (Unit: Qty., Materials on construction site: 80%)		
25.208.1100	Worm gear type: Supply and transportation to the work site and installation in its designated location, including any small material and building a base of 250-kg/m³ concrete on the floor, of a stoker sized to fit the boiler's capacity and deliver any kind of coal, which shall be equipped with a wide-pitch screw made of 5-mm hot-formed steel sheet or cast steel depending on the approved project, an external pipe made of min. 3-mm steel sheet or min. 8-mm pig cast steel with screw safety pins fitting the screw, pig-cast grate formed and sized to burn any kind of coal, min. 0.2-m² chamber made of min. 2-mm steel sheet reinforced with 40x40x4-mm angle steel, a coal size adjustment mechanism, hermetic motor, an original ventilation fan of appropriate size, and a setting mechanism that can deliver min. 3 levels of coal and air.		
25.208.1101	Up to 100 kg/h coal Burning	16.824,83	737,39
25.208.1102	Up to 200 kg/h coal Burning	21.129,13	778,83
25.208.1103	Up to 300 kg/h coal Burning	27.481,64	861,70
25.208.1104	Up to 400 kg/h coal Burning	30.924,68	944,58
25.208.1105	Up to 500 kg/h coal Burning	37.397,80	1.151,76
25.208.1106	Up to 600 kg/h coal Burning	40.947,01	1.524,70

Heating Systems

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.208.1200	Coal burner with fully automated motion grate: Coal burner designed to be installed in the boiler furnace for semi-cylindrical boilers or in the pre-combustion chamber for cylindrical boilers, and equipped with a hydromechanical motion grate to ensure better burning by stirring the coal crushed in appropriate grain size by pushing it: supply, installation, and delivery in working order with a grate actuator assembly; a coal bunker reinforced with sheet metal profile sized sufficiently for lignite with max. 50-mm grain size for an hour, which can be easily detached and attached; a mechanism (coal pump) for periodically putting the coal in the bunker on the grate as required by the system; LPG (or fuel) equipment for automatic first ignition; an automatic control system to ensure continuous operation of this system for a defined period; primary air blower, an exhaust gas aspirator; ash carrying system, LPG (or fuel oil) ignition system coal pump; and a program adding system to ensure periodic operation of the hydraulic actuator within this system, which can be programmed as desired (The electrical installation, exhaust gas aspirator, primary and secondary air blowers, exhaust gas and smoke ducts, air ducts, multi-cyclonic ash discharge system, coal crushing and conveying mechanisms, and fresh air pre-heating system shall be charged separately per relevant unit prices).		
25.208.1201	Up to 200 kg/h	66.740,39	757,01
25.208.1202	Up to 300 kg/h	79.314,15	839,89
25.208.1203	Up to 400 kg/h	100.063,15	922,76
25.208.1204	Up to 500 kg/h	116.699,96	1.169,20
25.208.1205	Up to 600 kg/h Note: 15% extra charge shall apply if a pre-chamber compatible with the boiler is made for cylindrical boilers.	120.210,23	1.415,64
25.208.1300	Worm-gear screw with special grate, coal and slag crusher: Installation on a steel base, coating with red lead and oil paint, and installation in the designated location, including any material and labor, with a 1-m³ coal storage made of 3-mm black sheet metal and reinforced with a 50x50x5-mm angle steel, a coal pit, coal crusher run by an electric motor with necessary power below the coal storage, an approximately 0.5-m³ coal pit, a 3.4-m³ coal bunker made of 3-mm black sheet metal and reinforced with a 40x40x1-mm angle steel, a coal level adjuster on the bunker, a coal spiral and drum made of special cast metal to take the crushed coal from the coal pit and convey it through the bunker to the grate with an electric motor with power required by the capacity of an operating boiler, with a large pitch, a safety pin against forcing, a heat-resistant cast steel screw barrel, a cast steel grate manufactured specifically for the type and quality of the coal and slightly slanted to the right or left, an electric variator adjusting the amount of coal, a combustion air blower suitable to the boiler and a valve adjusting the air flow rate.		
25.208.1301	For coal up to 100 kg/h	28.663,74	737,39
25.208.1302	For coal up to 200 kg/h	29.915,21	778,83
25.208.1303	For coal up to 300 kg/h	31.203,85	861,70
25.208.1304	For coal up to 400 kg/h	32.418,38	944,58
25.208.1305	For coal up to 500 kg/h	35.104,06	1.151,76
25.208.1306	For coal up to 600 kg/h	39.094,29	1.524,70

25.250.2309	Ø160 mm , graduated up to 15 ATM	58,66	8,58
25.250.3000	Heat Cost Allocators, Electronic (Unit: Qty. Materials on construction site: 80%) Supply to the work site, programming, installation and delivery in working order, including fittings, of sealed heat cost allocators of TS EN 834 standard, released with CE marking, equipped with two temperature sensors, one providing radiator surface reading, and the other, room temperature reading, and a housing that contains all components including the calculating and display modules, which shall run on mains and battery power, store consumption readings on its memory for min. 12 months, allow such reading to be viewed on its display, capable of operating at an ambient temperature of 0 -50°C, and can be installed on any type of radiator.		
25.250.3100	Heat Cost Allocator with Radio Module: (Unit: Qty. Materials on construction site: 80%) Fulfilling TS EN 834 Standards, released with a CE compliance marking, electric-operated, transferring data by a radio module, allowing reading from outside the building, with other specifications the same as the item 25.250.3000.	164,15	9,81
25.250.4000	Heat Meter (Calorimeter): (Unit: Qty. Materials on construction site: 80%) Programming, supply to the work site with fittings, and delivery in working order, of a sealed calorimeter of TS EN 1434-1/2/3/4/5 standard, with a compact or split structure, optical interface and M-bus, RF firmware, minimum class 3 measuring precision, a measuring range of 5 °C and 120 °C, replaceable batteries (including a 5-meter cable for a 6-meter split type calculation unit for installation) which shall be certified with AT TYPE Approval, made up of a flow rate measurement unit (flowmeter), electronic calculation unit and temperature sensors of DIN EN 60751 standard, in PN 16 pressure class, and used under A or C environmental conditions.	198,41	9,81
25.250.4100	Mechanical Heat Meter, for the Heating Line:

25.255.1000	EXPANSION AND VENTILATION TANKS: (Except insulation) (Materials on construction site: 60%).		
25.255.1100	Open prismatic expansion tank: Manufacturing an expansion tank with min. 40x40x4-mm angle iron and 3-mm iron sheet body, reinforcing the tank with min. 20-mm cross pipes installed inside, installing an overflow receptacle made of 2-mm iron sheet and bracket of 10x15-cm tarred timber, coating both surfaces of all iron parts with two layers of red lead, installing a hinged top cap with rubber seals that can be opened and closed, and secured with butterfly bolts, installing a vent, and connecting the overflow receptacle to the sewer system (except the price of the pipe and insulation with rock wool with 50 kg/m³ density and min. 5-cm thickness as per its project design.) Installation to the piping with flanges or bushes (depending on the Type Project) (The values are subject to change depending on the tank size). (Iron structures shall be paid per the item Y.23.176, and other structures shall be paid per their respective items.)		

Heating Systems

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.255.1200	Open cylindrical expansion tank, (TS 713): Supply of an open cylindrical tank fulfilling the size and quality requirements of TS 713, coating of the iron supports with two layers of red lead (the iron support shall not be charged), insulation with rock wool mattress with 90 kg/m ³ density sewn on min. 5-cm-thick rabbit wire (chlorine content < 10 ppm), supply to the workplace and installation. In case of sheet metal or aluminum plating, extra 80% of unit prices including installation shall apply. (Iron structures shall be paid per the item Y.23.176, and other structures shall be paid per their respective items.)		
25.255.1250	Enclosed expansion tank: Supply to the work site, coating with two layers of red lead and two layers of oil paint of a cylindrical expansion tank made of steel as per the relevant approved project, equipped with a manhole and water level indicator, safety valve, manometer and pressurized gas connection nozzles. Iron components shall be charged per item Y.23.176, other components shall be charged per relevant items based on the weight to be calculated as per the project design.		
25.255.1300	Cylindrical ventilation tank (Unit: Qty.): Production of a cylindrical ventilation tank made of 3-mm sheet metal with the ends slightly convex and the ratio of length (L) to diameter (d) (L+d) between 2 and 3, installation on consoles, connection to the system with flanges or bushes, coating with two layers of red lead and insulation (Based on the type image).		
25.255.1301	5 liters	37,99	4,91
25.255.1302	10 liters	55,19	4,91

25.255.1304	40 liters	95,59	4,91
25.255.2000	Steel, airtight expansion tank with replaceable diaphragm: (Unit: Qty., Materials on construction site: 60%). Airtight tank housing made of steel material (Min. TS EN 10025-1/2/3/4/5 Fe 37-2) of the size and quality in compliance with TS EN 13831, and equipped with an expansion tank, gas filling valve, valve housing, water filling nozzle, membrane replacement flange, and a diaphragm (membrane) resistant to min. 100°C (diaphragm material: ethyl propylene, butyl, nitrile, natural and styrol-butadien rubber or their mixtures), which shall be cleaned in a cleaning bath with all surfaces applied phosphate and external surfaces coated by electrostatic method and oven-dried. Steel plate and diaphragm wall thickness shall be min. 2 mm Supply to the work site and installation of a tank with a gas chamber filled with inert gases (Nitrogen, Helium, etc.). Note: 1- Manufactured to comply with the Regulation 2014/68/AB on Pressure Equipment, and released with a CE compliance marking. 2- The tank's tightness shall be tested by pressurized water with 1.5 times the minimum operating pressure. Tanks with higher capacity than 50 Lt shall be equipped with pedestals that allow them to be installed on the floor. At 8 atmosphere Operating Pressure:

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.264.2114	For pressures up to 32 atmosphere: Steel enclosure, Reflex glass, and a valve group with top, bottom and discharge pistons (TS 517): Unit prices in installed form in the item 25.264.2100 shall be increased by 20% and installation fees shall remain unchanged.		
25.264.3000	BOILER FEED DEVICES: (Unit: Qty., Materials on construction site: 60%).		
25.264.3100	Mechanical boiler feed device: Supply to the work site and installation of a feed device for use in low-pressure steam boilers, with pig-cast enclosure, copper or stainless steel floater, hardened and stonewashed stainless steel needle and valve connected to the floater, and stainless steel valve housing.		
25.264.3101	Ø6 mm	154,63	17,13
25.264.3102	Ø10 mm	158,05	20,55
25.264.3103	Ø15 mm	191,93	23,98
25.264.3104	Ø20 mm	209,05	27,40
25.264.3105	Ø25 mm	235,31	30,83
25.264.3106	Ø30 mm	245,59	34,25
25.264.3107	Ø40 mm	259,29	37,68
25.264.3108	Ø50 mm	322,09	41,10
25.264.3109	Ø65 mm	400,86	44,53
25.264.3200	Electric boiler feed device: (quality certified by TSE). Supply to the work site and installation of an electric boiler feed device between the control switch and the breaker for use in steam boilers, with pig-cast enclosure, copper or stainless steel floater, circuit opening and closing water level indicator with mercury switch connected to the floater, strainers for connection to the steam and boiler feed water circuit, not including the antigon cable up to 10 meters. (For boilers of any size)		
25.264.3201	Electric boiler feed device.	547,93	23,98
25.264.3202	Each additional switch for the low water alarm mechanism. (Burner or low water level alarm mechanism for controllers).	69,59	23,98
25.264.3300	Magnetic boiler feed device: (Fully automatic, electric, magnetic, three-function boiler feed device). (Quality certified by TSE). Supply to the work site, making water, steam and power connections and adjustments, and delivery in working order of a magnetic boiler feed device with a floater housing to control the level of fluid in such devices as the boiler, balance tank and degasifier under pressure and temperature, a stainless steel floater (flange-connected to the steam and water sections), the part housing the electrical contacts fully protected against the corrosive impact of steam and water, which allows installation of the minimum water level alarm and burner stopper contacts. (For boilers of any size).		
25.264.3301	Three Functions (up to 16 atmosphere)	699,78	44,53
25.264.3302	Three Functions (above 16 atmosphere)	714,61	44,53
25.264.3303	Extra charge for each additional contact.	35,28	10,28

Heating Systems

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.264.3400	Three-function, fully-automatic, electric boiler feed device: (for use in steam boilers) (quality certified by TSE). Supply, installation in the designated location, and delivery in working order, of an electric, fully automatic boiler supply (feeding) device with thermally-treated special pig-cast housing and connection parts with high carbon, stainless steel blower, floater and three parts that directly contact vapor, equipped with a mercury switch for starting and stopping the feeding water pump (low and high levels of operation) burner control (on and off), an alarm control system and a level stroke with precision settings, including power connection cables made of silicon-rubber insulated braided copper wires resistant to high temperature, a fiber connection terminal block and a porcelain cable fixing group.		
25.264.3401	Three functions, up to PN 16 atmosphere	759,15	44,53
25.264.4000	CONDENSATE WATER TANK: (Unit: kg, Materials on construction site: 60%). Production of a prismatic condensate tank with min. 40x40x4-mm angle iron and 4-mm iron housing based on the approved project, reinforcement of the tank internally with 25-mm pipes installed diagonally, building a 10-cm-high pedestal with 250 kg/m ³ concrete, interior and exterior coating with two layers of red lead, and supply of the condensate tank with a hinged top cap with rubber seals and a vent that can be opened and closed, and secured with butterfly bolts, and installation in the designated location with flanges or bushes (The aforementioned values are subject to change based on the tank size) (Iron components shall be charged per item Y.23.176, other components shall be charged per relevant items based on the weight to be calculated as per the project design.)		
25.264.5000	BOILER SAFETY SIPHON: (TS 2838). Supply to the work site and installation of a safety siphon for use in low-pressure steam boilers and manufactured as prescribed in the approved project depending on the boiler pressure and capacity, with 1, 2 or 3 pillars for flanged connection to the boiler, a pipe for filling the overflow tank, filling funnel with 15-mm gate valve, and air bleed valve and bottom valve for turning the water on and off. (The material cost shall be taken 100% to be paid per the pipe unit price depending on the size and by kg for the sheet metal components (installation of pipes).		
25.264.6000	BOILER SAFETY ALARM SYSTEM: (Unit: Qty., Materials on construction site: 60%). Supply to the work site and installation of an adjustable boiler safety alarm system that notifies when water level has dropped below the set lower threshold and steam pressure has risen above the set upper threshold.		
25.264.6001	Low water level alarm system: Delivery in working order complete with the alarm horn, outlet branch and circuit.	145,00	
25.264.6002	Maximum pressure alarm system: Delivery in working order complete with the pressure static burner, alarm horn, outlet branch and circuit.	186,68

25.280.1203	Up to 700 kW	9.445,29	315,85
25.280.1204	Up to 1000 kW	11.062,45	351,58
25.280.1205	Up to 1300 kW	11.469,81	368,70

Heating Systems

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.280.2000	<p>BURNER, FULLY AUTOMATIC, WITH HEATER: (Unit: Qty.: Materials on construction site: 60%)</p> <p>Manufactured in accordance with TS EN 267:2009+A1 standard, Directive (2006/42/EC) Machinery and Directive (2014/68/AB) Pressure Equipment, introduced to the market with CE compliance marking, (with heater, pump or air compressor), fully automatic, working with Fuel Oil of 100-225 SSU viscosity at 50°C (122°F) temperature for up to 20 kg/h capacity, 40 SFS viscosity at 50°C (122°F) temperature for 20-60 kg/h capacity, 300 SFS viscosity at 50°C (122°F) temperature for above 50 kg/h capacity, securely fixed to the boiler hatch or to the special metal base, dedicated body made of steel plate, aluminum or cast iron, electric motor with appropriate quality and performance on the body, air fan connected to the motor shaft and fuel pump or vane type compressor, air adjustment damper, air turbulator, high voltage transformer for the starting ignition, ignition electrodes and electrode cables, to ensure initial ignition, photocell or photo-resistance, appropriate settings for the photocell control timing and pre-purge duration specified in the Technical Specification. Types with pump: Air adjuster, burner nozzle suitable for the required consumption, magnetic or pressure type fuel shut-off valves (Solenoid), which receive the control from photocell relay according to the type of burner, electric pre-heater to control the atomization temperature to ensure that the atomization comes to a very good state by reducing the viscosity of the fuel and to deliver the fuel at the maximum capacity at least at 50°C temperature and a thermostat to cut-out and to cut-in the pre-heater in order to control the atomization temperature, a fitting to prevent the fuel leakage out of the spray nozzles when the burner is not running or the heater is on, flexible hoses to connect Fuel Oil to interconnecting piping between the heater pump and the nozzle. Types with compressors: Filtered fresh air valve, air and water intake taps, edge filter, electric heater with thermostat control and storage for heater; fuel adjustment hand valve; solenoid valve on filter circuit with hand valve, flexible hose for fuel connection. For both types: Electrical panel protected against humidity, recessed yellow, green and red signal lights on the panel for normal operation and malfunctions, recessed lights for the heater, fuses, suitable thermal and magnetic circuit breakers at amperage suitable for three-phase motors, cable connections for the panel, cabling between the burner and the electrical panel in the gas pipe in accordance with the approved design; some components on the panel may be mounted onto the burner. Single-phase or three-phase, to regulate the control in line with the technical specifications according to the appropriate settings for the photocell control timing and pre-purge duration, together with the time delay circuits, rectifiers and other accessories, photocell, photocell relay and photocell light, including all kinds of materials and labor, delivered in complete working order (price for 5 kg/h will be paid for 1 kg/h-5 kg/h). Prices for the other capacities shall be determined by interpolation (the price for the photocell and its relay shall be included in the price).</p>

25.288.5000	STAINLESS STEEL CHIMNEY: (Unit: Qty. Materials on construction site: 80%) For metal chimneys: Supply to the work site, installation by the MYK Level 3-certified employees of the Manufacturer or Distributor's Authorized Technical Service, inspection and award of the approval of compliance by the MYK Level 4-certified employees, of a flue manufactured as per the standards TS EN 1856-1, TS EN 1856-2, with a flue pipe, tee pieces, brackets, condensate collector, carrier base, adapter, flue cleaning cap, a second horizontal cap for cleaning where necessary, bellmouth or clamp fitting, a console, leaning and supporting parts to support horizontal and vertical parts, an earthed flue system, material description markings, and matching description tags in the CE certificate of the manufacturer and the markings on the flue, with the flue plate made of standard-compliant materials of the flue placed on a visible spot at the boiler room and the flue section and draught calculated and reported as per TS EN 13384-2+A1 or TS EN 13384-2+A1. (Unit prices for other values shall be interpolated.) Note: Flue carrier racks, carrier consoles, wire ropes, ladders, steel structures, lighting arresters and holders shall be calculated per the item Y.23.176. Manufactured to comply with the Regulation (EU) No.305/2011 Construction Products - CPR and released with a CE compliance marking, the chimneys shall be delivered in working order as installed with connections with all components specified in the approved project completed.

25.312.1105	Vertical type; Ø75 mm	27,85	5,15
25.312.1200	Manhole Flap (Unit: Qty.) The supply to the work site and installation of drain check valves manufactured in compliance with the standard EN 13564-1: Flood Prevention Equipment For Buildings for use in the drain and rain water systems, with flap or lock, mounted to the end of the pipes inside the sumps/septic tanks to prevent rats, vermin and stench from entering the buildings' installations, resistant against rat gnaws, self-closing stainless steel flap, ABS housing, with hand operated locking system and easy opening cleaning hatch with butterfly screws.		
25.312.1201	Flap type; Ø100 mm	52,95	4,86
25.312.1202	Flap type; Ø125 mm	62,23	6,59
25.312.1203	Flap type; Ø160 mm	76,94	7,26
25.312.1204	Flap type; Ø200 mm	137,74	8,29
25.312.1205	Flap type with lock; Ø100 mm	56,36	4,86
25.312.1206	Flap type with lock; Ø125 mm	63,94	6,59
25.312.1207	Flap type with lock; Ø160 mm	84,23	7,26
25.312.1208	Flap type with lock; Ø200 mm	140,00	8,29
25.312.2100	VENT PIPE AND COWL: (Unit: Qty.): Supply to the work site and installation of a plastic vent pipe and cowl that protrudes min 0.50-m from the roofing, for installation on waste water pipes extending from the ceiling to the roofing through the garret.		
25.312.2101	Ø70 mm	19,39	5,39
25.312.2102	Ø100 mm	28,20	7,20
25.312.2103	Ø125 mm	35,98	7,98
25.312.2200	Automatic waste water vent stack (Unit: Qty.) Supply, installation and delivery in working order of a class A1 automatic vent cowl used at spots not available for ventilation shafts, which balances negative pressure, contains an odor-proof check valve, operates at temperatures from -20°C to +60 °C, released with a CE marking.		
25.312.2201	Automatic Waste Water Vent Stack, max. Ø50 mm (including Ø50 mm)	113,00	13,70
25.312.2202	Automatic Waste Water Vent Stack, max. Ø100 mm (including Ø100 mm)	180,66	13,70

25.355.1200	Centrifugal pump; up to 3000 RPM other features are the same as item 25.355.1000. Installed unit price of the 1500 RPM centrifugal pump item 25.355.1000 including the installation and the installation costs shall be reduced by 10%.				
25.355.2000	SUPER HEATED WATER PUMPS (Unit: Qty.) The supply to the work site and installation in its designed location of the pumps with quality certificates to be selected from the technical documents according to the pump body, shaft, fan, seals, gland, axial sectional view, kind of fluid, operating pressure and temperature, flow rate, differential head, efficiency, power, efficiency and net plus (+), suction head characteristics, pump dimensions, inlet and outlet sizes, fan diameter, cooling water flow rate, motor type, speed and power in light of the approved design, installed and aligned on a common base with the electric motor. (The detail documents for the pump base shall be given to the administration)				
25.355.3000	Super heated water pump; at 10 Atmosphere, operating at 140°C operating pressure and temperature, up to 1500 RPM; The unit price including the installation and the installation prices for the 1500 RPM pumps in item 25.355.1000 shall be increased by 25%.				
25.355.4000	Super heated water pump; at 10 Atmosphere, operating at 140°C operating pressure and temperature, up to 3000 RPM; The unit price including the installation and the installation prices for the 1500 RPM pumps in item 25.355.1000 shall be increased by 15%.				
25.355.5000	Super heated water pump; at 12 Atmosphere, operating at 170°C operating pressure and temperature, up to 1500 RPM; The unit price including the installation and the installation prices for the 1500 RPM pumps in item 25.355.1000 shall be increased by 50%.				
25.355.6000	Super heated water pump; at 12 Atmosphere, operating at 170°C operating pressure and temperature, up to 3000 RPM; The unit price including the installation and the installation prices for the 1500 RPM pumps in item 25.355.1000 shall be increased by 30%.				
25.355.7000	Super heated water pump; at 20 Atmosphere, operating at 200°C operating pressure and temperature, up to 1500 RPM; The unit price including the installation and the installation prices for the 1500 RPM pumps in Pos. 25.355.1000 shall be increased by 100%.				

Joint Installation

25.400.3000	Rock Wool Based Prefabricated Pipe Insulation: (Unit: m) (TS EN 14303) Shall be in compliance with the Regulation (EU) No.305/2011 Construction Products and released with a CE compliance marking. Following the painting of the pipe with red lead paint for protection against corrosion, insulation with the prefabricated glass wool pipe insulation material selected in conformance with the outer pipe diameter, placing of the insulation material on the pipe by widening the longitudinal slit, winding with thin wire at every 30 cm. (In cold fluid systems, aluminum foil coated prefabricated pipe insulation shall be used.) (Red lead paint is not included in the unit price.) Rock wool Pipe Outer Diameter Wall Thickness

25.450.2000	ROOF-TOP ASPIRATOR: (Unit: Qty., Materials on construction site: 60%) (quality certified by TSE). Supply to the work site, installation, and delivery in working order, including electric motor, of roof-top ventilator described in the item 25.450.1000 with a metallic base for installation on the roof-top, and equipped with an esthetically pleasing hood to protect the motor from external effects. (Electrical wiring to be paid per the relevant unit prices) (Unit prices of other values shall be interpolated).		
25.450.2100	Roof-top radial aspirators with up to 225 pascal (25 mm) pressure:		
25.450.2101	Up to 1000 m³/h	1.650,00	193,00
25.450.2102	2000 m³/h	2.390,00	246,00
25.450.2103	3000 m³/h	3.050,00	265,00
25.450.2104	4000 m³/h	3.430,00	302,00
25.450.2105	5000 m³/h	3.900,00	343,00
25.450.2106	6000 m³/h	4.160,00	374,00
25.450.2107	8000 m³/h	4.360,00	428,00
25.450.2108	10000 m³/h	4.470,00	499,00
25.450.2109	12000 m³/h	5.230,00	557,00
25.450.2110	16000 m³/h	5.640,00	589,00
25.450.2111	20000 m³/h	6.500,00	633,00
25.450.2112	25000 m³/h	7.460,00	663,00
25.450.2113	30000 m³/h	8.740,00	739,00
25.450.3000	AXIAL VENTILATORS (ASPIRATOR) (Unit: Qty., Materials on construction site: 60%) (quality certified by TSE). Supply to the work site with the electric motor, installation with the necessary vibration insulator, flexibly connected to ducts with canvas, and delivery in working order, of axial ventilator (aspirator) with steel or aluminum blades, coupled with a mono-phase or three-phase electric motor with required power up to 225 pascals (25 mmWC) directly or with belt and pulley. (Electrical wiring to be paid per the relevant unit prices). (Other values shall be interpolated) (Items such as anti-vibration wedges, etc. used for production of devices shall be included in the unit prices, and no additional fees shall be charged.)		
25.450.3100	Axial ventilator, up to 1500 rpm:		
25.450.3101	Up to 5000 m³/h	1.770,00	242,00
25.450.3102	8000 m³/h	2.020,00	309,00
25.450.3103	10000 m³/h	2.380,00	343,00
25.450.3104	12000 m³/h	2.730,00	370,00
25.450.3105	14000 m³/h	3.080,00	389,00
25.450.3106	16000 m³/h	3.580,00	453,00
25.450.3107	20000 m³/h	4.270,00	537,00
25.450.3200	Axial ventilator, up to 900 rpm:		
25.450.3201	Up to 10000 m³/h	2.620,00	343,00
25.450.3202	12000 m³/h	2.990,00	370,00
25.450.3203	14000 m³/h	3.310,00	389,00
25.450.3204	16000 m³/h	3.680,00	453,00
25.450.3205	20000 m³/h	4.190,00	488,00

Ventilation and Air Conditioning Installations

25.450.3206	24000 m³/h	4.660,00	506,00
25.450.3207	30000 m³/h	5.360,00	537,00
25.450.3208	40000 m³/h	6.400,00	594,00
25.450.3209	50000 m³/h	7.970,00	676,00
25.450.4100	WINDOW DOMESTIC FANS (Unit: Qty.) Supply to the work site and installation in its designated location of window-type, single-direction, plastic window fan with automatic shutters actuated by air movements, engines with insulation class B and protected against overheat with a thermal breaker, and a maximum noise level of 35 to 45 dB, designed to exhaust the air directly to outside, which shall be 230 V and 50 Hz single-phase, in IPX4 class, and designed to comply with TS EN 60335-2-80 standard and the 2014/35/EU Directive Related to Electrical Equipment Designed within Certain Voltage Limits		
25.450.4101	400 m³/h	217,00	38,40
25.450.4102	600 m³/h	273,00	42,20
25.450.4103	900 m³/h	343,00	47,70
25.450.5100	DUCT-TYPE ASPIRATOR (Unit: Qty.) It shall allow installation between two ducts, and have a galvanized steel sheet or electrostatic powder-coated body, factory-made electrical connections, and be equipped with a motor and terminal box in IP 44 protection class. The blades shall be inclined back or forward, and the bearings shall be free of maintenance-free for life. The fan housing shall be installed on anti-vibration wedges, and a protective wire netting shall be installed on the fan outlet. Supply, installation, and delivery in working order, including labor, of a duct type aspirator that come with a axial fan with a variable phase control, with standard thermal protection on fan motors. (100-pa air flow rate shall be taken as basis for device capacities.)		
25.450.5101	100 m³/h	358,00	36,00
25.450.5102	200 m³/h	403,00	36,00

25.450.5107	1000 m³/h	753,00	60,00
25.450.5108	1250 m³/h	786,00	65,00
25.450.5109	1500 m³/h	852,00	70,00
25.450.5110	1750 m³/h	1.320,00	107,00
25.450.5111	2000 m³/h	1.600,00	121,00
25.450.5112	2500 m³/h	1.850,00	133,00

Ventilation and Air Conditioning Installations

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.450.7100	Axial Jet Fans (Unit: Qty.) The device shall be in compliance with the Regulation (EU) No.305/2011 Construction Products - CPR, released with the CE compliance marking, and resistance class F300 as per TS EN 12101-3, with max. 3-kW power and blades balanced as per ISO 1940-1. The fan motor shall be fully enclosed, capable of operating at two phases, have 2/4 poles, comply with min. IP 55 protection class and H insulation class, cooled by the air from above, be available on 24/7 basis and during emergencies . Electrical terminal boxes and cable bushings on the device shall be fire-resistant. The blade shall be axial. The fan shall be injection-molded made of aluminum alloy. Two sides of the fan housing shall be equipped with rock wool-insulated silencers for sound absorption. Both ends of the jet fans shall be equipped with directing blades and wire netting. The capacities are the values at the second phase. The description does not include automation, termination panel and wiring.		
25.450.7101	Thrust force: 22 N, Inner diameter: min. 275 mm, flow rate: min. 3500 m³/h	6.770,00	190,00
25.450.7102	Thrust force: 32 N, Inner diameter: min. 315 mm, flow rate: min. 4500 m³/h	7.330,00	222,00
25.450.7103	Thrust force: 50 N, Inner diameter: min. 355 mm, flow rate: min. 5000 m³/h	7.880,00	253,00
25.450.7104	Thrust force: 58 N, Inner diameter: min. 400 mm, flow rate: min. 9000 m³/h	8.580,00	317,00
25.450.7105	Thrust force: 80 N, Inner diameter: min. 400 mm, flow rate: min. 10,000 m³/h	8.880,00	348,00
25.450.7200	Radial Jet Fans (Unit: Qty.) The device shall be in compliance with the Regulation (EU) No.305/2011 Construction Products - CPR, released with the CE compliance marking, and resistance class F300 as per TS EN 12101-3, with max. 3-kW power and blades balanced as per ISO 1940-1. The fan motor shall be fully enclosed, capable of operating at two phases, have 4/8 poles, comply with min. IP 55 protection class and H insulation class, cooled by the air from above, be available on 24/7 basis and during emergencies The suction side of the fans shall be equipped with a protection wire, and guides to ensure homogeneous distribution of air at the blowing outlet. Electrical terminal boxes and cable bushings on the device shall be fire-resistant. Radial blades shall have a centrifugal structure with the blades inclined backwards, robot welded, made of black sheet metal, and coated with electrostatic oven-dried paint. The capacities are the minimum values at the second phase. The description does not include automation, termination panel and wiring.		
25.450.7201	Thrust force: 50 N, Flow rate: min. 6,000 m³/h	9.170,00	253,00
25.450.7202	Thrust force: 75 N, Flow rate: min. 8,000 m³/h	12.170,00	285,00
25.450.7203	Thrust force: 100 N, Flow rate: min. 8,900 m³/h	12.650,00	317,00

Ventilation and Air Conditioning Installations

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.452.1000	Smoke Vent Fan: (Unit: m²; Materials on construction site 60%) The supply to the work site and installation on a chassis or concrete base with sufficient anti-vibration insulation of the axial vent fan manufactured in compliance with the Regulation (EU) No.305/2011 Construction Products - CPR, released with CE compliance marking, roof type, single stage, approximately 10 kW power, with silencer, control panel, statically and dynamically balanced, with the rotor on roll bearings or sliding bearings, driven by a three phase electric motor coupled directly or by way of a belt-pulley system with jointless pulley, connection to the ducts with flexible fixtures, manufacture of sheet metal parts with DKP sheets; interior and exterior coating of such parts with anti-rust paint and coating of the visible parts with two layers of heat-resistant, gun-sprayed paint in desired colors (The electrical installation and the motor, if made with cells, the price of the cell and the price of the concrete base shall be paid as per the relevant unit prices.) (Intermediate prices shall be calculated by interpolation). (Vibration-proof wedges and similar productions are included in unit prices.)		
25.452.1100	According to TS EN 12101, fire resistance class F200 (200°C, 120 min), total pressure up to 225 Pascal (25 mmWC).

25.460.1000	VENTILATION, HEATING, AND AIR CONDITIONING CENTRAL UNIT CELL (Unit: m², Materials on construction site: 60%). Supply, installation, and securing on the floor or a concrete base with the ducts insulated against vibration with flexible fittings, of central unit cells that bring together the facilities for detachment and removal of ventilator, filters, dampers, heaters, coolers, humidifiers, and automatic control devices in the order specified in the relevant approved project to ensure the proper functionality of the devices; connection of pipes with flanges or bushes, coating of the necessary surfaces with two layers of anti-rust paint; followed by the coating of the external surface with two layers of gun-sprayed paint; and acoustic insulation of the required interior surfaces. - The external surface with 6 sides of the air conditioner central unit cell shall be taken as basis for the quantities, the intermediary cells shall not be considered, and the duct connection holes shall not be subtracted from the estimated surface. - Acoustic insulation within the cell shall be paid separately per the relevant insulation unit price depending on the specifications of the insulation. Air dampers shall be paid separately per the item 25.472.1400. (Items such as anti-vibration wedges, etc. used for production of devices shall be included in the unit prices, and no additional fees shall be charged.)		
25.460.1100	If modular profile frame is made with galvanized sheet metal double frame and polyurethane filling: The carcass and corner pieces of the air conditioning central unit shall be made of galvanized steel or aluminum profile manufactured as per the approved project design. Double-wall cells with weldless structure, internal and external walls made of min. 0.5-mm-thick galvanized sheet metal, and with min. 22-mm-thick factory-made polyurethane filler injected in the gap between the walls. Other specifications shall be as per the item 25.460.1000.	365,94	68,50
25.460.1200	If modular profile frame is made with galvanized sheet metal double frame and glass wool or rock wool filling: The carcass and corner pieces of the air conditioning central unit shall be made of galvanized steel or aluminum profile as per the relevant approved project design. The panels shall be made of pre-painted galvanized sheet metal with the exterior panel sheets made of galvanized sheet metal coated with polyester for protection from abrasive effects. All panels, covers and inlet panels shall be double-wall. Interior and exterior walls shall be made of min. 1-mm-thick galvanized sheet metal. The panels shall be installed on the carcass of the central unit to allow detachment for manipulation of the interior. Glass wool insulation board with 50 kg/m ³ density or rock wool insulation board with 70 kg/m ³ density shall be installed between the internal and external panels. Other specifications shall be the same as the item 25.460.1000.		
25.460.1201	Cells with glass wool or rock wool insulation up to 30 mm with the same specifications as the item 25.460.1200	364,59	68,50
25.460.1202	Cells with glass wool or rock wool insulation up to 60 mm with the same specifications as the item 25.460.1200	388,96	68,50

25.465.1000	HEAT RECOVERY UNIT FOR USE WITH AIR CONDITIONING CENTRAL UNITS: Unit: Qty. Rotor-type heat recovery calculations shall be made as per VDI 2071 standard. Where the flow rates of exhaust and blown air passing through the rotor are equal, sensible heat recovery efficiency for operation in both summer and winter shall be min. 65%. The accuracy of the heat recovery capacity shall be confirmed by a selection program. Air flow rates of 4 m/s and pressure losses of 220 Pa shall not be exceeded at the suction and blowing sides of the rotor. The rotor shall be driven by a system of belt and pulley. The rotor shall have a housing made of aluminum, and frame and other materials made of galvanized steel. The filling shall be manufactured to make a non-oscillatory rotation within cassette, and while the air flows 100% in parallel to the filling holes, the same holes shall be 90 degrees perpendicular to the cassette plane and no curvature shall be allowed. The sections of the rotor shall be factory-assembled, and delivered in a single piece. The heat recovery rotor shall be installed in air conditioning central unit panels.		
25.465.1100	Rotor type Heat Recovery (Hygroscopic type) Unit (Unit: Qty.) Supply to the work site and delivery in working order of a heat recovery unit with a rotor that can recover both sensible and latent heat in the circulation air, and manufactured to have a humidity transfer of min. 20%. 25.470.1100	Manufacture of rectangular ventilation ducts made of galvanized sheet metal in dimensions provided in the project design: Rectangular ventilation ducts shall be manufactured by automatic machines designed for this purpose; the corner parts shall be equipped with built-in flanges or installed with flanges with integral mastic; the self-adhesive neoprene seal shall be placed along the lateral section of the flange; and fixed at appropriate intervals with G-clips or 140-mm metal clamping components. The Galvanized Sheet Metals to be used shall be in thicknesses specified below and plated with DX 51 D+Z 275 g/m² zinc as per TS-EN 10346. The ducts shall be tested for infiltration as per the pressure class specified by the designer in the project design, in order to achieve infiltration in compliance with the Regulation on Energy Performance of Buildings and TS-EN 1507 standard. Curvilinear vanes shall be installed on the inside of the brackets at tight turns; flexible fittings shall be installed on the connections to devices and apparatuses; production and assembly shall be made including any jointing and fixing material; profiles of appropriate size shall be used for suspension and fixing for the ducts that are wider than 499 mm; and anti-vibration materials shall be installed between the profile and the duct. Installation shall be made on the ceiling or on the wall with threaded suspension bars.		
25.470.1101	0.60 mm for those with the longest edge up to 600 mm (600 mm included).	113,00	53,00
25.470.1102	0.80 mm for those with the longest edge up to 1249 mm	127,00	58,00
25.470.1103	1.00 mm for those with the longest edge up to 2490 mm	155,00	63,50
25.470.1104	1.2 mm for those with the longest edge longer than 2490 mm.	178,00	79,50
25.470.1200	Manufacture of cylindrical ventilation ducts made of galvanized sheet metal, with interlocking spirals: Manufacture of round ducts made of strip rolls of galvanized sheet metal plated with DX 51 D+Z 275 g/m² zinc complying with TS EN 12237 by means of S-type spiral interlocking; installation with sealed fittings to ensure infiltration; and mounting on wall or ceiling as per the relevant standard, using clamps, threaded suspension bars and similar other suspension elements. The item shall be tested for infiltration as per the pressure class specified in the project design by the designer so as to ensure infiltration in compliance with TS-EN 1507.		
25.470.1201	0.50 mm for up to Ø160 mm	102,00	36,00

Ventilation and Air Conditioning Installations

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.470.1202	0.60 mm for up to Ø315 mm	112,00	36,00
25.470.1203	0.80 mm for up to Ø800 mm	126,00	36,00
25.470.1204	1.0 mm for up to Ø1000 mm	139,00	36,00
25.470.1205	1.2 mm for up to Ø1500 mm	150,00	36,00
25.470.1300	Production of ventilation ducts with stainless steel plates: The flange and ducts shall be made of stainless steel of min. 304 quality, manufactured by automatic machines, to be installed with built-in flanges or flanges with built-in mastic, with infiltration and other specifications in compliance with the item 25.470.1100.		
25.470.1301	0.50 mm for the longest edge up to 250 mm.	208,00	48,00
25.470.1302	0.60 mm for the longest edge up to 499 mm.	227,00	48,00

25.470.1700	Ventilation Ducts made of embossed aluminum panels with hygienic pre-insulation Pre-insulated, embossed AL panels used for manufacture of ventilation ducts shall be filled with PUR (Polyurethane) / PIR (Polyurethane), with all specifications complying with TS EN 13403, with the external surfaces made of embossed aluminum, internal surfaces through which air flows coated with a material with antioxidant active ingredient or silver-ion. Compliance with ISO 22196 or ASTM (American Society for Testing and Materials) standards shall be approved by antimicrobial / antibacterial activity tests of Accredited organizations. Flange connections completing the ventilation duct shall be of the same specifications. Other specifications of the ducts shall be compatible with the item 25.470.1600.		
25.470.1701	Ventilation Duct made of hygienic pre-insulated, embossed aluminum panels, 20-mm-thick insulation, and 80/80 micron Al plating Ventilation Duct made of Hygienic, Pre-insulated, embossed aluminum panels Min. 20 mm thickness, 80-micron internal and 80-micron external surface plated with aluminum, with the other specifications the same as the item 25.470.1700	167,00	36,00
25.470.1702	Ventilation Duct made of hygienic pre-insulated, embossed aluminum panels, 20-mm-thick insulation, and 80/200 micron Al plating Ventilation Duct made of Hygienic, Pre-insulated, embossed aluminum panels Min. 20 mm thickness, 80-micron internal and 200-micron external surface plated with aluminum, with the other specifications compatible with the item 25.470.1600.	191,00	36,00
25.470.1703	Ventilation Duct made of hygienic pre-insulated, embossed aluminum panels, 30-mm-thick insulation, and 80/200 micron Al plating Ventilation Duct made of Hygienic, Pre-insulated, embossed aluminum panels Min. 30 mm thickness, 80-micron internal and 200-micron external surface plated with aluminum, with the other specifications compatible with the item 25.470.1600.	223,00	36,00
25.470.5100	Ventilation ducts made of flexible pipes:		
25.470.5101	Semi-flexible aluminum ventilation ducts Supply and installation of semi-flexible ventilation ducts without thermal insulation manufactured by drawing together and coupling of min. 90-micron-thick pure aluminum strips, which has a temperature range of -30°C to +250°C, resistant to max. 2000 pa operating pressure, in compliance with TS EN 13180 with double clamp, which allows an air flow speed of max. 25 m/s.	31,90	16,50
25.470.5102	Ventilation ducts made of flexible stainless steel pipes: Supply and installation of semi-flexible ventilation ducts without thermal insulation manufactured by drawing together and coupling of min. 100-micron-thick pure metallic 316 L stainless steel strips, which have a temperature range of -30°C to +250°C, resistant to max. 12500 pa operating pressure, in compliance with TS EN 13180 with double clamp, which allow an air flow speed of max. 25 m/s.	170,00	16,50

Ventilation and Air Conditioning Installations

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.470.5103	Ventilation ducts made of fully flexible pipes coated with aluminum and resistant to high pressure; Supply and installation of fully flexible ventilation ducts made by wrapping min. 65-micron-thick aluminum and polyester lamination on high-tension steel wire bent in helix form, used in a temperature range of -30°C to +140°C, resistant to min. 3000 Pa operating pressure, with thermally uninsulated internal and external surfaces, which shall allow a maximum air flow rate of 30 m/sec., be in compliance with TS EN 13180 and the Conditions required for compliance with the Building Fire Safety Directive as per TS EN 13501-1+A1.	25,80	16,50
25.470.5104	Ventilation ducts made of fully flexible pipes coated with hygienic aluminum; Supply and installation of fully flexible ventilation ducts made by wrapping aluminum and polyester lamination on high-tension steel wire bent in helix form, used in a temperature range of -30°C to +150°C, resistant to min. 3000 Pa operating pressure, with thermally uninsulated internal and external surfaces coated with silver-based antimicrobial material with antibacterial characteristics confirmed by ISO 22196 test and antifungal characteristics confirmed by ASTM G21 test, which shall allow a maximum air flow rate of 30 m/sec., be in compliance with TS EN 13180 and the Conditions required for compliance with the Building Fire Safety Directive as per TSE 13501-1+A1.	29,80	16,50
25.470.5200	Ventilation ducts made of insulated flexible aluminum pipes.		
25.470.5201	Insulated, Semi-flexible aluminum ventilation ducts Supply and installation of semi-flexible ventilation ducts with thermal insulation manufactured by drawing together and coupling of min. 90-micron-thick pure aluminum strips, which has a temperature range of -30°C to +250°C, resistant to max. 2000 operating pressure, in compliance with TS EN 13180 with double coupling, which allows an air flow speed of max. 25 m/s, is insulated with 2.5-cm glass wool mattress, and in compliance with the Building Fire Safety Directive as per TS EN 13501-1+A1.	67,00	16,50
25.470.5202	Ventilation ducts made of fully flexible pipes resistant to high pressure and thermally insulated with rock wool; Supply and installation of fully flexible ventilation ducts made by wrapping min. 65-micron-thick aluminum and polyester lamination on high-tension steel wire bent in helix form, used in a temperature range of -30°C to +140°C, resistant to min. 3000 Pa operating pressure, with thermally insulated internal and external surfaces coated with 2.5-cm-thick fully flexible glass wool mattress with 16 kg/m³ density and jacketed with polyester-laminated aluminum, which shall allow a maximum air flow rate of 30 m/sec., be in compliance with TS EN 13180 and the Conditions required for compliance with the Building Fire Safety Directive as per TS EN 13501-1+A1.	41,90	16,50

Ventilation and Air Conditioning Installations

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.470.5203	Insulated ventilation ducts made of fully flexible pipes coated with hygienic aluminum Supply and installation of fully flexible ventilation ducts made by wrapping aluminum and polyester lamination on high-tension steel wire bent in helix form, used in a temperature range of -30°C to +150°C, resistant to min. 3000 Pa operating pressure, with thermally uninsulated internal and external surfaces coated with silver-based antimicrobial material with antibacterial characteristics confirmed by ISO 22196 test and antifungal characteristics confirmed by ASTM G21 test, and with the interior duct covered with 2.5-cm-thick glass wool mattress with min. 16 kg/m³ density, which shall allow a maximum air flow rate of 30 m/sec., be in compliance with TS EN 13180 and the Conditions required for compliance with the Building Fire Safety Directive as per TS EN13501-1+A1.	54,50	16,50
25.470.5204	Flexible pipe ventilation duct material: (%) Supply and installation of fittings such as tee-connectors, prongs, sleeves, reducers, etc. made of galvanized sheet metal or polypropylene material, required for attachment of flexible pipes to each other as described in the item 25.470.5100 and 25.470.5200.	% 35	
25.472.1000	ACCESS DOORS: (Unit: Qty., Materials on construction site: 40%). Manufacture access doors sized approximately as described below at required spots on the main ducts, installation of the covers with seals on the duct, complete with fittings and fixing equipment.		
25.472.1100	Access door, double-wall, with the wall spacing filled with 2.5-cm-thick glass wool plate with 50 kg/m³ density (to be in compliance with the type project)		
25.472.1101	40 x 50 cm.	70,50	18,00
25.472.1102	20 x 30 cm.	121,00	18,00
25.472.1200	Single-wall insulation on the access door; for installation on the ducts: (in compliance with the typical project.)		
25.472.1201	40 x 50 cm	54,50	17,40
25.472.1202	20 x 30 cm.	70,00	17,40
25.472.1300	Column damper: (Unit: Qty.) For use at locations specified in the projects and at other locations as may be necessary, made of aluminum or cast iron of any size, galvanized sheet, manual adjustment valve etc. including any material, labor and assembly.		
25.472.1301	Up to 0.04 m²	52,50	11,80
25.472.1302	Up to 0.06 m²	59,00	11,80
25.472.1303	Up to 0.08 m²	72,50	11,80

Ventilation and Air Conditioning Installations

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.480.2100	Interior acoustic insulation of the ducts with glass wool mattresses, glass wool plates or rock wool plates factory-coated with acrilan or glass tissue (Unit: m²; Materials on construction site: 40%) Clearing impurities of dust and grease from the internal surfaces of the ducts, attaching the insulation retaining pins with self-adhesive base at 50-cm intervals along the duct in two or more rows depending on its width, fixing glass wool mats with 24 kg/m ³ density and one side covered with fabricated acrilan or glass wool plates with 50 kg/m ³ density and one side covered with glass tissue or rock wool plates with 70 kg/m ³ density, with the surface covered with acrilan or glass tissue facing inside, installing retaining washers on pins and cutting the protruding parts of the pins for sound absorption of the ducts to be acoustically insulated as per the relevant project, including any material and labor.		
25.480.2101	Glass wool plate with 2.5 cm thickness and 50 kg/m ³ density coated with glass tissue	23,20	11,80
25.480.2102	Glass wool plate with 3.0 cm thickness and 50 kg/m ³ density coated with glass tissue	24,20	11,80
25.480.2103	Glass wool plate with 5.0 cm thickness and 50 kg/m ³ density coated with glass tissue	21,70	11,80
25.480.2104	Glass wool mattress with 2.5 cm thickness and 24 kg/m ³ density coated with acrilan	23,20	11,80
25.480.2105	Rock wool plate with 2.5 cm thickness and 70 kg/m ³ density coated with glass tissue	29,80	11,80
25.480.2106	Rock wool plate with 5.0 cm thickness and 70 kg/m ³ density coated with glass tissue	22,10	11,80
25.480.2107	Glass wool mattress with 1.5 cm thickness and 24 kg/m ³ density coated with acrilan	29,90	11,80
25.480.2200	Acoustic insulation with polyurethane acoustic foam plate (Unit: m², Materials on construction site: 40%) Clearing dust, grease and impurities from the internal surfaces of the ducts; supply to the work site and installation of flame-retarding, self-extinguishing polyurethane foam plates selected to be compatible with the duct section and air flow rate, with 75 to 100 kg/m ³ density, fire reaction class C as per TS EN 13501-1+A1, and thermal conductivity coefficient λ (40°C) \leq 0.040 W/mK, uniformly on the internal wall of the duct after applying the adhesive mixed with thinner on the internal surfaces of the ducts with a density of 0.5 liter per square meter, for acoustic insulation of ventilation ducts that will be acoustically insulated as per the relevant project. Note: The fire resistance values as well as λ values shall be proven with test reports. Insulation thickness		
25.480.2201	6 mm.	31,80	21,20
25.480.2202	10 mm.	46,80	21,20
25.480.2203	15 mm.	66,00	21,20
25.480.2204	20 mm.	87,00	22,40
25.480.2205	25 mm	106,00	22,40

Ventilation and Air Conditioning Installations

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.480.3000	Factory-made glass wool prefabricated air conditioner ducts (Unit: m², Materials on construction site: 40%) Production of 2.5-cm-thick ducts with 85 kg/m ³ density formed by cutting by special knives of glass wool plates as per the dimensions specified in the relevant project design, with the external surface covered with reinforced tin foil, internal surface covered with colored glass tissue or tin foil, and stapling of the joints, then installation by applying 5-cm-wide self-adhesive tapes (no additional acoustic insulation shall be required when prefabricated glass wool air conditioner ducts with internal surfaces covered with colored glass tissue are used.)		
25.480.3001	Internal surface coated with glass tissue	63,00	25,00
25.480.3002	Internal surface covered with tin foil	65,00	25,00
25.485.1000	FAN COIL UNITS (Unit: Qty.) They shall operate with dynamically and statically balanced close-bladed radial fans with densely positioned fins driven by 220 V, 50 Hz. single or double-shaft, three-speed electric motors, which can be used for heating and cooling. They shall be equipped with cleanable filters for air suction. Serpentine shall be manufactured by the principle that copper pipes are inflated mechanically with aluminum fins firmly mounted to form close mechanical bonds. A drainage tray and connection to collect the condensate shall be present below the serpentine, and the parts that contact the condensate shall be protected against corrosion and insulated to improve acoustic and thermal performance. Fan-coil units shall be supplied and installation in working order with all connections made as per the relevant approved project. NOTE: The heat provided with 18 to 20°C air input and 90/70°C water shall be taken as basis for the device capacity.

25.485.2000	Four-tube Fan Coil Units Other specifications shall be the same as the fan coil types in the item 25.485.1000 with the unit prices including installation of the relevant item increased by 20% and installation fees remaining the same.		
25.490.0000	AIR CONDITIONING SYSTEM WITH VARIABLE COOLANT FLOW RATE AND MULTIPLE INTERNAL UNITS (Unit: Qty.) Supply, installation, delivery in working order of air conditioning systems with variable coolant flow rate which allows connection of multiple (cassette, ceiling, duct, floor, wall types, etc.) internal units in an external unit as per the approved project, and which can perform cooling, and heating as a heat pump. Each external unit shall determine the amount of coolant required for the location of each internal unit connected to it, change the amount of coolant to be sent to the system depending on the data acquired by the signal to be sent to perform capacity check; while internal units shall perform capacity check by electronic expansion valves, external units shall determine the amount of coolant required by the signals that they receive from the internal units and send coolant to the system at variable flow rates by means of a microprocessor board, and the coolant to be used in the system shall be ozone-friendly R410 A. The item shall be delivered in working order, including filling the entire system with the coolant gas. Draining pipes shall be charged per the relevant piping items, the power panel and power and signal cables shall be charged per the unit prices of electricity works.		

Ventilation and Air Conditioning Installations

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.490.1000	EXTERNAL UNIT OR GROUP OF EXTERNAL UNITS (Unit: Qty.) Supply of external units with air-cooled condensers, DC inverter compressors, and min. 3.2 EER (Energy Efficiency Ratio) and 3.4 COP value, which allow connection of internal units of various capacities and types with branch parts on a single line for individual liquid and gas lines from the external units or groups of external units; pressurizing of the units with nitrogen after the connections of pipes and power wires, and delivery in working order, including filling of coolant gas in the entire system. - Nominal capacity and efficiency: Cooling: Interior: 27 C KT/19 C YT, Exterior: 35 CKT/24 CYT; Heating: Interior: 20 C KT/15 C YT Exterior: 7 CKT/6 CYT, pipe length: 7.5 m and elevation difference: 0 m. - External units shall be raised gradually to 25 bar pressure with N2 (Nitrogen) gas after installation and tested for at least 24 hours under this pressure.		
25.490.1100	EXTERNAL UNIT OR EXTERNAL UNIT GROUP WITH FULLY FREQUENCY-CONTROLLED COMPRESSOR (Unit: Qty.) External unit or external unit group with air-cooled condenser, all compressors DC inverter compressor with frequency control, and with the rest of the specifications in compliance with the item 25.490.1000.

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.490.5200	CENTRAL CONTROLLERS FOR AIR CONDITIONING SYSTEM WITH VARIABLE COOLANT FLOW RATE AND MULTIPLE INTERNAL UNITS (UNIT: QTY.) The central controller device which can control all internal units of the systems with internal units and can be connected by a cable to the system communication signal line of the central controller system, control all individual functions of all internal units, have a timer programmer, restrict the use of the internal units on the system and be equipped with a liquid crystal display that provides information about the system failures. Connection and delivery in working order of the central controller.		
25.490.5201	Up to 50 internal units	5.820,00	412,00
25.490.5202	Up to 100 internal units	8.710,00	412,00
25.490.8100	COPPER PIPING SYSTEM FOR AIR CONDITIONING SYSTEM WITH VARIABLE COOLANT FLOW RATE AND MULTIPLE INTERNAL UNITS (Unit: Qty.: m) Made of copper pipes manufactured as per TS EN 12449 with the ends of the pipes inspected against moisture and dust, welding shall be performed with silver-copper alloy under N2 (Nitrogen) to avoid oxidation. Carrier clamps at 1-meter intervals shall be used in the piping. Interior of the pipes shall be cleaned with N2 (Nitrogen) gas before the copper piping is completed and the system is commissioned. - Copper pipe installation shall be raised gradually to 41.5 bar pressure with N2 (Nitrogen) gas after installation and tested for at least 24 hours under this pressure. Installation of piping, testing and commissioning with fasteners as insulated with rubber or elastomeric rubber with minimum thickness values specified below, for use with the piping of Air Conditioning Systems with Variable Coolant Flow Rate.		
25.490.8101	Copper Pipe Group 1/4" 0.8 mm (13 mm Insulation)	38,60	4,90

25.505.2000	CLOSED TYPE COOLING TOWERS (Unit: Qty.) Supply to the work site and installation, including water level control system, tower pond and filtration system, of towers in compliance with the approved project, with the tower pond and housing made of min. AISI 304 stainless steel or CTP (Glass Fiber-Reinforced Polyester) or galvanized steel sheet with 600 g/m ² zinc content, variable fan speeds, min. IP 55 protection class, PVC or polypropylene drift eliminators, easily detachable filling materials, and water spraying system made of PVC flanges which can be fully removed and cleaned. Tower serpentine shall be made of steel-drawn SRM (Steel Relief Annealed) pipes, and subject to deep hot-dip galvanization after production. Should be subjected to a hydraulic test pressure 1.5 times the operating pressure before and after the galvanized coating process. Maximum water side pressure loss of the serpentine should be 60 kPa (The capacities of 30°C output and 35°C input temperatures at 25°C wet-bulb temperature were taken as reference.)

Automatic Control System

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.550.1000	TWO-POSITION ELECTRIC THERMOSTATS: (Unit: Qty.) Two-position electric thermostats that are released to the market in accordance with TS EN 60730-2-7/AC, 2014/35/EU Low Voltage Directive (LVD), and 2004/108/EC Electromagnetic Compatibility Directive and with the CE compliance marking.		
25.550.1100	Two-Position Electric Location Thermostat; Supplying on site, installation to its place, making electrical connections and delivery in working condition of the two-position electric location thermostat with miscellaneous partitions that can be mounted on the wall, with temperature adjustment buttons, that switches on/off the ignition within the adjusted room temperature value.		
25.550.1101	Mechanical Location Thermostat	160,00	15,70
25.550.1102	Digital Location Thermostat	255,00	15,70
25.550.1103	Digital Communication Location Thermostat	507,00	15,70
25.550.1200	Two-Position Electric Duct Thermostat; Supplying on site, installation to its place, making electrical connections and delivery in working condition of the two-position electric channel thermostat that can be mounted on the exterior of the air duct, that is connected to the temperature monitor element with a capillary tube, miscellaneous partitions, temperature adjustment buttons, and a difference range adjustment button that switches on/off the ignition within the adjusted duct temperature value.	687,00	15,70
25.550.1201	Two-Position Electric Submersion Thermostat; Supplying on site, installation together with the cartridge to its place, making electrical connections and delivery in working condition of the two-position electric submersion thermostat that can submersed in the temperature monitoring element boiler, pipe or in any medium filled with liquid, miscellaneous partitions, temperature adjustment buttons, difference range adjustment button that switches on/off the ignition within the adjusted liquid temperature value.		
25.550.1202	Submersion thermostats that can be used up to 120 C	313,00	15,70
25.550.1203	Submersion thermostats that can be used at 120 C and above	329,00	15,70
25.550.1300	Two-Position Electric Surface Thermostat; Supplying on site, installation to its place, making electrical connections and delivery in working condition of the two-position electric surface thermostat that can be submersed pipe or in any medium that comes into contact tightly with the surface, with miscellaneous partitions, difference range adjustment button that switches on/off the ignition within the adjusted temperature value.	334,00	15,70
25.550.2000	PROPORTIONAL ELECTRIC THERMOSTATS: (Unit: Qty.)		
25.550.2001	Proportional Electric Location Thermostat; Supplying, installation to its place, making electrical connections and delivery in working condition of the two-position electric room thermostat with miscellaneous partitions that can be mounted on the wall, with temperature adjustment buttons, that can change the resistance value of the potentiometer in proportionate with the temperature change within the adjusted room temperature value.	809,00	15,70
25.550.2002	Proportional Electric Duct Thermostat; Supplying, installation to its place, making electrical connections and delivery in working condition of the two-position electric duct thermostat with miscellaneous partitions that can be mounted outside the air duct, that is connected to a temperature monitor element with a capillary tube, temperature adjustment buttons, that can change the resistance value of the potentiometer in proportionate with the temperature change within the adjusted room temperature value.	868,00	15,70

Automatic Control System

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.550.2003	Proportional Electric Submersion Thermostat; Supplying, installation to its place, making electrical connections and delivery in working condition of the two-position electric submersion thermostat together with its cartridge with miscellaneous partitions that the temperature monitoring element can be submersed in the boiler, pipe or any medium filled with liquid, that is connected to a temperature monitor element with a capillary tube, with temperature adjustment buttons, that can change the resistance value of the potentiometer in proportionate with the temperature change within the adjusted liquid temperature value.	1.240,00	15,70
25.550.2100	Additions to Two-Position and Proportional Thermostats (Unit: Qty.) In addition to the characteristics specified in the general description of electric thermostats, the elements added in the thermostat as a requirement of the place of use.		
25.550.2101	Manual correction addition (manual reset)	91,50	7,85
25.550.3000	TWO-POSITION HYGROSTATS: (Unit: Qty.)		
25.550.3001	Two-Position Location Hygrostat; Supplying on site, installation to its place, making electrical connections and delivery in working condition of the two-position electric hygrostat with 80% RH relative humidity partitions that can be mounted on the wall, with humidity adjustment buttons, that switches on/off the ignition within the adjusted room relative humidity value.	373,00	15,70
25.550.3002	Two-Position Air Duct Hygrostat; Supplying on site, installation to its place, making electrical connections and delivery in working condition of the two-position electric hygrostat with 80% RH relative humidity partitions that can be mounted inside the humidity monitoring duct, body outside the duct, with humidity adjustment buttons, that switches on/off the ignition within the adjusted duct relative humidity value.	373,00	15,70
25.550.4000	PRESSURESTATS (Pressure Switch): (Unit: Qty)		
25.550.4100	Two-Position Pressurestat; Supply on site, installation to the place, making electrical connections and delivery in working condition of the two-position electric pressurestat that can be mounted on the boiler, exchanger, pipe or any other pressurized container, that has miscellaneous partitioned pressure adjustment buttons including fluid and pressure values of the project, that switches on/off the contact within the adjusted pressure value.		
25.550.4101	Two-position pressurestat (for air)	276,00	15,70
25.550.4102	Two-Position Pressurestat (for liquids)	289,00	15,70
25.550.5000	DIFFERENTIAL PRESSURE PRESSURESTATS: (Unit: Qty.)		
25.550.5100	Two-Position Differential Pressurestat; Supply on site, installation to the place, making electrical connections and delivery in working condition of the two positioned differential pressurestat that can be connected on two different ambients, with miscellaneous partitions, with differential pressure adjustments button, that can switch on and off the built-in ignition in case the difference between two pressures reaches the adjusted pressure value.		
25.550.5101	Two positioned differential pressurestat (for air)	148,00	15,70
25.550.5102	Two positioned differential pressurestat (for liquids)	427,00	15,70

Automatic Control System

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.552.1100	ELECTRONIC SENSING ELEMENTS (Sensors): (Unit: Qty.) Supply on site, installation to the place, making electrical connections and delivery in working condition of every type temperature sensing element together with all parts including cover, immersion tubes and bushes that are named based on area of use and installation type, with changing resistance depending on the temperature change in the location of monitoring element, without temperature adjustment button.		
25.552.1101	Location type electronic temperature sensing element	163,00	15,70
25.552.1102	Air duct type temperature sensing element	194,00	15,70
25.552.1103	Immersion type electronic temperature sensing element, up to 120°C	215,00	15,70
25.552.1104	Immersion type electronic temperature sensing element, above 120°C	198,00	15,70
25.552.1105	Outside air type temperature sensing element	139,00	15,70
25.552.1106	Surface type temperature sensing element	175,00	15,70
25.552.1200	Electronic Relative Humidity Sensing Elements; Supply on site, installation to the place, making electrical connections and delivery in working condition of every type electronic relative humidity sensing element together with parts including cover etc. that are named based on area of use and installation types, with changing resistance depending on the relative humidity change in the location of monitoring element, without temperature adjustment button.		
25.552.1201	Room type electronic relative humidity sensing element	449,00	15,70
25.552.1202	Duct type electronic relative humidity sensing element	536,00	15,70
25.552.1300	Electronic Temperature and Moisture Sensing Elements (Sensors); (Unit: Qty.) Supply on site, installation to the place, making electrical connections and delivery in working condition of temperature sensing element together with all parts including cover, immersion tubes and bushes that are named based on area of use and installation type, with changing resistance depending on the temperature and moisture change in the location of monitoring element.		
25.552.1301	Location type electronic temperature moisture sensing element	848,00	15,70
25.552.1302	Duct type electronic temperature moisture sensing element	873,00	15,70
25.552.1303	Outside air type temperature moisture sensing element	1.430,00	15,70
25.552.1400	Electronic Pressure Sensing Elements; Supply on site, installation to the place, making electrical connections and delivery in working condition of small parts including cover etc. that are named based on area of use and installation types, with changing resistance depending on the relative humidity change in the location of monitoring element.		
25.552.1401	Pressure sensing element for air	709,00	15,70
25.552.1402	Pressure sensing element for the liquids	990,00	15,70
25.552.1403	Pressure sensing element for vapor	1.110,00	15,70
25.552.1500	Electronic Differential Pressure Sensing Elements; Installation to the place, making electrical connections and delivery in working condition of the sensing element that have different pressures with two pressure connection locations, and that can be connected with two different media, that can handle differential pressure adjustment.		
25.552.1501	Differential pressure sensing element for air	629,00	15,70
25.552.1502	Differential pressure sensing element for the liquids	1.790,00	15,70
25.552.1503	Differential pressure sensing element for vapor	1.700,00	15,70

Automatic Control System

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.552.1600	Air Sensors; Supply on site, installation to the place, making electrical connections and delivery in working condition of small parts including cover etc. that are named based on area of use and installation types, with changing output signal depending on the air quality in the location of monitoring element.		
25.552.1601	Carbon Dioxide (CO2) Sensor	1.450,00	15,70
25.552.1602	Carbon Monoxide (CO) Sensor	1.970,00	15,70
25.552.1603	Air Quality (VOC) Sensor	1.530,00	15,70
25.552.2000	Differences for Additions to Electronic Sensing Elements: (Unit: Qty.)		
25.552.2001	Addition of adjustment knob for location type temperature and air type pressure sensors	214,00	15,70
25.552.2002	Addition of indicator for location type temperature and air type pressure sensors	245,00	15,70
25.555.1000	ELECTRONIC HOT WATER (BOILER) CONTROL PANEL: (Unit: Qty.) Supply on site, installation to the place, making electrical connections and delivery in working condition of electronic hot water control panel together with digital indicator that receives warning from the outside air inflow water or electronic temperature sensing elements in the boiler, that controls boiler or motorized valve or pump in order to adjust inflow water or boiler water temperature depending on the outside water temperature within a predefined program, that has the necessary buttons and potentiometers in order to determine the program, that can program daily (24-hour) and weekly, that has summer-winter access function, that ensures operation without electricity cut.		
25.555.1001	Two-position electronic hot water control panel	1.740,00	48,10
25.555.1002	Proportionally controlled electronic hot water control panel	1.920,00	48,10
25.555.2000	ELECTRONIC CONTROL PANEL: (Unit: Qty.)		
25.555.2100	Pre-Programmed Air Conditioning Control Panel; (Unit: Qty.) Supply on site, installation to the place, making electrical connections and delivery in working condition of the electronic control panel with digital indicator that keeps the adjusted value by controlling with the warnings received from the electronic sensing elements, that can be installed to the enclosure or wall.		
25.555.2101	Air conditioning control panel with 1 control loop	2.070,00	48,10
25.555.2102	Air conditioning control panel with 2 control loops	2.490,00	48,10
25.555.2103	Air conditioning control panel with 3 control loops	3.000,00	48,10
25.555.2104	Air conditioning control panel with 4 control loops	3.540,00	48,10
25.555.3000	Differences to be Paid for Additions in Electronic Temperature Control Panel: (Unit: Qty.) Additions that are requested to be available on the electronic temperature control panel due to the requirement of the area of use other than the specifications stated in the relevant definitions of the above item 25.555.2100.		
25.555.3001	Addition of remote set-point replacement unit	215,00	8,10

Automatic Control System

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.560.1000	SERVOMOTORS: (TSE quality certificate) (Unit: Qty.)		
25.560.1100	Two-Position (switch on/off) servomotor; Supply on site, installation to the place, making electrical connections and delivery in working condition of the two positioned servomotor with miscellaneous rotation duration that fully switches on or off the valves or dampers with the warnings received from the two positioned thermostat, hygostat, pressurestat or electronic control panel, that has limited rotation with a specific angle.		
25.560.1101	For valves with DN 10 to DN 20 diameters	852,00	15,70
25.560.1102	For valves with DN 25 to DN 40 diameters	956,00	16,50
25.560.1103	For valves with DN 50 to DN 65 diameters	1.140,00	17,80
25.560.1104	For valves with DN 80 to DN 125 diameters	1.900,00	19,00
25.560.1105	For valves with DN 150 and larger diameters	2.260,00	20,30
25.560.1106	For dampers with an area of 0.4 m ² and less	610,00	15,70
25.560.1107	For dampers with an area of 0.4 - 1.0 m ²	654,00	16,50
25.560.1108	For dampers with an area of 1.0 - 2.0 m ²	779,00	17,80
25.560.1109	For dampers with an area of 2.0 - 4.0 m ²	997,00	19,00
25.560.1200	Proportional Servomotors; Supply on site, installation to the place, making electrical connections and delivery in working condition of the electromechanical servomotor together with all equipment pieces that locates the connected valve or damper with linear or rotary movement proportionally with the proportional warning (signal) received from the relevant control device.		
25.560.1201	For valves with DN 10 to DN 20 diameters	1.200,00	15,70
25.560.1202	For valves with DN 25 to DN 40 diameters	1.290,00	16,50
25.560.1203	For valves with DN 50 to DN 65 diameters	1.590,00	17,80
25.560.1204	For valves with DN 80 to DN 125 diameters	2.460,00	19,00
25.560.1205	For valves with DN 150 and larger diameters	2.780,00	20,30
25.560.1206	For dampers with an area of 0.4 m ² and less	792,00	15,70
25.560.1207	For dampers with an area of 0.4 - 1.0 m ²	826,00	16,50
25.560.1208	For dampers with an area of 1.0 - 2.0 m ²	934,00	17,80
25.560.1209	For dampers with an area of 2.0 - 4.0 m ²	1.000,00	19,00
25.560.2000	Additions to Servomotors: (Unit: Qty.)		
25.560.2100	Addition of emergency positioning: (to be used in vapor, super-heated water, hot water valves and ventilation dampers) Supply on site, installation to the place and delivery in working condition of the emergency location unit that fully switches on or off the valve feeding the servomotor with the built-in spring or battery mechanism in case of power outage.		
25.560.2101	For valves with DN 10 to DN 20 diameters	522,00	15,70
25.560.2102	For valves with DN25 to DN 40 diameters	524,00	16,50
25.560.2103	For valves with DN 50 to DN 65 diameters	778,00	17,80
25.560.2104	For valves with DN 80 to DN 125 diameters	802,00	19,00
25.560.2105	For valves with DN 150 and larger diameters	874,00	20,30
25.560.2106	For dampers with an area of 0.4 m ² and less	744,00	15,70
25.560.2107	For dampers with an area of 0.4 - 1.0 m ²	984,00	16,50
25.560.2108	For dampers with an area of 1.0 - 2.0 m ²	985,00	17,80
25.560.2109	For dampers with an area of 2.0 - 4.0 m ²	1.170,00	19,00

Automatic Control System

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.560.2200	Adding position switch Supply on site, installation to the place, making electrical connections and delivery in working condition of the position switch that adjusts certain rotation angles of the servomotor and transmits warning in this rotation angle, that receives movement from the rod installed inside or outside the servomotor.	226,00	7,95
25.560.2300	Addition of position feedback potentiometer Supply on site, installation to the place, making electrical connections and delivery in working condition of the position feedback potentiometer that feeds the position of the servomotor proportionally.	263,00	7,95
25.562.1000	FAN-COIL CONTROL SYSTEM: (Unit: Qty.)		
25.562.1100	Fan-Coil Thermostat; Supply on site, installation to the place, making electrical connections and delivery in working condition of additions including contact, manual adjustment addition (manual reset), etc. pertaining to the fan-coil thermostat with summer-winter switch, that stops and starts minimum 3-cycle fan motor of the fan-coil in order to keep the room temperature at the adjusted value, that controls the automatic fan-coil valve, that resists against motor starter currents and at least 1 A continuous inductive load at 220 volt, that has adjustment button, that is 10/30 C partitioned.		
25.562.1101	Mechanical thermostats	165,00	15,70
25.562.1102	Thermostats with digital display (without communication)	257,00	15,70
25.562.1103	Thermostats with digital display (with communication)	517,00	15,70
25.562.1200	Automatic Fan-Coil Valve; Supply on site, installation to the place, making electrical connections and delivery in working condition of the motorized control valve that changes the water amount passing through the fan-coil in order to adjust the room temperature with the warning (signal) received from the Fan-Coil thermostat, that has brass or bronze body, that has geared connection, that has drive unit with electromagnetic or electrothermal mechanism, that operates with linear or rotary movement. (Valve body, motor and connection equipment are complete.)		
25.562.1201	Two-way DN 15	107,00	15,70
25.562.1202	Two-way DN 20	141,00	16,50
25.562.1203	Two-way DN 25	150,00	17,80
25.562.1204	Three-way DN 15	140,00	19,00
25.562.1205	Three-way DN 20	171,00	20,30
25.562.1206	Three-way DN 25	204,00	21,60
25.565.1000	TWO-WAY AUTOMATIC CONTROL VALVE BODY: (Unit: Qty.) Supply on site, installation to the place, delivery in working condition of the two-way automatic valve body that is manufactured in accordance with the Directive (2014/68/AB) Pressure Equipment, that is released to the market with CE compliance marking, that adjusts liquid and vapor flow amount, that is triggered by a drive unit, that has a single or double seats, that has peak bronze or brass spillage body, that has stainless steel rod, bronze or stainless steel valves or seats. (drive unit is not included in the price)		
25.565.1200	Two-way, PN 10, threaded control valve body; Resistant to at least to 10 atmospheric pressures up to 100°C and to 8 atmospheric pressures up to 110 °C. Other features are as in item 25.565.1000.		
25.565.1201	DN 15	265,00	28,10
25.565.1202	DN 20	311,00	28,10

Kitchen and Laundry Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.600.1000	WORKTABLES		
25.600.1100	Worktable, AISI 304 Grade 18/8 Cr-Ni (Size: m) The supply and installation of the work table, completely manufactured of AISI 304 Grade 18/8 Cr-Ni material, at least 850 mm high, with 60 mm backrest, upper slab, legs made of 40x40x1,2 mm box profile or pipe (4 pieces up to 2 m, 6 pieces up to 3 m) and the other parts at least 1.5 mm and the lower plate 1.2 mm thick, when necessary, the right and left sides Argon welded and traces of weld completely eliminated, table corners and any kind of visible joints completely smoothed, the upper part polished or matt finished, legs with height adjustments (ball joint) made of rigid plastic, tubular, cast iron or rubber and mounted on the profile.		
25.600.1101	600 mm. width	774,84	38,56
25.600.1102	700 mm. width	810,51	38,56
25.600.1103	800 mm. width	847,41	38,56
25.600.2101	600 mm. width Moving Worktable Supply of work tables completely made of AISI 304 Grade 18/8 Cr-Ni material, upper slab with perimeter band for use in four directions, upper and lower plate, bottom plate with protection band, 360° swiveling 4 heavy duty legs 2 with brakes. Other specifications shall comply with item 25.600.1100.	1.242,30	
25.600.2102	700 mm. width Moving Worktable	1.291,50	
25.600.2103	800 mm. width Moving Worktable	1.328,40	
25.600.2200	WORKTABLE, WITH SINK, PRESSED: (Unit: m) Manufactured completely wall thickness AISI 304 Grade 18/8 Cr-Ni material with the upper plate with 1.2 mm wall thickness to prevent the water overflow, pressed as one piece, sloped as to direct the water flow to the tub. The sinks with at least 1.0 mm thickness shall be mounted to the upper plate with weld seams and the seams shall be smoothed as to form a monolithic image with the upper table. The supply and installation of a 1 mm skirted table with 60 mm high backrest, legs made of 40 x 40 x 1.2 mm box profile legs (4 pieces up to 190 cm, 6 pieces up to 240 cm), legs with height adjustment (ball joint) made of rigid plastic or rubber and mounted on the profile in order to prevent the sinks from being seen from the side and the front. (Sink is not included in the unit price.)		
25.600.2201	600 mm. width	775,34	38,56
25.600.2202	700 mm. width	801,16	38,56
25.600.2203	800 mm. width	847,90	38,56
25.600.2300	SINK, PRESSED, GRADE AISI 304 18/8 Cr-Ni The supply and distribution of a sink manufactured from 18/8 stainless steel material with at least 1.0 mm thickness with the deep drawing method, shall welded to the table top plate of the same material by argon-arc welding and the seams shall be smoothed as to form a monolithic image with the upper table and the corners shall be rounded.		
25.600.2301	Dimensions 40 x 40 x 25 cm.	338,25	
25.600.2302	Dimensions 40 x 50 x 25 cm.	377,61	
25.600.2303	Dimensions 50 x 50 x 25 cm.	414,51	
25.600.2304	Dimensions 50 x 50 x 30 cm.	452,64	
25.600.2305	Dimensions 60 x 50 x 30 cm.	541,20	

Kitchen and Laundry Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.600.3000	Addition of drawer: (Unit: Qty.)		
25.600.3100	Addition of drawer AISI 304 Grade 18/8 Cr-Ni With dimensions 50 x 50 x 15, handle, mounted to the table with rails. The price shall be considered when the drawers are added.	215,25	
25.600.3200	Addition of cupboard: (Unit: m) All to be mounted to the tables manufactured of AISI 304 Grade 18/8 Cr-Ni material, sliding doors of 1 mm thickness, the sides and the back of 0.8 mm thickness, per meter price of the cupboard without shelf.		
25.600.3201	For worktables with 600 mm. width	554,73	
25.600.3202	For worktables with 700 mm. width	648,21	
25.600.3203	For worktables with 800 mm. width	740,46	
25.600.3300	INTERMEDIATE SHELF ADDITION (Unit: m) Manufactured from AISI 304 Grade 18/8 Cr-Ni for mounting to the worktable, 1.2 mm thick, with three turns, supported by reinforcements where necessary. The price shall be considered when the shelves are added		
25.600.3301	For worktables with 600 mm. width	260,76	
25.600.3302	For worktables with 700 mm. width	298,89	
25.600.3303	For worktables with 800 mm. width	345,63	
25.600.4100	CUPBOARDS AISI 304 GRADE 18/8 Cr-Ni: (Unit: m)		
25.600.4101	The supply and installation of the cupboard with door: 1 mm. wall thickness, 400 x 600 mm. size, center rack, front hanger system, double wall sliding door.	1.173,78	41,44
25.600.4102	The supply and installation of the cupboard without door: 1 mm. wall thickness, 400 x 600 mm. size, center rack.	1.010,19	41,44
25.600.5000	WORKTABLES FOR MEAT PREPARATION TABLES: (Unit: m)		
25.600.5100	Worktable for meat preparation AISI 304 Grade 18/8 Cr-Ni: The upper table with 6 cm back in the back and/or at the side depending on the working person and 40 mm high, made of polyethylene, other parts the same as in 25.600.1100		
25.600.5101	600 mm. width	831,23	45,75
25.600.5102	700 mm. width	891,50	45,75
25.600.5103	800 mm. width	955,46	45,75
25.600.5200	MEAT BLOCK (Unit: Pieces) Carrier carcass and legs made of AISI 304 Grade Cr-Ni material 40 x 40 x 1.2 mm thick, total height 850 mm, with height adjustment components (ball joint), made of rigid profile and of rigid plastic, cast or rubber mounted on profile.		
25.600.5201	50 x 60 x 8 cm., polyethylene plate.	1.580,40	18,30
25.600.5202	50 x 70 x 8 cm., polyethylene plate.	1.764,90	18,30
25.600.5203	80 x 80 x 8 cm., polyethylene plate.	2.023,20	18,30
25.600.6000	WORKTABLES FOR DOUGH MAKING: (Unit: m)		
25.600.6100	Worktables For Dough Making, AISI 304 Grade Cr-Ni: The upper table 3 cm, the backs 6 cm thick marble, plastic slip-resistant base under the marble, cast iron feet, other parts same as 25.600.1100.		
25.600.6101	600 mm. width	939,40	52,94
25.600.6102	700 mm. width	1.015,66	52,94
25.600.6103	800 mm. width	1.096,84	52,94

Kitchen and Laundry Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.600.6104	1100 mm. width	1.440,01	52,94
25.600.6200	WORKTABLE FOR DISH STRIPPING: (With stripping funnel) (Unit: m) The supply and on-site installation of the stripping table manufactured entirely from AISI 304 Grade 18/8 Cr-Ni material with 1.5 mm wall thickness, stripping funnel made of stainless steel or plastic, load-carrying frame made of Cr-Ni box profile (40 x 40 x 1.5 mm), upper table with a slope in special form to prevent water from flowing onto the floor, legs screw adjusted and having hard plastic pads at the bottom..		
25.600.6201	600 mm. width	916,29	38,56
25.600.6202	700 mm. width	948,28	38,56
25.600.6203	800 mm. width	997,48	38,56
25.602.1000	TRAYS (Unit: m.)		
25.602.1100	Meat and vegetable washing tray AISI 304 Grade 18/8 Cr-Ni: The supply and installation at work site, approximately 850 mm high, at least 300 mm deep, completely manufactured of at least 1.5 mm AISI 304 Grade 18/8 Cr-Ni material, with 60 mm. top, upper plate and other parts 1.2 mm. thick, 1.5 mm. thick pool (with a maximum of 10 cm margin), pool bottom with filter tray, instead of the shelves, the front and the sides skirted to prevent the pool from being seen, all welded with argon arc welding matt satin finish, legs from 40 x 40 x 1.2 mm box profile, with hard plastic or rubber height adjustment elements (ball joint) mounted to the profile.	1.866,94	48,63
25.602.1200	BOILER AND POT WASHING TRAY: AISI 304 Grade Cr-Ni (Unit: m) Completely Manufactured of AISI 304 Grade 18/8 Cr-Ni material with a wall thickness of 1.5 mm, with 300 mm. deep pool, with a slope to facilitate the flow of water to the tub and from the table removable grid made of stainless steel profile, a band along the circumference of the tub to prevent the pool from being seen, table height 570 mm, the wall side 340 mm, legs made of 40 x 40 x 1.2 mm box profile with hard plastic or rubber height adjustment elements (ball joint) mounted to the profile. The supply and installation of the tray made with Argon welding and the removal of the slag and smoothening of the weld seams.		
25.602.1201	With 600 mm width	1.485,64	48,63
25.602.1202	With 700 mm width	1.534,84	48,63
25.602.1203	With 800 mm width	1.608,64	48,63
25.602.1204	With 1000 mm width	1.743,94	48,63

Kitchen and Laundry Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.605.1100	MEAL SERVICE TABLES (Unit: Pieces) The supply and installation of the service table, manufactured of AISI 304 Grade 18/8 Cr-Ni material, the meal pots in the hot water bath, with thermostat and electrical heater, below one bottom shelf, above glass, cough curtain, in front 30 cm tray conveying band, upper plate, hot water bath and meal pots 1.5 mm thick, other parts (including the tray band side and two side covers) 1 mm thick AISI 304 Grade 18/8 Cr-Ni material, hot water bath Argon welded and traces of weld completely eliminated visible joints completely smoothed, meal pots and basin manufactured by pressing, box profile legs with height adjustments (ball joint) made of rigid plastic, tubular, cast iron or rubber and mounted on the profile. Note: The devices shall be manufactured in compliance with the 2014/35/EU The Low Voltage Directive (LVD).		
25.605.1101	1600 mm, with 4 pieces of GN tub, at least at 3 kW power	5.599,70	145,88
25.605.1102	1900 mm, with 5 pieces of GN tub, at least at 6 kW power	6.307,60	194,50
25.605.1103	2400 mm, with 6 pieces of GN tub, at least at 6 kW power	7.475,53	243,13
25.605.1200	COVER UNIT (Unit: m) The supply and installation of tray manufactured completely from 1.5 mm. wall thickness AISI 304 Grade 18/8 Cr-Ni material with 1.5 mm wall thickness. closed on three sides, the support legs made of box profile (40 x 40 x 1.2 mm), with conveyor band, with at least three compartments (fork, spoon, knife) removable for cleaning, width 700, height 850/1350 mm.	2.245,01	31,50
25.605.1300	HOT WATER BATH FOR SUACE (Unit: Pieces)		
25.605.1301	Hot Water Bath for Sauce, electrically powered The supply and installation of the hot water bath, minimum 4 kW power, 800 x 900 x 850, 850 x 900 x 850 or 900 x 900 x 850 mm size, body AISI 304 Grade 18/8 Cr-Ni stainless steel sheet, other inner parts aluminized sheet, pool part of stainless steel sheet and suitable for the placement of GN pots, with multi-stage thermostats and limit protected against temperature rises, main switch to control the power entry to the water bath or to cut the power, all electrical control equipment in accordance with the international standards. Note: The devices shall be manufactured in compliance with the 2014/35/EU The Low Voltage Directive (LVD).	4.619,44	34,00
25.605.1302	Hot Water Bath for Sauce, gas powered The supply and installation of the gas powered hot water bath, minimum 5 Kw power, 800 x 900 x 850, 850 x 900 x 850, 900 x 900 x 850 mm size, body AISI 304 Grade 18/8 Cr-Ni stainless steel plate, polish-finished, other inner parts of aluminized sheet metal, pool part of stainless steel sheet and suitable for the placement of gastronorm pots, gas valve, safety valve which will automatically cut off the gas in case the flame goes off, pilot flame, thermostatic structure that can control the temperature at different stages, gas burner in form of a stainless steel pipe and automatic ignition button capable to work with all the gases, working with LPG or natural gas without any modification, all gas control and control equipment in compliance with the international standards. Note: Shall be in compliance with the Gas Powered Devices Directive 2016/426/AB	4.791,64	34,00

Kitchen and Laundry Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.607.1000	DOUGH KNEADING MACHINE: (Unit: Pieces) The supply, installation and commissioning of the machine with the total capacity specified below for the kneading of different types of doughs, frame made of steel, upper cover and body made of cast aluminum, wear and corrosion resistant, painted, the pot and the mixer made of AISI 304 Grade Cr-Ni material, monolithic in order to provide hygiene, the mixer with approximately 50 and 100 RPM double speed, gearbox and the motor coupled to each other, speed of the pot 15 RPM, with safety switch, with cage, the legs shall be in a way to prevent vibration and to work quietly and without vibration, the electrical panel to be provided with thermal and automatic fuse mounted on the machine against overload, to work at 380 V - 50 Hz electricity. Note: The devices shall be manufactured in compliance with the 2014/35/EU The Low Voltage Directive (LVD). Mixing Mot. (kW)		
25.607.1001	20 kg/round capacity; 0.4-0.7 (minimum)	4.143,38	91,75
25.607.1002	30 kg/round capacity; 0.6-0.9 (minimum)	4.721,38	108,88
25.607.1003	40 kg/round capacity; 0.8-1.4 (minimum)	5.627,50	123,25
25.607.1004	50 kg/round capacity; 1.0-1.6 (minimum)	6.511,78	140,38
25.607.1005	60 kg/round capacity; 1.2-2.1 (minimum)	8.242,00	154,75
25.607.2000	Potato Peeling Machine (Unit: Qty.) The supply and installation of the potato peeling machine with potato or similar food peeling capacity, at least 0.37 kW electric motor, at least 38 cm. diameter and 35 cm. deep galvanized or chrome peeling pot, on the inner surface of the peeling pot silicon carbide coated or grater shaped 18/8 stainless steel stripping liner and interchangeable silicon carbide coated peel disc, hinged front cover, mobile top cover and water spray nozzle. Note: Electrically operated devices shall be manufactured in accordance with the 73/23/EEC Low Voltage Directive issued by the Ministry of Industry and Trade and published on 11.January.2002 with number 24637. (he electrical panel and the power cable are not included in the description)		
25.607.2001	10 kg/run	3.947,94	92,00
25.607.2002	20 kg/run	6.721,44	98,00
25.607.2003	30 kg/run	7.690,13	102,00
25.607.3000	MEAT GRINDER: (TS 746) (Unit: Qty.) The supply and installation of the meat grinder with steel gear, gearbox with roller bearings and switch for back and forth rotations, with the cable at the required length and cross-section, body and neck made of AISI 304 Grade Cr-Ni material, enclosed in a casing. Note: Shall be manufactured in compliance with the regulation 2014/35/EC on electrical equipment designed for use within certain voltage limits and machine safety regulation (2006/42/EC)		
25.607.3001	With 200 kg/h meat grinding capacity	3.368,40	48,63
25.607.3002	With 400 kg/h meat grinding capacity	3.811,14	53,49
25.607.3003	With 500 kg/h meat grinding capacity	4.686,43	55,48
25.607.3004	With 600 kg/h meat grinding capacity	5.507,80	58,90

Kitchen and Laundry Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.607.3100	Meat Grinder, Stainless Steel, Cooling Type (Unit: Qty.) With AISI 304 stainless steel body, spiral, neck and neck nut, meat chamber cooling function, cooling unit with digital controller, and hand guard for safety. Bearing a CE marking.		
25.607.3101	With cooling and 400 kg/h meat grinding capacity	6.156,62	53,49
25.607.3102	With cooling and 600 kg/h meat grinding capacity	7.376,39	54,51
25.607.4000	BREAD SLICING MACHINE: (Unit: Pieces) Approx. 60 x 70 x 105 cm in size, 220 Volt AC, 50 Hz. The supply and installation of the bread slicing machine, power supply from the network, 0.8 kW, driven by 1400 RPM single phase motor, 10-15 mm thick slicing, 32 stainless steel blades; the surfaces coming into contact with bread to be made of AISI 304 Grade Cr-Ni, working automatically by pulling the lever, maximum 50 cm size bread entry, with crumb pot, body made of 5 mm thick sheet metal, oven painted, cast iron wheels. Note: The electrical devices shall be manufactured in compliance with the regulation 2014/35/EC on electrical equipment for use within certain voltage limits.	4.395,80	17,00
25.610.1000	FRYERS: Unit: pieces:		
25.610.1100	Electric Fryer: The supply and installation of the electric fryer for frying various foods in oil and in a short time, made of AISI 304 Grade 18\8 Cr-Ni material, of 85 cm. height, oil container with cold storage, single or double frying baskets with bottom lid, bottom discharge or front drainage system and oil collection container, pilot lamp, thermostat, oil drain tap and baskets suitable for frying and hygiene conditions, handle protected against heating, thermostat with 100-180°C temperature control, each of the basins are used independently with a separate control system, thermostat tips in contact with oil are of Cr-Ni, fitted with a ball valve at front or at the side to drain the oil, for the multi-purpose use fits under the cupboard or mounted on a carcass for middle group applications, having a main switch and a limit safety thermostat to cut-off the power in case of danger on the device, all electrical control equipment in accordance with the international standards, having height adjustment components. Note: The electrical devices shall be manufactured in compliance with the regulation 2014/35/EC on electrical equipment for use within certain voltage limits. for use within certain voltage limits.		
25.610.1101	12 L, min. 10 kW	4.554,25	34,00
25.610.1102	18 L, min. 16 kW	5.279,95	34,00
25.610.1103	24 L, min. 21 kW	8.182,75	34,00
25.610.1104	36 L, min. 33 kW	9.351,25	34,00

Kitchen and Laundry Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.610.2000	OVENs: (Unit: Pieces)		
25.610.2100	ELECTRIC CONVECTION OVEN: Made of Cr-Ni material, manual or automatic humidification, adjustable cooking time and digital display between 0 C - 300 C, shall be insulated with specially produced, at least 30 mm thick white ceramic or rock wool having a density of at least 50 kg/m³. Double-stage door lock system, with interior lighting, insulated, tempered, double-glazed, temperature time program indicator, sensor system to stop the fan when the door is opened, 2-speed stainless steel fan, equal heat distribution with double-direction fan with. Note: The devices shall be manufactured in compliance with the 2014/35/EU The Low Voltage Directive (LVD).		
25.610.2101	6 GN 1/1 tray and min. 8 kW thermal capacity (including a bottom stand with tray rails and 4-cm-deep trays)	10.861,83	111,63
25.610.2102	10 GN 1/1 tray and min. 12 kW thermal capacity (including a bottom stand with tray rails and 4-cm-deep trays)	11.850,65	128,75
25.610.2103	10 GN 2/1 tray and min. 16 kW thermal capacity (including a bottom stand with tray rails and 4-cm-deep trays)	16.789,85	160,25
25.610.2104	20 GN 2/1 tray and min. 32 kW thermal capacity (including a cooker car kit and 4-cm-deep trays)	22.740,40	194,50
25.610.2200	GAS CONVECTION OVEN: Made of AISI 304 Grade 18\8 Cr-Ni material, manual or automatic humidification, shall be insulated with at least 30 mm thick white rock wool or white ceramic wool having a density of at least 50 kg/ m³. Double-stage door lock system cutting-off the gas when the flame goes off, with interior lighting, insulated, tempered, double-glazed, temperature time program indicator, sensor system to stop the fan when the door is opened, 2-speed stainless steel fan, equal heat distribution with double-direction fan with. Note: In accordance with the Directive 2016/426/EU on gas burning devices, released to the market with a CE compliance marking.

25.630.1000	<p>LAUNDRY WASHING MACHINE, FULLY AUTOMATED: (Unit: Pieces.)(TS EN ISO 10472-2)</p> <p>Shall be introduced to the market fulfilling the requirements set out under the heading Market Introduction and Putting Into Service (Chapter II, Article 5-(1)) of the Directive (2006/42/EC) Machinery Safety and in compliance with the Directive (2014/35/EC) Electrical Equipment Designed for Specific Voltage Limits. The machine will have capacity to divide the tumbler volume by 10. Exterior coating, all surfaces that come into contact with the laundry and water, observation port with glass shall be of AISI 304 Grade 18/8 Cr-Ni stainless steel, the under frame shall be of at least 3 mm. thick, anticorrosion painted, black DKP steel plate or profile. The machine shall have a safety system to prevent the opening of the unloading hatch while the machine is working, washing will be monitored during the washing process by fitting a glass to the hatch and water tightness shall be ensured by way of a gasket. With the belt drive system, the washing shall be done at 25-60 RPM and the tumbling at 50/110RPM capable to spin in two stages, the high tumbling speed shall be to meet at least $G=300$ value. ($G=0.558 \times Dt \times Nt^2 / 1,000,000$ according to DIN 11901 Dt = Tumbler diameter mm, Nt^2=fast tumbling speed in square). There shall be at least 15 fixed washing + tumbling programs and at least 15 customizable programs prepared on the touch screen microprocessor control panel on the machine. To be supplied, installed delivered in working order with water level switch with at least two different water levels to be adjusted automatically, at least three-chamber detergent unit made of polyester and Cr-Ni stainless steel, discharge system to discharge excessive water and foam, a system to prevent the vibration and imbalance, machine shaft with ceramic or stainless steel bushings or with hard chrome plating against corrosion and supported in at least roll bearings at the back of the machine and having Viton seals, can be connected to liquid detergent dosing system, with electric/steam heating option, capable to do the intake and discharge of steam, hot water, cold water automatically, furnished with control panel</p>

25.635.2300	<p>PRESS IRONING MACHINE: (Unit: Pieces) Shall be released to the market fulfilling the requirements set out under the heading Market Introduction and Putting Into Service (Chapter II, Article 5-(1)) of the Directive (2006/42/EC) Machinery Safety and in compliance with the Directive (2014/35/EC) Electrical Equipment Designed for Specific Voltage Limits. Shall work with at least 2 atmospheres pressure steam. The supply and installation of the press ironing machine, upper ironing claw made of cast aluminum, steam pocket, cast iron lower cushion, tops of the claws made of perforated stainless sheet woven with perforated cotton and calico cushion, at least 0.25 kW aspirator for dehumidifying the laundry being ironed, foot pedals to control the aspirator, to lock/unlock the upper claw to/from the lower cushion, hand-operated steam valve and lever for steam injection from the top cushion, chassis made of profile black sheet metal and painted, flexible hoses for steam and condensate connections, table made of formica-coated chipboard or plywood, (The width of the ironing pad shall be approximately 20 cm at the narrow end, 40 cm at the wide place and 120 cm long.)</p>		
25.635.2301	<p>Electric Heated Steam Generator, Manual Press Iron: (Unit: Pieces.) Supply and installation of the press iron wit length min. 1130 mm, narrow end of min.250 mm, wide end of min.345 mm in size, with upper and lower jaw complete aluminum, min. 0.8 mm perforated plate covered with non-flammable ironing cloth, pressure-controlled, foot control pedals for the locking and unlocking the lower cushion of the upper jaw; hand-operated steam valve and lever for steam spraying from the top cushion; chassis made of profile black sheet metal and painted, flexible hose for steam and condensate connections, vacuum motor and min 20 kW electric steam generator and condensate group with intermediate connections. Note: In the case of automatic electric self-steam generator, unit price including the installation will be paid up to 15% without increasing the installation costs.</p>	27.864,50	97,25
25.635.2302	<p>Ironing Board With Built-In Boiler: (Unit: Pieces) The supply and installation of the ironing board with vacuum motor, min. dimensions 1150 x 380 x 240 mm, 220/380 Volts power, not affected by voltage fluctuations (including min. 3 L water volume and min. 3700 Watts electric heater, min. 5 kg/h capacity, min. 2 bar pressure steam generator and hand iron.</p>	8.885,60	97,25

Hospital Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.650.1100	OXYGEN CYLINDER (Unit: Qty.; Materials on construction site: 80%) The delivery of the steel cylinders in compliance with the standard TS EN ISO 9809-1-2, 50 L volume, refillable, seamless, hardened and tempered, with the valve protection cap, resistant to at least 150 atmosphere pressure, painted with oil paint in blue color, including all kinds of material and labor.	1.260,00	19,30
25.650.1200	ROD PIPE SET AND CONNECTION: (Unit: Qty.; Materials on construction site.: 80%) The supply and on-site installation of the pipe set, 200 bar resistant, approximately 100 cm long spiral twisted, made of annealed electrolytic copper pipe, having bushings at both ends, (including collector pipe bushings), which do not allow the connection of the wrong cylinders, flexible ramp-cylinder and ramp-ramp connections, including all kind of materials and labor.	224,00	35,70
25.650.1300	COLLECTOR: (Unit: Set; Materials on construction site.: 80%) The supply and on-site installation of the collector, connecting the cylinders with the automatic control and pressure reducing panel, manufactured from high pressure wrought brass, having 5 connection points for the connection of the gas cylinders and having a special design that does not allow the wrong connection of the cylinders, with check valves for each cylinder inlet, mounted on the wall and with a retainer, including all kinds of materials and labor.	364,00	42,90
25.650.1400	HIGH PRESSURE REDUCER: (Unit: Qty.; Materials on construction site.: 80%) The supply and on-site installation of a panel in compliance with the standard TS EN ISO 7396-1 and the Directive (93/42/EEC) Medical Devices, the pressure control unit released with CE compliance marking, in compliance with the standard TS EN ISO 10524-2, primary network pressure reducers to be used to adjust the inlet pressure of 200 bar to a pressure of 20 bar, two high pressure gas shut-off valves, one low pressure and two high pressure manometers in compliance with the standard TS EN 837-1, high pressure pressurestat (set to 20 bar), one ramp changer inverter system and alarm panel with digital or led indicator that gives the visual and audio alarms.	3.430,00	197,00
25.650.1500	SECOND PRESSURE REDUCER: (Unit: Qty.; Materials on construction site.: 80%) The supply and on-site installation of the second pressure reducing panel manufactured in compliance with the standard TS EN ISO 10524-2 and the Directive (93/42/EEC) on Medical Devices, released with CE compliance marking, with two pressure regulators, two manometers reducing the inlet pressure in the range of 8 - 10 bar to 4 bar and regulating, four valves, two safety valves, two check valves, one low pressure and one high pressure set contact manometer.	894,00	95,00
25.650.1600	ALARM SYSTEM: (Unit: Qty.; Materials on construction site: 80%) The supply and on-site installation of an alarm system which is to be installed in the Oxygen center and other required places of the hospital and to warn the relevant persons with electric lamp signal in case the pressure in the Oxygen battery falls below a certain value (eg. 7 Atmospheres).	1.210,00	77,50
25.650.2100	VACUUM INSTALLATION VACUUM TANK: (Unit: Qty.; Materials on site: 80%) The supply and on-site installation of a vacuum tank with required inner volume, resistant to at least (-0.9) atmosphere (negative) pressure, made of galvanized steel, with cleaning hatch, to be mounted on three legs or a ring, furnished with pipe and instrument connection points.		

Hospital Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.650.2101	200 L	1.430,00	104,00
25.650.2102	300 L	1.970,00	116,00
25.650.2103	400 L	2.490,00	116,00
25.650.2104	600 L	3.150,00	116,00
25.650.2200	VACUUM PUMP: (Unit: Set; Materials on construction site: 80%). The supply and on-site installation of two vacuum pumps in parallel, to obtain approximately between (-0.8) and (-0.9) atmosphere vacuum, one in operation the other on stand-by, with a vacuum pressurestat to be set between (-0.65) and (-0.70) atmosphere negative pressure and a vacuum relay, with the necessary (Pressurestat is paid separately from related unit prices.) (Pressurestat is paid separately from related unit prices.)		
25.650.2201	2 pumps, each delivering air at 60 m³/h flow and (-0.5) atmosphere pressure:	22.140,00	207,00
25.650.3000	NITROUS OXIDE INSTALLATION (Materials on construction site: 80%)		
25.650.3100	Nitrous Oxide Cylinder: (Unit: Qty.) (TS EN 13322-1-2) The supply and installation of the cylinders for Nitrous Oxide filling, painted in green color, other features the same as pos. 670-000.	1.140,00	
25.650.4100	OXYGEN, VACUUM AND NITROUS OXIDE INTERMEDIATE VALVE: (Unit: Qty.; Materials on construction site: 80%) The supply and mounting on the wall with dowel and brass screws of the valves to be used in Oxygen, vacuum and Nitrous Oxide installations, degreased and freed from harmful matters, tested to 30 atmosphere pressure, with an operating pressure of 12 atmosphere, having bushes at the inlet and outlet and a hand wheel for manual opening and closing.		
25.650.4101	Ø8 mm (1/4")	90,00	9,65
25.650.4102	Ø10 mm (3/8")	115,00	9,65
25.650.4103	Ø15 mm (1/2")	122,00	9,65
25.650.4104	Ø18 mm (5/8")	135,00	9,65
25.652.1100	Medical gas alarm panel (Unit: Qty.; Materials on construction site 80%) The supply and on-site installation of medical gas alarm panel, manufactured in compliance with the standard TS EN 7396-1 and the Directive (93/42/EEC) on Medical Devices, released with CE compliance marking, with separate light indicators for each gas, giving signals by monitoring the gas flow in a zone in "normal" and "alarm" positions, monitoring the pressure levels in the service zones by means of pressure switches against the set values and, in case, giving audible and visual alarms for warning, microprocessor controlled.		
25.652.1101	For 2 gases	1.550,00	143,00
25.652.1102	For 3 gases	1.870,00	203,00
25.652.1103	For 4 gases	2.090,00	243,00
25.652.1104	For 5 gases	2.340,00	280,00
25.652.1200	Medical gas valve boxes (Unit: Qty.; Materials on construction site: 80%) The supply and on-site installation of medical gas valve boxes manufactured in compliance with the standard TE EN ISO 7396-1 and the Directive ((93/42/EEC) on Medical Devices, released with CE compliance marking, in a box with oven-dried paint and a glass, locked door, with separate valves, lines and indicators for each gas, with pressure and vacuum switches.		
25.652.1201	For 2 gases	1.350,00	183,00
25.652.1202	For 3 gases	1.650,00	226,00

Hospital Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.652.1203	For 4 gases	1.940,00	251,00
25.652.1204	For 5 gases	2.370,00	289,00
25.652.1300	Nitrous Oxide center (Unit: Qty.: Materials on site: 80%) The supply and on-site installation of the Nitrous Oxide center manufactured in compliance with the standard TS EN 7396-1 and the Directive (93/42/EEC) on Medical Devices, released with CE compliance marking, with a control panel to send gas to the hospital installation by reducing the high pressure coming from the cylinders to the operating pressure, right and left group cylinder ramps, safety chain tube fasteners, collectors, flexible connections, safety valves, high pressure safety valve actuating in case of a pressure build-up in the pressure reducer, microprocessor controlled, transmitting information to the automation and computer systems, switching to the right and left groups automatically in sequence, incorporating all the necessary pressure regulators, safety valves, pressure indicators and alarms in order to feed the installation at the design pressure. Note: Excluding Nitrous Oxide cylinders		
25.652.1301	2 x 3 + 1 x 3 cylinder system	15.300,00	1.380,00
25.652.1302	2 x 4 + 1 x 4 cylinder system	16.030,00	1.560,00
25.652.1303	2 x 5 + 1 x 5 cylinder system	17.550,00	1.660,00
25.652.1304	2 x 10 + 1 x 10 cylinder system	22.170,00	1.940,00
25.652.1400	Medical air center (Unit: Set; Materials on construction site: 80%) Complete with triple compressor group, automatic control panel, air tank, drier, filter group and pressure regulators, the control panel cutting-in or cutting-out the compressors in sequence or as much as necessary until sufficient pressure is built up. Manufactured in compliance with the standard TS EN ISO 7396-1 and the Directive (93/42/EEC) on Medical Devices, released with CE conformance marking, with automatic control panel, alarm, air tank, 3 pieces. The supply and installation of screw compressors (with system co-aging), filter group, dryer (compressed air driers while delivering air in European Pharmacopoeia Standards, also complying with International Breathable Air Standards) and regulators.		
25.652.1401	3 x 35 m³/h (Tank = 500 L)	86.610,00	2.380,00
25.652.1402	3 x 40 m³/h (Tank = 500 L)	92.340,00	2.860,00
25.652.1403	3 x 60 m³/h (Tank = 2 x 500 L)	113.700,00	3.520,00
25.652.1404	3 x 110 m³/h (Tank = 2 x 1000 L)	138.400,00	4.420,00
25.652.1405	3 x 150 m³/h (Tank = 2 x 1000 L)	175.000,00	5.040,00
25.652.1500	Medical vacuum center (Unit: Set; Materials on construction site: 80%) The supply and on-site installation of the medical vacuum center manufactured in compliance with the standard TS EN ISO 7396-1 and the Directive (93/42/EEC) Medical Devices and released with CE compliance marking, with three pump groups, complete with automatic control panel, vacuum tank, bacterial filter and collection jar, the control panel to cut-in and cut-out the pumps in sequence or to the extent necessary, to ensure a sufficient vacuum level, vacuum tank, 3 pieces of pumps, accumulation pot and bacteria filter.		
25.652.1501	3 x 40 m³/h (Tank = 500 L)	47.820,00	2.070,00
25.652.1502	3 x 60 m³/h (Tank = 500 L)	52.610,00	2.360,00
25.652.1503	3 x 100 m³/h (Tank = 500 L)	65.690,00	2.660,00

Hospital Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.652.1504	3 x 160 m³/h (Tank = 1000 L)	95.050,00	3.520,00
25.652.1505	3 x 160 m³/h (Tank = 1000 L)	116.900,00	4.420,00
25.652.1600	Anesthetic gas evacuation system (venturi type) (Unit: Set; Materials on construction site: 80%) The supply and on-site installation of the anesthetic gas evacuation system manufactured in compliance with the standards TS EN ISO 7396-1, TS EN ISO 7396-2 and the Directive (93/42/EEC) on Medical Devices, released with CE compliance marking, designed specifically to extract from the patient exhalation circuit and to discharge the anesthetic gas, which is sucked at each gas evacuation socket where with a connection from the air supply line a venturi system creates vacuum, through the copper pipe line under the control of a flow regulator.	1.670,00	285,00
25.652.1700	Anesthetic Gas Evacuation System With Electropump Type The supply and on-site installation of the anesthetic gas evacuation systems manufactured in compliance with the standard TS EN ISO 7396-2 and the Directive (93/42/EEC) on Medical Devices, released with CE compliance marking, with lateral channel, discharging the gases from the gas evacuation system into the atmosphere by way of a blowing pump, switched on with a push button on the control panel, one running, one standby.		
25.652.1701	Anesthetic Gas Evacuation System With Electropump Type 30+30 m³/h	16.280,00	1.020,00
25.652.1702	Anesthetic Gas Evacuation System With Electropump Type 70+70 m³/h	20.240,00	1.150,00
25.652.1703	Anesthetic Gas Evacuation System With Electropump Type 100+100 m³/h	23.080,00	1.280,00
25.652.1704	Anesthetic Gas Evacuation System With Electropump Type 130+130 m³/h	32.060,00	1.420,00
25.652.1800	Oxygen center: (Unit: Set; Materials on construction site: 80%) The supply and on-site installation of the Oxygen center manufactured in compliance with the standard TS EN ISO 7396-1 and the Directive (93/42/EEC) on Medical Devices, released with CE compliance marking, with automatic control panel to reduce the incoming pressure from the cylinders to the operating pressure and sending to the system, rod pipe set, safety valve, safety alarm, cylinder fastening chain, cylinder separator, alarm system for the center, flexible connection between the cylinder ramps, combined cut-off valve and emergency socket, high pressure gas bleed valve, pressure gauges. Note: Except Oxygen cylinders		
25.652.1801	2 x 5 + 1 x 5 cylinder system	18.730,00	963,00
25.652.1802	2 x 8 + 1 x 8 cylinder system	21.400,00	1.350,00
25.652.1803	2 x 10 + 1 x 10 cylinder system	25.040,00	2.040,00
25.652.1804	2 x 20 + 1 x 20 cylinder system	30.880,00	2.360,00
25.655.1000	Medical gas sockets (Unit: Qty.; Materials on construction site 80%) The supply and on-site installation of gas sockets manufactured in compliance with the standard TS EN ISO 9170-1 and the Directive (93/42/EEC) on Medical Devices, released with CE compliance marking, capable of working only with its own gas plug (gas specific), tested in accordance with the test procedures set out in the standard TS EN ISO 9170.		
25.655.1001	Oxygen socket	178,00	19,30
25.655.1002	Vacuum socket	178,00	19,30

25.665.1100	Package Type Morgue Unit: (Unit: Qty.) All the panels of the package type standard type morgue unit made of AISI 304 Grade Cr-Ni stainless steel plates shall be filled with polyurethane filling at a density of 40-42 kg/m³, insulated and sealed, outer panel insulation thickness to be at least 70 mm, the thickness of the intermediate panel insulation is at least 38 mm, the panels shall be removable. The floor and ceiling panels of the unit shall be connected with at least at 14 points by welding or PVC panel lock system, the front-rear and middle wall connections are fixed at distances of at least 600 mm, the individual water drain systems of the cells and the intermediate shelves between the cells shall be removable and sealed. The supply and on-site installation of the morgue unit, in case of opening from the front, at least 660 x 530 mm, in case of opening from the side at least 2015 x 460 mm in size, the cell inlet frame and the cell hatch locks and frames made of polyethylene based material, the hatch sealed with interchangeable gaskets, the door lock can be opened from the inside, the bolts holding the hatch hinges fixed with rivet nuts, the cooling system of each cell independent from each other, microprocessor-controlled refrigerated cooling group capable of cooling capacities specified in the design, conveyor system consisting of at least 5 rolls with up to 25 mm diameter on the intermediate shelf, removable as needed, each cell to have a corpse tray of at least 1900 mm x 600 mm size capable to take up to 150 kg weight based with PVC-based handles, with four wheels of 150 mm diameter each, two with brakes.		

Hospital Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.665.1101	Package Type Unit With 1 Cubby: (Unit: Qty.) The supply and on-site installation of the morgue unit with a cooling unit with an at least 0.675 kW power hermetic compressor according to the approved design.	13.860,00	369,00
25.665.1102	Package Type Unit With 2 Cubbies: (Unit: Qty.) The supply and on-site installation of the morgue unit with a cooling unit with an at least 1.75 kW power hermetic compressor and with 2 cubbies according to the approved design.	21.160,00	369,00
25.665.1103	Package Type Unit With 3 Cubbies: (Unit: Qty.) The supply and on-site installation of the morgue unit with a cooling unit with an at least 2.62 kW power hermetic compressor according to the approved design.	24.870,00	369,00
25.665.1200	Ablution Desk: (Unit: Qty.) The supply and on-site installation of the ablution desk completely made of AISI 304 Grade Cr-Ni stainless steel, with a thickness of 1.5 mm and a depth of at least 50 mm, table dimensions 2140 x 80 x 850 mm, with slope and having a drain hole of 50 mm, legs of the frame to be of 40 x 40 box profile with 1.2 mm wall thickness, with 4 legs, 1.2 mm thick upper table shall be perforated and have 4 pieces of skits at least 100 mm wide made of 0.8 mm thick AISI 304 Grade Cr-Ni stainless steel plate, with 1.5 m long chrome plated hose, spray nozzle and a bathroom faucet for cold and hot water.	3.920,00	22,00

Fire Protection Equipment and Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.700.1000	FIRE CABINET ACCORDING TO THE STANDARD TS EN 671-1: (Unit: Qty.) Reel: Manufactured in compliance with the Directive 97/23/EC) on Pressure Equipment, in compliance with the standard TS EN 671-1, TS EN 671-2, the Regulation (EU) No.305/2011 Construction Products - CPR, released with CE compliance marking, consisting of two steel discs with a maximum diameter of 800 mm and a circular inner piece with a diameter not less than 200 mm and a drum for hoses with a diameter of 25 mm. Hose: Round, semi-rigid, conforming to the standard TS EN 694 + A1, hose diameter 25 mm and length not exceeding 30 m. Nozzle: Can be shut-off, with water jet or spray options, conforming to the standard TS EN 671-1, 671-2. Fire water valve: Hand operated, DN50 diameter, with coupling, valve and coupling in conformance with TS 12258, 12259, cabinet in appropriate sizes as to take all the equipment, use of warning signs in conformance with the Directive (92/58/EEC) on Minimum Requirements For Safety and/or Health Signs In Work Sites. Note: For the portable extinguishers, the supply and on-site installation of the cylinder with 6 kg ABC type dry powder inside in compliance with TS 862 EN 3.

25.700.2100	FIRE CABINET ACCORDING TO THE STANDARD TS EN 671-2: (Unit: Qty.) Manufactured in compliance with the Regulation (EU) No.305/2011 Construction Products - CPR, released with CE compliance marking. Hose: Flat hose in compliance with the standard TS 9222, diameter 50DN and 20 m long. Reel: In compliance with the standard TS 9222, other features the same as in pos. 25.700.1000.		
25.700.2101	Model With No Cylinder	882,00	143,00
25.700.2102	Model With Cylinder	984,00	179,00
25.700.3100	FIELD TYPE FIRE CABINET WITH 2" HOSE: (Unit: Qty.) The supply and on-site installation of the fire cabinet manufactured in compliance with the Regulation (EU) No.305/2011 Construction Products - CPR, released with CE compliance marking, made of 1.5 mm thick galvanized sheet, on pedestal, coated with RAL 3001-3002 electrostatic powder paint, double sided or double reel, 2 pcs. of 2" / 20 m fabric coated hose in compliance with the standard TS 9222/T1, 2 pcs. of 2" nozzle, hoses and nozzle with 2" storz coupling in compliance with the standard DIN 14811.	1.870,00	238,00
25.700.3200	FIELD TYPE FIRE CABINET WITH 2½" HOSE: (Unit: Qty.) The supply and on-site installation of the fire cabinet manufactured in compliance with the Regulation (EU) No.305/2011 Construction Products, released with CE compliance marking, made of 1.5 mm thick galvanized sheet, on pedestal, coated with RAL 3001-3002 electrostatic powder paint, double sided or double reel, 2 pcs. of 2½" / 20 m fabric coated hose in compliance with the standard TS 9222, 2 pcs. of 2½" nozzle, hoses and nozzle with 2½" storz coupling in compliance with the standard DIN 14811.	3.020,00	238,00

Fire Protection Equipment and Installation

25.727.1000	FIRE EXTINGUISHING SYSTEMS WITH HFC227EA GAS The design and physical specifications of the fire extinguishing system with HFC227EA gas shall be as specified in the TS EN 15004-1 and 5, and each area to be protected shall be designed to supply the HFC227EA gas into the suspended ceiling and beneath the elevated flooring, if any. The location of the system should be sealed and tested for tightness. The pipes to be used in the system shall be seamless drawn steel, and nitrogen shall be used for testing the pipes. The pipes shall be tested for 10 minutes under 3 bars of pressure, and their pressure drops shall be tested at the end of this time. The detection part of the HFC227EA extinguishing system shall be installed as prescribed in the EN 54 standard. Fire protection shall be made for every fire extinction zone in line with the volume of the zone as per the EN 54 standard. The electrical installation unit prices shall be referred to for calculation of the prices of fire detection systems, cables, detectors, panels, sirens, and similar other equipment. Measures shall be taken against accidental discharge and leaks of the HFC227EA gas that is in EN standards and (Kyoto) F class. The gas shall be discharged in max. 10 seconds, and mechanical and electronic equipment, cables, pipes and cylinders shall duly undergo all relevant tests under the supervision of the organization of the authority.		
25.727.1100	The Cylinder and Its Set The HFC227EA cylinders to be used in the system shall be certified for compliance with the Transportable Pressure Equipment Directive (2010/35/EU), bear a П logo, and be made of seamless drawn steel manufactured in EN ISO 9809-1:2010 standards. The cylinders shall bear the serial number of their respective filling tanks. The cylinders shall be used at a pressure of 25 to 42 bars, and the HFC227EA system valve on the cylinder shall bear a CE marking and have a forged brass body. The HFC227EA cylinder valves shall be equipped with safety mechanisms that open in case of overpressure, a pressure gauge to monitor the internal pressure of the cylinder. The cylinders shall be supplied to the work site with their installation kits and then installed. Note: A drain hose and a check valve shall be included in the multiple connections of the cylinders.		
25.727.1101	Up to 14 L	5.950,00	93,80

25.737.1100	Smoke Vent Duct: (Unit: m²; Materials on construction site 60%) The supply, on-site installation in conformance with the design and technical specification and delivery in working order of the air duct manufactured in compliance with the Regulation (EU) No.305/2011 Construction Products - CPR, released with CE compliance marking, in conformance with the standards TS EN 13501-4+A1; TS EN 1363-1, 2, 3; TS EN 1366-8; TS EN 12101-7, with E300 60 strength properties, made of steel plate or special material plate, smoke proof, flange connection.		
25.737.1200	Smoke Evacuation Cover: (Unit: Set) The supply and on-site installation of the smoke evacuation cover in conformance to the design, with TS EN 12101-2 test certificate, heat insulated, made of profiles resistant to the outdoor environment, made of polycarbonate, glass, acrylic or aluminum surface material according to the place of use, working with electric motors or thermal pneumatic system, controlled by electrical battery or CO2 gas panels, manually opened by way of the emergency button upon the signal from the fire automation system.		
25.737.1201	Up to 1 m²	6.290,00	570,00
25.737.1202	Up to 2 m²	7.570,00	722,00

Fire Protection Equipment and Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
25.737.2100	Electro Mechanical Fire Curtain: (Unit: m²; Materials on construction site 60%) The supply, on-site installation and delivery in working order of the electromechanical fire curtain with the strength calculations according to the design and approved by the administration, made of 1000°C heat resistant fireproof fabric, wrapped on a drum mounted on a frame by way of roll bearings on both sides, intermediary transmission and installation adapters on both ends of the drum resistant to bending and buckling, with two U profiles anchored to the wall and to the floor on two sides for guiding the curtain up and down, a worm gearbox with TSEK quality certificate, with protective housing in front of the gearbox, limit switch, control panel, manual operation, if necessary. Note: In case of manual operation system, installed prices shall be increased by 20% with the installation fee remaining unchanged.		
25.737.2101	Up to 15 m ² (price for 1 m ²)	3.280,00	365,00
25.737.2102	Up to 30 m ² (price for 1 m ²)	2.950,00	340,00
25.737.2103	Up to 45 m ² (price for 1 m ²)	2.850,00	322,00
25.737.2104	Up to 65 m ² (price for 1 m ²)	2.560,00	294,00
25.740.1100	Fire Stop Clamp (Unit: Qty.) The supply and on-site installation of the fire stop clamp manufactured in compliance with the standard TS EN 1366-3 and the Regulation (EU) No.305/2011 Construction Products - CPR, released with CE compliance marking, produced specially for the purpose of preventing the flame and smoke of pipes made of combustible materials passing through walls and floors, to be used in the places shown in the approved design, filling the gap around the pipe during the fire with a intumescent (heat-expanding) graphite-based wrapper content, in ready-to-use condition. Pipe Diameter Range (mm)		
25.740.1101	Ø32 - Ø51 Fire Stop Clamp	54,50	6,60
25.740.1102	Ø52 - Ø64 Fire Stop Clamp	63,50	6,60

REPUBLIC OF TURKEY

THE MINISTRY OF ENVIRONMENT AND URBANISM

Directorate of Higher Technical Board

1934

ELECTRICAL WIRING WORKS

2019

GENERAL PROVISIONS AND EXPLANATIONS FOR ELECTRICAL INSTALLATIONS

- 1- Prepared as per Article 97, Paragraph 1, Point (k) regarding the Organization and Duties of Our Ministry of the Presidential Decree no. 1 on the Organization of the President's Office.
- 2- In case there are printer's and material errors in Unit Prices, the latest values as may be corrected by the Ministry of Environment and Urbanism shall be taken as basis, and the amendments made accordingly shall be published in the page of the Directorate of Technical Board on www.csb.gov.tr or directly on <https://yfk.csb.gov.tr/>.
- 3- In case of a later change in the unit price standards applied, the latest versions of the standards in effect shall apply. Furthermore, they have to be supplied to the market securely in compliance with the applicable legislation.
- 4- General Technical Specifications published by the Ministry of Environment and Urbanism shall be complementary to such unit prices and their definitions.
- 5- The unit prices including installation and installation fees given in the list include the Contractor's 25% profit and overheads.
- 6- The materials and devices in the Unit Price Lists, for which no payment shall be made for the materials on construction site shall be listed by the relevant administrations.
- 7- The rates of the materials on construction site as specified in the Unit Prices Lists are percentages of unit prices including installation. The price of the materials on construction site shall be subject to tax discount.
- 8- For the materials and products with the names, classes and types listed below, which will be used in the contracted tasks:
 - 8.1. It shall be compulsory to present a Certificate of Compliance with the Turkish Standards for any material, for which the Unit Price Definition does not include a TSE number but there is a Turkish Standard is published.
 - 8.2. Documents that certify quality and compliance with the principles provided herein as well as international or foreign standards, and technical or special specifications shall be required for the items for which a Turkish Standard is not available.
 - 8.3. Any document mentioned in the items (8.1), (8.2) should be issued by authorized bodies.
- 9- The "Directive on the Protection of Buildings from Fire" and the "Construction Materials Directive" in effect shall be followed in selection, application, and commissioning of any installation equipment.
- 10- The values listed herein are VAT exclusive.
- 11- The Unit Prices of our Ministry shall be effective from January 1, 2019, and the administrations shall update the prices for preparing an approximate cost in accordance with the "TÜİK Table of Construction Cost Index and Rates of Change" as specified in the paragraph 11/3 of the Regulation on Application of the Tenders for Construction Works.

(Effective 1 January 2019.)

TURKISH STANDARDS TO BE FOLLOWED FOR LIFTS

SERIAL NO	TS NO.	THE SUBJECT MATTER OF THE STANDARD
1	TS EN 81-1+A3	Lifts - Safety Rules for Production and Installation - Part 1: Electric Lifts, Directive: 95/16/EC
2	TS EN 81-2+A3	Lifts - Safety Rules for Production and Installation - Part 2: Hydraulic Lifts, Directive: 95/16/EC
3	TS EN 81-21+A1	Lifts - Safety rules for production and installation - Special practices for passenger and freight lifts - Chapter 21: New passenger and freight lifts in existing buildings, Directive 95/16/EC
4	TS EN 81-40	Lifts - Safety rules for production and installation - Special practices for passenger and freight lifts - Chapter 40: Escalators and inclined lifting platforms for handicapped passengers, Directive 2006/42/EC (98/37/EC)
5	TS EN 81-43	Lifts - Safety rules for production and installation - Special practices for passenger and freight lifts - Chapter 43: Lifts for Cranes, Directive: 2006/42/EC (98/37/EC)
6	TS EN 81-73	Lifts - Safety rules for production and installation - Special practices for passenger and freight lifts - Chapter 73: Behavior of lifts during a fire, Directive 95/16/EC
7	TS CEN/TR 81-10	Lifts - Safety rules for production and installation - Basics and interpretations - Chapter 10: The systematics of EN 81 series of standards
8	TS EN 81-82	Lifts - Safety rules for production and installation - Existing lifts - Chapter 82 - Improving accessibility to existing elevators including for the handicapped
9	TS EN 81-28	Lifts - Safety rules for production and installation - Passenger and freight lifts - Chapter 28: Remote alarm for passenger and freight lifts, Directive 95/16/EC
10	TS EN 81-31	Lifts - For passenger and freight - Safety rules for production and installation - Chapter 31: Only open freight lifts
11	TS EN 81-3+A1/AC	Lifts - Safety Rules for Production and Installation - Part 3: Electric and Hydraulic Service Lifts, Directive: 2006/42/EC (98/37/EC)
12	TS EN 81-58	Lifts - Safety rules for production and installation - Examinations and tests - Chapter 58: Fire resistance test for floor doors, Directive 95/16/EC

12	TS EN 12601	Generator Sets Driven by Reciprocating Internal Combustion Engines - Safety
13	TS HD 60364-5-551	Electrical wiring in buildings - Chapter 5: Selection and installation of electric equipment - Group 55: Other equipment - Part 551: Low-voltage generator sets
14	TS 4218	Internal combustion piston engines - performance - standard reference conditions, specification of power, fuel consumption and oil consumption
15	TS EN 60204-1/A1	Safety with machines - Electrical equipment of machines - Chapter 1: General rules

NOTES:

1- Radioactive lightning rods shall not be used in tenders starting from 2002.

2- The standards TS EN 62305-1, TS EN 62305-2, TS EN 62305-3, TS EN 62305-4, TS EN 50164-1, TS EN 50164-2, and the Regulation on Grounding in Electrical Installations as published in the Official Gazette no. 24500 dated 21 August 2001 shall be taken as basis.

3- Radio antennae and/or TV or GSM antennae on the roofs of the buildings to be applied external protection shall also be protected by overvoltage devices. Grounding of such devices shall be as described in the Regulation on Grounding in Electrical Installations as published in the Official Gazette no. 24500 dated 21 August 2001.

4- The Administration may request a document obtained from an accredited National or International laboratory for any type (protection diameter).

5- The item 718-500 shall be taken as basis for the payments for enclosure-type overvoltage protectors.

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.100.0000	ENCLOSURES:		
35.100.1000	Floor-standing galvanized steel enclosures (1st enclosure): (Unit: Qty.) The enclosure frame, its doors, its covers, body, and all internal installation structure components used within, and its base shall be made of pre-galvanized steel sheet minimum 2-mm in thickness, and be minimum 2000-mm in height. All connections shall be made by fittings such as bolts and nuts or rivets. Also the base of the panel shall be minimum 10-cm high, and fixed to the panel with anchors and galvanized bolts at its four corners. The interior, exterior and frame of enclosures shall be coated with electrostatic powder. Perforated frames, supports, etc. shall be available on the enclosure based on the devices to be installed on enclosures as per the project design, and phases shall be painted in gray, black, and brown, busbars and insulators in neutral light blue as well as green/yellow earthing shall be installed as per TS EN 60445. The enclosures shall be manufactured in compliance with the 2014/35/EU Low Voltage Directive (LVD) and TS EN 61439-1/2 standards, and released with the CE compliance marking. The degree of protection of enclosures against mechanical impact shall be IK 10 in accordance with the TS EN 62262 standard. "Type tests" shall be run as per the standards of TS EN 61439-1/2, and the results of such tests shall be submitted to the Administration. Production, transportation to the site and installation of paint, insulator connection conductors, any kind of small material including labor and installation (excluding the cost of copper busbar and surge arrester) of first galvanized steel enclosures, and delivery of labels required for each device, any kind of material, and terminal blocks in working order including labor.		
35.100.1100	Minimum depth 400 mm:

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.100.2100	Surface-mounted galvanized steel electric panels (Unit: Qty.) The body and doors of the enclosures shall be made of pre-galvanized steel sheet that is minimum 1 mm thickness for the enclosures sized up to 0.5 m ² , and minimum 1.5 mm thickness for the enclosures larger than 0.5 m ² . It shall be minimum 200 mm in depth and all connections shall be made by fittings such as bolts and nuts or rivets. The holes required for cable entry shall be drilled on the cover, and bakelite or plastic bushings shall be installed in the holes to keep the insulation of the conductors intact. Also, labels for each device shall be affixed on the internal cover. Gray, black and brown, fireproof terminal blocks or busbars, light blue neutral and green/yellow earthing busbars in compliance with TS EN 60445 shall be available in sufficient number for the phase lines inside the enclosure. Inside and outside of the enclosure shall be coated with electrostatic powder, and the enclosure door shall be attached to the main body by flexible conductors and earthed. Supply, transportation to the work site and installation of the enclosure in working order including any material, terminal blocks and labor. Unit: m ² values specified in sub-items stand for the area of the internal cover. The fuse switches, etc. and earthing installation inside the enclosure shall be paid separately. Note: The enclosures shall be manufactured in compliance with the 2014/35/EU Low Voltage Directive (LVD) and TS EN 61439-1/2 standards, and released with the CE compliance marking. The degree of protection of enclosures against mechanical impact shall be IK 08 in accordance with the TS EN 62262 standard. "Type tests" shall be run as per the standards of TS EN 61439-1/2, and the results of such tests shall be submitted to the Administration.

35.100.6100	<p>Steel enclosures (1st enclosure): (Unit: Qty.: Materials on construction site: 60%) (TS EN 61439-1/2).</p> <p>Note: "Type tests" shall be run, and the results of such tests shall be submitted to the Administration. Enclosures that are 2100 mm in height, at least 500 mm in depth, and 800 to 900 mm in width as may be needed, and made from 40 x 40 x 4 mm bracket or a similar profile iron in free-standing system with a frame that is made of DKP steel sheet minimum in 2 mm thickness and covered with the same type of steel sheet shall be installed. A concrete base 10-cm in height shall be built on the floor for the enclosure which shall be installed by its four corners with anchors and galvanized bolts. A wire mesh housing shall be built with steel sheet up to 1 meter from the ground and the upper part made of Ø3 mm steel wire with 30-mm openings including doors on both sides of the tunnel 75-cm in width at the back of the tray with one of such doors being foldable. The interior, exterior and the frame of the enclosure shall be coated with a layer of red lead, two layers of matte gun-sprayed paint and oven-dried, the service tunnel behind the tray shall be made of wood and coated with PVC or linoleum. Where additional steel enclosures are used, the fixed wire mesh housing and the steel sheet part at the joint surface of the additional enclosure and the enclosure shall be installed to the end of the steel enclosures, and service tunnel furnishings shall be extended along the additional enclosures. Where required by the inspection authority, wooden railings that are 80 to 100 cm in height, painted in the same color as the enclosure, and with a section size of 5 x 10 cm shall be built, and the tunnel behind the panel shall be covered with a wire mesh housing that is made from Ø3 mm steel wires with 30 mm openings. Perforated frames, supports, etc. shall be available on the enclosure based on the devices to be installed on enclosures as per the project design, and phases shall be painted in gray, black, and brown, busbars and insulators in neutral light blue as per TS EN 60445, and where necessary, the panels shall be equipped with a L.V. surge arresters and green/yellow earthing lines. Production, transportation to the site and installation of paint, insulator connection conductors, any kind of small material including labor and installation (excluding the cost of copper busbar, lockable wire mesh door and wire mesh housing and surge arrester) of a 1st steel enclosure, and delivery of labels required for each device, any kind of material, and electric terminal blocks in working order including labor.</p>		
35.100.6101	800 mm width	2.490,00	336,00

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.100.6400	<p>Surface-mounted steel electric panels (Unit: Qty., Materials on construction site: 60%) (TS EN 61439-1/2) Note: "Type tests" shall be run, and the results of such tests shall be submitted to the Administration.</p> <p>A surface-mounted platform made from DKP steel sheet minimum 1-mm in thickness shall be installed. The panel shall consist of three parts. A lockable door, a steel box with bracket or profile frame and a key lock, an internal door with holes on the chassis supporting the devices for controlling the devices, and means of attachment welded on the steel box, which shall facilitate attachment and removal of the chassis. Depending on the project design, the box shall have an opening on the side through which various conductors are to enter the box, and the said opening shall be covered with a steel sheet cap mounted on the box with screws. The holes required for cable entry shall be drilled on the cover, and bakelite or plastic bushings shall be installed in the holes to keep the insulation of the conductors intact. The chassis shall be placed on brackets or a panel made of bent DKP. It shall be possible to mount all devices, terminal blocks and similar equipment on the chassis. The internal door with holes shall be easily mountable on the chassis for controlling the devices on the panel. Once the internal door is removed, all connections and devices in the panel shall be exposed, and this door shall be decorated with tags for each device. The aforementioned three parts shall be detachable without removing the panel.</p> <p>The projects concerning placement of devices in the panel shall be prepared in compliance with the type projects, submitted to the administration for approval, and manufactured only thereafter. A sufficient number of gray, black and brown, fireproof terminal blocks or busbars, and light blue neutral and green/yellow earthing busbars shall be available for the phase lines on the panel in compliance with TS EN 60445, and all iron parts shall be coated in a layer of red lead and two layers of gun-sprayed paint, and the panel's door shall be attached to the main body with a flexible conductor and earthed. Supply, transportation to the work site and installation of the panel. Delivery in working order, including any material and electric terminal blocks and labor. Unit: The internal door area shall be compared to the values given in the approved project, and the payment shall be made accordingly. This amount includes any small material, paint, connection and installation. The fuse switches, etc. and earthing installation on the panel shall be paid separately.</p>

35.115.2100	Enclosure-type overvoltage protectors (Low-Voltage Surge Arresters) (Unit: Qty.) Overvoltage protectors of Type 1 (class B), Type 2 (class C), Type 3 (class D) protecting energy supplies against atmospheric discharges (lightning strikes) temporary overvoltage peaks, and providing single-phase, 2-phase, 3-phase and neutral protection against over-voltage, which are equipped with an extra contact output for signalization, fully hermetically enclosed, installed on the rails of the enclosure without damaging it or other equipment in it or requiring a safety distance with the enclosure, and were released in compliance with the TS EN 61643-11 standard and with a CE compliance marking. 1- Overvoltage protectors shall be completely hermetically sealed. The protector should not have an arc discharge gap. The protector shall suppress arcs in itself rather than drawing it through the arc discharge gap and suppressing it with air. Thus, it shall be possible to install the protector anywhere within the enclosure without the requirement of a safety distance. 2- Type 2 (Class C) and Type 3 (Class D) protectors shall be equipped with an indicator that indicates whether the device runs smoothly or not. (I imp: Maximum impulse current for Type 1 surge arresters, I max: Maximum discharge current for type 2 and Type 3 surge arresters)		
35.115.2101	Class B, 230 V AC, 100 kA (I imp; 10/350 µs), 3-phase, neutral/earth	1.460,00	285,00
35.115.2102	Class B, 230 V AC, 100 kA (I imp; 10/350 µs), 3-phase, neutral/earth, with extra contact output	1.600,00	312,00

35.125.2102	Up to 3 x 25 A (3-phase)	67,00	8,80
35.125.2200	Mercury contact type: (Unit: Qty.) Supply and installation of a float switch that is identical with the Unit Price No. 35.125.2100 except that a contactor circuit operates with a mercury switch connected to the floater.		
35.125.2201	Up to 2 x 25 A (Single-phase)	64,00	8,20
35.125.2202	Up to 3 x 25 A (3-phase)	67,00	8,20
35.125.2300	Regular contact type: (Unit: Qty.) Identical with Unit Price No. 35.125.2100 except that a float switch directly controlled by the floater shall be supplied and installed on the contactor coil.		
35.125.2301	Up to 2 x 25 A (Single-phase)	38,60	8,20
35.125.2302	Up to 3 x 25 A (3-phase)	43,30	8,20
35.125.2400	Mechanical contact type without contactors: (Unit: Qty.)		
35.125.2401	Identical with Unit Price No. 35.125.2100 up to 6 A except that it is the contactor-free type.	26,10	8,20
35.125.2500	Mercury contact type without contactors: (Unit: Qty.)		
35.125.2501	Identical with Unit Price No. 35.125.2200 up to 6 A except that it is the contactor-free type.	26,10	8,20
35.125.2600	Regular contact type without contactors: (Unit: Qty.)		
35.125.2601	Identical with Unit Price No. 35.125.2300 up to 6 A except that it is the contactor-free type.	26,10	8,20
35.125.2700	Star delta automatic switch with a contactor: (Unit: Qty.) Supply and installation, including any material and labor, of a flush-mounted and surface-mounted panel with a lockable door, start - stop button, and the fuses for the signal lamp, time delay relays, panel-type terminal blocks, contactors and automatic star-delta switch with thermal protection relay. NOTE: Start - stop buttons and signal lamps shall not be installed on the panel door and the door shall be earthed.		
35.125.2701	Up to 3 x 25 A	533,00	48,00
35.125.2702	Up to 3 x 63 A	844,00	48,00
35.125.2703	Up to 3 x 80 A	1.490,00	53,00
35.125.2704	Up to 3 x 100 A	1.840,00	53,00
35.125.2705	Up to 3 x 250 A	2.870,00	53,00
35.125.2800	POWER DIMMERS: (Unit: Qty.), (Materials on construction site: 60%) Remote-control power dimmers used to adjust the lighting level of the system. Supply, installation, and delivery in working order, including any material, of the device used in glow-filament bulbs with a ferromagnetic transformer and 12-volt halogen bulb, which stores the brightness level before being turned off when the supply is cut out.		
35.125.2801	230 V. (50-60 Hz) 100W-1000 W.	828,00	16,20
35.125.2802	230 V. (50-60 Hz) 300-2500 W.	1.050,00	16,20
35.125.2803	230 V. (50-60 Hz) 300-5000 W.	1.240,00	16,20

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.125.3000	Remote controlled impulse current switch and its installation (Unit: Qty., Materials on construction site: 60%) Supply, transportation to the work site, installation in the designated location, establishment of connections, and delivery, including any material and labor, of an impulse current switch in IP 20 degree of protection and bearing TS EN 60669-2-2 and CE compliance markings, which shall be capable of turning on and off a lamp or a group of lamps connected in parallel to each other from two or more locations (switching by a light the location of the contacts at each impulse of the current that reaches it), being equipped with an auxiliary switch block where necessary, being controlled "manually" on the unit, performing by optional modules the functions of central control, switching based on time and status monitoring in addition to local controls, operating at an operation temperature of -10 to +40°C, which shall be equipped with an indicator indicates the status of the contacts, capable of switching on and off minimum 50,000 times on load, and available for installation on a standard 35-mm DIN rail. Unit: The number of relays shall be taken.		
35.125.3001	1 NA 16 A with 1 contact - Controller voltage: 230 V.	80,50	17,90
35.125.3002	2 NA 16 A with 2 contacts - Controller voltage: 230 V.	124,00	17,90
35.125.3003	3 NA 16 A with 3 contacts - Controller voltage: 230 V.	191,00	17,90
35.125.3004	4 NA 16 A with 4 contacts - Controller voltage: 230 V.	195,00	17,90
35.125.3005	2 A/K 16 A with 2 contacts - Controller voltage: 230 V.	106,00	17,90
35.125.3050	Side-switching auxiliary switch block for central control (Unit: Qty., Materials on construction site: 60%) Supply, transportation to the work site, installation, and delivery in working order, including any material and labor, of an auxiliary contact group installed adjacent to the impulse current switch to control the impulse current switch remotely, which is available for installation on a 35-mm steel rail, and affixed with a TS EN 60947-4-3/A1 and CE Compliance Mark. (The switch to be installed at the center shall be paid separately per the relevant item.)	81,00	17,90
35.130.0000	COMPENSATION SYSTEM:		
35.130.1000	COMPENSATION BATTERIES: (Materials on construction site: 60%) Supply of the required capacitors or capacitor batteries with terminals protected against touch and resistant to discharge for regulation of power coefficient (Cos Ø) for energy economy and avoid excessive excitation currents, and delivery in working order, including any material and labor, after the functioning of the item is tested by the inspection authority with a 40-Watt serially connected lamp. Compliance is required with the Regulation on Amendment of Energy Market Customer Services published in the Official Gazette No. 26558 dated 20.June.2007.		
35.130.1100	Central compensation batteries with automatic control: (Unit: kVAR) (Up to 30 kVAR) Supply, installation, and delivery in working order, of capacitors, the contactors that they will enable and disable as well as the circuit breakers of the circuits, control circuit circuit breakers, cam switches that control contactors, and the 3-phase compensation battery including the current transformer required for the relay (not including the price of the reactive power control relay, molded-case circuit breaker, and panel.) The power value in kVAR of the capacitor on the selected voltage value shall be considered as the unit.)		
35.130.1101	Up to 400 V	91,00	21,80
35.130.1102	Up to 450 V	96,00	21,80

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.130.1150	Extra central compensation batteries with automatic control (in compliance with TS EN 60255-1) (Unit: kVAR) Where compensation batteries are rated higher than 30 kVAR, for each kVAR exceeding 30 kVAR in addition to the item 35.130.1100		
35.130.1151	Up to 400 V	28,60	7,30
35.130.1152	Up to 450 V	31,40	7,30
35.130.1200	Central compensation batteries with automatic control with harmonic filter: (Unit: kVAR) (Up to 30 kVAR) Supply, installation, and delivery in working order, of harmonic filter reactors and capacitors in compliance with the standards TS EN61558-2-20 or IEC 61000-2-2 depending on the project, the contactors that they will enable and disable as well as the circuit breakers of the circuits, control circuit circuit breakers, cam switches that control contactors, and the 3-phase compensation battery including the current transformer required for the relay (not including the price of the reactive power control relay, molded-case circuit breaker, and panel.) The power value in kVAR of the capacitor on the selected voltage value shall be considered as the unit.)		
35.130.1201	Up to 450 V	147,00	23,30
35.130.1202	Up to 525 V	133,00	23,30
35.130.1250	Extra compensation batteries with automatic control and harmonic filters (in compliance with TS EN 60255-1) (Unit: kVAR) Where compensation batteries are rated higher than 30 kVAR, for each kVAR exceeding 30 kVAR in addition to the item 35.130.1200.		
35.130.1251	Up to 450 V	76,50	8,75
35.130.1252	Up to 525 V	63,50	8,75
35.130.1300	Central compensation batteries with automatic control, harmonic filter and semiconductor switching: (Unit: kVAR) (Up to 30 kVAR) Compensation batteries which use a switching component manufactured with semiconductor technology instead of contactor for enabling and disabling the groups of compensation and harmonic filter, and for which other specifications are identical with item 35.130.1200. The power value in kVAR of the capacitor on the selected voltage value shall be considered as the unit.)		
35.130.1301	Up to 450 V	222,00	28,40
35.130.1302	Up to 525 V	202,00	28,40
35.130.1350	Extra central compensation batteries with automatic control, semi-conductor switching and harmonic filters (in compliance with TS EN 60255-1) (Unit: kVAR) Where compensation batteries are rated higher than 30 kVAR, for each kVAR exceeding 30 kVAR in addition to the item 35.130.1300		
35.130.1351	Up to 450 V	94,50	10,20
35.130.1352	Up to 525 V	78,50	10,20
35.130.2000	RELAYS (Unit: Qty.) In compliance with the standards IEC6100 - 6 -2, IEC 61000 – 6 - 4, IEC 61010 -1, and TS EN 60255-1		

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.130.2100	SINGLE-PHASE REACTIVE POWER CONTROL RELAYS: (Unit: Qty.) Supply, installation as per the relevant project design, and delivery, including any material and labor, of the device sized for installation in the panel, with a current transformer and 220V AC supply, which is capable of measuring automatic C/k values.		
35.130.2101	Min. 5 steps Supply, installation as per the relevant project design, and delivery, including any material and labor, of the device sized for installation in the panel, with 5 steps, a current transformer and 220V AC supply, which is capable of measuring automatic C/k values.	480,00	78,00
35.130.2102	Min. 8 steps Supply, installation as per the relevant project design, and delivery, including any material and labor, of the device sized for installation in the panel, with 8 steps, a current transformer and 220V AC supply, which is capable of measuring automatic C/k values.	534,00	78,00
35.130.2103	Min. 12 steps Supply, installation as per the relevant project design, and delivery, including any material and labor, of the device sized for installation in the panel, with 12 steps, a current transformer and 220V AC supply, which is capable of measuring automatic C/k values.	625,00	102,00
35.130.2200	THREE-PHASE REACTIVE POWER CONTROL RELAYS: (Unit: Qty.) Reactive power relays are devices that attempt to regulate the power coefficient, which is the ratio of Active Power (W) to the Apparent Power (VA), to the power coefficient set by the user, by controlling the reactive power of the compensation component. The reactive power control relay with Computer Communication, 3 Current Transformers, 3 x 380 V AC Supply, which simultaneously displays minimum three electrical values on the screen shall automatically measure the powers of the capacitors in the compensation system that it is connected to. It can protect the system by deactivating it with a warning so that the problems with current and voltage connections can be resolved, and it selects and concurrently activates or deactivates the required capacitor steps. Detects faulty capacitors. Installation and delivery in working order, including any material and labor and per the relevant project, of the devices which are capable of issuing overcompensation, undercompensation, failed capacitor and exceeded ratio alerts, and of measuring the values of phase voltage (V) of its connected system, RMS value of the phase current that the current transformer is connected to, power coefficient (PC) of the system, the Active Power (W), Reactive Power (VAr), Apparent Power (VA), Harmonics, Active Energy (kWh), Inductive Reactive - Capacitive Reactive Energy (kVARh) drawn by the system		

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.130.2201	Min. 12 steps Reactive power relays are devices that attempt to regulate the power coefficient, which is the ratio of Active Power (W) to the Apparent Power (VA), to the power coefficient set by the user, by controlling the reactive power of the compensation component. The reactive power control relay with Computer Communication, 3 Current Transformers, 3 x 380 V AC Supply, minimum 12 steps which simultaneously displays minimum three electrical values automatically shall measure the powers of the capacitors in the compensation system that it is connected to. It can protect the system by deactivating it with a warning so that the problems with current and voltage connections can be resolved, and it selects and concurrently activates or deactivates the required capacitor steps. Detects faulty capacitors. Installation and delivery in working order, including any material and labor and per the relevant project, of the devices which are capable of issuing overcompensation, undercompensation, failed capacitor and exceeded ratio alerts, and of measuring the values of phase voltage (V) of its connected system, RMS value of the phase current that the current transformer is connected to, power coefficient (PC) of the system, the Active Power (W), Reactive Power (VAr), Apparent Power (VA), Harmonics, kWh, kVARh drawn by the system, in case of compensation failures.	779,00	152,00
35.130.2202	Min. 18 steps The number of steps shall be minimum 18, and other specifications shall be the same as the item 35.130.2201.	928,00	166,00
35.130.2203	Min. 12 steps (with MODBUS, RTU and Computer Communication) Reactive power relays are devices that attempt to regulate the power coefficient, which is the ratio of Active Power (W) to the Apparent Power (VA), to the power coefficient set by the user, by controlling the reactive power of the compensation component. A reactive power control relay with MODBUS RTU Computer Communication, 3 Current Transformers, 3 x 380 V AC Supply and minimum 12 Steps, which displays minimum three electrical values simultaneously, measures automatically the powers of the capacitors in the compensation system that it is connected to. It can protect the system by deactivating it with a warning so that the problems with current and voltage connections can be resolved, and it selects and concurrently activates or deactivates the required capacitor steps. Detects faulty capacitors. Installation and delivery in working order, including any material and labor and per the relevant project, of the devices which are capable of issuing overcompensation, undercompensation, failed capacitor and exceeded ratio alerts, and of measuring the values of phase voltage (V) of its connected system, RMS value of the phase current that the current transformer is connected to, power coefficient (PC) of the system, the Active Power (W), Reactive Power (VAr), Apparent Power (VA), Harmonics, Active Energy (kWh), Inductive Reactive - Capacitive Reactive Energy (kVARh) drawn by the system.	862,00	203,00
35.130.2204	Min. 18 steps (with MODBUS, RTU and Computer Communication) The number of steps shall be minimum 18, and other specifications shall be the same as the item 35.130.2203.	943,00	203,00

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.135.2000	Frequency meter: (Unit: Qty.) Supply and installation of a frequency meter in compliance with the standards (TS 5592 EN 60051-4), (TS 5558 EN 60051-1), (TS 4417), which has a range of 45 Hz to 55 Hz with 1/2-Hz increments.		
35.135.2001	Gauge type: Supply and installation of a frequency meter that shows the frequency by indicating the number on which the gauge stops	70,50	8,95
35.135.2002	Vibration reed type: Supply and installation of a frequency meter that shows the frequency by indicating the number on which the fin vibrates the most.	90,50	8,95
35.135.2003	Digital type: Supply and installation of digital frequency meter with a reading range of 20.0 - 99.9 Hz at 0.1 Hz increments.	102,00	8,95
35.135.2500	Energy analyzers and circuit components (unit: qty;) (in compliance with TS 4417) Delivery, including any material and labor, of the devices that can be used in 3-phase (3P, 3PN), 2-phase and single-phase AC systems with a communication module, alarm module, and optional input and output modules, and in compliance with IEC 61010, which shall be in modular structure that is capable of displaying on its backlit LCD the instantaneous, average and maximum current and power values, voltage, frequency in the range of 45 to 65 Hz, power factor and the total harmonic distortion, and RMS values up to the 21st harmonic which should be monitored in an electrical system, and which is capable of displaying five readings simultaneously.		
35.135.2501	Energy analyzer	1.110,00	214,00
35.135.2502	Modbus module	332,00	52,00
35.135.2503	Pulse module (digital output)	174,00	35,20
35.135.2504	Alarm module	217,00	48,90
35.135.2505	Two analog output modules	247,00	35,20
35.135.2506	Two digital output modules	204,00	35,20
35.135.2600	COS Ø METER: (Unit: Qty.) Supply and installation at its designated location of Cos Ø meters that are in compliance with TS EN 62058-31, TS EN 62058-11 and TS EN 62053-11 standards, with 0.5 inductive and 0.5 capacitive Cos Ø values. The current transformer shall not be charged.	104,00	9,25
35.135.3000	METERS:		
35.135.3100	Single-Phase, Hour-Tariff Electronic Energy Meters: (Unit: Qty.; Materials on construction site: 60%) Supply, transportation to the work site, installation and connection, and delivery in working order, of a TEDAŞ-approved, single-phase, two-wire electronic active energy meter with time tariff and its base, which shall be in compliance with the standards TS EN 62053-21 and TS 62052-11 as well as Directive (76/891/EEC) on Metering Instruments and Electric Energy Meters, awarded a brand registration certificate by the Ministry of Industry and Technology, capable of metering in maximum two accuracy classes of 10 A to 60 A and 20 A to 120 A, rated for an operating frequency of 50 Hz, capable of exchanging information with the meter as per the TS EN 62056-21 standard and of dividing a day into eight different time spans in minute-level precision based on the program of the meter, and manufactured as dustproof and waterproof in IP 51 degree of protection (TS EN 60529 standard).		
35.135.3101	Up to 10 (60) A	80,50	26,50
35.135.3102	Up to 20 (120) A	86,00	26,50

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.135.3200	3-Phase, Hour-Tariff Electronic Energy Meters: (Unit: Qty.; Materials on construction site: 60%) Supply, transportation to the work site, installation and connection, and delivery in working order, of a TEDAŞ-approved, 3-phase, four-wire electronic active meter with backlit digital display with six integer and two decimal places, a real-time clock of 100 years on the circuit of the meter, and time tariff and its base, which shall be in compliance with the standards TS EN 62053-21 and TS 62052-11 as well as Directive (76/891/EEC) on Metering Instruments and Electric Energy Meters, awarded a brand registration certificate by the Ministry of Science, Industry and Technology, capable of metering in maximum two accuracy classes in its designated current and voltage ranges, rated for an operating frequency of 50 Hz, capable of exchanging information with the meter as per the TS EN 62056-21 standard and of dividing a day into eight different time spans in minute-level precision based on the program of the meter, and manufactured as dustproof and waterproof in IP 51 degree of protection (TS EN 60529).		
35.135.3201	3 x 230 / 400V..3 x 10 (60) A	171,00	30,40
35.135.3202	3 x 230 / 400V..3 x 20 (120) A	177,00	30,40
35.135.3300	Three-Phase, Hour-Tariff Electronic (Active-Reactive) Meters: (Unit: Qty.; Materials on construction site: 60%) Supply, transportation to the work site, installation and connection, and delivery in working order, of a TEDAŞ-approved, 3-phase, four-wire Active-Reactive meter with minimum 5 (7.5) A input current backlit digital display with six integer and two decimal places, and its base, which shall be in compliance with the standards TS EN 62053-21/23 and TS 62052-11 as well as Directive (76/891/EEC) on Metering Instruments and Electric Energy Meters, awarded a brand registration certificate by the Ministry of Science, Industry and Technology, capable of measuring capacitive and inductive readings individually during reactive metering, metering in maximum two accuracy classes in its designated current and voltage ranges, rated for an operating frequency of 50 Hz, capable of exchanging information with the meter by means of an optical port as per the TS EN 62056-21 standard (EDIS and OBIS code systems shall be used for data exchange as per the standards, however the terms on the meter's display shall be easy to understand) and of dividing a day into eight different time spans in minute-level precision based on the program of the meter, and manufactured as dustproof and waterproof in IP 51 degree of protection (TS EN 60529). (The current transformer shall be paid separately in systems with current transformer.)		
35.135.3301	3 x 230 / 400 V ..3 x 5 (7.5) A	480,00	41,20

35.140.3100	Installation of column and supply lines with 1-KV, underground YVV (NYY) cables: (Unit: m) Installation of column and supply lines with 1-KV, underground YVV (NYY) cables in compliance with TS IEC 60502-1+A1 standards. Supply to the workplace, including cable bushings and escape pipes, any other material and labor, of underground cables for installation on plaster, on walls and ceilings through consoles or clips, or through conduits inside the building, and through conduits outside the building. Unit: The length of the cable between terminal boxes and terminal caps shall be considered. Multiple cables installed in the same conduit shall be housed in cable ducts or pipes in the diameter and length required for each cable at the locations of passage. The terminal boxes, caps, junction boxes, consoles, and conduits shall be paid separately. Iron structures shall be paid per the Item No. Y.23.176. No additional charge shall apply for passage ducts and pipes up to 10 meters long. Note: The item shall be manufactured in compliance with the TS EN 50575 and TS EN 50575/A1 standards, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union.

35.160.1150	<p>Security line lighting outlet branches: (The security line shall be plastic-insulated): (Unit: Qty.)</p> <p>Security line lighting outlets: (The security line shall be plastic-insulated): (Unit: Qty.) Installation of surface-mounted or flush-mounted lighting outlet lines (not including the fixtures), including the labor, and supply and transportation to the work site, of junction boxes, terminal blocks, switches, fixtures, fixing blocks and any material, with minimum 2.5-mm² service lines and 1.5-mm² outlet branch lines, phase and neutral conductors colored per TS EN 60445 and plastic-insulated, which shall be laid through peschel, bergman or PVC pipes. No price difference shall be charged for thicker walls. Unit: No additional charge shall apply unless the length of the branch exceeds 35 m. The part of the branch line exceeding 35 m shall be charged as a supply line per the Unit Price No. 35.140.2000. A single outlet shall be considered normal for the single switch outlet branch and chandelier outlet. Extra outlets connected to the aforementioned outlets shall be considered parallel. Two two-way switches and an outlet branch shall be considered a two-way outlet branch, and other outlet branches connected to it shall be considered parallel outlet branches. Deviator switches shall be paid separately per the relevant unit price. The first two of the outlet branches controlled by a dual switch outlet branch, which are at the same location, shall be considered commutator outlet branches, and the rest, parallel outlet branches. Where a breaker is used instead of a switch, the price of the switch shall be deducted, and also the price of the breaker shall be paid. A 3-phase outlet branch is similar to a single switch outlet branch where each fixture is supplied power by 3 phases and 4 or 5 conductors. Switch contactor and contactor controller lines of a 3-phase outlet shall be paid separately. Where each fixture is supplied through a different phase, the first outlet branch shall be charged as single-outlet regular, and other outlet branches connected thereto shall be charged as single-phase parallel outlet branch. Fixtures shall be paid separately per the unit price no. 35.170.0000.</p>		
35.160.1151	Single switch outlet branch with outlet line with earth wire.	73,00	38,80

35.170.1000	LED FIXTURES: Every LED fixture shall be equipped with an ENEC-certified driver with a PFC value of 0.95. LEDs must be IESNA LM-80 certified. The fixtures shall have a life cycle of minimum 50,000 (L70) hours per the TM-21 calculation table, the color rendering index (CRI) of the fixtures shall be minimum 80 and homogeneous light diffusion shall be available. The fixtures shall be in compliance with the standards TS EN 60598-1, TS 8698 EN 60598-2-1, TS EN 60598-2-2, and the fixture drivers shall be in compliance with the standards TS EN 61347-1 and TS EN 61347-2-13 and the 2014/35/EU Low Voltage Directive (LVD), and released with a CE compliance marking. The fixtures shall be accompanied by a photometric measurement report as per IESNA LM-79 standards by an accredited laboratory, and IP degree of protection shall be tested as per the TS 3033 EN 60529 standard and IK degree of protection shall be tested as per the TS EN 62262 standard. Also, the fixtures shall be manufactured in compliance with the Restriction of the Use of Certain Hazardous Substances Directive. Note: The luminous flux (lm) values specified in the LED fixture items are the output values of the fixtures, and the consumption power represents the total power drawn from the mains by a fixture.		
35.170.1100	LED Ceiling Fixtures (Unit: Qty.) Supply to the work site, and delivery in working order, including any material, labor and installation, of fixtures of minimum IP 40 degree of protection, and with a body made of minimum 0.5-mm DKP sheet metal and frame made of minimum 0.7-mm-thick DKP sheet metal and an opal PMMA diffuser minimum 1-mm in thickness.		
35.170.1101	Surface-mounted LED ceiling fixtures sized minimum 30x30 (with minimum 1000 lm light flux, and maximum 12 w consumption).	169,00	5,10
35.170.1102	Flush-mounted LED ceiling fixtures sized minimum 30x30 (with minimum 1000 lm light flux, and maximum 12 w consumption).	142,00	5,10

35.170.5200	Motion Sensors: (Unit: Qty.) Supply, transportation to the work site, establishment of the connections and settings, and delivery in working order, including any material and labor, of wall-type, flush-mounted motion sensors of IP 44 degree of protection, in compliance with the Restriction of the Use of Certain Hazardous Substances Directive, the 2014/35/EU Low Voltage Directive (LVD), TS EN 60669-2-1 standards and released with a CE compliance marking, which shall operate in 220 to 240-volt mains voltage, a temperature range of -20°C to +40°C, allow connection of loads up to 400 Watts for fluorescent lamps and up to 1000 Watts for glow-filament lamps as well as adjustment of activity period and daylight by means of trimmers. Wall-type motion sensors shall be equipped with a digital optical detector and have a detection range of 180°, and ceiling-type motion sensors shall have a detection range of 360°.		
35.170.5201	180° wall-type, surface-mounted motion sensor	61,00	7,00
35.170.5202	360° ceiling-type, surface-mounted motion sensor	61,00	7,00
35.170.5203	360° ceiling-type, flush-mounted motion sensor	71,50	7,00
35.170.7000	FLUORESCENT FIXTURES: (Unit: Qty.) All fluorescent fixtures shall be manufactured to comply with the Restriction of the Use of Certain Hazardous Substances Directive, the 2014/35/EU Low Voltage Directive (LVD), and the standards TS EN 60598-1, TS 8698 EN 60598-2-1, TS EN 61347-1, TS EN 61347-2-3:2011 (flush-mounted ones shall also comply with the TS EN 60598-2-2 standard), and released with CE compliance marking. Also, all fluorescent fixtures shall be with electronic ballast.		
35.170.7100	DECORATIVE SUSPENDED CEILING FIXTURES (for Rock Wool and Plaster Suspended Ceiling) (Flush- and surface-mounted) Supply to the work site, including any material and labor, of fluorescent bulbs, fireproof, locked-type sockets, and halogen-free connection cables with electronic ballast along with fixtures coated with a special oven-dried paint of a color to be approved by the administration and of the IP 20 degree of protection (Fixture efficiency shall be minimum 70%. The administration may request the manufacturer to have the efficiency values tested and certified by the laboratory of a relevant organization where necessary), with special DKP sheet metal profile minimum 0.5-mm in thickness; 9 to 11-cm hole in width and length to fit the type and number of the bulbs; back side strengthened with additional folds; cases featuring special air vents; special frames; installation tabs that allows easy intervention and installation; double parabolic, anodized pure aluminum reflectors extending in parallel and perpendicular to fluorescent bulbs which diffuse light symmetrically in the form of a bat wing; anodized pure aluminum reflectors, which shall be made of anodized high-purity (99.9%) anodized aluminum (with anodized aluminum fin strips placed at 6 to 10-cm intervals perpendicular to the fluorescent bulbs for single parabolic reflectors).		
35.170.7101	ATY2 - 4 x 18 (with double parabolic glossy reflectors)	151,00	6,10
35.170.7102	ATY4 - 4 x 18 W (with matte or clear prismatic plexiglass)	141,00	6,10
35.170.7103	ATY8 - 2 x 18 W (with double parabolic reflectors)	104,00	6,10

35.170.7204	T1 - 2 x 40-Watt Fixture	87,50	9,20
35.170.7300	Waterproof fluorescent fixture Type U: Supply to the work site and installation in the designated location, establishment of the connections and settings, and delivery in working order, including any material and labor, of waterproof fixtures including a fixture coated in electrostatic powder paint with minimum IP 65 degree of protection, fluorescent bulb, electronic ballast, light socket compliant with TS EN 60400 standard, with a clear polycarbonate cover, minimum 8-cm depth, width and length fitting the type and number of the bulb, which shall be sealed, hinged, can be opened, and tightened with thumb screws.		
35.170.7301	U - 1 x 20-Watt Fixture	62,50	8,20
35.170.7302	U - 2 x 20-Watt Fixture (Double ballast)	82,00	9,20
35.170.7303	U - 1 x 40-Watt Fixture	78,00	8,20
35.170.7304	U - 2 x 40-Watt Fixture	104,00	9,20
35.170.7400	Clean Room Fixtures (unit: qty.) Supply to the work site, and delivery, including any material and labor, of lighting fixtures, including halogen-free connection cables, with similar specifications as the item 35.170.7100 with the addition of a clear, opal or prismatic acrylic lens or tempered glass, single or double parabolic aluminum reflectors, electronic ballast, stainless steel bolts on the IP 65 degree of protection external frame, sheet metal components phosphate bathed and coated with epoxy polyester paint, internal connections made with halogen-free cables, which shall offer ease of maintenance with the lens or glass suspended on the body, and all parts of which shall be earthed.		
35.170.7401	ATH-2 x 18 w	265,00	7,80
35.170.7402	ATH-4 x 18 w	398,00	7,80
35.170.7403	ATH-2 x 36 w	382,00	7,80
35.170.7500	PROJECTORS WITH HALOGEN BULBS: (Unit: Qty.) (in compliance with the standards TS 8702 EN 60598-2-5 and TS EN 60598-2-5) The body of the component and the frame of the front glass shall be made of injected aluminum and coated in oven-dried paint; the reflector shall be made of anodized pure aluminum plates; and the front glass shall be tempered and built to resist minimum 250 C or thermal shocks and impulses. The component shall be protected against dust and rain (IP 54), the part between the glass and the body shall be protected against extreme heat with silicon seal. The connection box that is installed under the body of the projector shall be heat-resistant injected plastic. Installation shall be included. Note: The bulb is included in the price.

35.180.1601	<p>SNMP software and adapter: (Unit: Qty., Materials on construction site: 60%)</p> <p>Transportation to the work site, installation (except the cables) and delivery in working order of SNMP adapters and software which allow monitoring of the functions of all SNMP-compliant electronic devices at any distance, include the equipment and software required for this, display output power, input power, location and functions of the UPS, battery charge status, supply time and UPS temperature information, record mains power outages, recovery of mains power, frequencies, alarms, turning off and technical failure information with date and time, display graphic representations of such values as input voltage, frequency based on historical data, and which are capable of operating on TCP/IP-based network infrastructure, and automatically sending messages or emails to an address or group of addresses in case of an alarm or failure, and issuing signals in different colors in case of regular warnings and failures.</p>	1.570,00	303,00
35.180.2100	<p>Modular Uninterruptible Power Supply (UPS) (Unit: Qty.)</p> <p>The modular uninterruptible power supply shall be made up of maximum 50-kVA hot-swappable (allowing replacement without causing an interruption in the load) modules. The UPS shall be 3-phase, suitable for continuous operation, solid-state, non-transformer, two-cycle, VFI (voltage- and frequency-independent). The UPS shall be capable of containing a sufficient amount of power modules for required power or redundancy. Each module shall load equally and simultaneously to share the critical load. The UPS shall incorporate minimum two hot-swappable modules to process the full load, and it shall be installed in a cabinet to ensure system integrity. If any of the power modules fails, the failing module should be capable of fully isolating itself automatically from the system. Replacement of modules shall not interrupt the system and can be performed while the critical load is shared on-line by other module(s). The UPS shall record shifts of grid and its reactions to such shifts. The records shall include date, time and the subject. Transportation to the work site, installation (not including the cables) and delivery in working order, including the batteries and cabinets, of modular uninterruptible power supplies with input tolerance values of 380 V AC (3-phase) $\pm 20\%$ and 50 Hz $\pm 10\%$, a minimum output power factor of 0.9 and a minimum efficiency value of 0.95, an input current harmonic distortion of $< 3\%$ and a load crest factor of 3:1, complying with the standards TS EN 62040-1, TS EN 62040-2, the Regulation 2014/35/AB on Electrical Equipment Designed for Use Within Certain Voltage Limit, the Regulation 2004/108/AT on Electromagnetic Compatibility, and the Regulation on Amendment of Energy Market Customer Services published in the Official Gazette No. 26558 dated June 20, 2007 and bearing a CE compliance marking, equipped with an IGBT rectifier, a static (semiconductor) by-pass switch that switches the load to the grid or the auxiliary resource in the event of overload / short circuit / output voltage running out of limits / rectifier failure / extreme temperatures / inverter failure, a built-in mechanical by-pass switch, a dry-type, maintenance-free battery pack sufficient to run the system on full load for the required period in case of a power outage, a flexible DC busbar to ensure continuity of operation, an LCD or graphic display panel, display the values such as current / voltage / frequency / load status / battery precisely on the front panel, which shall supply the required power uninterruptedly for 24 hours, fulfill the output values of 380 V AC (3-phase) $\pm 1\%$ and 50 Hz $\pm 0.1\%$ as well as total harmonic distortion of $< 2\%$ on linear load and $< 5\%$ on non-linear load for the total output voltage, supply the load while charging fully discharged batteries, keep fully charged batteries at buffer charge, perform the inversion by IGBT using PWM (Pulse Width Modulation) to generate an ideal sine wave, and allow the connection of a network card for remote monitoring. NOTE: 1- The battery pack used with the uninterruptible power supply shall be fully maintenance-free, dry and TSE-certified. Power per cell of the batteries proposed to the Administration shall be calculated as follows: $(\text{Device power (VA)} \times \text{Output CosQ (0.9)}) / \text{Inverter efficiency (0.95)} / \text{Number of batteries} / \text{Number of cells (6)} = \dots \text{Watt/cell}$. For the calculation of the batteries, voltage per cell shall be considered 1.70 V/cell. The calculation result and proposed batteries shall be marked on the catalog and submitted to the administration. 2- Prices of the intermediate values of power shall be determined by interpolation.</p>

35.185.1261	Supply to the work site and installation of waterproof start-stop buttons (Unit: Qty.)	19,20	1,85
35.185.1700	Emergency Stop Button (Unit: Qty.) Supply, transportation to the work site, installation, establishment of connections and delivery in working order of plastic emergency mushroom buttons Ø40 or Ø60 mm in diameter with exposed and covered dry contacts and special adhesive that is not affected by heat and moisture, and designed for emergency stop, emergency start, emergency inactivation, and emergency activation, which shall break the system's power and switch it to the safe mode, not re-activate the system unless the button is rotated, restore to the original position when the head of the button is rotated manually, in compliance with the standards TS EN 60947-5-1, TS EN 60947-5-5/ A1 and TS EN ISO 13850, manufactured with the laser inscription technique against deletion and fading, bearing a designation of "Acil Durdurma" or "Emergency Stop" in black on a yellow background, a circular warning sign 60, 75 or 90 mm in diameter and a CE compliance marking, and in compliance with the 2014/35/EU Low Voltage Directive (LVD).		
35.185.1701	2 poles (1 NA + 1 NK contacts), Ø40-mm mushroom head	22,30	8,95
35.185.1702	2 poles (1 NA + 1 NK contacts), Ø60-mm mushroom head	27,50	8,95

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.185.1750	Emergency Stop Button Box (Unit: Qty.) Supply, transportation to the work site, installation and establishment of connections, and delivery in working order, including any material and labor, of weather-proof, fireproof, flame-retardant and halogen-free casings made up of two parts - yellow top, black or gray bottom - with stainless steel cover screws, factory-drilled cable holes and sealed PVC sleeves matching the cable diameter on the body, for installation of the emergency stop button on a wall, which shall be in compliance with TS EN 60670-1, IP 65 degree of protection and CE certified.		
35.185.1751	Single button casing	29,60	8,95
35.185.1800	THREE-PHASE PLUGS, SOCKETS AND INSTALLATION: (Unit: Qty., Materials on construction site: 60%) (TS-40).		
35.185.1810	Supply and installation in designated locations, including any material and labor, of 3-phase bakelite power sockets and plugs with covers and earth contacts. (TS-40).		
35.185.1811	Up to 3 x 25 A	9,05	3,80
35.185.1812	Max. 3 x 60 A	12,10	3,80
35.190.0000	CABLE CARRIAGE SYSTEMS		
35.190.1100	Cable Tray Systems: (Unit: kg) Materials on construction site: 60%) Bending and drilling holes on the sheet metal with sufficient width and height to carry the cable load, designed in compliance with the standard TS EN 61537, dimensions specified in the approved electricity project, the general technical specifications for electricity, and the standard TS EN 10130/10131, making grooves on the tray to lay transversal and longitudinal strings on the (reinforced) tray to enhance the strength and prevent further bending of the sheet metal, subjecting the tray to a chemical bath to remove grease and rust, flux coating and pre-drying the tray, then hot dip galvanizing the tray in compliance with the standard TS EN ISO 1461, transportation to the work site, installation on the ceiling or walls with suspenders or consoles, and delivery in working order, including any material and labor, of the tray. NOTE: 1- Only the weight of the tray shall be considered for measuring. 2- The attachment parts to be used for horizontal and vertical deflection, reducers, the consoles to be used as carriers, ceiling pendants, suspension elements, fixing clips, screws, nuts, washers, pins, etc. shall also be hot dip galvanized. The prices of such items shall be included in the unit price and not charged additionally. 3- The manufacturer of hot tip galvanization shall be required to present a certificate of compliance with the conditions of TS EN ISO 1461.	14,40	2,30
35.190.1101	Cable Tray Systems, Sheet Metal Covers: (Unit: kg) Delivery of sheet metal covers as per the item 35.190.1100 to cover the ducts specified in the approved project design, including labor and any material.	9,20	0,90
35.190.1102	Cable Ladders: (Unit: Kg) Delivery of cable ladders as per the item 35.190.1100 as specified in the approved project design, including labor and any material.	9,90	1,50

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.190.1200	Under-floor (Under-screed) Cable Ducts (Unit: kg) Cutting and bending minimum 1.5-mm-thick, "pre-galvanized" sheet metal in compliance with TS EN 10143 to turn it into a sealed channel in the dimensions mentioned below, creating compartments by modifying the form of the channel, transportation to the work site, installation in the flooring material by adjusting the channel and junction box heights by set screws, placement of junction boxes at necessary locations, laying guide wires in the channel (applying "Rabitz wire" on the channel in case of an insufficient thickness of screed on the channel), in compliance with the standards TS EN 50085-1 and TS EN 50085-2-2, dimensions specified in the approved electrical installation project design, and the general specifications of the electrical installation for safe installation of power cables beneath the floor, and delivery including labor and any material. NOTE: 1- The attachment parts to be used for horizontal and vertical deflection, four-point attachment parts, level adjustment unit, cable duct junctions with outlets in four directions, duct termination units, cable duct outlet boxes, anchors, screws, nuts, washers etc. shall also be hot-dip galvanized. The cable duct junction and multi-socket box shall be charged separately based on the relevant unit prices. 2- If rabitz wires are used on the cable duct, they shall be charged separately based on the relevant unit price.	9,50	1,90
35.190.1201	Underfloor Cable Duct Junction Box (Unit: Qty.) Supply, transportation to the work site, and delivery in working order, including labor and installation, of cable duct junction boxes with the side surfaces on four sides available for drilling to install the cable duct; minimum 2-mm in thickness bottom, top frame and lockable top cover for use as a distribution junction; stoppers to prevent the duct from penetrating into the junction box; outlets on four sides; decorative appearance; a mechanism that allows height adjustment before and after the screed; and barriers of different types within the junction box to prevent the contact between different types of cables, which shall be used at deflection points of the floor duct or where a power outlet or any other outlet is required, made of pre-galvanized steel sheet as per TS EN 10143, and comply with the standards TS EN 50085-1 and TS EN 50085-2-2 as well as the dimensions and general technical specifications provided in the approved electricity project design.	39,70	1,90

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.190.1202	Under-Screed or Elevated Floor Multi-Socket Box (Unit: Qty.) Supply, transportation to the work site, installation, and delivery in working order, including any material and labor, of flame-retardant, halogen-free socket housings with special ducts fitting the junction for installation; interfaces with the floor or junction box sized minimum 235 x 235 mm; the periphery of the housing reinforced with galvanized steel sheet minimum 3-mm thickness; iron hinge pin, a lockable cover with embedded handle, which can be installed in both directions; the top surface of the cover allowing decorative coating (designed to be flush with the floor when coated); openings covered with rubber caps to allow extension of plug cables; special inclined slots placed opposite to each other to allow installation of 8 sockets of 45 x 45 modules and 16 sockets of 22.5 x 45 modules; and a mechanism to allow adjustment to the level of the floor, which shall be in compliance with the standards TS EN 50085-1 and TS EN 50085-2-2, the dimensions given in approved electricity project design and the general specifications of the electrical installation. Note: The sockets shall be charged based on the relevant items.	39,70	1,90
35.190.1300	PVC Cable Ducts (Unit: m) Supply, transportation to the work site, installation in its designated location, establishment of the connections, and delivery, including internal corners, external corners, brackets, terminals, T-brackets and frames, of flame-retardant in compliance with TS EN 60695-2-11 standard, RAL 9010 white (with internal locking and foil coating for the ducts sized 100 mm and above), self-extinguishing PVC (UL 94 V0 M1) ducts resistant to mechanical impacts, atmospheric and UV rays, and 260 kW/cm dielectric current, operable in an ambient temperature range of -25 C to +60 C, designed for safe carriage of high and low current conductors within the building, equipped with hinged and movable internal corner, external corners and brackets, and horizontal and vertical installation holes at the bottom to facilitate wall installation, which shall comply with the standards TS EN 50085-1, TS EN 50085-2-1, bear IP 40 degree of protection, was released with CE marking, and comply with the Restriction of the Use of Certain Hazardous Substances (RoHS) Directive.		
35.190.1301	Min. 20 x 12 mm (single cell)	7,95	2,45
35.190.1302	Min. 40 x 16 mm (double cell)	11,40	2,45
35.190.1303	Min. 80 x 20 mm (triple cell)	17,10	2,45
35.190.1304	Min. 100 x 35 mm (triple cell)	20,10	3,20
35.190.1305	Min. 100 x 50 mm (triple cell)	25,30	3,80
35.190.1350	Floor-mounted (herringbone) PVC cable ducts (Unit: m) Identical with Unit Price No. 35.190.1300, with 3 or 4 cells, gray or white;		
35.190.1351	Min. 50 x 12 mm	4,20	2,35
35.190.1352	Min. 60 x 15 mm	6,20	2,45
35.190.1353	Min. 75 x 20 mm	7,10	2,45
35.190.1354	Min. 90 x 20 mm	9,00	2,45

High Current Interior Wiring

35.200.0000	PHOTOVOLTAIC SOLAR POWER SYSTEMS		

High Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.200.1000	<p>Photovoltaic Panels: (Unit: Qty.) Photovoltaic panels shall be of the number and energy capacity provided in the relevant project design in 1000 W/m² radiation, AM 1.5 air mass and 25°C cell temperature conditions (in standard test conditions). The instantaneous power output tolerance of solar panels shall be maximum +3%. The panels shall be equipped with by-pass diodes against power drops caused by shading. Panels shall be protected to prevent passage of current when no power is generated. The panels shall have a minimum system voltage of 1000 V and a maximum short inverse current protection of 15 A. Panel frames shall be pressed and also punched. A drainage hole, earthing hole and installation holes shall be available on the frame. Installation shall be made without bolts. The frame shall be corrosion-resistant and rust-free. The frame shall be designed to allow installation without drilling, etc. The glass/plastic covering the solar panels shall not reflect the sun rays. The glass shall be tempered per the standard EN 12150 and offer 91% permeability. The strength of the glass estimated per EN 12150 shall be 90 N/mm². The solar panels and fittings shall be resistant to minimum 130 km/h or 2400 Pascal wind speed and snow load (minimum 5400 Pascal). The terminal boxes of panels shall be of minimum IP 65 protection class. The back side of the panels shall comply with TS EN 61730-1 and allow installation of the panels at the relevant area. (+) and (-) terminals of the DC output cables and connectors of the panels shall be distinguishable. Cells used in the panels shall be laminated in both directions with ethylene-vinyl acetate (EVA) that complies with the standard TS EN 61215. The panels shall be capable of operating at -40 C to +85 C, at the elevation of the designated location of installation, and under a relative humidity of 0 to 85%, and compliance of the panels with the said conditions shall be guaranteed in written by the manufacturer. The photovoltaic panels shall be guaranteed for 10 (ten) years for product and physical strength, and 25 (twenty-five) years for linear energy. The linear energy warranty shall ensure minimum 90% of the panel power in 10 (ten) years and minimum 80% of the panel power in 25 (twenty-five) years. Above each panel shall be a product label affixed by the manufacturer, which at least contains the Manufacturer's name, PV Cell Type, Serial No, Nominal Power, Pmax, Voc, Isc, Dimensions and Max. System Voltage, Date of Production, and Country of Origin. Product labels shall be affixed beneath the glass, at the back of the product or on the edge of the frame in an indelible form. The contractor should submit to the Administration the flash test and EL (electroluminescence) test reports of the proposed panels in digital media before the installation of the panels on site. The faults or critical cracks in panel cells, if any, shall be identified by the test reports, and those panels which are not approved shall not be used on site. The installation shall not commence before the said test reports are delivered. If the installation site is located by the sea, the result of the salt water corrosion strength with minimum magnitude of 3 per TS EN 61701 shall be submitted to the Administration. If the installation site is located close to a farm, the result of the ammonia corrosion test per TS EN 62716 shall be submitted to the Administration. Those panels which fail to fulfill the standards required by the environmental conditions shall not be used in the system. The maximum period between the dates of production and transportation to the site of the panels to be used in the system shall be 3 (three) months. Supply, transportation to the work site and delivery in working order, including the connectors, any material and installation, of photovoltaic panels manufactured in compliance with the standards TS EN 61215, TS EN 61730-1 and TS EN 61730-2 and released with a CE marking. Note: The items 111-100, 111-200 or 111-300 shall be used for panel carrier systems.</p>

35.200.1204	Photovoltaic panel with minimum 335 Wp output power.	899,00	11,40
35.200.1205	Photovoltaic panel with minimum 340 Wp output power.	921,00	11,40
35.200.1206	Photovoltaic panel with minimum 345 Wp output power.	943,00	11,40
35.200.1207	Photovoltaic panel with minimum 350 Wp output power.	966,00	11,40
35.200.1208	Photovoltaic panel with minimum 355 Wp output power.	988,00	11,40
35.200.1209	Photovoltaic panel with minimum 360 Wp output power.	1.020,00	11,40
35.200.1210	Photovoltaic panel with minimum 365 Wp output power.	1.040,00	11,40
35.200.1211	Photovoltaic panel with minimum 370 Wp output power.	1.060,00	11,40
35.200.1212	Photovoltaic panel with minimum 375 Wp output power.	1.080,00	11,40
35.200.5000	<p>Solar Inverter: (Unit: Qty.) Maximum input voltage shall be minimum 1000 VDC. For 15 kW and above, the inverters shall have at least 98% maximum efficiency and 97% Euro efficiency. For below 15 kW, the maximum efficiency shall be min. 97%, and the Euro efficiency shall be min. 96%. The inverters shall be equipped with a RS485 communication port. THD (Total Harmonic Distortion) of the inverters shall be < %3. The environmental protection of the inverters shall be minimum IP 65. The operating temperature range shall be -25 C to +60 C. The grid operating frequency range shall be 47 to 52 Hz. The grid operating voltage range (phase-neutral) shall be 190 to 270 V. The ambient relative humidity shall be up to 95%. The inverters shall be equipped with a "residual current monitoring unit" sensitive to all terminals. The inverters shall have an integrated web server, and the following data shall be accessible free of charge both on the Internet (remote monitoring system) and on the inverter throughout the life cycle of the system. Instantaneous power generation (overall and separate for each panel group), energy generated per day, the energy generated since installation, panel voltage, grid voltage. The system shall not require any payment throughout its life cycle for remote monitoring after the installation. The contractor shall obtain from the manufacturer a written commitment that the latter shall not charge any monitoring fee throughout the life cycle of the system. The Protection Rate I as per TS EN 62477-1 standards and Protection Class III per TS EN 60664 High Voltage Category shall be provided and each MPPT shall be protected by a surge arrester. The inverters in compliance with the standards TS EN 62109-1, TS EN 62109-2, TS EN 61727, TS EN 61000-6-2, and TS EN 61000-6-3 and released with CE marking shall be delivered with the connection accessories, any material and installation. Note: The surge arrester is not included in the price.</p>

Low Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.400.0000	HOSPITAL CALL SYSTEM		
35.400.1000	HOSPITAL CALL SYSTEM (IP SYSTEM): It is a communication and automation system that governs and integrates the Hospital Call Systems, the Nurse Call System, the Code Blue System, the Code Pink System, the Code White System, and the Consultant Call System. The system's central server communicates with room control units through a TCP/IP socket connection in the hospital's existing network. It has passed immunity and propagation tests to meet TS EN 60601-1-2 standard. It has also underwent TS EN 60950-1 standard tests. It complies with the Directive (2014/35/EU) Electrical Equipment Designed for Use within Certain Voltage Limits and the Directive (2004/108/EC) Electromagnetic Compatibility.		
35.400.1001	Nurse Call Panel: (Unit: Qty.) Supply, transportation to the work site, installation, making electrical connections, and delivery in working order of a desktop or wall-mounted panel with at least 15" LCD monitor, at least 1 GB system memory, at least 160 GB hard disk, a Turkish operating system and 10/100 MB LAN features. The panel can rank calls in the service according to call type and level of emergency, and inform the nurses about the calls in the rooms.	5.980,00	24,00
35.400.1002	Room Control Panel: (Unit: Qty.) Supply, installation, making electrical connections and delivery in working order of the panel that supplies power to and regulates voltage level in bedside call units, Toilet-Bathroom call units and over door lights. It can be built-in or surface-mounted that cannot be disassembled. It communicates with the Nurse Call Panel and Hospital Call Server via Ethernet network. It can scan smart cards, has at least 4.3" LCD touch-screen monitor, and 220 VAC or 12-24 VDC power supply. It can contain at least 50 records until the Hospital Call Server confirms that it received the calls and measurement information. It can scan Personnel Smart Cards. It can supply power to and regulate voltage level in at least two bedside call units and at least one Toilet-Bathroom call unit. It can connect with other devices in the room via an RS485 system or CAN bus.	1.080,00	24,00
35.400.1003	Bedside Call Unit: (Unit: Qty.) Supply, transportation to the work site, installation, making electrical connections and delivery in working order of an edge-lit, aesthetic and durable call unit that can be mounted to the bedside console, communicates with the room control panel via in-room communication network, can easily be connected to or disconnected from Patient Handset Call Units, as it has a single connector, can connect to the Room Control Panel via an RS485 system or CAN bus, has a call button to call the nurse, is made of high-quality flame-resistant material.	149,00	24,00

Low Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.400.1004	Patient Handset Call Unit: (Unit: Qty.) Supply, transportation to the work site, installation, making electrical connections and delivery in working order of a call unit that is ergonomic for the hand, can be connected to the bedside unit via a separate spiral RJ45 cable and has a call button to call the nurse.	137,00	24,00
35.400.1005	Patient Toilet-Bathroom Call Unit: (Unit: Qty.) Supply, transportation to the work site, installation, making electrical connections of the call unit which can be surface- or flush-mounted. It communicates with the Room Control Panel via in-room communication network. It can connect to the Room Control Panel via an RS485 system or CAN bus. It can make emergency calls if the rope under the panel is pulled.	149,00	24,00
35.400.1006	Over Door Light: (Unit: Qty.) Supply, transportation to the work site, installation, making electrical connections and delivery in working order of a noticeable LED over door light that utilizes red, green and blue colors.	131,00	24,00
35.400.1007	Hospital Server: (Unit: Qty.) Supply, transportation to the work site, installation and making electrical connections of the Hospital Server that has at least 1.6 GHz dual core CPU, at least 2 GB system memory, at least 160 GB HDD, and an integrated 4-port internal line input. It employs Interactive Voice Response (IVR), and is compatible with IP and analogue switchboards. It includes Caller ID support, and can run round the clock. It includes the settings of the Nurse Call Unit System, the Code Blue System, the Code Pink System, the Code White System and the Consultant Call System. It can manage, direct, record and report all calls, and produce statistics. It can contain records and reports for at least 10 years.	22.050,00	112,00
35.400.1008	Personnel Smart Card: (Unit: Qty.) ISO/IEC 14443 Type A. 13.56 MHz MIFARE classic (Standard - 1 KB) contactless smart card.	12,50	
35.400.1009	Pager: (Unit: Qty.) Supply of the pager that operates on Industrial, Scientific, and Medical frequency bands described in regulations on the use of Short-Range Devices. It has Turkish interface, and records the time and date the message is sent or received. It can keep up to 30 messages, give low battery warnings, and has sound and vibration settings for notifications. It can run on a single rechargeable AA-battery. This pocket-size device can also warn the user when it is out of coverage area. It has 8-line message display, and uses POCSAG coding.	1.170,00	
35.400.1010	Wireless Transmitter: (Unit: Qty.) Supply, transportation to the work site, installation and making electronic connections of the transmitter that communicates messages to pagers. It consists of a central and several auxiliary antennas positioned at where the signal fades. It operates on Industrial, Scientific, and Medical frequency bands described in regulations on the use of Short-Range Devices. It uses POCSAG coding, and can communicate with other devices without needing a data cable. Its coverage area can easily be increased by adding a transmitter nearby the blind spot. It has a 220 VAC or 12-24 VDC power supply.	1.540,00	34,00

Low Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.400.1011	Emergency Service Call Panel: (Unit: Qty.) Supply, transportation to the work site, installation and making electronic connections of the wall-mounted panel that has at least 19" LCD touch-screen monitor, at least 1 GB system memory, at least 16 GB hard disk, and a Turkish operating system. It supports 10/100 MB LAN features. It can scan Personnel Smart Cards, transmit messages via several devices and report the messages.	8.150,00	24,00
35.400.2000	NURSE CALL SYSTEM (manufactured in compliance with TS EN ISO 11197 and 93/42/EEC Medical Devices Directive, and released with the CE compliance marking)		
35.400.2001	Nurse Call Console: (Unit: Qty., Materials on construction site: 60%) Supply to the work site, installation and delivery in working order, including any material and labor, of a console (including the nurse call main unit with solid-state relays with output protection for all connections and controls including the power unit, indicator lamps, controls and communication, short circuit, open circuit and thermal protection, and EMI filter) with ABS housing, membrane front panel, LCD indicator panel with necessary buttons depending on the number of rooms, LED indicators, and a sufficient number of inputs and outputs for data, printer, PC and room connections, which shall be capable of data and audio communication with the central unit, printing and transferring to PC all details with all nurse call functions with timestamps and operating with other consoles in a network, and which shall allow nurses to carry out all monitoring and inspection tasks.		
35.400.2002	24 address capacity,	4.010,00	843,00
35.400.2003	31 address capacity	4.390,00	915,00
35.400.2004	62 address capacity	5.440,00	1.100,00
35.400.2005	Room / bed address control module (Unit: Qty., Materials on construction site: 60%) Supply to the work site and delivery in working order, including any material and labor, of a device enclosed in special casings with IP54 protection, and inputs and outputs with optical insulation, which shall allow monitoring and control of patient rooms, operate automatically, have a microprocessor, and transfers signals to the panel by means of a call input, door warning light and bathroom button connections.	291,00	39,60
35.400.2006	Call / reset unit (Unit: Qty., Materials on construction site: 60%) Supply to the work site and delivery in working order, including any material and labor, of a unit that consists of a nurse and physician call reset push-button and warning lights installed on patient bedside units.	76,00	12,10
35.400.2007	Call handset (Unit: Qty., Materials on construction site: 60%) Supply to the work site and delivery in working order, including any material and labor, of a patient handset with membrane, PVC, etc., with 2-meter cable, a call button, and buttons to control the lights on the patient bedside unit.	98,00	16,90
35.400.2008	WC / Bathroom emergency call button with a cord (Unit: Qty., Materials on construction site: 60%) Supply to the work site and delivery in working order, including any material and labor, of a unit made up of a module containing call and reset buttons, a warning light and a braided nylon cord with a pull ring at the tip. The unit shall be protected against moisture and dust.	115,00	16,90

Low Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.400.2009	Door-top warning light (Unit: Qty., Materials on construction site: 60%) Supply to the work site and delivery in working order, including any material and labor, of a lamp with plexiglass casing, red and green in color, which shall be used above patient doors, highly diffusive of light, and shall operate with 12V or 24V voltage.	113,00	19,50
35.405.0000	SYNCHRONIZED CLOCK SYSTEM		
35.405.1000	Master clock and wiring: (Unit: Qty., Materials on construction site: 70%) (TS EN 60708) Supply, installation, and delivery in working order, including any small material and labor, of a master clock described in the technical specifications, which shall be capable of managing a sufficient amount of slave clocks.		
35.405.1010	Regular master clock	955,00	112,00
35.405.1020	Compensated master clock	1.190,00	129,00
35.405.1030	Signal clock (that can also control the bell circuit when necessary)	1.380,00	142,00
35.405.1100	Slave clock and installation: (Unit: Qty., Materials on construction site: 70%) Supply, installation, and delivery in working order, including any small material and labor, of a slave clock described in the technical specifications.		
35.405.1110	Ø30 cm, single sided	113,00	23,90
35.405.1120	Ø30 cm, single sided, with the second hand	217,00	23,90
35.405.1130	Ø30 cm, single sided, weather-proof	97,50	23,90
35.405.1140	Ø30 cm, single sided, 110/220 V or 1.5-V battery-powered	75,50	23,90
35.405.1150	Signal clock	407,00	23,90
35.405.1160	Clock supply line: (Unit: m, Materials on construction site: 60%) Installing a flush-mounted or surface-mounted clock supply line by laying plastic-insulated conductors with 1.5-mm² section through peschel, bergman or PVC pipes. Junction boxes, terminal blocks and any small material and labor shall be included.	5,70	4,20
35.405.1170	Weather-proof clock supply line: (Unit: m, Materials on construction site: 60%) Clock supply line with the same as the item 35.405.1160 except non-lead antigron cables resistant to moisture.	5,95	4,80
35.405.2000	IP Master Clock Supply, installation and delivery in working order, including any small material and labor, of a master clock bearing the CE compliance marking of compliance and equipped with RJ45 network connectors, which shall be capable of sending signals to, and operating, analog and digital slave clocks; being set as a server on the network and sending and receiving time information to and from all devices on the network; setting daylight saving time automatically; and which supports GPS antenna connectivity and installation on 19-inch rack cabinets, and has a backup battery to backup the settings on the device during power outage; starts running automatically when the power is restored; and can be operated remotely by network connection.	12.270,00	112,00

Low Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.405.2100	IP Analog Slave Clock Supply, installation and delivery in working order, including any small material and labor, of a slave clock bearing the CE compliance marking of compliance and equipped with RJ45 network connectors and PoE (Power over Ethernet) power supply, which operates synchronously with the IP master clock by means of its TCP/IP configuration, indicates hour and minute, has an operating temperature of -10 to +50 degrees, including a two-sided installation apparatus for the two-sided type.		
35.405.2110	min. Ø30 cm, single sided	1.160,00	23,90
35.405.2120	min. Ø30 cm, double-sided	2.370,00	23,90
35.405.2130	min. Ø40 cm, single sided	1.730,00	23,90
35.405.2140	min. Ø40 cm, double-sided	3.590,00	23,90
35.405.2200	IP Digital Slave Clock Supply, installation and delivery in working order, including any small material and labor, of a slave clock bearing the CE compliance marking of compliance and equipped with PoE (Power over Ethernet) power supply, which operates synchronously with the IP master clock by means of its TCP/IP configuration, an LED indicator, and 4-digit hour and minutes indicator which indicates hour and minute, has an operating temperature of -10 to +50 degrees, including a two-sided installation apparatus for the two-sided type.		
35.405.2210	min. 5-cm-high digits, single sided	1.590,00	23,90
35.405.2220	min. 5-cm-high digits, double-sided	2.540,00	23,90
35.405.2230	min. 7-cm-high digits, single sided	1.940,00	23,90
35.405.2240	min. 7-cm-high digits, double-sided	3.250,00	23,90
35.405.2250	min. 10-cm-high digits, single sided	2.370,00	23,90
35.405.2260	min. 10-cm-high digits, double-sided	3.800,00	23,90
35.405.2300	GPS Antenna Supply and installation, including any material and labor, of the antenna that must be suitable for outdoor conditions, and produced in accordance with the IP 67 protection class, at least. It must be able to operate in temperatures between -30 C and 70 C. This 12-channel receiver must come on the market with CE compliance marking. The GPS antenna will be supplied with a 20 meter-long cable and a mounting leg.	699,00	23,90
35.410.0000	ADDRESSABLE FIRE DETECTION AND ALARM SYSTEM All fire detection, extinction and alarm systems will be manufactured in compliance with the Regulation (EU) No. 305/2011 Construction Products, and be released to the market with a CE compliance marking.		

Low Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.410.1100	<p>Address fire alarm control panel (Unit: Qty., Materials on construction site: 80%)</p> <p>Addressable smoke, heat, gas, flame and temperature detectors shall be modular, equipped with a microprocessor, and compatible with the connectors of addressable internal and external fire alarm buttons, input and output interface units, short circuit insulators and addressable audible and visual alarm devices, which can be connected to each other by a fire alarm control panel network system with minimum 16 addresses in a large distributed system, support Modbus, Bacnet or another accepted communication module for communication with other control and automation systems of the building, allow different event types (fire, error, security, alarm, information, etc.) to be defined on all addressable devices by the user, ensure full compatibility among the locations and fire scenarios for which the system is installed, allow additional devices to be installed on the system in a manner that does not upset the existing local addressing order, and provided with Turkish and English control panel firmware and Turkish front-end firmware. The control panel with minimum 2 programmable audible alarm outputs as well as controlled alarm and failure outputs dedicated to signalization to the fire department or a remote firefighting center; a pre-alarm function for early response (before the alarm activates) from the control panel in case of low smoke density; an overall fire alarm and failure lamp and individual alarm and failure lamps for each fire zone; an alphanumerical indicator and local audible warning device; zone numbers next to the fire lamps indicating the zone which each fire lamp is assigned to; and with a fully enclosed, sealed, maintenance-free accumulator that will ensure that the fire alarm system performs the detection functions for min. 24 hours and keep all alarm, control and communication functions up and running for min. 30 minutes at the end of the said period, which shall support RS communication module for remote access, and TCP/IP (compatible with IPv4 and IPv6) for remote access over LAN, WAN and the Internet; send the event details including the "date, time, event type, location, etc." to a predetermined mobile phone number (SMS) during the event by means of a GPRS communication module that can be installed on the control panel or integrated in the control panel by means of an external GPRS communication module; integrated in the existing audio system and allow monitoring of errors and failures in the connection by the control panel; provide a programmable alarm relay output to the camera, hence allow automatic switching to the location of fire as part of its integration with the closed circuit television (CCTV) system; continuously check the detectors for contamination and issue a "Service Required" alert if it detects contamination; allow connection of repeater and mimic panels to the control panel; allow continuous inspection of all cables and connections for broken wires, short circuit and earth leakage; store min. last 1000 events on its fail-proof memory; and allow connection of a mini thermal printer. The control panel shall be manufactured in compliance with the standards TS EN 54-2 and TS EN 54-4, the Regulation (EU) No.305/2011 Construction Products - CPR, released with the CE compliance marking, and awarded the manufacturer's declaration of performance, and Certificate of Constancy of Performance by an organization accredited by the European Union. Supply, transportation to the work site, installation, connection to alarm outlet lines, adjustment, and delivery in working order, including any material and labor, of the control panel.</p> <p>Note: Specifications of the module given in the description shall be in compliance with the relevant descriptions in the unit price descriptions. The said module prices are not included in the unit price of the control panel.</p>		
35.410.1101	Single-loop, addressable fire alarm control panel, with min. 120 address capacity.	10.880,00	983,00
35.410.1102	Two-loop, addressable fire alarm control panel, with min. 240 address capacity.	11.500,00	983,00
35.410.1103	Three-loop, addressable fire alarm control panel, with min. 360 address capacity.	13.600,00	1.070,00
35.410.1104	Four-loop, addressable fire alarm control panel, with min. 480 address capacity.	14.780,00	1.210,00

35.410.1520	<p>Addressable fire alarm control panel, GPRS communication module (Unit: Qty., Materials on construction site: 60%) It shall be used for remote access of the addressable fire alarm system over the Internet using the mobile communication protocol GPRS. It shall send the event details including the "date, time, event type, location, etc." to a predetermined mobile phone number (SMS) during the event by means of a GPRS communication module. The GPRS communication module shall have the same technical specifications with the unit price no. 35.410.6000, be supplied power by a switched-mode power supply (SMPS), and the price of the power supply shall not be included in the unit price. Supply, transportation to the work site, and delivery in working order, of a module manufactured by a company that is awarded ISO 9001 Quality Management System certificates.</p>	3.940,00	256,00
35.410.1530	<p>Addressable fire alarm control panel, MODBUS communication module (Unit: Qty., Materials on construction site: 60%) The modbus communication module shall be designed to operate in integration with the PLC systems of the fire alarm system using the modbus protocol, which are used for direct data exchange with other building control and automation systems of the plant. The modbus communication module shall allow the use of the data corresponding to the register addresses on the memory map for PLC automation. The modbus communication module shall be capable of fire, pre-alarm, error, test and disabling events on the system. Any event that occurs on the system shall be detailed up to the device address. Modbus module settings shall be made by means of hardware on the card and by means of software using the modbus master, and modbus RTU/ASCII modes shall be supported as settings and communication shall take place by the modbus protocol through RS 232/485. The modbus module shall be equipped with memory protection. The unavailable fields on the memory shall be both reading- and writing-protected. The modbus query time shall be min. 100 ms. Supply, transportation to the work site, and delivery in working order, of a module manufactured by a company that is awarded ISO 9001 Quality Management System certificates.</p>	4.130,00	256,00
35.410.1540	<p>Addressable fire alarm control panel, BACnet communication module (Unit: Qty., Materials on construction site: 60%) Supply, transportation to the work site, testing and delivery in working order, including any small material, of a BACnet communication module which operates as integrated with the systems that use the BACnet protocol, operate directly with the BACnet systems with MS/TP layer and through a router with the BACnet systems with an Ethernet layer, indicates fire, pre-alarm, error and disabling events, configures BACnet communication module settings by hardware on the card, and is manufactured by a company that is certified for compliance with the ISO 9001 Quality Management System.</p>	4.130,00	256,00

35.410.2000	<p>Addressable fire alarm repeater panel (Unit: Qty., Materials on construction site: 80%)</p> <p>The repeater panel should be equipped with all indicator and control buttons on the master fire alarm control panel, allow monitoring of all alarm and failure states related to the system and conduct system checks. The repeater panel should have a master fire alarm and failure lamp, and individual alarm, failure lamps and illuminated alphanumerical indicator for each fire zone as well as local audible alarm component. Location numbers indicating the assigned location of a fire lamp should be placed next to each local fire lamp. In case of mains power outage, the fire alarm system shall continue to perform detection functions for min. 24 hours, and be equipped with enclosed, sealed, maintenance-free accumulators to ensure that the functions of alarm, control and communication remain enabled for min. 30 minutes at the end of the said period. The control panel shall be earthed for the required ohm value independently. The control panel shall be manufactured in compliance with the TS EN 54-2 and TS EN 54-4 standards, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply to the work site, and delivery in working order, including any small material, of the repeater panel.</p>	4.810,00	381,00
35.410.2010	<p>Addressable Fire Alarm System Fire Telephone Control Unit (Unit: Qty., Materials on construction site: 60%)</p> <p>As part of the addressable fire alarm system, a control unit of a capacity stated in the relevant item shall be used to establish communication between the security center and field fire telephones located at strategic points on site. Field fire telephones shall not require dialing to call the security center. The fire telephone control unit of the addressable fire alarm system shall be equipped with the technical infrastructure necessary for fire telephones to call the relevant number automatically. Once an operator at the security center has answered an incoming call, the telephone call shall begin and if warnings are received from other fire telephones, they shall be able to join the call (conference). Addressable fire alarm system fire telephone control unit shall be equipped with sufficient technical infrastructure to allow all fire telephones to join a conference call simultaneously. Conference calls shall be started automatically by the control module without the need for any operator action. Supply, transportation to the work site, and delivery in working order, of a module manufactured by a company that is awarded ISO 9001 Quality Management System certificates.</p>

35.410.2500	<p>Active air sampling precision smoke detector (Unit: Qty., Materials on construction site: 60%)</p> <p>The active air sampling precision smoke detector which can detect fire at its initial stage for the locations that require very fast and precise smoke detection and protection shall operate by the principle of sampling the air at the relevant location. The detector shall be capable of operating at precision classes A (very high precision), B (enhanced precision) and C (normal precision). The detector shall be able to detect and report the operator any blockage or fracture at the pipe that transfers the air at the location to the panel. The pipes shall be drilled in the number and diameter as per the pneumatic calculations, and installed at their designated location specified in the application project. The pipes shall be secured by clamps to avoid deflection. The active air sampling precision smoke detector shall be in a PVC cabinet, and made up of a laser or LED-based high-power detection cell, an aspirator that absorbs the air, and a filter and electronic control equipment. The light source shall be semiconductor laser or high-power LED, and have a minimum life loop of 10 years. It shall adjust precision automatically based on the ambient conditions using its microprocessor controller design. The detector shall detect at min. 2 grades: alarm and pre-alarm. The device shall be equipped with pre-alarm, alarm and error relays. The active air sampling fire detector shall communicate by RS-485.</p> <p>The system should allow monitoring by PC using its own software. Air sampling panels shall be able to report events retrospectively and keep the events (such as reset, alarm, silencing an alarm, discharge, etc.) on its memory.</p> <p>The active air sampling precision smoke detector shall be equipped with a 24 V DC switching-mode power supply (SMPS) unit with the item number 35.410.6000 and in compliance with TS EN 54-4 to maintain the operability of detection functions for min. 24 hours and keep all functions of alarming, control and communication up and running for min. 30 minutes after the said period. The power supply shall not be included in the unit price.</p> <p>The active air sampling precision smoke detector shall be integrable with addressable fire detection systems through control modules. Supply, transportation to the work site, testing, and delivery in working order, including any small material, of active air-sampling precision smoke detectors and sensing pipes manufactured in compliance with the TS EN 54-20 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, with the manufacturer awarded a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union.</p> <p>Note: Square meter values specified in the item description indicate the area that the device can protect in the configuration class C. It should be kept in mind that the protection area is reduced in the configuration class A and B.</p>		
35.410.2501	A system with active sampling precision smoke detector with a protection area of min. 500 m ² in configuration class C.	4.260,00	1.050,00
35.410.2502	A system with active sampling precision smoke detector with a protection area of min. 750 m ² in configuration class C.	5.020,00	1.400,00
35.410.2503	A system with active sampling precision smoke detector with a protection area of min. 1250 m ² in configuration class C.	6.730,00	1.730,00
35.410.2504	A system with active sampling precision smoke detector with a protection area of min. 2000 m ² in configuration class C.	8.600,00	2.030,00

35.410.2640	<p>Addressable relay module resistant to high current (Unit: Qty., Materials on construction site: 60%)</p> <p>A relay module to be connected to the addressable fire alarm control panel should be used to activate the devices to be controlled in case of fire. The relay module should be activated by any combination of the input devices. It should be possible to use the module in applications that require high current by means of its 250 V AC, 8 A contacts. They should be able to operate normally open and normally closed by non-voltage, single-pole contacts. The microprocessor-controlled module should be equipped with an illuminated indicator that indicates operating, alarm and failure statuses of the device. The module should not require a 24 V DC supply unit and draw its power from the loop cable. Supply, transportation to the work site, testing, and delivery in working order, including any small material, of modules manufactured in compliance with the TS EN 54-18 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, with the manufacturer awarded a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union.</p>	597,00	44,80
35.410.2650	<p>Addressable contact monitoring module (Unit: Qty., Materials on construction site: 60%)</p> <p>A contact monitoring module to be connected to the addressable fire alarm control panel should be used to monitor the positions of the sprinkler systems, alarm inputs, general-purpose fire devices, control switches and other safety devices. It should be able to monitor normally open and normally closed contacts. The microprocessor-controlled module should have a modular expansion function. It should be activated individually by any combination of the module input devices. The module should be equipped with an illuminated indicator that indicates operating, alarm and failure statuses of the device. The module should not require a 24 V DC supply unit and draw its power from the loop cable. Supply, transportation to the work site, testing, and delivery in working order, including any small material, of modules manufactured in compliance with the TS EN 54-18 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, with the manufacturer awarded a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union.</p>	447,00	32,30

35.410.7000	WIRELESS FIRE DETECTION AND WARNING SYSTEM		
35.410.7010	Addressable Wireless Fire Alarm Transceiver Unit: (Unit: Qty.) Supply, including any small material, transportation to the work site, testing and delivery in working order of a addressable wireless fire alarm transceiver. When it is connected to a compatible cycle, it connects addressable wireless field devices to the fire detection and alarm system. It offers automatic channel selection and allows communication through minimum 7 different channels. It will be manufactured in accordance with the TS EN 54-18 and TS EN 54-25 standards, and the Regulation (EU) No. 305/2011 Construction Materials. It must be released with a CE compliance marking, and with a Declaration of Performance by the manufacturer and a Performance Stability Certificate issued by an organization accredited by the European Union.	1.080,00	65,00
35.410.7020	Addressable Wireless Fire Alarm Expansion Module: (Unit: Qty.) Supply, including any small material, transportation to the work site, testing and delivery in working order of the addressable wireless fire alarm expansion module that increases the signals coming from the transceiver units, and therefore expands the coverage area of the wireless fire alarm system. It offers automatic channel selection. It will be manufactured in accordance with the TS EN 54-18 and TS EN 54-25 standards, and the Regulation (EU) No. 305/2011 Construction Materials. It must come on the market with a CE compliance marking, and with a Declaration of Performance by the manufacturer and a Performance Stability Certificate issued by an organization accredited by the European Union.	1.030,00	62,00
35.410.7030	Addressable Wireless Smoke Detector: (Unit: Qty.) Supply to the work site, and delivery in working order, including any small material, of the microprocessor-controlled detector that will be equipped with a photoelectric smoke cell which operates by emitting light. Minimum one LED will be available on the detector for visibility from a distance. This detector will be powered by a dual battery system that lasts minimum 3 years. It must allow double-sided communication as a transceiver and employ automatic channel selection features. The detector will be manufactured in compliance with the TS EN 54-7 and TS EN 54-25 standards, and the Regulation (EU) No. 305/2011 Construction Products. It must be released with a CE marking and a Declaration of Performance by the manufacturer, and a Performance Stability Certificate issued by an organization accredited by the European Union. Supply to the work site, and delivery in working order, including any small material, of the detector.	817,00	23,50
35.410.7040	Addressable Wireless Heat Detector: (Unit: Qty.) Addressable wireless heat detector can be programmed as fixed temperature detector or rate-of-rise detector. Minimum one LED will be available on the detector for visibility from a distance. It will run on a dual battery system with a life expectancy of at least 3 years. It must allow double-sided communication as a transceiver and automatic channel selection. The detector will be manufactured in accordance with the TS EN 54-5 and TS EN 54-25 standards, and the Regulation (EU) No. 305/2011 Construction Products. It must be released with a CE marking and a Declaration of Performance by the manufacturer, and a Performance Stability Certificate issued by an organization accredited by the European Union.	800,00	23,50

35.415.0000	CONVENTIONAL FIRE DETECTION, EXTINCTION AND ALARM SYSTEM All fire detection, extinction and alarm systems will be manufactured in compliance with the Regulation (EU) No. 305/2011 Construction Products, and be released to the market with a CE compliance marking.		
35.415.1100	Conventional Fire Alarm Control Panel (Unit: Qty., Materials on construction site: 80%) The conventional fire alarm control panel shall be compatible with the connections of conventional optical smoke detectors, fixed temperature detectors, temperature increase rate detectors, optical smoke and temperature detectors, flame detectors, natural gas, LPG and carbon-monoxide detectors, conventional internal and external fire alarm buttons, audible and visual alarm devices. As standard, the fire alarm control panel should be equipped with min. 1 output for audible alarm as well as alarm and failure outputs for sending signals to a nearby fire station, a remote firefighting center or a fire lookout station. The fire alarm control panel should be able to operate standalone or with a repeater panel. The conventional fire alarm control panel should continuously keep all lines entering the detection and alarm devices under control against such failures as broken lines, short circuit or removal of the devices on the line. The fire alarm control panel should have a master fire alarm and failure lamp, and individual alarm and failure lamps for each fire zone as well as local audible alarm component. The control panel shall be equipped with a locking mechanism to prevent unauthorized access. In case of mains power outage, the fire alarm system shall continue to perform detection functions for min. 24 hours, and be equipped with enclosed, sealed, maintenance-free accumulators to ensure that the functions of alarm, control and communication remain enabled for min. 30 minutes at the end of the said period. The control panel shall be earthed for max. 5 ohm independently and in compliance with the Regulation on Earthing for Power Plants. The control panel shall be manufactured in compliance with the TS EN 54-2 and TS EN 54-4 standards, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply, installation, and delivery in working order, including any small material and labor, of a conventional fire control panel.

35.415.1300	<p>Conventional fire alarm repeater panel (Unit: Qty., Materials on construction site: 80%)</p> <p>The fire alarm repeater panel should communicate with the master fire alarm control panel and monitor all alarm and failure states of the system. The fire alarm repeater panel should have a master fire alarm and failure lamp, and individual alarm and failure lamps for each fire zone as well as local audible alarm component. The control panel shall be equipped with a locking mechanism to prevent unauthorized access. In case of mains power outage, the fire alarm system shall continue to perform detection functions for min. 24 hours, and be equipped with enclosed, sealed, maintenance-free accumulators to ensure that the functions of alarm, control and communication remain enabled for min. 30 minutes at the end of the said period. The control panel shall be earthed for the required ohm value independently and in compliance with the Regulation on Earthing for Power Plants. The control panel shall be manufactured in compliance with the TS EN 54-2 and TS EN 54-4 standards, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply, installation, and delivery in working order, including any small material and labor, of a conventional fire repeater panel as described in the relevant technical specifications.</p>	993,00	68,50
35.415.1400	<p>Conventional fire button and its installation (Unit: Qty.)</p> <p>Conventional fire buttons shall be activated by breaking the plastic film-coated glass cover. Once the glass is broken, a microswitch that is normally leaned on the glass should release and change position, and remain in that position until the glass is replaced. It should be possible to test the button by a test switch without breaking the glass. The button shall be manufactured in compliance with the TS EN 54-11 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply, installation, connection to fire warning outlet lines, and delivery in working order, including any small material and labor, of conventional fire buttons.</p>	48,70	7,15
35.415.1410	<p>Conventional resettable fire button and its installation (Unit: Qty.)</p> <p>The conventional resettable fire button should activate once the flexible non-breakable glass on the button is pressed, and remain in that state until it is reset. It shall be manufactured in compliance with the TS EN 54-11 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply, installation, connection to fire alarm outlet lines, and delivery in working order, including any small material and labor, of buttons.</p>	66,50	7,15

35.415.1420	Conventional, resettable, exterior fire button and its installation (Unit: Qty.) The conventional, resettable, exterior fire button should activate once the flexible non-breakable glass on the button is pressed, and remain in that state until it is reset. The protection class of the buttons shall be minimum IP 65. The buttons shall be manufactured in compliance with the TS EN 54-11 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply to the work site, and delivery in working order, including any small material, of the button.	272,00	7,15
35.415.1430	Conventional fixed temperature detector and its installation (Unit: Qty., Materials on construction site: 60%) By a semi-conductor temperature detection technology, the detector shall detect temperature once it has reached a certain threshold regardless of the rate of increase. The detector shall be compatible with the parallel remote indicator connector and equipped with a socket that ensures easy attachment and removal. The detector shall be manufactured in compliance with the TS EN 54-5 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply to the work site, and delivery in working order, including any small material, of the detector.	118,00	9,45
35.415.1440	Conventional temperature increase rate detector (Unit: Qty., Materials on construction site: 60%) By a semi-conductor temperature detection technology, the detector shall perform detection once the increase rate of the ambient temperature per unit time has reached a certain threshold and the temperature increase rate has reached a certain value. The detector shall be capable of operating as a fixed temperature detector or temperature increase rate detector. The detector shall be compatible with the parallel remote indicator connector and equipped with a socket that ensures attachment and removal. The detector shall be manufactured in compliance with the TS EN 54-5 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply to the work site, and delivery in working order, including any small material, of the detector.	134,00	9,45
35.415.1450	Conventional optical smoke detector and its installation (Unit: Qty., Materials on construction site: 60%) The detector shall detect smoke by optical means. The detector shall be equipped with a photoelectric smoke cell that operates by emitting light. The detector shall be compatible with the parallel remote indicator connector and equipped with a socket that ensures attachment and removal. The detector shall be manufactured in compliance with the TS EN 54-7 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply to the work site, and delivery in working order, including any small material, of the detector.	156,00	8,65

Low Current Interior Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.415.1460	Parallel remote indicator (Unit: Qty., Materials on construction site: 60%) It shall be operated by the signal from the parallel remote indicator output when fire alarm detectors detect an event. It shall be used where it is difficult or impossible to see and monitor the indicator (light (LED)) on the detector. The indicator (light (LED)) on the parallel remote indicator shall be red and min. 10 mm for ease of monitoring. The parallel remote indicator shall be manufactured by a manufacturer that is awarded ISO 9001 Quality Management System certificates. Supply, installation, and delivery in working order, including any small material and labor, of a parallel remote indicator.	26,30	8,65
35.415.1470	Conventional optical smoke and temperature detector and its installation (Unit: Qty., Materials on construction site: 60%) The detector shall detect smoke by optical means. The detector shall be equipped with a photoelectric smoke cell that operates by emitting light. The detector shall also sense temperature by a heat-sensitive semiconductor. The detector shall be compatible with the parallel remote indicator connector and equipped with a socket that ensures attachment and removal. The detector shall be manufactured in compliance with the TS EN 54-7 and TS EN 54-5 standards, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply to the work site, and delivery in working order, including any small material, of the detector.	272,00	32,30
35.415.1500	Conventional beam-type smoke detector (Unit: Qty., Materials on construction site: 60%) Conventional, or transceiver or transceiver reflector beam-type smoke detectors for large and high-ceiling areas shall be used for the fire alarm system. The detector should have min. three different grades of smoke sensitivity settings. The detector should be reset on the switchboard without the need for an external resetting unit. The beam-type smoke detector should perform drift compensation, and issue an error signal when the drift level has reached the critical threshold. A parallel remote indicator output shall be available on the detector. For the transceiver model, fireproof cables of an appropriate type and section for should be used to ensure synchronized operation and data communication between the receiver and the transmitter. The beam-type smoke detector shall be manufactured in compliance with the TS EN 54-12 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply to the work site, and delivery in working order, including any small material, of the detector.

35.415.2000	<p>Conventional fire extinguishing control panel (Unit: Qty., Materials on construction site: 80%)</p> <p>The conventional fire extinguishing control panel shall be compatible with the connections of conventional optical smoke detectors, fixed temperature detectors, temperature increase rate detectors, optical smoke and temperature detectors, flame detectors, conventional internal and external fire alarm buttons, audible and visual alarm devices, and start extinguishing and stop extinguishing buttons. A three-state (automatic, manual, off) switch for fire extinguishing should be available on the conventional fire extinction control panel. In case of fire, only the fire alarm should activate if the alarm is issued by only one zone. If the alarm is issued by two zones, the extinguishing outlet should activate. The extinguishing outlet should be assigned a period of delay. A "start extinguishing" button should be available to start extinguishing and a "stop extinguishing" button should be available to pause or stop extinguishing. As standard, the fire extinction control panel should be equipped with min. 1 output for audible alarm as well as alarm and failure outputs for sending signals to a nearby fire station, a remote firefighting center or a fire lookout station.</p> <p>The conventional fire extinguishing control panel should continuously keep all lines entering the detection, extinction and alarm devices under control against such failures as broken lines, short circuit or removal of the devices on the line.</p> <p>The fire extinguishing control panel should have a master fire alarm and failure lamp, and individual alarm and failure lamps for each fire zone as well as local audible alarm component. The audible and visual alarm devices should operate intermittently during the countdown for extinguishing and continuously during the extinguishing operation. The control panel shall be equipped with a locking mechanism to prevent unauthorized access. The control panel shall be equipped with an internal memory that is capable of storing min. 500 events even in case of a power outage. It shall be possible to transfer the events kept in the memory to a computer or a printer. In case of mains power outage, the fire alarm system shall continue to perform detection functions for min. 24 hours, and be equipped with enclosed, sealed, maintenance-free accumulators to ensure that the functions of alarm, control and communication remain enabled for min. 30 minutes at the end of the said period. The control panel shall be earthed for max. 5 ohm independently.</p> <p>The control panel shall be manufactured in compliance with the TS EN 54-2, TS EN 54-4 and TS EN 12094-1 standards, the Regulation (EU) No. 305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. 35.417.0000	FIBER OPTIC HEAT DETECTION SYSTEM		
35.417.1000	<p>Smart analogue linear fiber optic heat detection cable control system: (Unit: Qty.) Supply, transportation to the work site, including any small material, testing and delivering in working order of a detector, distribution, termination and connection boxes. The system uses an optical time domain reflectometer (OTDR) and Raman amplification. It will detect changes in temperature during a fire with a 1 C margin of error. It will then inform the user about these temperature changes, alarms and malfunctions within a minimum 8 km area with a 1 km margin of error. It can integrate with communication modules, and inform the user about control unit and sensor errors or downed electrical wires. It can cover an area up to 20,000 meters by connecting with fiber optic cables through one-, two- or four-channel options. It can define minimum 250 or 500 virtual fire zones, depending on its coverage area. It has minimum 40 dry contact outputs, and therefore can send fire zone information to the fire alarm control panel. It can send information to Scada systems with ModBus RS485 or ModBus TCP/IP outputs. It can ascribe special alarm threshold values by defining a rate of increase and a fixed temperature value for each virtual fire zone. It offers pre-alarm settings and password protection. It does not contain a cooling fan unit, and can continue to operate, detect fire and activate alarms even when fiber optic cables break. It uses an external 24 VDC (SMPS) switched-mode power supply. It must be released with an internationally-valid Approval Certificate based on TS EN 54-22 standard, and with a Declaration of Performance by the manufacturer.</p>

35.420.0000	GAS CONTROL SYSTEMS		
35.420.1000	<p>Addressable Combined CO-NO-NO2 Gas Control Panel (Unit: Qty.) The device shall offer an alarm threshold level and gas alarm zones that comply with the standards of the combined gas control panels which are used in indoor parks and tunnels, operate concurrently with CO (carbon monoxide), NO (nitrogen oxide), NO2 (nitrogen dioxide) gas detectors, and control electromechanical jet fan or gas/ smoke discharge systems for detecting and discharging gases. The panel shall be equipped with central error and gas alarm relay outputs as well as relay outputs for each zone at each detection level. It shall be included in the gas discharge automation by relay output required for each zone. It shall allow monitoring and directing of the operating status data on its integrated display. It shall be possible to make the necessary settings and configurations using the Turkish menu. The gas control panel shall always check all lines entering the detection and alarm devices against such problems as broken lines, short circuits and removal of the devices on the line. The control panel can be switched to the alarm state, the alarm state can be canceled and the system can be reset using the remote control inputs of the control panel. The gas alarm system shall continue to perform its functions for min. 24 hours in case of mains power outage, be equipped with enclosed, sealed, maintenance-free accumulators to ensure that the functions of alarm, control and communication remain enabled for min. 30 minutes at the end of the said period, and powered by a power supply manufactured in compliance with the TS EN 54-4 standard and Regulation (EU) No.305/2011 Construction Products - CPR. The panel shall be in compliance with the 2014/35/EU Low Voltage Directive and TS EN 50545-1 standard, released with the CE compliance marking, and the manufacturer shall be certified for a declaration of performance. The panel shall be supplied, transported to the work site, installed, connected, tested and adjusted, including any material and labor.</p>

35.420.1100	<p>Addressable Nitrogen Dioxide (NO2) gas detector (Unit: Qty.) Transportation to the work site, installation, connection to gas alarm outlet lines, testing and adjustment, and delivery in working order, including any material and labor, of the device that operates by connecting to the gas control panel, has a nitrogen dioxide measuring range of 0 to 30 ppm, a supply voltage of 24 V DC, a sensor lifeloop of min. 2 years, an operation indicator LED, which is in compliance with TS EN 50545-1, manufactured by a company certified for compliance with the ISO 9001 Quality Management System, released with the CE compliance marking and certified with the manufacturer's declaration of performance.</p>	919,00	82,00
35.420.1150	<p>Addressable LPG - Natural Gas (Methane - CH4) gas panel (Unit: Qty.) The device shall offer an alarm threshold level and gas alarm zones that comply with the standards of conventional combined gas control panels, operate concurrently with gas detectors that detect explosive gases, LPG and Natural Gas (Methane-CH4), and control electromechanical jet fan or gas/smoke discharge systems for detecting and discharging gases. The panel shall be equipped with central error and gas alarm relay outputs as well as relay outputs for each zone at each detection level. It shall be included in the gas discharge automation by relay output required for each zone. It shall allow monitoring and directing of the operating status data on its integrated display. It shall be possible to make the necessary settings and configurations using the Turkish menu. This menu shall allow to perform such functions as selecting locked or unlocked gas alarms, assigning input delay to the zones, assigning output delays to the sirens, testing the zones, disabling error relays, alarm zones and internal sirens, and monitoring the status of such actions. Access levels shall be password-protected. The gas control panel shall continuously keep all lines entering the detection and alarm devices under control against such failures as broken lines, short circuit or removal of the devices on the line. The control panel shall be able to start, cancel alarms and reset the system by means of its remote control inputs. The gas alarm system shall continue to perform its functions for min. 24 hours in case of mains power outage, be equipped with enclosed, sealed, maintenance-free accumulators to ensure that the functions of alarm, control and communication remain enabled for min. 30 minutes at the end of the said period, and powered by a power supply manufactured in compliance with the TS EN 54-4 standard and Regulation (EU) No.305/2011 Construction Products - CPR. The panel shall be in compliance with the 2014/35/EU Low Voltage Directive, released with the CE compliance marking, and the manufacturer shall be certified for a declaration of performance. The panel shall be supplied, transported to the work site, installed, connected, tested and adjusted, including any material and labor.</p>	3.020,00	510,00

35.420.2000	<p>Industrial combined gas alarm control panel (Unit: Qty., Materials on construction site: 80%)</p> <p>The industrial gas control panel should be designed to assess the measurements received from the gas detectors and sound an alarm. The panel's capacity should be scalable. Fire ducts should have a regular detector line outlet and a detector line outlet protected by a zener barrier in case the fire detectors are used in such zones where there is a risk of explosion. The industrial gas control panel should be equipped with a backlit, alphanumerical, large LCD display that indicates system details, detector locations and all gas levels simultaneously. It should indicate the type of measurement (ppm, % LEL, % VOL) on the same display depending on the type of the gas detector. It should be equipped with buttons for all system processes and maintenance functions, warning lights for alarm and fault details, and a min. 85-dB internal siren.</p> <p>The gas ducts should be adjustable for alarming at two different levels (high and low). Low and high alarm relay and error relay outputs should be available for each duct. Depending on the gas level on the gas detector, 4 - 20 mA or 1-5 V analog outputs should be available for each gas duct.</p> <p>A RS485 Modbus output should be available for monitoring and control through DCS/SCADA/PLC systems. The industrial type should keep the latest events indicating the alarms, errors and system interventions in its memory. Its software should give access the records on the memory from any computer. The control panel should be resettable from an external location by a switch. The device should be of IP 54 protection class. The panel should issue a warning when calibration is required and all inputs and outputs should be tested easily at the push of a button. The industrial combined gas alarm control panel shall be manufactured in compliance with the standards TS EN 50270 and TS EN 61010-1, and 2014/35/EU Low Voltage Directive (LVD), and released with the CE compliance marking. Supply, transportation to the work site, testing and delivery in working order, including any small material, of industrial combined gas alarm control panels.</p>

35.420.2050	<p>Flame-proof infrared (IR) gas detector (Unit: Qty., Materials on construction site: 60%)</p> <p>Flame-proof infrared (IR) gas detector shall detect hydrocarbon gases by absorption of infrared light, and explosive gases should be detected at 0 to 100% LEL. Instant reaction time should be shorter than 3 seconds at T90 and repeatability should be max. 2% FSD. The housing of the flame-proof infrared (IR) gas detector should be coated with LM aluminum alloy and polyester powder. The detector should operate perfectly up to 90% blockage. It should be able to issue a drift warning if the optical (mirror) assembly gets 75% dirty. The system should be equipped with a heating component to prevent evaporation. Calibration by a single person should be possible by an infrared output and intrinsically safe connection where there is a hazard of explosion. The detector should have RS-485 and 4/20 mA signal outputs for communication. Light indicators on the flame-proof, infrared (IR) gas detector should indicate normal operation, error and gas alarm states by different colors (green, yellow, red) of lights. The MTBF (mean time between failures) should be min. 10 years. Min. IP 66 protection class should be offered. It should be possible to connect the item to the combined gas alarm control panel. It should fulfill the flame-proof infrared (IR) gas detector standards. It should be in compliance with the Directive of Equipment and Protective Systems Intended for Use in Potentially Explosive Atmospheres (2014/34/EU), the Electromagnetic Compatibility Directive 2014/30/EU, the TS EN 60079-0 standard, certified for EEx d II C T6 approvals, manufactured in compliance with the standards TS EN 50270, and TS EN 61000-6-4 on RF emission, bearing the manufacturer's declaration of performance and the CE compliance marking. Supply to the work site, and delivery in working order, including any small material, of flame-proof infrared (IR) gas detectors.</p>	7.780,00	1.120,00
35.420.2100	<p>The flame-proof infrared (IR) flame detector (Unit: Qty.; Materials on Construction Site 60%)</p> <p>The flame-proof infrared (IR) flame detector should be designed to detect flame and respond quickly, and to be unaffected by the impurities, grease and dust in the environment where it is used. The flame-proof IR flame detector should be equipped with 3 IR sensors and check the information received from those 3 sensors to eliminate the risk of false alarm. The flame-proof IR flame detector should give a signal within max. 2 seconds if a flame start to burn in the relevant area, and it should be designed to set this delay up to 30 seconds upon the user's request. The flame-proof IR flame detector should detect sudden flashes of flame in 90° vertical and 90° horizontal axes. The IR flame detector should have 4-20 mA output. It should give normal status, error and alarm information with this output. It must be able to provide information on alarms, malfunctions and impurities via contact outputs. It must have 2A alarm and error relay contact at 30 VDC or 5A at 250 VAC. The MTBF (mean time between failures) should be min. 100,000 hours. The device should be of IP 66 protection class or above. It should be connected to the industrial combined gas alarm control panel, and to the addressable fire alarm control panel through the intrinsically-safe zone control module. The flame-proof infrared (IR) flame detector should fulfill the standards of FM, NFPA, class I Div. 1 Groups B, C & D, NFPA class II Div. 1 Groups E, F & G and CENELEC EExd II B TS. It must be manufactured by a company that is awarded ISO 9001 Quality Management System certificates. Supply, transportation to the work site, testing, and delivery in working order, including any small material, of flame-proof infrared (IR) flame detectors manufactured in compliance with the TS EN 54-10 standard, the Regulation (EU) No. 305/2011 Construction Products, and released with a CE marking, with a Declaration of Performance by the manufacturer and a Performance Stability Certificate issued by an organization accredited by the European Union.</p>	10.240,00	1.120,00

35.420.2150	Automatic gas and power cutoff device that detects earthquakes (Unit: Qty, Materials on construction site: 60%) Supply, transportation to the work site, connection, and delivery in working order, including any material and labor, of a device in compliance with TS 12884 and bearing the CE compliance marking, with microprocessor control and overload protection relay outputs, sensors that monitor momentum in two axes, and a rechargeable battery and charging circuit that gives audible and visible warnings and supplies power to the system during a power outage of min. 24 hours, which detects the seismic motions with the momentum specified in TS standards during an earthquake and generate control signals to automatically cut off the building's power supply as well as the gas supply lines of the devices that burn combustible and flammable gases such as natural gas / LPG, disables power generators and prevents them from automatically stepping in during a power outage, switches elevators to the emergency mode, makes them stop on the nearest floor and open their doors to ensure quick evacuation, automatically disables other electric devices that may be hazardous during an earthquake, minimizes post-earthquake damages, tests itself when powered or reset, is not affected by small shocks that are not caused by earthquakes, allows monitoring of operation and failure on the device (by means of LEDs/displays/LCD screens, etc.), and operates in coordination with the existing security systems and sensors installed in the building. NOTE: The electric solenoid valve to be used for cutting off gas shall be paid separately per the relevant items.	697,00	258,00
35.430.0000	EMERGENCY PUBLIC ADDRESS SYSTEMS		
35.430.1000	Emergency Digital Public Address System Control Unit The system control unit should operate with digital signal processing technology and communicate on the network. It should allow the systems of different buildings to be controlled from a single location and operate as a single system. The system control unit should supervise all speaker lines against short and open circuit problems. The system control unit should be able to make announcements to minimum 8 zones and be scalable to min. 200 zones by means of additional units. It should be able to record messages in CD quality and have a monitorable memory. It should be possible to assign priority to announcements. It should have min. 8 contact inputs for emergency and automatic announcements with the ability to broadcast messages alternately with each of them. A hand-held microphone should be available on the control unit for use during emergency. It should be possible to connect minimum 4 public address microphones to the system. The cable distance between the public address microphones and the center should be extendable to 300 meters. The system control unit should have a monitorable 24 V DC trigger output for each zone. Local audio setting units should be turned on using these outputs even if they are turned off. The control unit shall be powered by a power supply that fulfill the technical specifications provided in the item 35.430.1330 and comply with TS EN 54-4. The power supply shall not be included in the unit price. System control unit equipment shall be manufactured in compliance with the TS EN 54-16 standard, the Regulation (EU) No.305/2011 Construction Products - CPR, released with a CE compliance marking, and the manufacturer shall have a declaration of performance and Certificate of Constancy of Performance issued by an organization accredited by the European Union. Supply to the work site, installation, testing and delivery, including any small material, of an emergency digital public address system control unit including expansion units for more than 8 zones.

35.450.2400	SPEAKER HANGING KIT: (Unit: Qty., Materials on construction site: 60%) Delivery, including any small material and labor, of a mechanically secure wall hanging kit for mounting a speaker on a wall.	239,00	113,00
35.450.2500	AUDIO CABLES: (Unit: BALANCED: m., Materials on construction site: 60%) Delivery, including any small material and labor, of a cable apparatus of international quality, which shall be made up of a pair of live cables and braided copper shielding for a balanced transmission of audio signals. Note: Payment shall be made per item 35.500.2000 and the relevant items.		
35.450.2600	TWINAX SPEAKER CABLE: (Unit: Qty., Materials on construction site: 60%) Delivery, including any small material and labor, of a cable apparatus of international quality, which shall be made up of a pair of live cables and braided copper shielding for a balanced transmission of audio signals. Note: Payment shall be made per item 35.500.2000 and the relevant items.		
35.450.2700	MULTICORE AUDIO CABLE: (Unit: Qty., Materials on construction site: 60%) Delivery, including any small material and labor, of a multicore audio cable apparatus that is made up of eight numbered wires for transfer of audio signal. Note: Payment shall be made per item 35.500.2000 and the relevant items.		
35.450.2800	STAGE BOX: (Unit: Qty., Materials on construction site: 60%) Delivery, including any small material and labor, of a professional static black DKP sheet metal stage box with a connection panel with min. 8 audio connections and Neutrik or equivalent audio connectors, which shall be used for audio connections on stage.	555,00	56,50
35.450.2900	RACK CABINET: (Unit: Qty., Materials on construction site: 60%) Note: The item 35.550.0000 shall be applicable.		
35.450.3000	(NEUTRIK CONNECTORS): (Unit: Qty., Materials on construction site: 60%) Delivery, including any small material and labor, of Neutrik connectors with Neutrik or equivalent voltage regulators used for installation, which shall be installed in 8-compartment stage boxes on both sides of the stage, allow microphone connection from the hall, and for which 8-wire multicore cables are laid.	22,00	6,65
35.450.3100	Potentiometer and its wiring: (Unit: Qty., Materials on construction site: 60%) Installation of a flush-mounted or surface-mounted potentiometer outlet line using min. 0.75-mm ² plastic-insulated conductors (TS-3930) within peschel, bergman or PVC pipes, with potentiometers with compatible characteristics with the speakers that it will be used with, including junction boxes, terminal blocks and any small material and labor.	25,90	6,65
35.450.3200	Channel selector (three channels)	15,10	6,65
35.450.5000	Microphone: (Unit: Qty: Materials on construction site 60%) Installation, and delivery, including any small material and labor, of crystal or dynamic microphones complying with TS 6509 and the relevant technical specifications, with min. 10-meter-long microphone cable, microphone socket and plug.		
35.450.5001	Desktop microphone.	154,00	6,65
35.450.5002	Free-standing microphone.	173,00	6,65
35.450.5003	Hand-held microphone.	126,00	6,65

35.460.1000	LIGHT CONTROL MIXERS: (Unit: Qty., Materials on construction site: 60%) Delivery, including any small material and labor, of light controller mixer with light, chaser, stage memory and MB flash card, which shall be programmable by a PC, suitable for theater applications, support the DMX 512 protocol, and control programs equal to the number of channels. Other values shall be interpolated.		
35.460.1010	24-channel Light Controller Mixer	2.410,00	261,00
35.460.1020	48-channel Light Controller Mixer	4.620,00	562,00
35.460.1100	HALL LIGHTING CONTROLLER, DIMMER: (Unit: Qty., Materials on construction site: 60%) The device shall be microprocessor-controlled with each channel supplying 12 A. Thus, such functions as channel status, channel levels, pre-heating and balancing curve shall be performed on the device. The device shall be equipped with a cooling mechanism to prevent heat-related problems and the device shall be capable of operating without the need for external control equipment. It shall be possible to update the firmware and install new versions easily by an RS-232 connection. Power connectors on the back of the device shall be equipped with 3-phase supply and automatic line protection, and the device shall be delivered with any small material and labor.		
35.460.1110	6-channel Digital Dimmer	3.580,00	562,00
35.460.1120	12-channel Digital Dimmer	6.890,00	562,00
35.460.1200	PROFILE SPOT: (Unit: Qty., Materials on construction site: 60%) Delivery with any small material and labor of a profile spot 14°/32° with a security chain and suspension apparatus, iris diaphragm and gobo holder, equipped with an adjustable light source, a protection system that cuts off power when it is necessary to replace the lamp, which shall operate with a tungsten lamp of desired power, provide a uniform focus and light beam control by 50% more lamps than the number of spots required, and provide a light level of 200 to 2800 lux in various distances, and IP 55-certified.		
35.460.1210	650-W Profile Spot	2.760,00	468,00
35.460.1220	1000-W Profile Spot	3.450,00	468,00
35.460.1230	2000-W Profile Spot	5.440,00	468,00
35.460.1300	PC SPOT, BARN DOOR: (Unit: Qty., Materials on construction site: 60%) Delivery, including any small material and labor, of an IP-55-certified barn-door PC spot operating with a tungsten lamp, which shall be equipped with the desired number of spotlight lamps, a PC optical system to provide a sharp and smooth light beam, an adjustable light source, and a light beam of 200 to 2800 lux or more at various distances, complete with a color filter holder, safety guard, 4-wing shutter epoxy powder coating.		
35.460.1310	300/500 W PC Spot, Barn door, 500 W light bulb	944,00	98,50
35.460.1320	650/1000 W PC Spot, Barn Door, 1000 W light bulb	984,00	98,50

35.510.1804	Up to 100 pairs	297,00	88,00
35.510.1805	Up to 150 pairs	414,00	123,00
35.510.1806	Up to 200 pairs	536,00	153,00
35.510.1900	Telephone device and its installation: (Unit: Qty., Materials on construction site: 70%). Supply and delivery in working order, including any small material and labor, of a desktop or wall-mounted telephone. Quality certified by TSE.		
35.510.1901	Service type	17,00	
35.510.1902	Push-button, automatic type	78,00	
35.510.2000	Telephone wiring outlet line: (Unit: Qty., Materials on construction site: 60%) Installation of a flush-mounted or surface-mounted telephone outlet line by a plastic-sheath telephone cable (TS EN 60708) with plastic-insulated conductors 0.50 mm in diameter in peschel, bergman or PVC. Junction box, special telephone socket, plug, casing and any small material and labor shall be included. (An individual line shall be installed for each telephone from the floor distribution panel, including the ground line and excluding the trunk line and the device.) Unit: No payment shall be made unless the length of the outlet line exceeds 20 m. The part of the outlet line exceeding 20 m shall be charged per the item 35.510.0000.	41,40	27,80
35.510.2100	Parallel telephone outlet line: (Unit: Qty., Materials on construction site: 60%) Installation of a flush-mounted or surface-mounted parallel telephone outlet line by a plastic-sheath telephone cable (TS EN 60708) with plastic-insulated conductors 0.5 mm in diameter in peschel, bergman or PVC pipe. Junction box, terminal block, special telephone socket, plug, casing and any small material and labor shall be included (the main line and the device shall be included but the earth line shall not be included). Unit: No additional charge shall apply unless the length of the outlet line exceeds 20 m. The part of the outlet line exceeding 20 m shall be charged per the item 35.510.0000.	19,80	14,40
35.510.2200	Weather-proof telephone outlet line: (Unit: Qty., Materials on construction site: 60%) The same as the item 35.510.2000 except that the telephone outlet line shall only be made of weather-proof materials and with PVC-insulated polyethylene-sheathed telephone wires. Unit: No additional charge shall apply unless the length of the outlet line exceeds 20 m. The part of the outlet line exceeding 20 m shall be charged per the item 35.510.0000.	52,00	31,80
35.510.2300	Telephone plug - socket (Unit: Qty.) Installation, including the housing and any small material and labor, of telephone plugs and sockets with threaded connection leads and fireproof housing, for use with telephones, which shall be equipped with male and female contacts, used as flush mounted and surface mounted, and designed differently from the plugs and sockets to be used with high current.	5,90	2,30

35.515.4000	LIH(St)H-TP HALOGEN-FREE SIGNAL and CONTROLLER CABLE (Unit: m.) (VDE 0812) Supply to the work site, including gateways and security pipes as well as any material and labor of halogen-free, unshielded control and internal connection cables, flexible cables used for signal and control cables used for connections of electronic systems, sound frequency transfer in any communication system, electronic data transfer, and industrial electronics, and made by twisting of cladding formed by insulation in colors in compliance with DIN 47100 and multiple twisted, annealed copper, halogen-free, flame-retardant materials in layers (operating temperature: -30 C and +70 C), shielded by AL-PES wrapping tape with an earthing wire, with the outer jacket that meets the TS EN 50290-2-26 standard and is made of flame-retardant HFFR compound in RAL 7001 gray, in compliance with the standards TS 13734:2017, IEC-332-1, IEC-332-3, IEC-60754, IEC-60332, TS EN 60332-1-2, TS EN 60754-1 and TS EN 61034-2, and certified for passing the flame test. Note: HFFR pipes are included for the internal wiring. Note: The item will be manufactured in compliance with the TS EN 50575 and TS EN 50575/A1 standards, the Regulation (EU) No. 305/2011 Construction Products, and released with a CE marking. The manufacturer must have a Declaration of Performance and a Performance Stability Certificate issued by an organization accredited by the European Union.

35.540.0000	FIBER OPTIC CABLES		
35.540.1000	MULTI-MODE FIBER OPTIC CABLE (Unit: m.) Multi-mode (MM) fiber optic cables are used for high-quality audio, data and video transfer at local area networks (LAN), closed circuit television (CCTV) systems, and industrial automation systems (SCADA). Fiber core/cladding diameter: 62.5 / 125 µm (OM1), 50/125 µm (OM2, OM3). It will be corrugated, grooved, with or without a steel wire armor, with an external polyethylene casing and "Thixotropic Gel" filling in buffer tubes to prevent water carryover. The maximum optical attenuation must be 3 dB/km at 850 nm and 1 dB/km at 1300 nm. It should meet TS EN 60793-1-1 and TS EN 60794-1-23 standards. It will be put into service only after it is terminated by "fusion splice" method using a special welding machine and tested end-to-end with an OTDR tester. Each fiber optic cable will be tested with an OTDR test device after it is laid and terminated in a termination box, and the test reports will be submitted to the administration. Any material and labor will be included.

35.545.1000	PIG TAIL (Unit: Qty., Materials on construction site: 60%) An optical fiber cable with a connector at one end, which is used in optical fiber termination sets. The exterior jacket is 0.9 mm in diameter. SM and MM optical fiber cables have outer jackets of the same diameter. Pigtail length is 1.5 m. It is available with ST, SC, FC, LC, MTRJ connectors. Interference loss values should be max. 0.3 dB, and the test results shall be submitted to the administration. Any material and labor shall be included.		
35.545.1001	SM LC pigtail	45,20	5,65
35.545.1002	SM SC pigtail	53,50	7,75
35.545.1003	SM FC pigtail	54,00	7,75
35.545.1004	SM MTRJ pigtail	65,50	8,90
35.545.1005	SM ST pigtail	43,20	5,65
35.545.1006	MM LC pigtail	29,30	3,45
35.545.1007	MM SC pigtail	27,90	3,45
35.545.1008	MM FC pigtail	58,50	7,95
35.545.1009	MM MTRJ pigtail	63,50	8,45
35.545.1010	MM ST pigtail	36,80	5,65
35.545.2000	PATCH CORD (Unit: Qty., Materials on construction site: 60%) An optical fiber cable with connectors at both ends, which is used for transmission between optical termination sets and active devices or among active devices. The exterior jacket is 3 mm in diameter. Patch cord length is 3 meters and 6 meters. SM and MM optical fiber cables have outer jackets of the same diameter. Type ST-SC-FC-LC-MTRJ connectors are available. Interference loss values should be below 0.3 dB, and the test results shall be submitted to the administration. Any material and labor shall be included.

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.545.6000	Wall Mount Fiber Optical Termination (Unit: Qty., Materials on construction site: 60%): To be used for connecting optical fiber equipment for high-quality and wideband data, audio and video transfer on local area networks, closed circuit television systems, industrial automation systems, telecommunication rooms, and between transfer points with min. 90-meter distance to each other. Locked, with two covers and the additional cassette compartment and the panel connection compartment accessible through separate covers, and optical fiber cables of ITU G 651, 652 and 655 standards, equipped with 4 detachable and (V0) fireproof plastic adapter panels, fireproof plastic dust caps for idle adapter slots, additional modular cassettes made of fireproof plastic with transparent covers, compartments with min. 3 additional cassettes, a fiber distribution panel, and min. 16 fiber capacity each for direct transmissions and terminations; cable inputs on the sides and at the back compatible with cable inputs, outputs and tee connectors and equipped with plastic dust caps compatible with such inputs; and adapters, panels, additional cassettes and additional guards, and available for insertion of simplex and duplex ST, SC, FC, LC, MTRJ optical adapters. Any material and labor shall be included.

35.700.1100	Electronic Type Fully Automated Telephone Exchange: (Unit: Qty.: Materials on construction site: 80%) The supply and installation on site of the telephone exchange manufactured in accordance with the Directive (1999/5/EC) Radio Equipment and Telecommunications Terminal Equipment, introduced to the market with the CE compliance marking, of which specifications are defined in the Technical Specification, comprising fully solid state semi-conductor circuit components, micro-processor controlled, of modular electronic automatic type; the installation of the internal and external subscriber distribution panel, the making of the cable connections coming from the telephone exchange and subscribers; the provision of a special battery (TS 1352-1 EN 60896-11, TS 1352-2 EN 60896-21, TS 1352-3 EN 60896-22) and a rectifier for the exchange, all kinds of small materials, workmanship and the delivery of the telephone exchange in working order. Note: There will be robot operator and voice message system port at a quantity of 15% of the number of external lines for the proposed telephone exchange.

35.700.1200	ISDN PRA CONNECTION (Unit Qty.) It is an external line connection with 2 Mbit/s (30B+D) capacity supporting the characteristics at ITU-T standards associated with the below specified standards and services. Will be 0.3% (three per thousand) of number of the internal lines of the exchange with the item number 890-500 in the project. (For example, it will be maximum 3 units for a telephone exchange with 1000 internal lines) Caller ID (CLIP) ETS 300 092 Caller ID Restriction (CLIR) ETS 300 093 Connected Line ID (COLP) ETS 300 097 Connected Line ID Restriction (COLR) ETS 300 098 Direct Call (DDI) ETS 300 064 Fee setting (AOC-D and E) ETS 300 182 Note: The system shall not contain BRA when PRA is used.	526,00	137,00
35.700.2000	HYBRID IP DIGITAL TELEPHONE EXCHANGE (Unit: Qty.) (Materials on construction site: 80 percent) Shall be manufactured in accordance with Directive (1999/5/EC) Radio Equipment and Telecommunications Terminal Equipment, released to the market with CE compliance marking. The procedures and principles specified in the Regulation on the Protection of Personal Data and Protection of Privacy in the Electronic Communications Sector shall be complied with. The telephone exchange shall fully comply with the recently published books and recommendations (including the country options specified by the service provider company), standards of ITU-T (International Telecommunication Union) and ETSI (European Telecommunication Standards Institution). -The exchange must fully support the state-of-the-art IP (Internet Protocol) and DECT (wireless telephone system) applications.		

Telephone Exchange Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
	<p>IP (Internet protocol) and DECT system features shall be applied on the telephone exchange and then be handed over to the administration. Additionally, DECT telephone sets shall support Caller ID (CLIP), Connected Line ID (COLP), Caller Name ID (CNIP), Dialed Name ID (CONP), dialing by name, leaving message, roaming features and the subscriber will be able to use these features when they want. IP (Internet protocol) and DECT system features shall be applied on the telephone exchange and then be handed over to the administration. -There must be at least two processors in the systems exceeding the capacity of 250 ports and they must be operated as hot stand by (full load sharing). -Systems exceeding the total capacity of 250 ports capacity should be extendable by at least 50%. -At least three (3) persons should be included in the conference in a conference circuit. However, the telephone exchange should support multiple conferences as hardware and software. -The telephone exchange shall support all current ISDN standards and recommendations published by the Information and Communication Technologies Authority and ITU-T. -It shall be a completely modular system as software and hardware. -The system shall be accessed and intervened by modem for malfunctions and system programming. -The exchange must support analogue and digital junction connections (2 and 4-wire E and M, ISDN, Ethernet, R2, etc.) in order to be able to work in networks that are created and can be created. -Together with a rectifier unit, a maintenance-free type dry battery group capable to feed the system for at least 8 hours must be included. - For each 20 analog external lines and 30 digital external lines (PRI) in the system configuration, 1 operator console and headset shall be supplied. -Robot operator and voicemail system: For each 24 analog external lines, a 4 channel capacity robot operator and voice mail system shall be included. -With regard to the extension capacities, all kinds of software and hardware that will serve the subscriber shall be included in the additional capacity and the service quality of the exchange will not decrease. -At least one computer or an equivalent device that perform the same function shall be supplied for remote intervention, maintenance and programming of the exchange. -The main distribution frame (MDF) to be supplied must be two-sided (exchange and building side). Analog TT lines must be protected against high voltage and current. The grounding and power supply of the system shall be established separately and independently. -The system shall be guaranteed for at least two years. -The whole system, including all materials and workmanship, shall be delivered in working order. Robot operator and message recording system: -The system will serve in at least in two languages (Turkish and English). -Message recording time shall be at least 100 hours for systems with a total capacity of up to 250 subscribers and the time will be increased by the same ratio as the increment in the number of subscribers for the systems with more than 250 subscribers. -For the security of personal information, the system will be password protected. -The system will be powered by the exchange. Pricing: - Programs or information for call billing shall be in the format requested by the administration. Note: 1- As the monopoly of Turk Telekom in the field of telecommunication since the beginning of 2004 will be lifted in accordance with the legislation, the decisions of the authority to replace TT shall be valid. 2- It shall be calculated as 1 Analogue or ISDN BRA subscriber = 1 port 1 trunk = 1 port ISDN PRI = 30 ports. Article 1: In the exchange, programs, operating parameters and contact information shall not be affected by power failures. Article 2: Exchange and telephone sets shall ensure the use of the features offered by the Euro-ISDN standards. These features are: Euro-ISDN Service and Features: Call Hold (CH) - Call Hold: This is the feature that the subscriber can make another call by holding the subscriber he/she is talking to. Call Barring (CB) - Outgoing Call Restriction:</p>		
	<p>This is the feature that the subscriber can turn off and on the device for all outgoing calls or for certain calls. Call Waiting (CW) - Call Waiting: This feature is to notify the subscriber of the incoming call with a warning tone when its line is busy. The subscriber either contacts the new caller by placing the existing call on hold or ends the other one by choosing one of the calls. Call Forward-B / U / NR- Call Forwarding: This is the feature of forwarding incoming calls to predetermined numbers. Call forwarding can be done in three different ways; Subscriber Busy - B: Incoming calls are forwarded if the subscriber is busy. All Calls - U: All incoming calls are forwarded. No Response – NR: Incoming calls are forwarded only when there is no answer after a pre-set number of rings. Conference Call: A feature that allows more than two subscribers to communicate Terminal Portability (TP)</p>		

Telephone Exchange Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
	<p>- Terminal Portability: It is a feature that enables the subscriber's device to park and connect to another socket in connection with the same access or resume the communication at the time of communication (connection). Call Transfer (CT) - Call Transfer: A feature for transferring an incoming call to another subscriber. MCID - Capturing Malicious Calls: Centralized detection of disturbing calls. CCBS - Busy Redial: This is the feature of automatic redialing when the called number is busy. Line Hunting - Line Hunting: This feature is used to distribute incoming calls according to a predetermined order. Call Deflection (CD) -: This feature is to divert the call to another terminal device before the call is established (before the called subscriber picks up the phone). MSN-Multiple Subscriber Number: It is the feature of having a separate number for each device to be connected to ISDN line (up to 8 terminals) or using more than one number for a single terminal device. (It is used in ISDN BA Subscription.) DDI-Direct Search: It is the feature that callers can reach the internal subscriber by dialing prefix + subscriber's extension number directly. (Used in ISDN PA Subscription.) Sub Addressing - Sub addressing: It is the feature that the subscribers can define a logical address for their terminal devices. More than one address shall be assigned to the devices connected to the line after the phone number for a single ISDN number. User to signalling-UUS:</p>		
	<p>This is the feature of performing short messaging or scale data transmission using D signaling channel. AOC- Fee Determination: It is a feature of the fees or units related to the call to be displayed during the call setup, the call or at the end of the call. CUG-Closed User Group: It is a special virtual network communication feature for one or more group of users. CLIP- Caller ID: It is a feature of seeing the number of the caller. This is a feature that the subscriber will get. CLIR- Caller ID Restriction: It is possible to prevent caller number from being seen on the opposite side. CLIR Override: This feature is the suppression of the CLIR feature of the caller. COLP- Connected Line ID: It is the feature that the number of the connected terminal can be seen. It can be used especially if the confirmation that the sent information has gone to the right place, such as to a device (fax etc.), can not be received. COLR- Connected Line ID Restriction: It is the feature of preventing the number of the called subscriber from going to the calling party. IP FEATURES: IP Hybrid digital telephone exchange shall support IPv4 and IPv6 protocols. VOIP Protocols: Ethernet interfaces will support the following VoIP protocols: H.323 or SIP (Session Initiation Protocol). VoIP Codecs: The following codecs shall be available for IP subscriber and external line applications. (G.711 (A and µ), G.722, G.723 (5.3 kbps), G.729, G.729A) Echo suppressor: For VoIP calls, echo suppressors will be available at G.168. IP Subscribers: H.323 gatekeeper and SIP registrar shall be available at IP exchange, SIP and H.323 IP subscriber shall be able to connect to the exchange even if there is no static IP address. It shall be possible that the phones (analog and IP), video phones and softphones are connected. IP users (IP telephony etc.) as much as the amount given in the exchange table shall be supported. These IP subscribers and external line licenses shall be delivered. IP subscribers shall be able to connect to the exchange even if there are no static IP addresses. IP external line: The IP exchange shall be able to be registered to H. 323 gatekeeper and SIP registrars. Thus, the exchange can be connected to another exchange by SIP protocol and to the alternative operator (UMTH) via SIP protocol. IP Subscriber and external line programming: IP subscribers as much as the amount given in the exchange table shall be supported and international line programming shall be done easily by using the same maintenance operation program over the internet. PC Console Applications: The digital and analogue subscribers to the IP exchange shall be able to use their phones integrated with a Windows- or a similar software-based computer. From these subscribers' computers, dialing, call answering, holding, diverting, conferencing, phone book calling, missed call monitoring, listening to voicemail shall be able to be done. Line Recording: The exchange shall support the voice recording feature. In case of request of the administration, the voice recordings of the pre-determined analogue internal or external lines shall be accomplished and voice alerting shall be made. WEB Phone (calling from the web): The subscribers of the exchange shall be able to search the web browser without entering codes and passwords. Softphone Applications: Subscriptions shall be given from the exchange by way of a software installed on PCs. Programmable busy panel (the IP, analogue, digital subscribers of the exchange will show the status), speed dial keys, parking keys, transfer key shall be compatible with Windows (all versions) or similar operating systems.</p>		

Telephone Exchange Wiring

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
	Subscriptions shall be given from the exchange by way of a software installed on smart phones. At least 5 softphones shall be provided together with the IP exchange. Internet Protocol: The exchange shall support central IPv4 (Internet Protocol Version 4) and IPv6 (Internet Protocol Version 6) at the same time. Session Initiation Protocol: The switchboard must fully support IP (Internet protocol) subscriber / outline applications and IP DECT (wireless Telephone System) applications running with the state-of-the-art SIP (Session Initiation Protocol) network protocol. IP Applications: SIP-based IP Telephones IP Video Phones, Software Based IP Phones and Smart Mobile (GSM) Phone applications shall be able to be operated on the exchange.

35.700.3100	Type 1 digital telephone set: Telephone sets shall be connected with standard 2 (two) wire and will receive energy from the power plant. The sets must have 12 programmable keys, missed calls list and name dialing feature, hands-free calling feature, LCD screen with at least 80 characters, caller ID and name ID features, date and time information on the screen, mute button (the key keeping the sound from going to the opposite side). The sets (at least 2B+D) shall support ISDN features	546,00	61,00
35.700.3105	Type 2 digital telephone set: Telephone sets shall be connected with standard 2 (two) wire and will receive energy from the power plant. The sets must have 5 programmable keys, hands-free calling feature, LCD screen with at least 40 characters, caller ID and name ID features, date and time information on the screen, mute button (the key keeping the sound from going to the opposite side). The sets (at least 2B+D) shall support ISDN features Optional features for the sets - There must be a redial button. -The sets must be able to send short messages to each other. -The sets must be capable to keep 30 calls in memory. (10 missed calls, 10 incoming calls, 10 calls made) - Ringtone and volume settings must be done on the sets. Sets must keep 100 names and numbers in the address book.	345,00	20,10
35.700.3110	Type 1 IP telephone set: IP phones shall be able to be connected to IP exchange. These video IP phones will be equipped with at least two Ethernet ports, an LCD display, a programmable busy board (shall display whether the IP, analogue and digital subscribers of the exchange and the trunks are busy), speed dial keys, parking keys, transfer key, monitoring features.	728,00	79,50
35.700.3115	Type 2 IP telephone set: IP phones shall be able to be connected to IP exchange. IP phones shall be equipped with at least two Ethernet ports, an LCD display, a programmable busy board (shall display whether the IP, analogue and digital subscribers of the exchange are busy), speed dial keys, parking keys, transfer key features.	430,00	27,70

Lift Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.710.1000	<p>NORMAL ELEVATOR INSTALLATION (in compliance with TS EN 81-20 and TS EN 81-50)</p> <p>Compliance with the standards TS EN 81-20 and TS EN 81-50 (TS EN 81-1+A3 shall also be acceptable until the date annulment date of the aforementioned standards) for General and Safety Rules, TS EN 12016 for electromagnetic compatibility, and TS ISO 4190-1 and TS ISO 8238 4190-2 for placement and dimensions shall be sought. Delivery in working order of the elevator installation with door leaves made of 1.25-mm-thick DKP sheet metal; fully automatic floor doors (with two telescopic leaves, opening from the center to the sides) zinc phosphatized by spraying method in surface cleaning baths, then painted in a color requested by the administration by electrostatic method and oven-dried, and certified for compliance with CE standards; door mechanisms with the same specifications and with drive engines, which shall be installed on the cabinet and driven with a mechanism (chain, belt, lever, etc.) to operate in synchronization with the floor doors; locking mechanisms, pulleys, roller guides, rails, belts, chains, levers and electronic cards CE certified; fully automatic cabinet door (two-leaf, telescopic, opening from the center to the sides); emergency uninterruptible power supply with Ni-Cd or dry battery which shall move the cabinet to the nearest floor and open the doors in case of power outage; light curtain equal to the inner height of the door, which contains multiple beams (min. 94 beams) to protect the occupants or loads entering the cabinet (full-height photocell); frequency inverter that adjusts the speed of the motor to prevent the impacts while the elevator starts to move or stops and to adjust the position of the cabinet precisely; a tacho generator or encoder that constantly measures the motor speed; a filter that eliminates the disturbances in the system; variable voltage/variable frequency (vvvf) drive system that is made up of a regulated feedback and resistance unit; cumulative control feature, including material and labor (except the group controller equipment).</p> <p>NOTE:</p> <p>The elevator installation shall be manufactured in compliance with the Directive 2014/33/EU for Lifts and Safety Components for Lifts, and released with the CE compliance marking.</p> <p>The fully automatic floor doors shall fulfill the specifications provided in the standard TS EN 81-58 and fire-resistant as per the Fire Safety Directive. The fire-resistant doors shall be certified to resist fire for min. 60 minutes by an accredited organization.</p> <p>The cabinet interior, and fully automatic cabinet and floor doors shall be paneled with (0.80-mm-thick) satin stainless steel sheets.</p>		
35.710.1100	<p>Class I elevators (The elevators designed for carrying passengers). Variable-speed, Capacity: 630 kg, Unit: Qty.</p> <p>Capacity (rated capacity): 630 kg, Pit (cross section) size: 2000 x 2100 mm (width x depth), Cabinet cross-sectional size: 1100 x 1400 mm (width x depth), Where the dimensions specified in TS ISO 4190-1 cannot be fulfilled, the area of the cabinet shall be 1.45 - 1.66 m² as per TS EN 81-20. Entrance width: 900 mm, Entrance height: min. 2000 mm as per TS EN 81-20.</p> <p>Note: The cabinet interior shall be modified for use by the handicapped. The article 45 of the Planned Areas Type Zoning Regulation shall be taken into consideration for door width and cabinet area.</p>

35.720.1000	<p>ELEVATOR INSTALLATION WITHOUT MACHINE ROOM (in compliance with TS EN 81-20 and TS EN 81-50)</p> <p>Compliance with the standards TS EN 81-20 and TS EN 81-50 (TS EN 81-1+A3 shall also be acceptable until the date annulment date of the aforementioned standards) for General and Safety Rules, TS EN 12016 for electromagnetic compatibility, and TS ISO 4190-1 and TS ISO 8238 4190-2 for placement and dimensions shall be sought. Delivery in working order of the elevator installation without engine room and with door leaves made of 1.25-mm-thick DKP sheet metal; fully automatic floor doors (with two telescopic leaves, opening from the center to the sides) zinc phosphatized by spraying method in surface cleaning baths, then painted in a color requested by the administration by electrostatic method and oven-dried, and certified for compliance with CE standards; door mechanisms with the same specifications and with drive engines, which shall be installed on the cabinet and driven with a mechanism (chain, belt, lever, etc.) to operate in synchronization with the floor doors; locking mechanisms, pulleys, roller guides, rails, belts, chains, levers and electronic cards CE certified; fully automatic cabinet door (two-leaf, telescopic, opening from the center to the sides); emergency uninterruptible power supply with Ni-Cd or dry battery which shall move the cabinet to the nearest floor and open the doors in case of power outage; light curtain equal to the inner height of the door, which contains multiple beams (min. 94 beams) to protect the occupants or loads entering the cabinet (full-height photocell); frequency inverter that adjusts the speed of the motor to prevent the impacts while the elevator starts to move or stops and to adjust the position of the cabinet precisely; a tachogenerator or encoder that constantly measures the motor speed; a filter that eliminates the disturbances in the system; variable voltage/variable frequency (vrvf) drive system that is made up of a regulated feedback and resistance unit; cumulative control feature, including material and labor (except the group controller equipment). NOTE: The elevator installation shall be manufactured in compliance with the Directive 2014/33/EU for Lifts and Safety Components for Lifts, and released with the CE compliance marking. The fully automatic floor doors shall fulfill the specifications provided in the standard TS EN 81-58 and fire-resistant as per the Fire Safety Directive. The fire-resistant doors shall be certified to resist fire for min. 60 minutes by an accredited organization. The cabinet interior, and fully automatic cabinet and floor doors shall be paneled with (0.80 mm thick) satinized stainless steel sheet.</p>

Diesel Electrode Groups and Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.740.1000	<p>DIESEL ELECTRODE GROUP INSTALLATION: (Materials on construction site: 80%)</p> <p>Performing the feeder and control cables, cable and pipe ducts, supplying, installation and delivery at the work site in working condition of the 5 mm checkered plate duct covers, cable heads and attachment material, installation material, spare and other materials required on the technical specification and every kind of small materials that are manufactured in accordance with the Turkish standards as specified in the general provisions and descriptions section of the Unit Price book, Directive (2006/42/EC) Machinery, Directive (2000/14/EC) Noise Emission by Outdoor Equipment, 2014/35/EU Low Voltage Directive (LVD), released to the market with CE marking, at a power that can provide the required generator power at the specification and at the sea level as written in the Technical specifications in 24/24 hour continuous operation and full load, at a cross-section that complies with the power between two or four timed diesel engine and specification, the first movement and cooling appliance, 400/231 volt 50 Hz alternator that is coupled with this and the equipment, automatic activation appliance, board with devices as specified on the technical specification, alternator and its board. Note: 1-±10% modification is acceptable in the alternator power that is specified as kVA below. The price to be added or removed for each changed kVA will be found with the interpolation by using certain lower and upper values. The price of the powers in the residual location is determined by interpolation. 2- The prices for Electrode group, Transfer board (surface-mounted sheet board), Dry-type protective contactor, auxiliary contactor, time delay relay, Knife-type fuse (on the transfer board) for the grid inlet and generator flow, signal lamp, cable that is specified on the project based on power and distance (underground cable junction box and underground cable duct) Horn alarm honk (for exciting any transaction that is done on the control unit) and cable changing based on power and distance, cable junction box will be individually paid for the relevant items. Note: The automatic switching equipment included in the price of the diesel electrode group will comply with the following definition. Supply, installation and delivery in working condition of the automatic activation device (control unit) comprising of electronic circuits that will give light signals in the event of power outage, voltage dropping below or rising above a certain value, and when desired that will activate and deactivate the diesel electrode group in specific circumstances promptly or after a certain amount of time, that will give audible and light excitation in the event of a failure or malfunction, that will not be affected by the parallel operation of two groups, that will be able to operate automatically and manually depending on the needs, that can be adjusted in a way to disable the diesel automatically by giving audible and light excitation in case of a drop in the oil pressure and excessive temperature rise or decrease in the cooling water or temperature rise in the cylinder head, that can make 2 or 5 start-ups, that can determine the operation or non-operation, that will have light signal and the mechanism to lock the system in case of malfunction, that will perform emergency shutdown when required, that will stop the system and give light signal in case of an interruption in any of the generator phases, and in case of rising and decreasing engine speed, that will disconnect the load with a light signal in the event of overloading, that will give light signal in the event of feedstock failure, that will not trigger the diesel unnecessarily, that will operate every type of generators. NOTE: Other materials to be used will be paid separately from the relevant unit prices.</p>

35.740.5000	SYNCHRONIZATION ASSEMBLY: (Unit: Qty.: Materials on construction site: 80%)		
35.740.5100	Hand-Operated (Manual): Delivery of every kind of small materials including labor in working condition provided to contain plug (button) or selector cam switch, locking lever or console that will ensure parallel connection of two or more groups and that will ensure the selection of the generator to switch on dual voltmeter, dual frequency meter, synchronoscope, zero voltmeter, necessary current and voltage measurement transformers.	5.040,00	308,00
35.740.5200	Automatic: The automatic synchronization device, two Wattmeter (with Wattmetric relay), zero voltmeter and other specifications are same as with B.F.T. 35.740.5100.	6.560,00	492,00
35.740.5300	Synchronization assembly 1250 - 2000 kVA (Automatic) Note: Diesel, its original coupled alternator, dashboard, automatic switch-on assembly and synchronization assembly will be the original devices specified in the manufacturer company's package insert.	7.180,00	556,00

Diesel Electrogen Groups and Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.740.5400	Sound insulation vessel: (unit: qty., materials on construction site: 60%) The material will be 9-10 cm wall thickness, flat cowl outer part, and machined perforated sheet interior. The gap between these two sheets will be filled and compressed with foam and A class non-combustible glass wool fiber layer in accordance with TS EN 13501-1 + A1. Thanks to the special wall covered with perforated sheet, the sound will pass through these holes and be absorbed. These special walls will be inserted inside hood sections transversely two or three pieces at a time, and the sound will be absorbed during the air circulation. Doors will be placed in a way to carry out the maintenance of the machinery from all directions of the cabinet. Suitable gaskets will be installed to prevent the leakage of sound, when the doors are closed. Furthermore, the doors will be made of lockable type. After shutting the sound in the engine as the noise will only remain in the exhaust, exhausts with sound choke chambers will be used. The dimensions will grow based on the power of the generator, the cabinets will be scaled accordingly. Including every kind fasteners, delivery of every kind small materials including labors in working condition

LIGHTNING PROTECTION INSTALLATION UNIT PRICES AND DEFINITIONS

2019

Lightning Protection Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.750.1000	LIGHTNING PROTECTION SYSTEM (Materials on construction site: 60%) (TS EN 62305-1/2/4, TS EN 62561-1, TS EN 62561-2)		
35.750.1100	Metallic arrester tip (Unit: Qty.) Supply of a 800-mm-long (40-mm part threaded) arrester tip Ø20 mm in diameter made of solid copper with a tapered end, and a roof-top fastener (as in the project no. EL-2), connection to the roof-top connectors using the bolted terminal blocks on the copper fastener, screwing the terminal block on the wooden roof-top wedge, and delivery in working order, including any small material and labor.	183,00	21,70
35.750.1500	Active arrester tip (Unit: Qty.) Supply, transportation, installation on a post, connection of drop wires, and delivery in working order, including any small material and labor, of an active lightning arrester head made of non-corrosive materials or materials that bear such characteristics (e.g. chrome-plated copper, chromium-nickel, stainless steel, etc.), resistant to the highest wind speed, in compliance with the TS 13709/T1, (NFC17-102) and (UNE 21.186) standards, CE-certified, and guaranteed for operation for min. 15 years under the approval of the Ministry of Science, Industry and Technology, with an early stream excitation system, high corrosive resistance, min. IP 65 protection, and min. 15 µs ΔT excitation time, which can operate smoothly at -40°C to +120°C, resist a 100 kA lightning test current class H as per TS EN 50164-1 /TS EN 62561-1, as described in the relevant technical specifications. NOTE: 1- Type tests of active lightning rod heads shall be conducted by a laboratory accredited by TURKAK or an international organization, and submitted to the Administration. 2- A document certifying that the IP 65 protection class test was conducted by an organization accredited by TURKAK or an International organization shall be submitted to the Administration.		
35.750.1501	Mean excitation way DL = 15 to 25 m.	2.700,00	159,00
35.750.1502	Mean excitation way DL = 30 to 40 m.	2.940,00	159,00
35.750.1503	Mean excitation way DL = 40 to 50 m.	3.050,00	159,00
35.750.1504	Mean excitation way DL = 60 m.	3.230,00	159,00
35.750.1600	Roof-top post (For active arrester tip) (Unit: Qty., Materials on construction site: 60%) Supply of a 6-meter post made of 80-mm galvanized pipe (1 size), including any accessory material related to the drop wire and securing of the post, and installation of the post without damaging the roof, including the fasteners along the post. If the length of the post exceeds 6 meters, the part exceeding 6 meters shall be charged per the relevant unit price.	442,00	146,00
35.750.1650	Lightning counter (unit: Qty., materials on construction site: 60%) Lightning counter with indicator, without power supply, including connectors, which shall count maximum 100-kA lightning pulses flowing from the drop wire to the earth, hence make it easier to monitor how many times the system has been exposed to lightning discharges, be in compliance with the standards, and installed serially to the test terminal block or to the drop wire 2 m above the ground within the lightning protection systems.	655,00	4,60
35.750.1700	Active lightning rod test device (unit: qty., materials on construction site: 60%) A portable device designed to test the operation of the active lightning rod, indicating whether it operates by the LEDs on the device.	733,00	5,00

Lightning Protection Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.750.2000	Roof surrounding and drop wires (Unit: m, Materials on construction site: 60%) Installation of roof and conductor wiring as described in the specifications, using bare electrolytic solid copper conductors, taking measures against corrosion at points of connection to the arrester tip or earth electrode with pointed or threaded pronged wire clips made of bronze cast or similar materials, silver soldering the attachments of conductors where necessary, including test terminal, any small material and labor.		
35.750.2001	50-mm ² electrolytic copper conductor	38,40	7,55
35.750.2002	25-mm ² electrolytic copper conductor	20,30	6,90
35.750.2003	Electrolytic copper strip sized 3 x 25 or 4 x 20 mm for drop wire.	43,90	7,55
35.750.3000	Installation of surrounding wires around the building (Unit: m, Materials on construction site: 60%) Installing surrounding wires for the building using the conductors, making a 60 to 80-cm-deep canal around the building, laying the conductor and filling the canal back, connecting to the electrodes with rivets or by welding, including any small material and labor.		
35.750.3001	50-mm ² solid copper	40,50	9,60
35.750.3002	30 x 3.5-mm galvanized steel flat bars as described in the project design,	19,30	6,90
35.750.4000	Earth electrode (Materials on construction site: 60%)		
35.750.4001	Earth electrode (Plate) electrolytic copper (Unit: Qty.) Supply of 0.5-m ² (0.70 x 0.70 m), 1.5-mm-thick copper sheets to the work site, preparation of pits in any type of soil, burial of the copper sheets, including any material and labor.	337,00	41,40
35.750.4002	Earth electrode (bar) electrolytic copper (Unit: Qty.) Supply to the work site of a min 3.5-meter electrolytic copper bar in compliance with the TS 435/T1 standard, Ø20 mm in diameter, screw-mounting of a tapered head on one end to facilitate driving the bar into the ground, supply of the attachment with 4 cm threads if the bar is made up of two pieces, burying the bar min. 60 cm in the ground, connection to the drop conductors and surrounding conductors of the building by silver soldering or special bronze cast retaining clamps, including any small material and labor. Note: If the ground is rocky, appropriate soil shall be sought around that area.	592,00	77,00
35.750.4003	Conductor protecting pipe (Unit: Qty.) Laying drop wires through 3-m, 20-mm galvanized iron pipe with the 0.5-m within the earth (the part of pipe exceeding 3 m shall be paid separately); Insulation of the conductor within the pipe with PVC or a similar insulator to prevent the part of the conductor within the pipe from contacting the pipe and attachment to the pipe at a point to prevent its operation as a transformer in case of lightning strike; test terminal made of non-corrosive material; supply, installation and delivery including any small material and labor of all materials.	115,00	25,30
35.750.4500	Silver soldering (Copper brazed) Oxygen welding of 1 x 50 mm ² copper conductor to F 20 mm earthing electrode with low-heat welding wire (copper welding wire)	134,00	25,30

Lightning Protection Installation

ITEM NO	NATURE OF WORK	UNIT PRICE INCLUDING INSTALLATION (TRY)	INSTALLATION FEE TRY (TRY)
35.750.5000	Exothermic welding attachment (copper to copper), (copper to aluminum), (copper to iron) (Unit: Qty.) Attachment of conductors of any section to each other by exothermic reaction of copper oxide powder, including pots, pot pliers, scrapers, brushes, lighters, any material and labor.		
35.750.5001	Up to 32 g welding powder	140,00	44,90
35.750.5002	Up to 65 g welding powder	154,00	44,90
35.750.5003	Up to 90 g welding powder	171,00	44,90
35.750.5004	Up to 115 g welding powder	181,00	44,90
35.750.5005	Up to 150 g welding powder	199,00	44,90
35.750.5006	Up to 200 g welding powder	229,00	44,90
35.750.5007	Up to 250 g welding powder	243,00	44,90
35.750.5500	Chemical to reduce earthing resistance (Unit: kg) Supply, transportation to the work site, and application around the conductors, of the aluminum silicate and carbon-based chemical to be used to reduce the earthing resistance below the values given in the specifications if it is higher.	61,00	5,00
